Town of Groton Mr. Jonathan J. Reiner, AICP Planning and Development Services, Director 134 Groton Long Point Road Groton, Connecticut 06340

RE: Phase I – Environmental Site Assessment Former Colonel Ledyard School 120 West Street Groton, Connecticut Eagle Project No. 19-091.12T1

Dear Mr. Reiner:

Eagle Environmental, Inc. (Eagle) completed a Phase I Environmental Site Assessment (Phase I ESA) for the Former Colonel Ledyard School located at 120 West Street in Groton, Connecticut (Site). We have developed the following conclusions with regard to the known or potential presence of oil or hazardous materials in soil or groundwater at the Site:

- A 6,000-gallon No. 2 fuel oil Underground Storage Tank (UST) currently serves the Site building. The UST replaced a previous UST installed in 1963. No previous tank removal closure report, including laboratory analytical results of the tank grave soil, was available for review. There is a potential for a release to have occurred in the tank grave area that may have impacted soil and groundwater.
- Local and state-owned institutions typically applied persistent pesticides around the perimeter of buildings for maintenance from the 1950s through the 1970s. Pesticides can remain at application sites and are commonly detected in association with school construction/re-construction projects. If pesticides were applied to the Site property, there is potential for an impact to soil and groundwater.
- Buildings constructed prior to 1978 typically contain lead-based paint, and many buildings constructed between 1950 and 1970 also contain polychlorinated biphenyls (PCB) caulking and glazing compounds. These materials, when applied to exterior building surfaces, weather and erode onto the ground surface leaving lead and PCBs in shallow soil at the building perimeter.

Based on the findings and conclusions discussed herein, Eagle recommends conducting a Phase II Environmental Site Investigation to assess conditions in the area of the underground fuel oil tank and the perimeter of the school to assess the presence of contaminant impacts. In addition, Eagle recommends completion of a dye test to confirm that the boiler room floor drains are connected to the sanitary sewer system.

Please contact us directly if you have any questions related to the report

Sincerely,

Eagle Environmental, Inc.

EXECUTIVE SUMMARY

Eagle Environmental, Inc. (Eagle) conducted a Phase I Environmental Site Assessment (ESA) at the Former Colonel Ledyard School located at 120 West Street in Groton, Connecticut (hereinafter referred to as "the Site"). This Phase I ESA was performed in accordance with the scope and limitations of American Society for Testing and Materials (ASTM) standards E1527-13 and meets EPA's All Appropriate Inquiry (AAI) standard. The Phase I ESA included an environmental databases search, review of local, state, and federal regulatory agency files, and a reconnaissance of the Site and vicinity. No sampling or other intrusive activities were conducted as part of the Phase I ESA. An evaluation for the presence of suspected asbestos-containing material (ACM), lead-based paint (LBP), poly-chlorinated biphenyls (PCB) containing building materials or radon gas was not included in the scope of work for the ESA.

The major findings of the Phase I ESA are as follows:

- The Site consists of one (1) parcel of land totaling 8.32-acres and currently occupied by a vacant, 20,000+/- square foot (s.f.) elementary school building constructed in 1963. Historically, the Site consisted of vacant, forested land prior to the school construction;
- The Site building currently utilizes a 6,000-gallon, fiberglass underground No. 2 fuel oil storage tank (UST) installed in 1991 and listed as temporarily closed. This tank replaced a previous 7,500-gallon, steel UST installed in 1963 and removed in 1991;
- The Site is served by public water and sanitary sewer; and,
- The Site does not appear to qualify as an "Establishment" as defined by the Connecticut Transfer Act.

Eagle identified one (1) data gap, as defined by ASTM E1527-13, during the records review that could affect our ability to identify known or potential releases of oil or hazardous materials at the Site. Connecticut Department of Energy and Environmental Protection (CTDEEP) Remediation, Solid Waste, Oil and Chemical Spills and Correspondence, and Soil Vapor files for the Town of Groton were not available for review at the time of our CTDEEP file search. It is possible file information may contain information relative to the Site including past releases.

This Phase I ESA has revealed evidence of three (3) recognized environmental conditions (RECs) in connection with the Site at the time of this report.

REC No. 1: Underground Storage Tank Location

A 6,000-gallon No. 2 fuel oil UST currently serves the Site building. The UST replaced a previous UST installed in 1963. No previous tank removal closure report, including laboratory analytical results of the tank grave soil, was available for review. There is a potential for a release to have occurred in the tank grave area that could have impacted soil and groundwater.

REC No. 2: Potential Pesticide Applications

Local and state-owned institutions typically applied persistent pesticides around the perimeter of their buildings for maintenance from the 1950s through the 1970s. Pesticides can remain at

application sites and are commonly detected in association with school construction/re-construction projects. If pesticides were applied to the Site property, there is potential for an impact to soil and groundwater.

REC No. 3: Lead and PCBs Along Building Perimeter

Buildings constructed prior to 1978 typically contain lead-based paint, and many buildings constructed between 1950 and 1970 also contain polychlorinated biphenyls (PCB) caulking and glazing compounds. These materials, when applied to exterior building surfaces, weather and erode onto the ground surface leaving lead and PCBs in shallow soil at the building perimeter.

Based on the findings and conclusions discussed herein, Eagle recommends conducting a Phase II Environmental Site Investigation to assess conditions in the area of the underground fuel oil tank and the perimeter of the school. In addition, Eagle recommends completion of a dye test to confirm that the boiler room floor drains are connected to the sanitary sewer system.

1.0 INTRODUCTION

Eagle Environmental, Inc. (Eagle) conducted a Phase I Environmental Site Assessment (ESA) at the Former Colonel Ledyard School located at 120 West Street in Groton, Connecticut (hereinafter referred to as "the Site"). The Phase I ESA is being conducted to support a site information package (Request for Proposals) to be provided to prospective developers.

The purpose of the Phase I ESA is to determine if Recognized Environmental Conditions (RECs)¹ are present in connection with the Site resulting from past or present property usage in accordance with the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980 as amended, 40 USC 9601, et seq. Furthermore, the Phase I ESA will: assess potential environmental liability; hazardous material stored, released or disposed of on Site; and the need for soil and groundwater characterization. In addition, this Phase I ESA considers whether the Site is an "Establishment" as defined under the Connecticut Transfer Act (Sections 22a-134 through 22a -134e of the Connecticut General Statutes as amended.)

This Phase I ESA was conducted in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) standard for the Phase I Environmental Site Assessment Process (ASTM E1527-13) which is compliant with EPA's All Appropriate Inquiry (AAI) rule (40 CFR §312). In addition, this Phase I ESA meets the requirements of the Site Characterization Guidance Document published by the Connecticut Department of Energy and Environmental Protection (CT DEEP) and the Connecticut Housing Finance Authority (CHFA) Construction Guidelines: Environmental & Hazardous Materials Review January 2018.

1.1 Purpose

This assessment utilized the general quality principles and practices towards the preparation of a report that incorporates suggested methods under ASTM. The purpose of the assessment was to:

- Identify recognized environmental conditions (RECs), defined by ASTM as a condition with the potential for a past, current, or future release of oil or hazardous material (OHM) at the Property;
- Identify historic RECs (HRECs); defined by ASTM as a past release of OHM that has achieved regulatory closure without required controls or conditions;
- Identify controlled RECs (CRECs); defined by ASTM as a past release of OHM that has achieved regulatory closure with required controls or conditions; and,
- Evaluate the potential for a release of OHM at the Property.

