Restores healthy land and water from our City's mill town past; Port works in partnership with legacy parties to clean up sites

Puget Sound Initiative (2006) identified 215 acres to be cleaned up, all either complete or under cleanup action now

Facilitated more than \$33M in cleanup since early 2000s; \$25M at destination waterfront

For every \$1 spent on environmental cleanup, \$7 in economic output is generated

In the next few years, the Port will double its environmental cleanup investment on the waterfront

WHY CLEANUPS MATTER
