

Covid-19 Vaccinations:

Your best shot at stopping COVID-19.

YOU HAVE A
SPOT. | TAKE YOUR
SHOT.

You have a spot, take your shot. A tested, safe and effective vaccine will be available to all who want it, but supplies will be limited at first. To save lives and slow the spread of COVID-19, independent state and federal public health advisory committees recommend first protecting health care workers caring for patients with COVID-19, people who are at the highest risk of being hospitalized or dying, and those at high risk of exposure to COVID-19. Keep practicing the 3 W's—wear a mask, wait six feet apart, wash your hands—until everyone has a chance to get vaccinated.

1a
Health care workers fighting COVID-19 & Long-Term Care staff and residents.

- Health care workers caring for and working directly with patients with COVID-19, including staff responsible for cleaning and maintenance in those areas
- Health care workers administering vaccine
- Long-term care staff and residents—people in skilled nursing facilities and in adult, family and group homes

1b
Adults 75 years or older and frontline essential workers.

There is not enough vaccine for everyone in this phase to be vaccinated at the same time. Vaccinations will be available to groups in the following order.

- **Group 1:** Anyone 75 years or older, regardless of health status or living situation
- **Group 2:** Health care workers and frontline essential workers 50 years or older*
- **Group 3:** Health care workers and frontline essential workers of any age

** The CDC defines frontline essential workers as first responders (e.g., firefighters and police officers), corrections officers, food and agricultural workers, U.S. Postal Service workers, manufacturing workers, grocery store workers, public transit workers, and those who work in the education sector (teachers and support staff members) as well as child care workers*

2
Adults at high risk for exposure and at increased risk of severe illness.

Vaccinations will happen by group in the following order:

- **Group 1:** Anyone 65-74 years old, regardless of health status or living situation
- **Group 2:** Anyone 16-64 years old with high-risk medical conditions that increase risk of severe disease from COVID-19 such as cancer, COPD, serious heart conditions, sickle cell disease, Type 2 diabetes, among others, regardless of living situation
- **Group 3:** Anyone who is incarcerated or living in other close group living settings who is not already vaccinated due to age, medical condition or job function
- **Group 4:** Essential workers not yet vaccinated*

** The CDC defines these as workers in transportation and logistics, water and wastewater, food service, shelter and housing (e.g., construction), finance (e.g., bank tellers), information technology and communications, energy, legal, media, and public safety (e.g., engineers), and public health workers*

3
Students

- College and university students
- K-12 students age 16 and over. Younger children will only be vaccinated when the vaccine is approved for them

4
Everyone who wants a safe and effective COVID-19 vaccination.
