

Project #20-059
Foothill Residential Subdivision (25 Lot)
Located at approx. 1250 N. 1300 E.

REPORT SUMMARY...

Project Name: Foothill Residential Subdivision (25 Lot)
Proponent/Owner: Nic Porter / Foothill Lofts Residential LLC
Project Address: 1250 N. 1300 E.
Request: 25-lot subdivision
Current Zoning: NR-4
Date of Hearing: December 10, 2020
Type of Action: Quasi-Judicial
Submitted By: Russ Holley, Senior Planner

RECOMMENDATION

Staff recommends that the Planning Commission **conditionally approve** a single family subdivision of approximately 8.37 acres located at approximately 1250 N. 1300 E. (TIN# 05-011-0005)

Land use adjoining the subject property

<i>North:</i>	NR-4: Vacant	<i>East:</i>	NR-4: Residential Uses
<i>South:</i>	NR-4: Religious Uses	<i>West:</i>	MR-20: Multi-Fam. Residential Uses

PROJECT INTRODUCTION

The proponent is requesting a 25-lot single-family subdivision. The square-shaped property slopes slightly downward from east to west and sits between older single-family homes to the east and the new Foothill Lofts apartments to the west. To the south, sits two churches and partially vacant land is downslope to the north. The proposal shows lot sizes ranging from 10,004 SF to 12,531 SF. The layout creates an inner block with an outer perimeter of lots accessed by a looping 60' wide road. The proposed layout shows three (3) street connections onto 1300 East and a storm water retention area along the west border.

Figure 1 shows the 25-lot proposal on the 8.37-acre property Project #20-059 Foothill Residential Subdivision

BACKGROUND INFORMATION & GENERAL PLAN

This 8.37-acre piece was part of the 19.36-acre property that was historically used for gravel extraction in association with the Legrand Johnson Construction Company. The split zoning designations of Mixed Residential Medium (MR-20) and Suburban Neighborhood Residential (NR-4) was established in July of 2017 with the Logan City Council ORD# 17-17, approving 9.0 acres of MR-20 (180 dwelling units) and the remaining ~10 acres as NR-4 single-family residential zoning. With the construction of the foothill lofts apartment complex on the 9 acres and the street dedication of 1300 East, the remaining 10-acre NR-4 area became 8.37 acres in size. This area was approved for a 19-lot single-family subdivision with 60' streets and 10,000 SF minimum lot sizes in September of 2018 and has since expired. Most recently, the Logan City Council denied a rezone request from this applicant from NR-4 to NR-6 on July 7, 2020. The Future Land Use Plan (FLUP), within the Logan City General Plan, identifies this property as Detached Residential (DR) which are described as single-family home developments.

DENSITY

The Logan City Land Development Code (LDC) 17.07.050 NR-4 zoning district allows up to four (4) units per acre and a 10,000 SF minimum lot size and a 90-foot minimum lot width. The proposed subdivision has a gross density of 2.98 units per acre and lot sizes in the subdivision range from 10,004 SF to 12,531 SF. Lot widths are shown at 90' wide or greater (measured at the midpoint between the front and rear lot line). As conditioned, the subdivision meets the minimum standards in the LDC.

SETBACKS

The LDC requirements for building setbacks in both the NR-4 zones are as follows (as measured from property lines):

- Front: 25'
- Corner: 20'
- Side: 8'
- Rear: 10'

As new homes are proposed on individual lots, setbacks will be reviewed and approved by City staff prior to issuing a building permit.

STREETS

The proposed 60' wide street rights-of-way meet the recently adopted Logan City Standards and Specifications. The LDC requires 3 points of connection for subdivisions greater than 20 lots. LDC 17.30.070 outlines standards for block layout, street stubbing and neighborhood connectivity. The subdivision proposes 3 points of connection onto 1300 East. The other three sides of this development are already developed and did not provide street stubs for connection opportunities. Topography is a challenge to the north.

Table 17.30.170.E.2: Minimum Number of Street Connections by Size of Residential Development

Number of Dwelling Units Served	Number of Connections
Greater than 20	3
9-20	2
1-8	1

Figure 2 shows the LDC Street Connection Requirements for Residential Developments

The Logan City Public Works Standards and Specifications states that unsignalized full movement access/intersections do not have a minimum spacing for the Local Residential Street Cross Section category. The proposed three (3) street connections onto 1300 East for this subdivision are spaced apart approximately 130 feet on the north and 120 feet on the south intersection.

AGENCY AND CITY DEPARTMENT COMMENTS

Comments were solicited from the following departments or agencies:

• Fire	• Water/Cross Connection
• Engineering	

PUBLIC COMMENTS

No comment has been received at the time this report was prepared.

PUBLIC NOTIFICATION

Legal notices were posted on the City's website and the Utah Public Meeting website on 12/2/20, and Legal notices published in the Herald Journal on 11/28/20 and a Public Notice mailed to property owners within 300' were sent on 11/20/20.

RECOMMENDED CONDITIONS OF APPROVAL

1. All standard conditions of approval will be recorded with the Subdivision Permit and are available in the Community Development Department.
2. 25 lots are approved with this subdivision permit.
3. Three (3) street connections are required for this subdivision permit.
4. All lots on the final plat shall be a minimum 10,000 SF and 90 feet wide.
5. Street trees shall be provided on both sides of all streets every 30' on center.
6. Fencing shall comply with the LDC and receive a permit prior to installation.
7. The final plat shall be recorded within one (1) year of this action or comply with LDC 17.58 Expirations and Extensions of Time.
8. Prior to recording of a Final Plat or issuance of a Building Permit, the Director of Community Development shall receive a written memorandum from the following departments indicating that their requirement has been satisfied:
 - **Fire —contact 716-9515**
 - Place hydrants within 600 feet of all buildable area of all lots.
 - **Engineering —contact 716-9153**
 - Provide water shares for or an in-leu fee for both indoor and outdoor demands of development.
 - Road width, pavement sections, and accesses to comply with new City design standards if roads are considered public right of way.
 - Provide storm water detention/retention per Logan City Storm Water Design Standards. This includes the onsite retention of the 90% storm event using Low Impact Design methods.
 - Provide storm water and private utility agreements as required.
 - **Water/Cross Connection—contact 716-9627**
 - All landscape irrigation system's fed from Logan City water must have a high hazard backflow assembly installed and tested. No dual source feed systems allowed without Logan Cities prior approval and installation criteria (RP & swing joint) is met and inspection is passed.
All backflow assemblies must be tested within 10 days of turning in water to them and annually thereafter.
 - Water meter setters must meet City standards.
 - All points of use of water must comply with the 2018 IPC and State of Utah Amendments, during and after construction.
 - **Environmental —contact 716-9760**
 - Residential carts will be provided

FINDINGS FOR APPROVAL FOR THE SUBDIVISION PERMIT

1. The conditioned subdivision meets the requirements in the LDC.
2. The conditioned subdivision meets the goals and objectives for the NR-4 zone in the LDC and the General Plan.
3. The surrounding streets and infrastructure can adequately service the proposed development.
4. As conditioned with Engineering standards the development meets standards and specifications.

APPLICATION FOR PROJECT REVIEW

Planning Commission **Land Use Appeal Board** **Administrative Review**
