

2030 Harrison County Comprehensive Plan

Moving into the future, while learning from our past

2030 Harrison County Comprehensive Plan

Moving into the future, while learning from our past

JULY, 2008

PREPARED FOR

The Harrison County Board of Supervisors and the citizens of Harrison County, Mississippi.
William Martin, President, District 4
Marlin Ladner, District 3
Connie Rockco, District 5
Kim Savant, District 2
Windy Swetman, District 1

PREPARED BY

The Ohio State University, Knowlton School of Architecture, Project Manager
Ellen Cowell
Gulf Regional Planning Commission
Neel-Schaffer
Southern Mississippi Planning and Development District

STEERING COMMITTEE

Mike Andrews
Andy Balias
Fred Boykin
Warren Doussan
Eddie Hartwell
Dan Hensarling
David Ladner
Angel Middleton
Sharon Turnipseed
Rondell Young

HARRISON COUNTY ZONING ADMINISTRATION

Patrick Bonck, Zoning Administrator
Kelvin Jackson, Planner

Funding for this plan is made possible by a grant from the Mississippi Development Authority.

Chapter	Figure	Page
Executive Summary	Figure EX-1. With more than 50,000 people expected to move into the unincorporated county by 2030, the plan calls for concentrating urban development and expanding the transportation network, while creating healthy, safe, economically vital, communities of choice.	ii
Introduction	Figure 1-1. To create a healthier, more resilient, more prosperous county that effectively manages growth to create attractive communities of choice for residents and tourists.	1
	Figure 1-2. Citizens and stakeholders have participated throughout the comprehensive planning process, including at the March 19th Ideas Forum.	2
	Figure 1-3. This phasing diagram describes the timeline for the preparation of the comprehensive plan.	3
	Figure 1-4. Citizens from across Harrison County have volunteered their time to participate in community organizing, town hall meetings, and on steering committees.	4
	Figure 1-5. Harrison County has a mix of natural features that have made the unincorporated county a desirable location for residents.	5
	Figure 1-6. Harrison County’s mix of housing types and employment opportunities have made unincorporated Harrison County the community of choice for many residents.	6
	Figure 1-7. Residents enjoy a variety of recreation opportunities throughout Harrison County including playgrounds and the Sand Beach.	6
Communities	Figure 2-1. The citizens of Harrison County have expressed how they envision the future of their communities through each of the Community Plans.	7
	Figure 2-2. Live oaks are a common and treasured species along Bayou Delisle.	9
	Figure 2-3. The DeLisle Plan called for the creation of a retail center, shown here.	11
	Figure 2-4. Eastern Harrison County has a mix of features that the community values and wants to preserve as this Plan is implemented.	12
	Figure 2-5. The citizens of Eastern Harrison County have identified the Woolmarket Village Center as a location to expand recreational, civic, and retail uses.	13
	Figure 2-6. The Plan proposes a mix of businesses and multi-family and single-family housing in the neighborhood center.	14
	Figure 2-7. Bayou Mallini provides water access for residents to the Saint Louis Bay.	15
	Figure 2-8. Citizens would like to see a marina at Discovery Bay.	16
	Figure 2-9. The center of Pineville.	18
	Figure 2-10. The Arboreteum in Pineville offers attractive views of the natural landscape.	18
	Figure 2-11. Citizens would like to see the further development of the Town Center.	20
	Figure 2-12. This is a conceptual site plan of potential interchange enhancements at proposed State Route 601 and State Highway 53.	21
Land Use	Figure 3-1. Harrison County has a variety of land uses that contribute to the quality of life for residents.	23
	Figure 3-2. While many Harrison County residents had to live temporarily in a FEMA trailer on their property or in a park, new housing is being completed across the county providing opportunities for citizens to move into permanent housing.	25
	Figure 3-3. The Comprehensive Plan promotes protecting the scenic character of the rural areas of Harrison County.	27
	Figure 3-4. Harrison County’s future land use plan promotes the preservation of sensitive lands and promotes parks and open space as development occurs.	28
	Figure 3-5. Harrison County’s future land use pattern is focused on creating nodes of development activity. As shown below, a mix of neighborhood residential and community commercial is appropriate in G-2 sectors. Shown below is a concept for commercial development at County Farm Road and State Highway 53.	29
	Figure 3-6. Conservation developments are encouraged in G-1 sectors and are the preferred development method in G-2 sectors.	29
	Figure 3-7. The plan advocates educating property owners and developers about development strategies that protect the natural environment.	32

