

Take A Water Journey. . .

Your water is always there when you need it . . . just turn on the faucet! But how did it get to your faucet and get clean enough to drink?

That's where Des Moines Water Works comes in. We make sure that ALL the water coming from your faucet is safe to drink!

Take a water journey through the treatment process on the next 6 pages. As you solve the puzzles, you will learn how your water is treated.
