**2014 Fiscal report of the INDUSTRIAL DEVELOPMENT CORPORATION OF
THE PORT OF EVERETT.**

The Industrial Development Corporation of the Port of Everett (Corporation), a public corporation, was established in March of 1982, and it is authorized to facilitate the issuance of tax-exempt nonrecourse revenue bonds to assist in the development of industrial facilities within the geographic boundaries of the Port.

Revenue bonds issued by the Corporation are payable from revenues derived as a result of the industrial development facilities funded by the revenue bonds. The bonds are considered to be “conduit bonds” and as such are not a liability, a contingent liability of the Port, nor a lien on any of its properties or revenues other than upon the industrial facilities for which they were issued.

The Port’s Board of Commissioners serves as the governing board of the Corporation. The Corporation’s revenues are based upon application fees received from entities that anticipate, or have received, funding for their industrial projects from the issuance of industrial revenue bonds.

The application fees cover estimated future costs of the Corporation and consist of directly charged expenses of attorneys and auditors and non-billed administrative and overhead costs of the Port of Everett. The account balances and transactions are included as a blended unit within the Port’s financial statements.

Upon dissolution of the Industrial Development Corporation of the Port of Everett, all unspent application fees will be paid to the Port of Everett.

At December 31, 2014, no bonds issued through the Corporation were outstanding. During the year the Corporation’s only Revenues were interest earnings of \$72. The Corporation spent \$14,000 during the year to support the Advanced Composite Manufacturing Institute leaving the Corporation with a December 31, 2014 cash balance of \$27,801.
