## ***SEWER REPAIRS***

---

**\*\* A permit is required to repair a sewer line or install a cleanout \*\***

Provide a copy of the Sewer Repair Diagram (attached below) for the property indicating the location and distance of the repair work with the permit application. **If at any time during the repair work, you excavate in the parkway, a \$1,000 cash bond must be posted immediately with the Building Department.**

The following procedure will apply for all sewer repair inspections:

1. Pipe for sewer repair work shall be SDR 26 - 4" or 6", unless next to a water service the sewer pipe shall be SCH 40 PVC 4" or 6".
2. Pipe to be bedded in crushed stone (1/4"-3/4") CA 6 or grade 9.
3. Please call our office at 847-459-2530 to schedule an underground inspection. Calls must be received by 12 pm (noon) to be added to the following business day. Calls received after 12 pm (noon) will be added 2 business days. No same-day inspections; the inspection will be between 10 am – 2 pm.
4. If work in the Right-of-Way is being done, Engineering Department **MUST** be notified at 847-459-2523.

Due to the uniqueness of each installation, additional information may be required. It is the homeowner's responsibility to ensure that a permit has been secured before commencing any work. This information is being provided to help guide you through the permit process.
