RE: 2023
Fillmore County
Feedlot Program Year-End Review

Dear Dallas Dornink:

On April 5, 2024, the Minnesota Pollution Control Agency (MPCA) completed a year-end review of the Fillmore County (County) delegated feedlot program for the period of January 1, 2023, through December 31, 2023. Based upon the review, the MPCA has determined that the County satisfactorily met 17 out of an applicable 17 or 100 percent of non-inspection minimum program requirements (MPRs). The County also satisfactorily conducted 47 inspections of the 568 feedlots required to be registered for an inspection rate of 8.27 percent.

In addition, the MPCA has reviewed the County's 2022-2023 Delegation Agreement and Work Plan by comparing it to the work the county has done. No modifications to the Delegation Agreement Work Plan have been proposed at this time.

The MPCA commends the County for its work in 2023**.** If you have any questions regarding the review, please do not hesitate to contact me at 507.424.9132 or peter.kuisle@state.mn.us.

Sincerely,

Peter Kuisle

Additional Performance Credit Calculations and Supplemental Information

Describe below the progress made in meeting your program year work plan inspection goals. You must provide quantitative results for each compliance inspection and land application goal listed in your work plan.

The site inspections completed in 2023 have shown better success in meeting the county's inspection goals compared to 2022. The priority numbers were better aligned with DAWP than compared to the previous year. The county feedlot program plans clean up any non-compliance sites and get them back into compliance, especially those lacking MMP and land application records. The county would also plans to complete 50% of the multiple Tempo sites in 2024 through inspections and/or updated registrations. There was a fair amount of new construction in the county this past year with two CSF permits and eight Notice of Construction/Expansion permits.

RE: Township Zoning
Our File No. 5023-0001

Dear Cristal,

You requested that I provide a brief summary of the law involving the interplay between county and township zoning. We can use this document to guide our discussion with the County Board regarding this topic on the 23rd. Please distribute it to Board Members.

As you know, under Minnesota Law counties have the authority to adopt official controls, including zoning ordinances, and apply them to all areas in the county, except within city limits (although a city and a county may agree to the contrary.)

County zoning ordinances thus extend to townships. However, townships have authority to adopt their own zoning ordinances. Township zoning ordinances must not be inconsistent with or less restrictive than a county zoning ordinance. Minn. Stat. § 394.33.

There are two different approaches or views on how county and township ordinances are administered in a situation where a town has adopted an ordinance regulating the same subject matter. Under one approach, the county steps back and lets the township fully assume the regulatory role. Consequently, whether the township has acted properly (or not) in managing a particular application is the township's issue.

Under a second alternate approach, counties take the position that, when a township adopts land use regulations, an applicant must not only obtain township approval, but that of the county as well. Minnesota counties are split 50/50 on the approaches they take.

I understand you are having some issues with applications that may comply with one jurisdiction's zoning ordinances/requirements, but not the other. I suggest we work through those issues with the County Board and determine where the Board would like to land in terms of alternatives. That may guide us in determining whether practice or ordinance changes are needed.

Very Truly Yours,

/s/ Jay T. Squires
