

MS4 Program Plan:

The MS4 (municipal separate storm sewer system) Program Plan is a regulatory framework that describes all programs and actions taken by the City to ensure compliance with Virginia Stormwater Management Program (VSMP) MS4 Permit #VAR040063. This plan is a single document outlining policies, ordinances, strategies, checklists, and other documents detailing the various programs the City establishes to meet permit requirements and is considered an enforceable document under the state permit. This program has been designed to reduce the discharge of pollutants to the “maximum extent practicable.”
