United States®
Census
2020

The 2020 Census is around the corner — and it will shape our future for years to come.

Once every ten years, the United States Census takes a count of every person in the United States. The taking of the census is mandated by the United States Constitution and has occurred every 10 years since 1790. The census is critical for determining each state's representation in Congress and the distribution of more than \$675 billion in federal funding for vital programs like public education, public housing, roads and bridges, and much more. Because so much is at stake, it's critical that our residents stand up and be counted in the 2020 Census.