The ASTM definition does not include "de minimis" conditions, which generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate government agencies. Therefore, de minimis conditions are not considered RECs.

The Phase I ESA includes the following tasks:

PHASE I ESA 1-1 JUNE 2019

.

¹ Recognized environmental conditions – the presence or likely presence of any *hazardous substances or petroleum* products in, on or at a *property:* (1) due to release to the environment; (2) under conditions indicative of a *release* to the *environment;* or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*.

- Review of an environmental database search report for sites identified on databases including National Priorities List (NPL); Comprehensive Environmental Response Compensation and Liability Act (CERCLA); Resource Conservation and Recovery Act (RCRA); emergency response notification sites; a state spill, release, and landfill sites;
- Review of files at the Tax Assessor's Office, Health Department, Town Clerk, Fire Marshal's Office and the Building Department;
- Site reconnaissance to observe conditions exposed at the ground surface for evidence of previous and current property usage, and indications of environmental impact (e.g., stressed vegetation, staining, etc.);
- Reconnaissance of surrounding properties to identify potential off-site sources of contamination; and
- Vapor encroachment screening based on information obtained via the environmental database report, local and/or state research and interview documentation.

In accordance with the approved scope of work, Eagle did not collect samples for suspect asbestos containing material (ACM), lead-based paint (LBP), polychlorinated biphenyls (PCBs) or radon gas. This Phase I ESA was performed in accordance with the limitations and exceptions identified in *Section 14.0* of this *report*.

2.0 SITE DESCRIPTION

2.1 Site Ownership and Location

Site Owner: Town of Groton

Site Occupant: Vacant

Site Location: 120 West Street, Groton, Connecticut

County: New London County

Parcel ID: 19-136-6

Latitude/Longitude: 41° 20′ 59″ N, 72° 04′ 15″ W

Size: 8.32 Acres

Elevation: 83' Above Mean Sea Level

The Site is located at 120 West Street in Groton, Connecticut. The Site is accessed via one (1) asphalt paved road off the north side of West Street. The location of the Site is depicted on a Locus Map and Topographic Map enclosed as *SL-1* and *SL-2*, respectively.

2.2 Current Use of the Property

The Site is currently occupied by a vacant school building.

2.3 Description of Structures, Roads, Other Improvements on the Site

The 20,378 s.f. Site building was originally built in 1963 with concrete block and brick walls. The majority of the building is constructed slab-on-grade although utility tunnels, approximately 5 feet high and 10 feet wide are located below the two main hallways and oriented east to west and north to south. The tunnels were only visually accessed from the boiler room and were not entered. An apparent utility or storage room located adjacent to the north of the boiler room was also not accessed. Two exterior doors that provided entry to the room were locked.

The majority of the roof is flat and built-up except for the auditorium area which has a pitched, asphalt-shingled roof. The main entrance has a covered portico and is located on the east side of the southern wall of the building. School offices, a teachers' room, a conference room, a kitchenette and two bathrooms are located in the southeast corner of the school. An approximate 3,000 s.f. auditorium occupies the northeast portion of the building. The auditorium has high ceilings and a stage on the south end. It appears that the auditorium would have doubled as cafeteria although no kitchen facilities were observed. The classroom wing extends west from the eastern (office/auditorium) side of the building. It contains eleven classrooms all of which have sinks with running water. The boiler room, two bathrooms, a custodial closet and a storage room are located on the east end of the north side of the classroom wing. The boiler room contains one H.B. Smith Boiler, two circulation pumps, two compressors, one oil-fired hot water

tank and a water tank. No furniture, storage, or maintenance materials or products were located in the building.

A paved driveway and parking area extends northward off of West Road along the south side of the school. An asphalt basketball court is located adjacent to the southeast side of the school.

A grassed field extends from the school to forested land along the northern property boundary.

2.4 Current Uses of Adjoining Properties

Northerly: City of Groton Town Offices and Public Works Facilities

Easterly: Forest and Route 349

Southerly: West Street/Single Family Residences

Westerly: Forested Land and Cemetery

3.0 USER PROVIDED INFORMATION

A User Questionnaire was completed by Ms. Susan Cullen, Planner from the Town of Groton. A summary of the information provided by Ms. Cullen is provided below. A copy of the questionnaire is provided in *Appendix A*.

Note that a complete title search, valuation, and other real estate information are beyond the scope of work of this Phase I ESA.

Historical information is provided in **Section 4.0**, **5.0** and **6.0** of this report. The information presented in this section was based primarily on the information collected from Ms. Cullen.

3.1 Environmental Liens

The above-referenced individual indicated in the User Questionnaire that she is not aware of any environmental liens issued against the subject Site.

3.2 Environmental Land Use Restrictions

The above-referenced individual indicated in the User Questionnaire that she is not aware of any environmental land use restrictions that are in place at the Site or that have been filed/ recorded in public land records for the Site.

3.3 Specialized Knowledge

The above-referenced individual indicated in the User Questionnaire that she is aware of specialized knowledge or experience relating to the subject Site.

3.4 Valuation Reduction for Environmental Issues

The above-referenced individual indicated in the User Questionnaire that she is unaware if the purchase price would reasonably reflect the fair market value of the property.

3.5 Commonly Known or Reasonable Ascertainable Information

The above-referenced individual indicated in the User Questionnaire that she is unaware of known or reasonable ascertainable information pertaining to the subject Site.

3.6 Degree of Obviousness of Contamination

The above-referenced individual indicated in the User Questionnaire she is aware of obvious indicators that point to the presence or likely presence of contamination on the property.

4.0 PREVIOUS ENVIRONMENTAL ASSESSMENTS

The User of this report did not provide a previous environmental investigation report for Eagle for review. This information would be provided in $Appendix\ B$.

PHASE I ESA 4-1 JUNE 2019

5.0 DATABASE SEARCH REPORT AND MUNICIPAL RECORDS

5.1 Standard Environmental Record Sources

Eagle retained Environmental Data Resource, Inc. (EDR) of Milford, Connecticut to perform an on-line radius search (based on AAI standards) of applicable State and Federal environmental databases. The EDR (*Appendix C*), dated June 11, 2019, reviewed the following databases for the area within the specified radius of the subject parcel:

- Environmental Protection Agency (EPA) National Priorities List (NPL), 1-mile radius:
- Environmental Protection Agency (EPA) National Priorities List (NPL) Delisted site, 1-mile radius;
- EPA Comprehensive Environmental Response Compensation Liability Information System (CERCLIS) List (which included EPA Superfunds sites), 1/2-mile radius;
- EPA Comprehensive Environmental Response Compensation and Liability Information System Archived sites (CERCLIS NFRAP), 1/2-mile radius;
- Resource Conservation and Recovery Act (RCRA) sites (Generators within 1/4-mile radius; Treatment, Storage and Disposal facilities within 1/2-mile radius; and Corrective Action sites within 1-mile radius);
- Federal Institutional Controls/Engineering Controls (IC/EC), 1/2-mile radius;
- Emergency Response Notification System (ERNS) sites, on the property;
- Tribal Lands (database of boundaries in which American Indian tribes have primary governmental authority, administered by the Bureau of Indian Affairs), 1-mile radius;
- State/Tribal Hazardous Waste sites, 1/2-mile radius;
- State/Tribal Spill Sites; 1/2-mile radius;
- Solid/Tribal Waste Landfill sites, 1/2-mile radius;
- State/Tribal Registered Underground storage Tanks (USTs) and Aboveground Storage Tanks (ASTs) listings,) 1/2-mile radius;
- State/Tribal Leaking Underground Storage Tanks (LUSTs) listing, 1/2-mile radius;
- State/Tribal Institutional/Engineering Control (IC/EC) database, 1/2-mile radius;
- State/Tribal Brownfields sites, 1/2-mile radius;
- State/Tribal Voluntary Cleanup Program (VCP) sites, 1/2-mile radius; and,
- State Other (database of sites within the (CTDEEP's Property Transfer Program), 1/2-mile radius.

