# Level of Unassigned Fund Balance

General Fund Unassigned Fund Balance as a Percentage of Annual Revenues

The level of unassigned fund balance is an indication of the amount of unexpended and available resources the government has at a given point in time to carryover into the next fiscal year to fund budgetary emergencies, shortfalls, or other unexpected needs.

# Sales Tax, Meals Tax, Other Local Tax Growth

Sales tax, meals tax and other local tax growth is a measure of the state of the local economy by comparing revenue collected in the prior year to the current year.

# MCPS Intergovernmental Support

What are the sources of the City school's intergovernmental support?

Beginning in fiscal year 2022, the local transfer to MCPS no longer includes debt service funding, as this is now being accounted for in the City's debt service fund. The total amount transferred to the City's debt service fund for MCPS' current and future debt service in fiscal year 2022 is \$6,082,905.

# Change in Net Position

Net position includes all assets of the City except for fiduciary funds held for the benefit of others and component units. It is measured as the difference between total assets, including capital assets, deferred outflows of resources, total liabilities, including long-term debt and deferred inflows of resources.

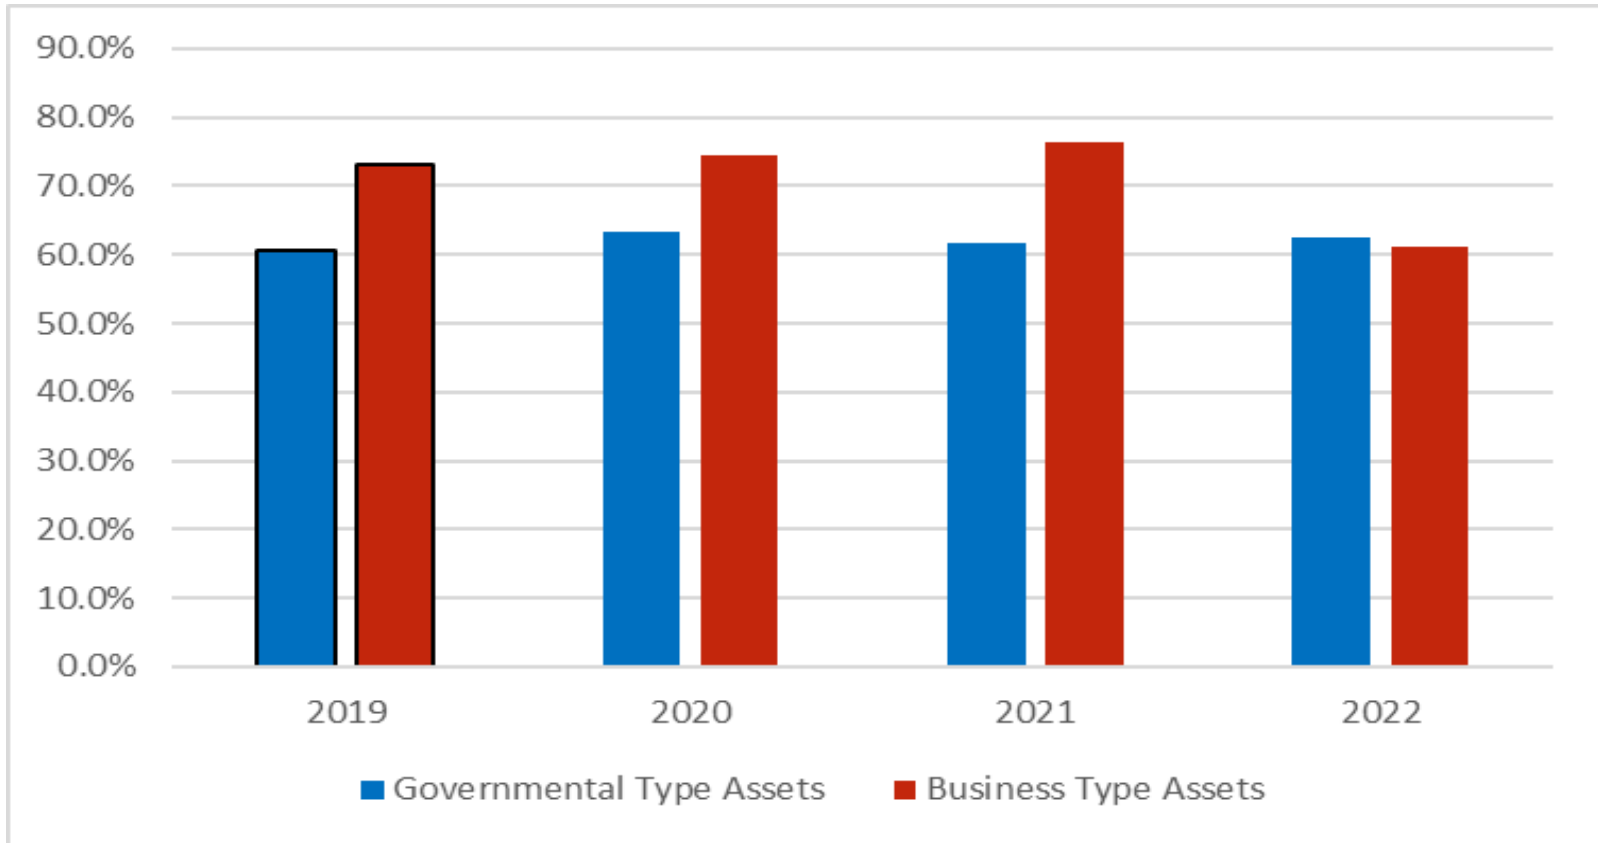

For 2022, total net position increased by \$52.7 million or 11.1% from the prior year. This increase is primarily a result of increases in other local taxes and increases in operating and capital grants.

