MAPLETON UTAH

Home, Heritage, Happiness

Mayor's Message

We are honored to announce Jim and Mary Fojtek as the Grand Marshals for our Pioneer Days Celebration. Jim is originally from Port Neches, a small community in southeast Texas, and Mary was raised right here in Mapleton. They met in Washington, D.C., while Jim was stationed with the Air Force at Joint Base Andrews-Naval Air Facility Washington and Mary was working with the Peace Corps in its administrative office. They were married after Jim returned from the Vietnam War.

Jim and Mary have five children born at four different Air Force bases around the United States. They also have 12 grandchildren and one great-grandchild, with two more coming in the fall. They have lived in Texas, Illinois, Florida, and Colorado. Jim's final assignment was at Hill Air Force Base, and he retired after 22 years of service. In 2011, the Fojteks decided to retire in Mapleton, in the home Mary was raised in on 800 North (her great-grandfather, Richard Lovell Mendenhall Sr. built the home in 1878, and it's one of the oldest homes in Mapleton).

Jim and Mary have been involved in various facets of our community. Most recently, Mary served as the chair of the Mapleton Historical Society Committee. Jim and Mary were instrumental forces in bringing our Historic Old Towne Square in Mapleton City Park to fruition. We appreciate the Fojteks' great contributions to our community, and we are honored to recognize their legacy at our Pioneer Days Celebration.

- Mayor Dallas Hakes

Parks and Recreation

Happening Now

Check out our NEW web page at <https://mapleton.org/parksandrec> for information on registration, sports programs, venues, and more.

Concerts in the Park

Starts Mon., July 4 at Mapleton City Park. See the enclosed flyer for details.

Fall Sports Registration

Online registration for flag football and soccer is open July 1-23. Register early to secure your spot!

Taste in Music Class

Join us for a new semester of Taste in Music, taught by Cynthia Hart! This time, topics will include Jazz, Baroque Masters, Movie Theme music from 1970-present, World Music, Musical Theatre for all, and Opera you will actually like. Each class is paired with a gourmet dessert from local artisans. This class is especially designed for teens and adults. Online registration opens July 5.

Save the Date!

Pioneer Days Celebration - July 16-23, 2022

Registration for the helicopter Ping Pong Drop is now available at the Mapleton City Building. Online registration for our tournament events (pickleball, cornhole, kickball, and 5K/Fun Run) and parade entries closes July 10.

Do you love humanitarian work? Do you have a favorite project you work on? If you would like to be a project sponsor at the Humanitarian Fair on July 23, please contact Michelle Estes at 801-885-8223.

Moonlight Half Marathon - September 9, 2022

Walk or run under the light of the moon. Proceeds from race entry fees go towards completing the next section of the trail, adding new amenities, and maintenance. Enter now at <https://www.raceentry.com/races/moonlight-half-marathon/2022/register>

Follow Us on Social Media!

Mapleton Parks and Recreation

Farmers Market

Join us at Mapleton City Park for the Mapleton Farmers Market! Monday evenings starting July 25 through the end of September from 6:00 - 8:30 pm. Fresh produce, local crafts and great music!

Mapleton Seniors

No Luncheon This Month

There will be no luncheons in July or August. We will see you all again in September!

Senior Gym Hours

Monday 8:00am-11:00am, 3:00pm-5:30pm

Tuesday 8:00am-11:00am, 3:00pm-5:30pm

Wednesday 8:00am-11:00am, 3:00pm-5:30pm

Thursday 8:00am-11:00am, 3:00pm-5:30pm

Friday 8:30am-11:00am, 3:00pm-5:00pm

Closed holidays

If you would like a tour of the Senior Gym, are available to volunteer, or have any questions, please contact Peggy Burt at 385-685-8331.

\$6 Hot Dog Dinner Fundraiser

Fri. July 22, 6:00-8:00pm | Mapleton City Park

Come support our annual humanitarian fundraiser dinner. Enjoy a hot dog, baked beans, watermelon, chips, and bottled water for only \$6.00 a plate in our beautiful Mapleton City Park.

This dinner is sponsored by the Mapleton Senior Citizens Committee. All proceeds will go to the Seniors' humanitarian fund to support local projects like Mapleton Police Department's Shop with a Cop event, Mapleton Fire Department's Sub for Santa, our local schools, and other worthwhile projects.