Eagle reviewed the area topography as it relates to the Site and determined an inferred direction of groundwater flow through the Site and adjacent area to be northerly towards Birch Plain Creek that discharges to the Long Island Sound. Based on this inferred direction of groundwater flow, properties (within the search radii specified above) located south and upgradient of the Site will be discussed as it relates to the potential environmental impact to the Site. The location of the Site is depicted on the Topographic Map enclosed as *SL-2*.

5.2 On-Site Federal Regulatory Information

5.2.1 <u>Environmental Protection Agency (EPA) National Priorities List (NPL</u>): Site is not listed.

5.2.2 Environmental Protection Agency (EPA) National Priorities List (NPL) Delisted Sites:

Site is not listed.

5.2.3 <u>Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)</u> <u>Status:</u>

Site is not listed.

5.2.4 <u>EPA Comprehensive Environmental Response, Compensation, and Liability Information</u> System Archived Sites (CERCLIS NFRAP) Status:

Site is not listed.

5.2.5 Resource Conservation and Recovery Act (RCRA) Notification Status:

Site is not listed.

5.2.6 Federal IC/EC Status:

Site is not listed.

5.2.7 Emergency Response Notification System (ERNS) Status:

Site is not listed.

5.2.8 Tribal Lands Status:

Site is not listed.

5.3 On-Site CT DEEP Regulatory Information

5.3.1 State/Tribal Hazardous Waste Sites Status:

Site is not listed.

5.3.2 State/Tribal Spills Site Status:

Site is not listed.

5.3.3 <u>State/Tribal Waste Landfill Site Status</u>:

Site is not listed.

5.3.4 <u>State/Tribal Underground Storage Tank (UST) and Aboveground Storage Tank (AST) Site Status:</u>

The Site is listed for two (2) USTs.

1. A 7,500-gallon No. 2 fuel oil steel UST was installed 01/01/1963 and removed from the ground 09/01/1991.

2. A 6,000-gallon #2 fuel oil fiberglass UST was installed 09/01/1991 and last used 02/27/2018. The UST includes single wall construction, containment sumps and metallic fittings isolated from soil and water.

5.3.5 <u>State/Tribal Leaking Underground Storage Tank (LUST) Sites Status:</u>

Site is not listed.

5.3.6 State/Tribal Institutional Control Database Status:

Site is not listed.

5.3.7 State/Tribal Brownfields Status:

Site is not listed.

5.3.8 State/Tribal Voluntary Cleanup Program Sites Status:

Site is not listed.

5.3.9 State Other (CT DEEP Property Transfer Program) Database Status:

Site is not listed.

5.4 Off-Site Federal Regulatory Information

5.4.1 NPL Sites/Delisted NPL Sites Within the Specified Minimum Search Radius:

No Federal NPL sites were identified within a 1-mile radius and upgradient of the subject Site. In addition, no delisted NPL sites were identified within a 1/2-mile radius of the subject Site.

5.4.2 CERCLA & CERCLA-NFRAP Sites Within a 1/2-Mile Radius:

No Federal CERCLA-NFRAP Sites (Now renamed SEMS-ARCHIVE by the EPA in 2015) were identified to be upgradient and within a 1/2-mile radius of the subject Site.

5.4.3 RCRA Notifiers Within the Specified Minimum Search Radius:

No Federal RCRA Notifiers were identified to be upgradient and within a 1/8-mile radius of the subject Site.

5.4.4 Federal IC/EC Within a 1/2-Mile Radius:

No Federal Institutional Controls/Engineering Controls (IC/EC) Sites were found to be upgradient and within the 1/2-mile radius of the subject Site.

5.4.5 ERNS Listing Within a 1/8-Mile Radius:

No Federal ERNS Sites were found to be upgradient and within a 1/8-mile radius of the subject Site.

5.4.6 Tribal Lands Within a 1-Mile Radius:

No Federal Tribal Lands were found to be upgradient and within a 1-mile radius of the subject Site.

5.5 Off-Site CT DEEP Regulatory Information

5.5.1 State/Tribal Hazardous Waste Sites Within a 1-Mile Radius

No State/Tribal Hazardous Waste Sites were found to be upgradient and within a 1-mile radius of the subject Site.

5.5.2 <u>State/Tribal Waste Spill Sites Within a 1/8-Mile Radius</u>

No State/Tribal Waste Spill Sites were found to be upgradient and within a 1/8-mile radius of the subject Site.

5.5.3 State/Tribal Waste Landfill Sites Within a 1/2–Mile Radius

No State/Tribal Waste Landfill Sites were found to be upgradient and within a 1/2-mile radius of the subject Site.

5.5.4 State/Tribal USTs and ASTs Within a 1/4–Mile Radius

No UST site was identified within 1/4-mile radius of the subject Site.

5.5.5 State/Tribal LUSTs Within a 1/2–Mile Radius

One (1) State/Tribal LUST was found to be upgradient and within a 1/2-mile radius of the subject Site.

1. Branford Manor Apartments – Building 19 located at Poquonock Road in Groton has a LUST reported 05/17/1991 with status as completed. No additional information was available for review.

Due to the distance and LUST completion, there is low potential for an adverse impact to the subject Site associated with this LUST.

5.5.6 State/Tribal IC/EC Within a 1/2–Mile Radius

No State/Tribal Institutional Controls (IC) / Engineering Controls (EC) were found to be upgradient and within a 1/4-mile radius of the subject Site.

5.5.7 State/Tribal Brownfield Sites Within a 1/2–Mile Radius

No State/Tribal Brownfield Sites were found to be upgradient and within a 1/2-mile radius of the subject Site.

5.5.8 State/Tribal Voluntary Cleanup Program Sites Within a 1/2–Mile Radius

One (1) State/Tribal Voluntary Cleanup Program (VCP) Site was found upgradient and within a 1/2-mile radius of the subject Site.

5.5.9 State Other (CTDEEP Property Transfer Program Sites) Within a 1/4–Mile Radius

No State Other (CTDEEP Property Transfer Program Sites) were found upgradient and within a 1/4-mile radius of the subject Site.

5.6 Supplemental CTDEEP File Review

Eagle conducted a CTDEEP file review on June 6, 2019 for UST information, remediation files, manifest files, oil and chemical spill files, oil and chemical spill correspondences, soil vapor recovery, solid waste, water orders, industrial water correspondences, stormwater

correspondences, water industrial surveys, polychlorinated biphenyls (PCB) files, recent spill files and any additional documents deemed relevant to the scope of this Phase I ESA. Upon review, only UST information, recent oil and chemical spills and PCB files were available for review. The remaining files for the Town of Groton had been sent off-Site for scanning and had not been returned to date. A Freedom of Information Act Request (FOIA) form was completed by Eagle and submitted on June 10, 2019. A response from each department however can take up to twelve (12) weeks or more. Eagle did not receive a response from each department upon completion of this Phase I ESA study. CT DEEP files, including the FOIA form, are included in *Appendix D*.

