

BOB OOTEN**Sanitary Engineer**

I have over 55 years of Technical/financial experience in sewer and trash collection with a BS in Civil Engineering and a Master degree in Sanitary/Environments Engineering. As a CMSD Board member I have and will continue to develop fiscally conservative policies/practices that ensure cost-effective, safe and public protecting services.

I provide the technical background to the Board that

- Eliminated the need for an 11 million-dollar Fairview Avenue trunk sewer project

- Got an activist lawsuit dropped that saved over \$100,000

- Improved staff productivity by eliminating 75-time consuming maintenance tasks

- Developed life extending infrastructure processes that reduced rehab/replacement costs

I have the time, energy and technical background to be an effective Board member. My wife and I are 38-year Costa Mesa residents. I am active in local community service projects.
