Whole-House Water Filter after
One Month Use
Oaklawn Subdivision

Complaints with the Town Water Department and the State Dept of Health Office of Drinking Water have been documented since 2013 regarding these issues. It is time to be taken seriously and to get the issue corrected.

Day 1 after filter instalation

Day2

Day 3

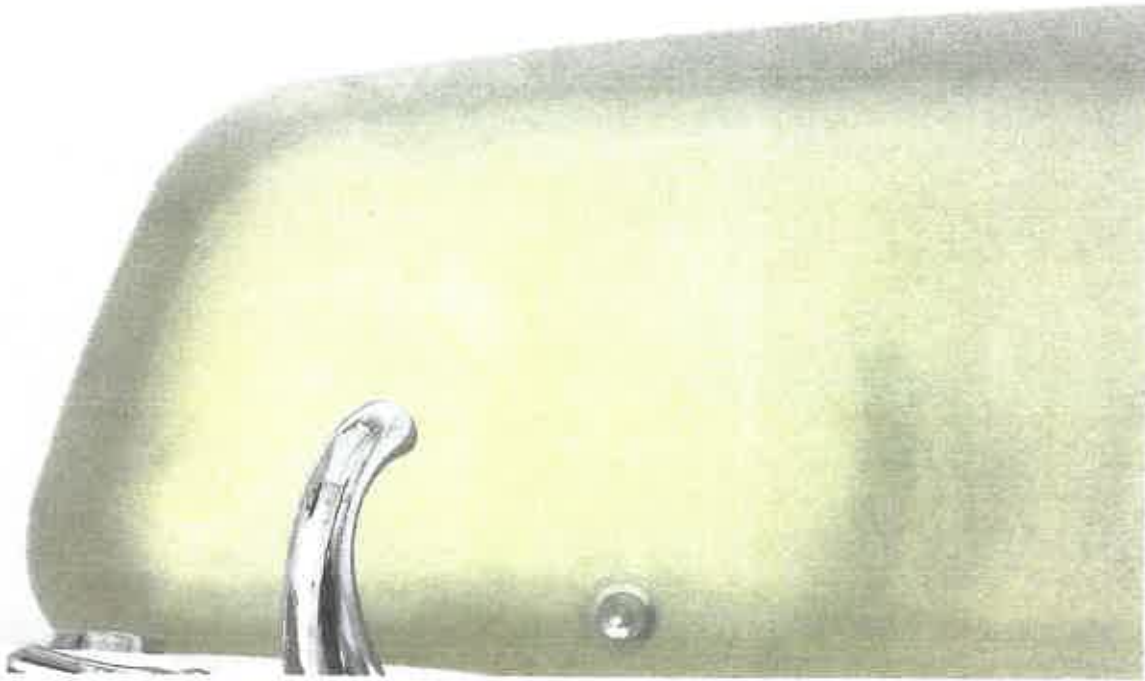

Day4

Day 6

For years we didn't think we had issues with our pipes then our fridge door wouldn't dispense water, our washer some times put rust color stains on our clothes and our faucets started clogging??

Before- are our fixtures, hot water heater or our pipes rusting?

After- No this was all caused by sediment in our pipes

Cardinal View Homeowner Association, Inc.

C/O Blackwood Management, Inc. PO Box 1866, Fredericksburg, VA 22402

Phone: (540) 710-6800 Fax: (540) 710-6743

August 11, 2018

Town of Culpeper
Mayor and Council Members

Mayor and Council Members:

On behalf of the Cardinal View Homeowners Association I wish to raise the issue of water quality in our community. Many of our owners and residents have expressed concerns about the color, smell, and chemical/mineral content of our public water supply, and over three quarters of them have signed the petition detailing these concerns to be presented at your meeting. I urge you to investigate these concerns and correct the issues with all haste.

Sincerely,

A handwritten signature in dark ink, appearing to read 'A. Gunkel', written in a cursive style.

Alvin Gunkel,
President, Cardinal View HOA

We, the undersigned residents, are petitioning the Town of Culpeper to have outside, Independent sources complete the following:

1. Independent town-wide fire flow study (especially in the older infrastructure areas of the water distribution system);
2. A comprehensive financial rate analysis to identify and prioritize funding for water distribution system repairs and replacement; funding sources, and justification for rate setting, and
3. A comprehensive water system study (to include safety/quality of water, water plant and well water quality and operations, and condition of the piping throughout the distribution based on age by pinpointing homes, businesses and areas with issues, a plan for repair/replacement as needed, etc.).

We, the undersigned residents, are petitioning the Town of Culpeper to have outside, independent sources complete the following:

1. Independent town-wide fire flow study (especially in the older infrastructure areas of the water distribution system);
2. A comprehensive financial rate analysis to identify and prioritize funding for water distribution system repairs and replacement; funding sources, and justification for rate setting, and
3. A comprehensive water system study (to include safety/quality of water, water plant and well water quality and operations, and condition of the piping throughout the distribution based on age by pinpointing homes, businesses and areas with issues, a plan for repair/replacement as needed, etc.).

6/30

We, the undersigned residents, are petitioning the Town of Culpeper to have outside, independent sources complete the following:

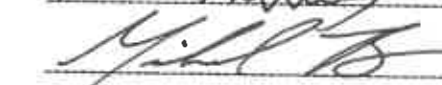

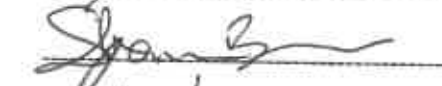

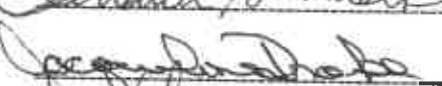

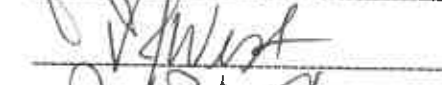

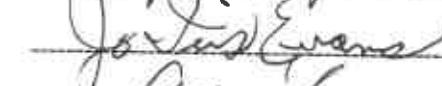

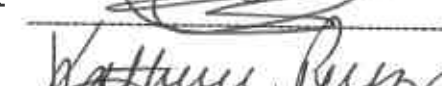

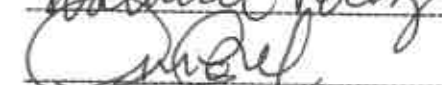

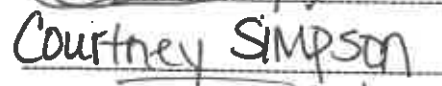

1. Independent town-wide fire flow study (especially in the older infrastructure areas of the water distribution system);
2. A comprehensive financial rate analysis to identify and prioritize funding for water distribution system repairs and replacement; funding sources, and justification for rate setting, and
3. A comprehensive water system study (to include safety/quality of water, water plant and well water quality and operations, and condition of the piping throughout the distribution based on age by pinpointing homes, businesses and areas with issues, a plan for repair/replacement as needed, etc.).