1. Underground Storage Facility Notification, September 17, 1991 – Two (2) USTs are listed at the Site. UST CL1 consists of steel construction with a 7,500-gallon capacity of No. 2 fuel oil installed in 1963 and removed 9/1991. UST CL1R1 consists of fiberglass construction with a 5,000-gallon capacity of No. 2 fuel oil installed in 9/1991. A Site plan was included with the notification confirmed the current UST location (CL1 tank grave) to be southwest of the Site building.

2.

- 3. Tank System Test, February 19, 1992 Enviroshield conducted a tank system tightness test on a 6,000-gallon UST located at the Site. Testing confirmed the UST was tight and within the allowable tolerance.
- 4. Underground Storage Facility Notification, June 13, 2008 One (1) UST is listed at the Site. CL (assumed to be CL1R1) is corrected to be a 6,000-gallon tank previously marked as 5,000-gallon.
- 5. UST Compliance Inspection Checklist, February 27, 2018 The Site was inspected by Gary Bellmar of CTDEEP and confirmed to contain one (1) 6,000-gallon heating oil UST owned by the town and not used for the past ten (10) years. The inspection report provided the following recommendations: twenty-two (22) inches of liquid/product remain in the UST and need to be vacuumed out down to one (1) inch or less; the fill cap needs to be locked and stuck with a gas stick weekly, recorded, and posted. A Notification of Violation was issued based on these observations. The UST must be permanently closed on or before 9/1/2021 before exceeding the thirty (30) year life expectancy for fiberglass tanks.

5.7 Municipal File Review

Eagle conducted a Municipal Office file review on June 4, 2019 and conducted telephone interviews on June 25, 2019. Municipal offices researched as part of this Phase I ESA study include the Groton Assessor's Office, Town Clerk, Fire Marshal's Office, Building Department, and Ledge Light Health District. Several documents were also provided by the User. All municipal files are included in *Appendix D*.

5.7.1 Tax Assessor

Groton Tax Assessors property card was reviewed and provided information regarding the parcel size and building layout, size and construction previously described in **Section 2.0**. The Site owner is listed as the Town of Groton.

PHASE I ESA 5-5 JUNE 2019

5.7.2 **Building Department**

Eagle visited the Groton Building Department and found a March 2016 Building Permit to board up the windows of the site building and clean up refuse in the basketball court. The broken windows and debris were the result of vandalism.

5.7.3 Town Clerk

Eagle visited the Groton Town Clerk's Office and obtained Site plans and ownership records. The records indicate that the southeastern portion of the Site was previously owned by Vito J. DeNoia who sold the property to the Town of Groton in October of 1963. Records indicate that the majority of the Site was owned by the Colonel Ledyard Cemetery Association. A June 1962 Site plan describes a 13 acre site at the end of West Street "to be acquired by the Town of Groton".

5.7.4 Fire Marshal's Office

Eagle interviewed Deputy Fire Chief Ted Sargent regarding his knowledge of chemical storage, disposal, underground tanks and inspections at the Site. He indicated that the Department had only the records sent by CTDEEP that indicated the Site had one (1), 6,000-gallon heating oil UST that was temporarily out of service.

5.7.5 <u>Health Department</u>

Eagle interviewed Chris Seery of the Ledge Light Health District to assess the presence of any file information or reports regarding the Site. Mr. Seery indicated that there were no records on file for the Site.

5.8 Connecticut Transfer Act

Based on the information reviewed to date, in our opinion the Site does not meet the requirements set forth in the Connecticut Transfer Act to be considered an "Establishment" and, therefore, would not be subject to the legal and technical requirements of the Connecticut Transfer Act in the event of a transfer of ownership. Advice from legal counsel is suggested to confirm a final determination.

6.0 SITE AND AREA HISTORY

The Site and area history has been compiled from Sanborn Maps, City Directories, Historical Topographic Maps and Aerial Photographs of the Site.

6.1 Sanborn Fire Insurance Maps

Certified Sanborn® Fire Insurance Maps were unavailable for the Site. A copy of the map search confirmation is included in Appendix E.

6.2 Topographic Maps

Topographic maps were obtained via the EDR Topographic Map Library. Specific maps reviewed included the United States Geological Survey (USGS): New London 15-minute Quadrangles for the 1892, 1893, 1921 and 7.5-minute Quadrangles for 1938, 1949, 1950, 1958, 1970, 1984 and 2012. Copies of the topographic maps are included in *Appendix F*.

Site topography has remained similar from 1892 to 1958. In 1970, the Site building first appears indicating localized modification and grading of the Site parcel to accommodate construction. From 1984 to 2012, Site topography appears to reflect current conditions as generally flat with higher elevation to the east and southeast. Site elevation is approximately 83 feet above mean sea level.

6.3 Aerial Photographs

Aerial photographs were obtained via EDR through their Aerial Photo Decade Package sourced from CTMAGIC, USGS, USDA, MAGIC, FAIR, USGS/DOQQ and USDA/NAIP collections. Aerial photographs reviewed were for the years 1934, 1941, 1952, 1957, 1969, 1970, 1974, 1980, 1985, 1990, 1991, 1996, 2005, 2008, 2012 and 2016. Copies of the aerial photographs are included in *Appendix G*.

Aerial photographs from 1934 to 1957 depict the Site as forested land. The surrounding adjacent parcels are predominately forested with some residential dwellings to the west and south. In 1969, the Site building first appears on the southern portion of the parcel with forested land still on the north portion. The Clarence B. Sharp Highway is located directly east of the site. From 1970 to 2016, the Site and surrounding properties appear to reflect current conditions.

6.4 City Directories

City directories were obtained by Eagle via EDR through their EDR Digital Archive and Price & Lee's City Directory. City directories reviewed were from 1964, 1968, 1973, 1978, 1992, 1995, 2000, 2005, 2010 and 2014. Copies of the city directories are included as *Appendix H*.

From 1964 to 1978, the Site is listed on West Street with no corresponding number. From 1992 to 2010, the Site is listed as 120 West Street. In 2014, the Site is no longer listed.

7.0 SITE RECONNAISSANCE

Mr. Martin Brogie, LEP performed a Site Reconnaissance on June 4, 2019. The Site visit included walking around the property, entering the building and surveying the surrounding property. The purpose of the Site reconnaissance was to observe current Site conditions and assess, based on visual observations, if there were release(s), or evidence of potential releases of oil and/or hazardous materials (OHM) to the surface or subsurface. One (1) room was locked and inaccessible adjacent to the boiler room at the time of inspection. Pertinent Site characteristics are shown on the Site plan presented as *SP-1* and on photographs included in *Appendix I*.

7.1 Physical Setting

7.1.1 Site Setting and Topography

The Physical Setting of the Site are discussed in *Section 2.0* and shown in *SL-1* and *SL-2*. The Site is generally flat. The Site is located on the "New London 7.5 and 15 Minute Quadrangle Series Topographic" maps. Based on the topographic maps, inferred groundwater flow direction is northerly towards Birch Plain Creek which discharges into the Long Island Sound.

7.1.2 Groundwater Characteristics

According to the CT DEEP Water Quality Classifications Map of Connecticut (2015), the Site is a GB groundwater classification area which presumed the groundwater is not suitable for human consumption without prior treatment. GB groundwater may be used as industrial process water, cooling waters and baseflow for hydraulically-connected water bodies.

7.1.3 Geologic Characteristics

According to the CT DEEP Surficial Materials Map of Connecticut (Stone 1992), the materials beneath the Site are mapped as floodplain alluvium to the north with thin till to the south. Thin till consists of areas where till is generally less than 10-15 feet thick including areas of bedrock outcrop where till is absent. Upper till is loose to moderately compact, generally sandy and stony. Floodplain alluvium consists of sand, gravel, silt and some organic material on the floodplains of modern streams. Alluvium typically overlies thicker glacial stratified deposits.

