

COUNCIL AGENDA: NOVEMBER 18, 2014

SUBJECT: AUTHORIZATION TO ADVERTISE FOR BIDS – TOMAH STORM DRAIN PROJECT

SOURCE: Public Works Department - Engineering Division

COMMENT: Plans and Project Manual have been prepared for the Tomah Storm Drain Project. The project includes construction of approximately 398 lineal feet of storm drain piping, connection to existing storm drain manhole and drop inlets, construction of a new storm drain manhole, trench patching and related appurtenances.

The Plans and Project Manual have been completed and are available in Pete V. McCracken Conference Room for Council's review.

The estimate of probable cost for the entire project is \$67,880 with \$6,788 required for the construction contingency (10%). An additional \$3,394 (5%) is required for construction management, quality control and inspection. The total estimated cost associated with the project is \$78,062. An Estimate of Probable Cost is attached for Council's review.

A major portion of the funding is provided by developer impact fees and was approved in the 2014/2015 Annual Budget for the Tomah Avenue Storm Drain Project. A budget augmentation of \$30,000 in developer impact fees is required to fully fund the project.

RECOMMENDATION: That City Council:

1. Approve staff's recommended plans and project manual;
2. Authorize staff to advertise for bids on the project; and
3. Authorize the Finance Director to appropriate Developer Impact Fee Funds in the amount of \$30,000.