List of Figures

Transportation	Figure 4-1. The county’s scenic rural roadways will need to be expanded as growth occurs in designated sectors.	33
	Figure 4-2. The future growth of the county will depend on having a transportation network capable of handling increased traffic.	34
	Construction and reconstruction of roads and bridges can be seen across the county.	
	Figure 4-3. Public transit, especially in growth sectors, is critical to supporting visitors and residents.	35
	Figure 4-4. Rail and air transport are critical to supporting the economic vitality of the county.	35
	Figure 4-5. Providing for bike lanes and paths is an important action for creating a multimodal transportation network.	36
	In some locations existing right-of-way could be used to provide a lane or path.	
	Figure 4-6. Harrison County has many scenic roadways that provide relaxing drives across the county. This plan calls for the adoption of ordinances to protect these scenic corridors.	36
	Figure 4-7. Enhancing highway bridges is one way to create community identity and increase the quality of experience for tourists.	37
	Figure 4-8. Walk and Ride days would encourage people to take the bus, bicycle, or walk rather than drive to work.	39
Healthy Communities	Figure 5-1. Harrison County has a variety of facilities that support the health and well being of the county’s residents.	44
	Figure 5-2. Harrison County has a significant number of trails. The creation of a trail head, as seen below, enhances visitors’ experience.	45
	Figure 5-3. Increasing access to healthy food options is an important goal of this plan.	46
	Figure 5-4. Access to community facilities and services is a challenge for some of Harrison County’s vulnerable populations.	47
	Expanding public transit is one way to help these citizens.	
	Figure 5-5. Harrison County residents want to increase the walkability of neighborhoods and increase the number of playgrounds in their communities.	48
	Figure 5-6. Harrison County’s residents want more horse trails, like the one shown below.	49
	Figure 5-7. A land bank would allow the County to use land for a variety of purposes such as community gardening, natural resource preservation, and buildings that serve the community.	49
	Figure 5-8. Farmers’ markets and roadside produce and seafood stands can be found throughout Harrison County. This plan promotes creating more opportunities for healthy food options, such as organic foods produced regionally.	50
	Figure 5-9. Harrison County has a number of farmers’ markets. Residents and market managers have requested a covered pavillion to provide shade for customers and vendors.	50
This structure could be attached to an existing community or senior center to provide additional locations for farmers’ markets.		
Figure 5-10. The County’s senior centers could host rotating social service providers to bring services to the residents of the county.	51	
Safe Communities	Figure 6-1. S.S. Hurricane Camille, razed in May 2008, once served as a remembrance of past hurricanes.	56
	Figure 6-2. This house in Pineville has been elevated to mitigate against flooding.	57
	Figure 6-3. The New D’Iberville High School will also serve as a FEMA 361 Shelter.	57
	Figure 6-4. The Coast Transit Authority aids in Emergency Evacuation.	58
	Figure 6-5. This Hurricane Evacuation Sign Along Old Highway 49 aids drivers in exiting the County.	58
	Figure 6-6. Sand and gravel operations are located across Harrison County. Ensuring a setback from waterways will reduce the impact these operations have on the county’s rivers and bayous.	59
	Figure 6-7. A walking school bus is a group of students accompanied by adults.	60

