H. Construction Meter, Construction Meter Delay Fee.

The applicant shall install a construction meter for all proposed buildings with service lines 2-inches or larger. The JCMUA shall supply the construction meter. The construction meter shall be installed with a reduced pressure principle backflow preventer ("RPZ") indoors or in a protected meter pit or meter box that prevents the RPZ from freezing and shall be connected by a temporary line that is tapped into or connected to the service line for the proposed building downstream from the curb gate valve. Applicant shall pay \$1,000 for the construction meter's use. Of the \$1,000, \$500 will be a deposit for the meter and the other \$500 shall be deposited in a drawdown account for billing purposes. The drawdown account, and when necessary, the deposit shall be charged for water use and for any damages to the construction meter.

New Rate \$1,100.00

Once construction is completed, the meter shall be returned to the JCMUA, the temporary line and RPZ completely removed, and any temporary tap into the service line closed with a stainless steel clamp with rubber gasket and stainless steel bolts or other apparatus approved by the JCMUA. Upon approval, the \$500 deposit will be returned plus any unused balance in the drawdown account.

New Rate \$600.00

If a property is found to have tapped into the service line or other Water System source without a JCMUA supplied construction meter connected, the property owner shall be charged a delay fee of \$50 per day back to the date the service line for that property was tapped into the Water