According to the "Bedrock Geological Map of Connecticut" (Rodgers, 1985), the bedrock underlying the Site is described as the New London Gneiss. This formation consists of massive, gray granitic gneiss.

7.1.4 Potential Environmental Receptors

Based on USGS topographic maps, the nearest natural surface water body is the Birch Plain Creak located approximately 1,800 feet east of the Site. The northeast corner of the site is located in a 0.2% Annual Chance Flood Hazard area with a 1% annual chance flood of less than one (1) foot. The Site majority, including the building, is located in Flood Zone X; areas determined to be outside the 1.0% and 0.2% annual chance floodplain according to the Flood Insurance Rate Map for this area of New London County. A copy of the FEMA Map is included in *Appendix J*.

7.2 Physical Characteristics

The following is a list of observations made during the reconnaissance of the Site.

7.2.1 Land Area

The land area for the Site was observed to be generally flat with higher elevation to the southeast. The Site includes one (1) building constructed on the southern portion of the parcel. The Site description is discussed in detail *Section 2.0*.

7.2.2 <u>Site Operation</u>

The Site is improved with a vacant school that has not been operational for several years. Previous operations in the school included custodial and maintenance services. These activities included routine/daily cleaning and exterior maintenance as well as heating system maintenance. A maintenance room is located on the north side of the classroom hallway. It was empty at the time of the Site reconnaissance and included a floor-mounted mop sink. It is likely that cleaning compounds were previously stored in this room. A boiler room is located adjacent to the maintenance room. Routine boiler operations would have included introduction and changing of boiler water chemicals, maintenance of circulation pumps and compressors, and fuel oil filter changes. Exterior maintenance would have included weed removal, mowing, snow removal, ice treatment and pest treatment

7.2.3 Petroleum Product and Raw Chemical Storage

A 6,000-gallon, fiberglass underground No. 2 fuel oil storage tank (UST) is located adjacent to the front entrance on the south façade of the school. The tank was installed in 1991 and replaced a 7,500-gallon, steel UST that was original to the building (1963). No records have been found documenting the condition of the tank grave at the time of removal/replacement.

No other petroleum storage or raw chemical storage was observed on the Site.

7.2.4 Petroleum and Chemical Waste Generation and Disposal

No petroleum or chemical waste storage was observed on the Site. No previous oil/chemical waste generation/disposal is expected to have occurred.

7.2.5 Air Emission Sources

Air emissions from the former boiler room boiler stack would have occurred in the past.

7.2.6 Wastewater Discharge Sources

Sanitary, routine cleaning wash water, and incidental boiler room wastewater discharges occurred and were apparently directed to the sanitary sewer system.

7.2.7 Visual Indications of Contamination of Building Interior

No visual indications of contamination were noted in the building interior.

7.2.8 Solid Waste or Hazardous Waste Deposits Observed On-Site

No solid wastes or hazardous waste deposits were observed on the Site.

7.2.9 Dielectric Fluid-Containing Electrical Devices

One (1) pad-mounted transformer is located at the east facade of the building. The transformer appeared to be in good condition and displayed no evidence of leakage. A label indicating that the transformer contained less than 2 parts per million PCBs was observed.

7.2.10 Floor Drains, Dry Wells, Pits, Sumps or Lagoons

Two floor drains were located in the boiler room and floor drains were located in each of the four bathrooms. Staining on or adjacent to the area of each drain was not observed.

7.2.11 <u>Asbestos Containing Materials (ACMs)</u>

An ACM inspection was not included as part of this Phase I ESA, however, suspect ACM may exist within the building including but not limited to roofing, caulking, window glazing compound, glue daubs, mudded fittings, insulation paper, laboratory tops and materials within inaccessible areas (above ceilings/behind walls).

7.2.12 Off-Site Sources of Contamination Observed During Site Visit

A Town of Groton Public Works facility, including underground gasoline storage tanks is located adjacent to the north of the Site. The gasoline USTs are located approximately 1,000 feet north of the school building. Based on local topographic and hydrologic features, potential environmental impacts at the offsite property would not be expected to have an adverse impact to the Site.

8.0 INTERVIEWS

8.1 User

The User is typically interviewed about their knowledge of the Site during the Phase I ESA study. The User of the report, Mr. Johnathan Reiner Director of Planning & Development Services for the Town of Groton, referred Eagle to the User Questionnaire discussed in *Section 3.0* of this *report*.

8.2 Key Site Manager

A "Key Site Manager" was not identified for the Site and therefore could not be interviewed by Eagle.

8.3 Interview with State and/or Local Officials

Various City officials were interviewed as described in the Municipal Regulatory Review available in *Section 5.7* of this report.

8.4 ASTM Environmental Questionnaire

An ASTM environmental site assessment questionnaire was also completed by Ms. Cullen, as well as the Eagle personnel that completed the Site Reconnaissance, and can be found in Appendix A.

The questionnaire did not provide additional information of environmental significance that was not already addressed during the Site Reconnaissance.

9.0 DATA GAPS

Eagle identified one data gap, as defined by ASTM E1527-13, during the records review that would significantly affect the ability of Eagle to identify recognized environmental conditions in connection with the Site.

Connecticut Department of Energy and Environmental Protection (CTDEEP) Remediation, Solid Waste, Oil and Chemical Spills and Correspondence, and Soil Vapor files for the Town of Groton were not available for review at the time of our CTDEEP file search. It is possible file information may contain information relative to the Site including past releases.

10.0 VAPOR ENCROACHMENT SCREENING

10.1 Vapor Encroachment Screening

In 2010, ASTM international issued its revised Standard E2600-10 entitled "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." This standard guide has been adopted into the ASTM E1527-13 Phase I Environmental Site Assessment Standard. The purpose of the standard is to define good commercial and customary practice for real estate transactions in the United States for conducting a screening assessment directed solely at the likelihood for migrating vapors to encroach upon a target property (i.e. the Site) creating a vapor encroachment condition (VEC). The presence of vapors in a building that has migrated from a release to the environment (i.e. from a release outside of the building) can result in CERCLA liability. Thus, this screening serves to assess the likelihood of a VEC. Determining whether or not encroaching vapors result in a vapor intrusion problem requires further investigation that is beyond the scope of the standard.

A VEC is defined as the presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the Site caused by the release of vapors from contaminated soil or groundwater on or near the Site. An area of concern (AOC) as defined in the E2600-10 is measured 0.33-miles from the Site for known or suspect contaminated sites with volatile organic compound (VOC) or semi-VOCs; 0.1-mile from the Site for known or suspect petroleum hydrocarbon releases. The identification of AOCs may be reduced if the groundwater flow direction is known relative to the Site. Critical distances are taken into account for contaminated groundwater plumes in any direction for COCs including petroleum light non-aqueous phase liquid (LNAPL) accumulating above the water table at a distance of 100 ft. from the edge of the plume to the Site and 30 ft. for dissolved volatile petroleum hydrocarbons.

A Vapor Encroachment Screen (VES) was obtained by Eagle via EDR. Based on this VEC assessment, and the Site reconnaissance, there is low potential that a VEC exists at the Site based upon a lack of documented releases within the area and current and historic chemical utilization/storage on and off-Site. A copy of the VES report is provided in *Appendix K*.

