CITY of EASTPOINTE EXCAVATION GUIDE LINES

These guidelines are to assist contractor/homeowner doing sewer repair work in the street. These are just basic needs for repairs out in the street. It is the contractor/homeowner responsibility to keep excavated site level with the street till cement repairs are made.

STREET REPLACEMENT COSTS

1. \$800.00 per panel – minimum charge 2 panels
2. Sidewalk cost is \$100.00/square minimum charge \$300.00
3. Alley replacement is \$1500.00

ITEMS NEEDED

1. Street/sidewalk replacement fees from Eastpointe Water and Sewer Department
2. Permit from Eastpointe Building Department. \$25,000 Surety Bond with city named on policy.
3. Excavating equipment (Excavator, backhoe, front end load, bobcat, and trucks)
4. All hand tools, cutters and other essential tools needed for repairs
5. Barricades (Lighted if going in to night time hours)
6. Road Closed signs two (2) or more
7. Work lights (For work that goes after sunset)
8. Sand (For filling in trench or hole/s) leaving 1" to 2" for cold patch
9. Rock (crushed concrete) 2" to 3" size (For wet hole/s)
10. Asphalt patch 1" to 2" on top of back fill
11. Fencing for trench or hole if it is to be left open over night

MATERIAL NEEDS

1. Schedule 40 PVC pipe 6"
2. Primer and glue
3. Masonry cement
4. Block, brick, and tar
5. Boot or saddle (optional)

SEWER REPAIR PROCEDURES

- ❖ Road closures should be avoided if possible
- ❖ Road closed signs must be in place if road is impassable. Police and Fire Departments are to be notified by contractor/homeowner when any road is closed. Signs must be placed at intersections, not at job site.
- ❖ Any trench left open and unattended for any reason must be properly secured with cones, lighted barricades, snow fence, and caution tape as needed.
- ❖ Proper shoring for the excavation is the contractor/homeowner responsibility.
- ❖ All broken concrete must be hauled away; the City does not take concrete.
- ❖ Schedule 40 PVC is to be used. Pipe cannot protrude into main more than one inch.
- ❖ Excavations in the street and sidewalk area are to be backfilled with sand or sand/gravel mix and compacted. Then topped with one to two inches of asphalt patch.
- ❖ The temporary asphalt patch on the sidewalk and street is to be maintained by the contractor/ homeowner until such time as the City can cement the job.
- ❖ All restorations except concrete replacement of sidewalk and street areas are the sole responsibility of the homeowner/contractor.
- ❖ All debris must be swept clean in the street and sidewalk areas.

**** Before backfilling call Eastpointe Water and Sewer Department for inspection of sewer repair the phone number is (586) 445-3661 x2219. ****
Inspections between the hours of 7:00am – 3:00pm
After hours (evening) and Saturday charge \$180.00
Sunday and Holiday charge \$300.00
