1. Water measurements shall be used to determine consumption to compute sewer consumption rates unless a sewage meter is installed. Sewage shall be billed as 75 percent of the culinary water usage, as measured by the water meter, with the exception of Utah State University who is billed 100% of the culinary water usage in lieu of charging base rates.

2. If a facility has a sewage meter, sewage will be billed based on the amount of sewage recorded by the sewage meter, but no less than the applicable Commercial Fixed Monthly Charge.
3. Commercial irrigation-only water meters shall not be billed sewer consumption charges.
4. Upon application to and approval by the Public Works Director, and with adequate justification, commercial users who use a substantial amount of culinary water for irrigation purposes and who do not have a separate irrigation-only water meter may be granted the irrigation rate adjustment. The irrigation rate adjustment will be based on winter usage (November through April) and will be computed each year. Users applying for this rate adjustment must have at least one acre of irrigated grounds to qualify for this rate adjustment.
5. Utah State University sewage bill shall be computed from water consumption recorded from all USU water sources.