11.0 FINDINGS

Based on the information obtained during the completion of the Phase I ESA for the Site, the major findings are as follows:

- The Site consists of one (1) parcel of land totaling 8.32-acres and currently occupied by a vacant, 20,000+/- square foot (s.f.) elementary school building constructed in 1963. Historically, the Site consisted of vacant, forested land prior to the school construction;
- The Site building currently utilizes a 6,000-gallon, fiberglass underground No. 2 fuel oil storage tank (UST) installed in 1991 and listed as temporarily closed. This tank replaced a previous 7,500-gallon, steel UST installed in 1963 and removed in 1991;
- The Site is served by public water and sanitary sewer; and,
- The Site does not appear to qualify as an "Establishment" as defined by the Connecticut Transfer Act.

12.0 CONCLUSIONS

Eagle has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-13 for the Former Colonel Ledyard School located at 120 West Street in Groton, Connecticut (depicted on *SP-1*). Any exceptions to, or deletions from, this practice are described in *Section 14.0* of this *report*.

This assessment has revealed evidence of three (3) recognized environmental conditions (RECs) in connection with the Site at the time of this report.

REC No. 1: Underground Storage Tank Location

A 6,000-gallon No. 2 fuel oil UST currently serves the Site building. The UST replaced a previous UST installed in 1963. No previous tank removal closure report, including laboratory analytical results of the tank grave soil, was available for review. There is a potential for a release to have occurred in the tank grave area that could have impacted soil and groundwater.

REC No. 2: Potential Pesticide Applications

Local and state-owned institutions typically applied persistent pesticides around the perimeter of their buildings for maintenance from the 1950s through the 1970s. Pesticides can remain at application sites and are commonly detected in association with school construction/reconstruction projects. If pesticides were applied to the Site property, there is potential for an impact to soil and groundwater.

REC No. 3: Lead and PCBs Along Building Perimeter

Buildings constructed prior to 1978 typically contain lead-based paint, and many buildings constructed between 1950 and 1970 also contain polychlorinated biphenyls (PCB) caulking and glazing compounds. These materials, when applied to exterior building surfaces, weather and erode onto the ground surface leaving lead and PCBs in shallow soil at the building perimeter.

13.0 RECOMMENDATIONS

Based on the findings and conclusions discussed herein, Eagle recommends conducting a Phase II Environmental Site Investigation to assess conditions in the area of the underground fuel oil tank and the perimeter of the school. In addition, Eagle recommends completion of a dye test to confirm that the boiler room floor drains are connected to the sanitary sewer system.

14.0 LIMITATIONS

All work product and reports provided in connection with the performance of this Program are subject to the following limitations.

The program was based on the observations of Eagle Environmental, Inc. (Eagle) of the Site condition and a review of information provided by the state and local officials and information and representations made by other parties and on information contained in the files of State and/or local agencies made available to Eagle at the time of the Site assessment. To the extent that such files are missing, incomplete or not provided, Eagle is not responsible. Although there may have been some degree of overlap in the information provided by these various sources, Eagle did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this Phase I ESA.

The purpose of this report is to assess the physical characteristics of the subject Sites with respect to the presence of environmental hazardous substance, such as potentially hazardous waste or petroleum and chemical products and wastes as defined in Connecticut General Statutes section 22a-452. No specific attempt was made to check the compliance of present or past owners or operators of the Sites with Federal, State or local laws and regulations, environmental or otherwise.

Eagle's work presented herein was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area, and Eagle observed that degree of care and skill generally exercised by other consultants under similar circumstances and conditions. Eagle's findings and conclusions must be considered not as scientific certainties, but as a professional opinion concerning the significance of the limited data gathered during the course of the Program. Specifically, Eagle does not and cannot represent that the Sites contains no hazardous material, oil, or other latent condition beyond that observed by Eagle during this Program.

16.0 SIGNATURE AND QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in "§312.10 of 40 CFR §312" and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Martin Brogie, LEP is a Licensed Environmental Professional (LEP) in Connecticut and has over 28 years of environmental experience conducting site assessments, field investigations, and remedial actions in Connecticut and has a Bachelor of Science degree in Natural Resource Management and Engineering.

AAI User Questionnaire/ASTM Environmental Questionnaire

AAI – USER QUESTIONNAIRE

FOR

Former Colonel Ledyard School - 120 West Street, Groton, Connecticut

In order to receive CERCLA liability protection, the *user*¹ must provide the following information (if available). Failure to provide this information could result in the determination that "all appropriate inquiry" was not complete.

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

- o Yes
- No
- o Unknown
- 2. Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CRF 312.26).

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

- o Yes
- No
- o Unknown
- 3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes

o No

o Unknown

specialized experience relating to asbestos/lead/mold and prion engineerle/project management/construction experience in excess of 20 years

¹ The party seeking to complete an AAI to receive CERCLA liability protection

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

no purchase price has been set o Yes

o No Unknown

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, (a.) Do you know the past uses of the property? (b.) Do you know of specific chemicals that are present or once were present at the property? (c.) Do you know of any spills or other chemical releases that have taken place at the property? (d.) Do you know of any environmental cleanups that have taken place at the property?

o Yes
o No
Unknown

The past Use of the property was a school. We have no information regardize environmental cleanups that way have occurred while leasing the feeling of the presence of contamination at

the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence of likely presence of contamination at the property?

Yes

o No

o Unknown

There are obvious signs of the likely prescence of mold, asbestos, and lead contamination of the property.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/11/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
ELECTRIC BOAT CORP Site ID: 0102326	75 EASTERN POINT RD	SW 1/4 - 1/2 (0.443 mi.)	E20	93

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EPA ID:: CTD001147842				

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

State and tribal institutional control / engineering control registries

CT ENG CONTROLS: An Engineered Control is a permanent physical structure designed to safely isolate pollutants which would otherwise not comply with the self-implementing remedial options allowed in the Connecticut Remediation Standard Regulations (RSRs). The ECGD includes a description of what is eligible to be considered as an Engineered Control under section 22a-133k-2(f)(2) of the RSRs, a description of the information necessary for the preparation of complete and approvable applications, a step-by-step outline of the review and approval process, and supplemental resources provided in the appendices.

A review of the CT ENG CONTROLS list, as provided by EDR, and dated 03/03/2019 has revealed that there is 1 CT ENG CONTROLS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	al/Higher Elevation Address		Map ID	Page
POSS BURIED ORDNANCE		WNW 1/2 - 1 (0.502 mi.)	G31	379

CT CPCS: A list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). The list contains the following types of sites: Sites listed on the Inventory of Hazardous Waste Disposal Sites; Sites subject to the Property Transfer Act; Sites at which underground storage tanks are known to have leaked; Sites at which hazardous waste subject to the RCRA; Sites that are included in EPA's (CERCLIS); Sites that are the subject of an order issued by the Commissioner of DEP that requires investigation and remediation of a potential or known source of pollution; and Sites that have entered into one of the Department's Voluntary Remediation Programs.

A review of the CT CPCS list, as provided by EDR, and dated 03/05/2019 has revealed that there are 7 CT CPCS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SCHEETZ RESIDENCE Lust Status: Pending	52 FLEMMING COURT	WNW 1/8 - 1/4 (0.159 mi.)	8	41
BRANFORD MANOR APART Lust Status: LUST Completed (DEP	BLDG. 19, POQUONNOCK 's significant hazard definition)	S 1/8 - 1/4 (0.198 mi.)	10	46
CUMBERLAND FARMS, IN Lust Status: Pending	273 MITCHELL STREET	W 1/4 - 1/2 (0.254 mi.)	D14	60

CT SEH: The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

A review of the CT SEH list, as provided by EDR, and dated 08/31/2018 has revealed that there are 2 CT SEH sites within approximately 0.5 miles of the target property.