CPAs | CONSULTANTS

# Assets to Liabilities

Percentages of Equity

The assets to liabilities ratio measures the extent to which the government has funded its assets with debt and other liabilities. The higher the percentage, the more equity the government has in its assets.

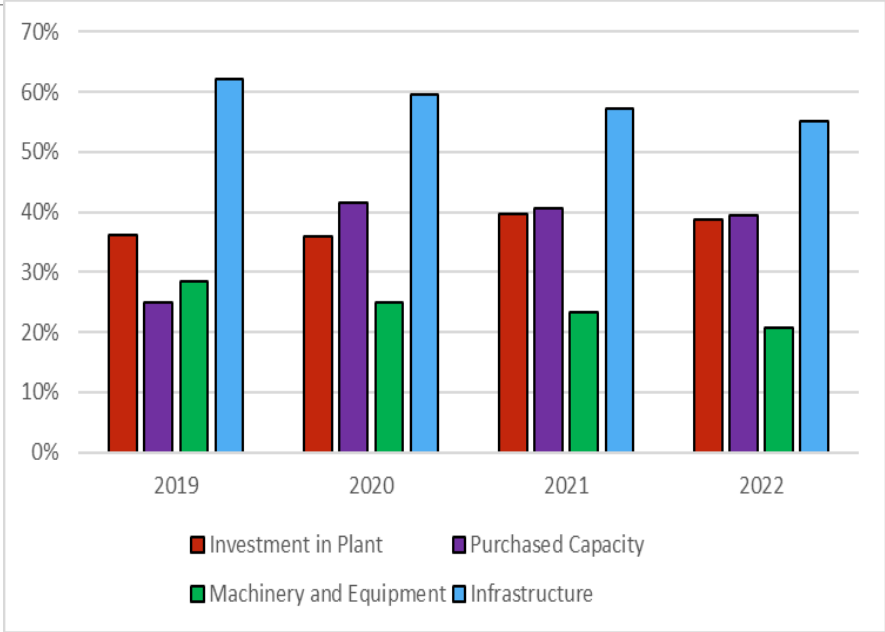

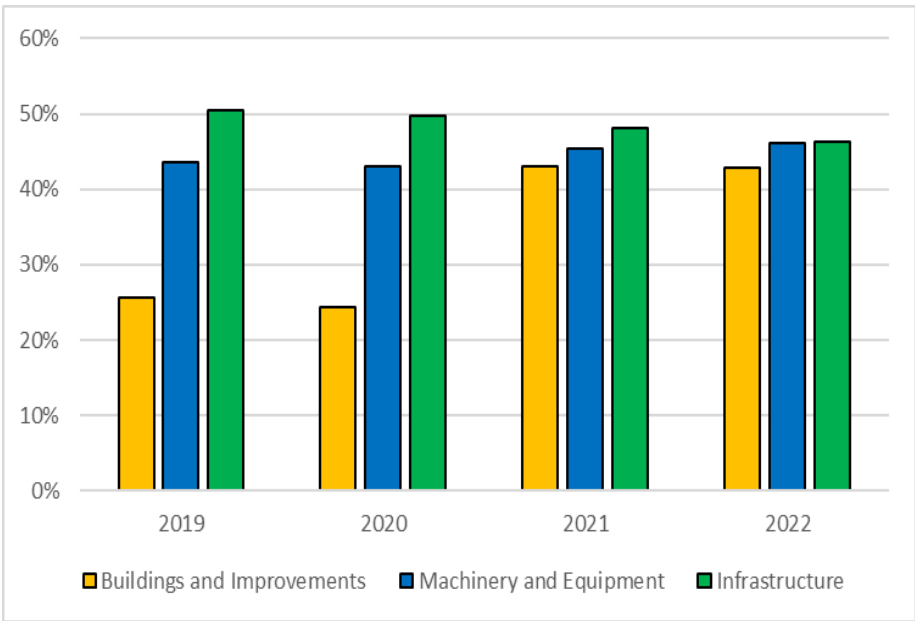

CPAs | CONSULTANTS

# Capital Asset Condition – Primary Government

How much useful life is remaining in the City’s capital assets?

Percentage of Capital Assets’ Useful Life Remaining – Governmental Activities

Percentage of Capital Assets’ Useful Life Remaining – Business-type Activities

The capital asset condition ratio compares depreciable capital asset cost to accumulated depreciation to determine the overall percentage of useful life remaining. A low percentage could indicate an upcoming need to replace a significant amount of capital assets.
