There was discussion on the newly passed Safe-T-Act. The general consensus was that there might be a reduction in prison population initially, but that the population would stay about the same as in previous years.

During the zoom meeting with Wold an overview of the process was discussed. Along with the committee being involved it was discussed to try to get some community involvement and start the conversation on what is being looked at. Wold is going to send an information request on judicial data. They also requested to pick up a copy of blueprints. Sheriff Kloeping was requested to get some dates arranged in 3-4 weeks for Wold to meet with all involved in the prison and judicial system.

After the zoom meeting there was brief discussion on thoughts and concerns. After discussing community involvement it was decided to inform the mayors of what was being discussed. Also there would be further presentations given to groups in the future.