ELECTRIC BOAT CORP (Continued)

1000212340

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 86884

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 33441.4

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED

IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE,

CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2,

TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

SPENT SOLVENT MIXTURES.

Waste code: F003

Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND STILL

BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005

Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE

Direction Distance Elevation

evation Site Database(s) EPA ID Number

ELECTRIC BOAT CORP (Continued)

1000212340

EDR ID Number

FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 86884

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 33441.4

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AIR EMISSIONS CLASSIFICATION UNKNOWN

COMPLIANCE AND EMISSIONS REPORTING

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RISK AND TECHNOLOGY REVIEW

AIR MAJOR

HAZARDOUS WASTE BIENNIAL REPORTER

Connecticut Site Information Management System (SIMS) is part of a suite of web-based applications designed to allow the Connecticut Department of Environmental Protection (DEP) staff to harmonize environmental interest information from disparate systems in a single agency-wide data repository (known as CFI). SIMS provides tools for

identifying and resolving duplicate data, querying data (using both tabular and geospatial methods), and viewing/maintaining documents associated to the data.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

SEH:

Date Notified: 10/19/1998

Type Of Hazard: Pollution detected in groundwater that discharges to a surface water

body may pose a risk to aquatic life.

Response: DEP directed the property owner to continue with the established plan

and schedule for invstigation and remediation of property under the

EPA Corrective Action Program.

Actions: Groundwater threat to surface water being evaluated for site specific

conditions by owner.

Date Notified: 02/05/1999

Type Of Hazard: Pollution in the top two feet of soil may pose a risk to human health

as a result of direct contact.

Response: DEP indicated a fence should be installed and signs posted to prevent

exposure to PCB contaminated soils.

Direction Distance

EDR ID Number Elevation Site Database(s) **EPA ID Number**

ELECTRIC BOAT CORPORATION (Continued)

S108320115

CT NPDES

Actions: A temporary fence was installed, followed by excavation of PCB

> impacted soils. A susequent deed notice and Land Use Restriction were recorded on the land records. No further abatement action necessary.

ENF Action Comment: Electric Boat completed NOx testing on October 19, 2017 pursuant to

NSR Permit No. 070-0284 for the B&W Boiler. The boiler met the 0.2 Ib/MMBTU limit (NOx RACT limit) but greatly exceeded the pph limit for NOx (BACT limit). This pph exceedance was a also self reported

violation to Keith s group. This is in violation of Permit Number 070-0284.

Fiscal Year: 2013 City: **GROTON** Federal Facility ID: CT9799F8697 Telephone: 978-318-8238 INST ID: 54457 **NEW LONDON** County: RAB: Not reported

CORPS DIST: New England District (NAE)

NPL Status: Not Listed CTC: 9.5

Current Owner: State Government Future Prog: Not reported

Description: The site was known as Fort Griswold and is located on Fort St in

> Groton, CT. The Army used the existing fort onsite as an open earthwork fort for national defense. The fort consisted of a parade ground and an upper and lower battery. Structures used by the Army include a magazine, barracks, a water well, a powder house, a shot furnace, and gun emplacements. These structures were built prior to the Army's use of the site. During WWII the Army rebuilt the magazine and put up temporary structures for housing and other purposes.

Current Program: Not reported

A fort existed at the site as early as 1775 and was used by the History:

volunteer militia and the State of Connecticut. An Act of the State of CT in June 1842 authorized the Governor to cede the approximately 12.3-acre fee Fort Griswold site to the US. According to the current owner, the US resumed control of the site for an unknown time period during World War II (1941-1945) by exercising a reserved right to re-enter. According to a 1911 newspaper article, on 6/6/1902 Congress granted the State of CT the right to occupy, improve, and control the 12.3 acre tract. The property was still owned by the US and the right

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

SEH: List of Significant Environmental Hazards Report to DEEP

The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

GEOCHECK®-PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

FORMER COLONEL LEDYARD SCHOOL 120 WEST STREET GROTON, CT 06340

TARGET PROPERTY COORDINATES

Latitude (North): 41.350147 - 41° 21′ 0.53″ Longitude (West): 72.070671 - 72° 4′ 14.42″

Universal Tranverse Mercator: Zone 18 UTM X (Meters): 745073.1 UTM Y (Meters): 4581556.5

Elevation: 84 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5644938 NEW LONDON, CT

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

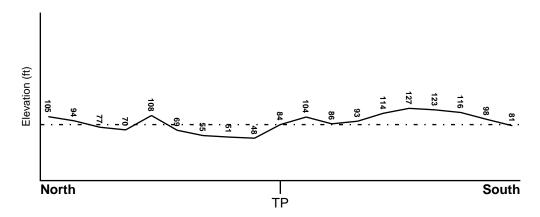

TOPOGRAPHIC INFORMATION

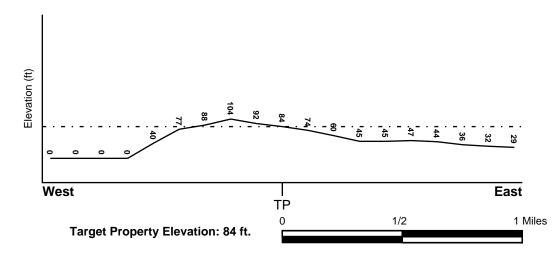

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NEW LONDON YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

	Soil Layer Information								
	Вои	ındary		Classi	fication	Saturated hydraulic

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Community and Non-Community Water System Wells

Source: Department of Public Health, Water Supplies Section

Telephone: 860-509-7333

Active, emergency and inactive wells used for potable purposes that are owned and operated by active community and non-community water systems in Connecticut.

OTHER STATE DATABASE INFORMATION

Connecticut Leachate and Wastewater Discharge Sites

Source: Department of Environmental Protection

Telephone:

The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP. These maps locate surface and groundwater discharges that (1) have received a waste water discharge permit from the state or (2) are historic and now defunct waste sites or (3) are locations of accidental spills, leaks, or discharges of a variety of liquid or solid wastes.

EPA-Approved Sole Source Aquifers in Connecticut

Source: EPA Telephone:

Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

RADON

State Database: CT Radon

Source: Department of Public Health

Telephone: 860-509-7367 Radon Statistical Summary

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.

(nong wet)

TO ALL PEOPLE TO WHOM THESE PREJENTS SHALL COME, GREETING,

KNOW YE, That THE COL. LEDYARD CEMETERY ASSOCIATION, a corporation organized and existing under the laws of the State of Connecticut, located in the Town of Groton, County of New London, and State of Connecticut, acting herein by Ralph L. Daviøson, President and Robert C. Allyn, Secretary, hereunto duly authorized, for the consideration of One Dollar (\$1.00) and other good and valuable considerations received to its full satisfaction of the TOWN OF GROTON, a municipal corporation located in said County of New London and State of Connecticut, do give, grant, bargain, sell and confirm unto the said Town of Groton, a certain tract or parcel of land situated at the northerly end of West Street in the Borough of Groton and Town of Groton, County of New London and State of Connecticut, bounded and described as follows:

