

SUBJECT: INSTALLATION OF STREET LIGHTS ALONG NORTH PLANO STREET AND SOUTH WISCONSIN STREET

SOURCE: Public Works Department - Engineering Division

COMMENT: Staff received requests from the public to install street lights along North Plano Street from Henderson Avenue to Mulberry Avenue, and along South Wisconsin Street in the vicinity of the 1100 block.

Plano Street is an arterial street and lacks street lights between Henderson Avenue and Mulberry Avenue. Staff deems it fitting that this arterial corridor receive lights.

Wisconsin Street, south of State Route 190 is approximately 3/8th of a mile long terminating at the Poplar Ditch. The request for one street light was made by the property owner who lives near the Poplar Ditch. Staff's field review at dusk of the South Wisconsin Street corridor convinced staff that it would be appropriate to install lights along the entire length of South Wisconsin Street.

Staff will present a work order to Edison to install 21 street lights as shown on the attached plans. The annual cost per street light is \$108 for a total annual cost of \$2,268. Special GasTax monies is the funding source.

RECOMMENDATION: None. Informational only.