List of Figures

	Figure 6-8. Bayou Acadian is one of the many natural areas to be preserved.	61
	Figure 6-9. Neighborhood Blockwatch programs are popular with Harrison County residents.	62
	Figure 6-10. Informational signage can be placed in flood prone areas.	62
	Figure 6-11. Firewise strategies help reduce wildfire risks.	63
	Figure 6-12. Organizing development to create open space between houses and forested or flood prone areas can protect residents from natural disaster.	63
	Figure 6-13. Rain gardens divert rain water from going directly into storm systems that lead to streams and rivers.	64
	Figure 6-14. Green roofs can also help reduce the urban heat island effect.	64
	Figure 6-15. Callboxes can increase safety at vulnerable locations.	65
	Figure 6-16. The plan supports the construction of new fire stations as needed. The fire station in DeLisle (far right) and Henderson Point (middle) were both destroyed in Hurricane Katrina. The middle photo shows the Henderson Point station under construction.	68
Economic Vitality	Figure 7-1. Harrison County has a variety of industries, including operations along waterfronts.	71
	Figure 7-2. The economic development goals focus on maintaining the unique character of the county, while creating more diversity in employment and further development of the labor force.	72
	Figure 7-3. The drawings below illustrate some of the design principals for industrial development including signage, buffering, employee areas, and landscaped roadways.	75
	Figure 7-4. Future industrial park development should integrate rain gardens in parking lots, buffer areas, and employee areas.	76
	Figure 7-5. The concept of economic gardening focuses on growing small businesses to generate job creation.	77
	Figure 7-6. The WIN Job Center helps Harrison County residents find employment.	77
	Figure 7-7. Residents of Harrison County work at a variety of businesses along the Mississippi Gulf Coast.	78
Tourism	Figure 8-1. Harrison County offers a wide variety of recreational opportunities for tourists.	82
	Figure 8-2. Casinos are the number one attraction for tourists visiting the Mississippi Gulf Coast.	83
	Figure 8-3. Protecting and conserving the coastline is an important strategy of the comprehensive plan.	85
	Figure 8-4. The casino sites in Harrison County can minimize their impact on the surrounding natural environment by using low impact development techniques and green building technologies. There are also opportunities to allow visitors to interact with the natural environment.	86
	Figure 8-5. Casinos need to provide tourists with unique and new experiences to compete with the established regional competition. This illustration of a 'treehouse' resort as part of a casino complex shows tourists enjoying the panoramic views of the bay and wetlands, enjoying boating across the water bodies, and taking nature walks in the background. The schematic conceptual plan shows the layout of a set of cottages.	87
	Figure 8-6. By providing bird-watching towers and floating boardwalks residents and tourists can experience the natural environment that Harrison County has to offer.	88
	Figure 8-7. Signage provides visual cues to tourists and residents about the location of activities. The example signs below illustrate a canoe drop in point, a horse riding trail, the sand beach, and a working waterfront along the beach. The numbers can be tied to a destination map provided to tourists and trail names can be included where appropriate.	89
	Figure 8-8. The Gulfport Sportsplex attracts tourists from across the state who come to watch baseball and other sports tournaments.	92
	Figure 8-9. Visitors to Harrison County often travel using US Highway 90, crossing the Bay of St. Louis bridge. The new bridge has a bicycle lane and has led to many visitors choosing to ride their bike along the bridge, beach and scenic roadways.	93

List of Figures

Fiscal Plan	Figure 9-1. Harrison County residents would put more money into parks and recreation.	94
	Figure 9-2. The fiscal goals include supporting decisions that will support providing residents with the level of services they desire, including community centers, fire service, and roads.	95
	Figure 9-3. Sources of Revenue in Harrison County	96
	Figure 9-4. Expenditures in Harrison County	96
	Figure 9-5. Residents have identified the preference for investing in community services and infrastructure improvements.	97
Intergovernmental Cooperation	Figure 10-1. Intergovernmental cooperation involves communication and cooperation between multiple jurisdictions, and can result in many benefits for those communities involved.	99
	Figure 10-2. Intergovernmental cooperation helps foster relationships around issues of regional concern.	101
	Figure 10-3. Through intergovernmental cooperation a regional blueways system could be achieved.	104
	Figure 10-4. The Citizen Advisory Council on Economic Development provides opportunities for citizen engagement on future development ideas.	105
	Figure 10-5. Cooperation to ensure a quality regional transportation system is an important goal of this plan.	105
	Figure 10-6. The De Soto National Forest is a partner in the natural resource industry and a provider of recreational opportunities.	105
	Figure 10-7. Harrison County could use relationships established through intergovernmental cooperation to create multi-county business parks as a way to market the region to larger, or more specialized industrial prospects.	106
	Figure 10-8. It is important for other jurisdictions to engage in the efforts underway in Harrison County. Below, a representative from Ocean Springs came to a stakeholder meeting to learn about what Harrison County plans for its beach while sharing the ideas for the Front Beach in Jackson County.	107
	Figure 10-9. Harrison County benefits from its relationship with many other governmental agencies, for example the Coast Transit Authority and the Mississippi Department of Transportation both of which make it easier for citizens of Harrison County to get around.	112
Background Assessment	Figure B-1. Open-range grazing of sheep was common in Northern Harrison County in the 1800s.	113
	Figure B-2. The Batson and Hatten Lumber Company was the largest sawmill in the world.	113
	Figure B-3. The Saucier family moved from the coast to create a settlement further inland.	114