Beginning at the southeasterly corner of the herein described tract at a drill hole set at the intersection of two stone walls; thence running westerly by and along a stone wall, bounded southerly by land now or formerly of Vito J. DeNoia, a distance of 315.64 feet to a drill hole; thence turning an interior angle of 180° 56' 00" and continuing westerly by and along said stone wall, bounded southerly in part by said DeNoia land, in part by the northerly end of West Street, socalled, and in part by lands now or formerly of William D. and Clementine Johnson, a distance of 233.37 feet to a drill hole; thence turning an interior angle of 179° 04' 45" and continuing westerly by and along said stone wall, bounded southerly by lands now or formerly of Sacred Heart Church Corporation, a distance of 186.00 feet to an iron pipe; thence turning an interior angle of 930 10' 40" and

running northerly bounded westerly by Association, a disterly by remaining lands of Colonel Westerly b cemetery Association, and Ledyard by Cometery Association, a distance of interior and hole; the of emetery description and description of the o furning an interior angle; thence and running easterly by and ol. arning and running easterly by 920 01.

strone wall, bounded northerly by by by by stone wall, bounded northerly along and stone ads now or formerly of John John John lands now or formerly of John J. by pelaura et al, a distance of 36.25 feet to a drill hole; thence 36.25 interior angle of 1720 31, turning an interior angle of 1720 31, turning easterly by and continuing easterly by and along said stone wall a distance and along said to a drill hole; thence turning feet to a drill hole; thence of 110.09 interior angle of 1820 53, turning an interior angle of 1820 53, turning continuing eastering by and continuing easterily by and along and contill a distance of 68.53 along said wall a distance of 68.53 feet to a drill hole; thence turning an interior angle of 2110 30' 00" and interior easterly by and all and continuing easterly by and along and wall a distance of 130 38 said stone wall a distance of 130.38 said to a drill hole; thence turning feet interior angle of 1500 30' 00" and continuing easterly by and along and wall a distance of 376 92 said stone wall a distance of 376.92 said to a drill hole set in the wall teet turning an interior and corner; thence turning an interior angle corner; 18' 00" and running southerly by and along a stone wall, bounded easterly by lands now or formerly of Twin Hills of Groton, Inc., a distance of 231.64 feet to a drill hole; thence turning an interior angle of 1530 04' 30" and continuing southerly by and along and stone wall a distance of 35.66 feet to a drill hole; thence turning an interior angle of 1940 00' 30" and continuing southerly by and along said stone wall a distance of 140.12 feet to a drill hole; thence turning an interior angle of 1870 41' 00" and continuing southerly by and along said stone wall a distance of 234.90 feet to a drill hole; thence turning an interior angle of 1850 00' 30" and continuing southerly by and along said stone wall a distance of 201.50 feet to the point and place of beginning. Said last course making an interior angle of 800 18' 00" with said first course; said tract containing an area of thirteen acres, more or less, and said tract being the same as shown on a plan to be filed in the Groton Land Records titled, "Plan of Property to be Acquired by The Town of Groton from Col. Ledyard Cemetery Assn.

Conn. Scale 1" = 40' June 1962 DiGesare= Bentley-Welling Engr's: Greton, Conn. Revision "A" 9-4-62",

Being a portion of the premises conveyed to the Grantor then known as Greton Cemetery Association, by Abble A. Mitchell by her deed dated August 8. 1890 and recorded in the Greton Land Records in Volume 35, page 700 and a portion of the premises conveyed to the Grantor under the name of Groton Cemetery Association by Sarah A. Mitchell by her deed dated April 30, 1907 and recorded in said land records in Volume 48, page 546.

The grantee by the acceptance of this deed covenants and agrees with the granter that the grantee will erect at its expense a suitable fence along the common boundary lines between the herein conveyed premises and the remaining land of the granter prior to maining land of the granter prior to that date on which the building to be erected on the herein conveyed premises is occupied for school purposes.

TO HAVE AND TO HOLD the above granted and bargained premises, with the appurtenances thereof, unto it,
the said grantee, its successors and assigns for ver, to
its and their own proper use and behoof.

AND ALSO, it, the said grantor, does for itself, its successors and assigns, covenant with the said grantee, its successors and assigns, that at and until the ensealing of these presents, it is well seized of the premises, as a good indefeasible estate in FEE SIMPLE; and has good right to bargain and sell the same in manner and form as is above written; and that the same is free from all incumbrances whatsoever, except as hereinbefore mentioned.

AND FURTHERMORE, it the said grantor, does by these presents bind itself and its successors and assigns forever to WARRANT AND DEFEND the above granted and bargained premises

it, the said grantee, its successors and assigns, against it. the and demands whatsoever, except as hereinbefore

IN WITNESS WHEREOF, it has hereunto set its name and seed this 9th day of Catalan

signed, smalad and de-livered in presence of:

1962.

Narrative Comments

02/27/2018 Inspector: Gary Bellmar - Site has a single SW FRP 6K heating oil UST. Site is owned by town/city and was formerally a school. Site has been closed and not in use for the past 10 years. Inspector will change tank status to "Imporarily Closed". Inspector finds that UST contains 22 inches of liquid/product. Tank needs to be vacuumed out down to one inch ir less of liquid/product. Fill cap needs to be locked. Tank needs to be stuck with gas stick weekly and readings one inch ir less of liquid/product. Fill cap needs to be locked. Tank needs to be stuck with gas stick weekly and readings recorded and posted on site for viewing by inspector. Notice of Violation issued. Annual Tank Notification needs to be updated on-line via EZFile to CT DEEP. If assistance is needed, contact Moises Torrent at DEEP, 1-860-424-3343. Written Warning issued. NOTE: This UST must be permenantly closed on or before 9/1/2021.

REPORT OF TITLE

ISSUED TO Suisman, Shapiro, Wool, Brennan

File No.: Town of Groton ETS No. 01-06009-4

Property Address: 120 West Street, Groton, CT

This is to report that after an examination of the Land Records, as indexed, of the Town of Groton, State of Connecticut, from October 9, 1962 to July 30, 2018 at 4:00 p.m., the records show that the Town of Groton is the owner in fee simple, of all that certain piece or parcel of land, with all improvements thereon described in a Quit Claim Deed from Vito J. DeNoia dated October 31, 1963 and recorded November 20, 1963 in volume 207 at page 306, and a Warranty Deed from The Col. Ledyard Cemetery Association dated October 9, 1962 and recorded October 10, 1962 in volume 198 at page 492, and by Warranty Deed from William D. Johnson and Clementina Johnson dated October 3, 1962 and recorded October 9, 1962 in volume 198 at page 465, all of the Groton Land Records, copies of which are attached and that title to said property is free from all encumbrances except the following:

- 1. Violations of any and all provisions of any ordinances, municipal regulations or public or private law.
- 2. Any state of facts which an accurate survey or physical inspection of said premises might disclose, but which do not appear of record.
- 3. Beach rights or other riparian or littoral rights, and any rights in rivers, brooks, streams, lakes, ponds, bays or navigable waters.
- 4. Errors in the indexing of public records.
- 5. Inchoate liens not perfected by recording with the Town Clerk.
- 6. Mechanic's Liens prior to the time that notice of the lien or the lien itself is recorded.
- 7. The title to land under rights of way appurtenant to the premises unless a special search is directed covering such rights of way and a special fee charged therefor.

- 8. Right of parties in possession, if any.
- 9. Any recorded public improvement or private association assessments and any unpaid installments thereof.
- 10. Real Estate Taxes on the Grand List of October 1, 2017 are exempt.

NOTE: No open mortgages or liens found.

Respectfully submitted,

Philip Piter Clyster

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Eagle Environmental, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

FIRM Map

National Flood Hazard Layer FIRMette

Legend

SEE FIS REPORT FOR DETAILED LEGEND AND INDEX MAP FOR FIRM PANEL LAYOUT

9

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 6/25/2019 at 3:37:17 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.
