The septic system designed for this site contains a holding tank and therefore requires an ongoing pumping contact and monitoring plan. A copy of the written pumping contract and monitoring plan must be submitted to the Local Unit of Government along with the SSTS Permit Application for the holding tank and notification must be made to the Local Unit of Government upon termination of that contract.

**It is the property owner's responsibility to hire a person licensed by the Minnesota Pollution Control Agency as a Maintainer** to perform this work, and for that Licensed Maintainer to submit an annual report to the Local Unit of Government on tanks that have been pumped. It is the homeowner's responsibility to get the holding tank pumped and to send a copy of the receipt as proof of pumping to the Fillmore County Zoning Office. Tanks under a Holding Tank Pumping Contract/Monitoring plan that

have not been pumped by a licensed Maintainer are subject to a fine of \$500.00 dollars.

*This contract is not transferable from one property owner to another. Upon sale or transfer of property this contract becomes invalid and the new property owner must obtain a new pumping contract/monitoring plan within thirty (30) days of the property transfer and must provide to the Fillmore County Zoning Office.*

*The effective date of the pumping contract/monitoring plan is the date approved by the Fillmore County Zoning Office.*