Facebook Page

Join our Facebook Page for the most up to date information on luncheons, senior events, gym times, and activities. <https://bit.ly/31K1OnB>.

Senior Committee

The Senior Committee is always looking for volunteers to help plan monthly activities and staff the Senior Gym. Join us every first Thursday of the month at 9:30am in the Multipurpose Room at the City Building.

Citizen Survey

Mayor Hakes and the Mapleton City Council invite you to participate in a citizen survey to help us better understand and contextualize the Mapleton experience. Let your voice be heard!

The first 100 residents to complete the 10-minute survey will receive a \$10 Amazon e-card (only one allowed per household). Visit <https://t2m.io/NDoYU-wVs> or scan the QR code to participate.

Towne Square Committee

Mapleton's Driving and Walking Tours

Photos and information compiled by Daughters of Utah Pioneers – Camp Union. Although these are not all the early homes, these are some of the oldest ones that are still standing and recognizable today. Here are maps of the two Mapleton Heritage Homes tours:

Walking Tour: <https://www.google.com/maps/d/u/0/edit?mid=1fzIEw7snLOnYPHI6VXypi-TQw4rWT7op&usp=sharing>

Driving Tour: https://www.google.com/maps/d/u/0/edit?mid=1exgO5NxlnCzu4vQAnDmmy4joCkHji_J&usp=sharing

Historic Video Premiere

Join us at the Barn Raising event on Fri., July 22 at 6:00pm at Mapleton City Park for the preview of a historic video we have been working on to document Mapleton's history. The video will also be shared on the Mapleton City YouTube channel for continual public viewing.

Public Safety

Pioneer Days

We are excited to see everyone out for our Pioneer Days activities. The police department is working to make sure everyone has a safe and enjoyable Pioneer Days experience.

Please take a minute to look through the upcoming Pioneer Day magazine to learn about altered traffic flows for events. Remember to leave early, watch for pedestrians, and have fun! The officers enjoy saying hello to kids and those they don't get to interact with often so don't be shy about chatting them up. Happy Pioneer Days!

Community CPR Classes

The next Community CPR class will be held on Sat., July 9 at 9:00am at the Mapleton Fire Station. The class costs \$55, and you will receive an American Heart Association BLS/CPR certification. To sign up, please contact Lorrie Dibble at 801-491-8048.

Blood Drive

Mapleton Fire & Rescue is hosting a blood drive from 10:00am-8:00pm on Fri., July 15 at the Mapleton City Building. Help us beat the Utah County blood drive record! 100 spots are available.

The blood drive will be by appointment only. To schedule an appointment, visit <https://redcrossblood.org> or scan the QR code. Use the sponsor code: EMS

City Council Corner

July is upon us which means family reunions, vacations, barbecuing, swimming, and long summer nights. Amidst the fun and craziness that comes with the summer months, I hope we also find the time to talk with our families about gratitude. Gratitude for those who risked and gave their lives for the founding of our country. Gratitude for the pioneers' work and sacrifices to establish our beautiful state and wonderful community of Mapleton.

President Ronald Reagan said, "Each generation goes further than the generation preceding it because it stands on the shoulders of that generation." This quote builds on Sir Isaac Newton's description of past generations standing on "the shoulders of Giants."

It is the responsibility of each generation, of course, to build upon the progress of past generations and make a better future for the coming generations. We take this responsibility seriously as we make decisions affecting Mapleton now and in the future. This month, let's be intentional and set aside time to ponder and celebrate our freedoms, heritage, and the sacrifices given to bless us today.

-Councilmember Kasey Beck

MAPLETON

UTAH

2021 Annual Drinking Water Quality Report Mapleton City

We are pleased to present to you this year's Annual Drinking Water Quality Report. This report is designed to inform you about the quality of the water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water sources have been determined to come from a mixture of ground water wells and springs in Maple Canyon.

The Drinking Water Source Protection Plan for Mapleton City is available for your review. It contains information about source protection zones, potential contamination sources and management strategies to protect our drinking water. Our sources have been determined to have a low level of susceptibility from potential contamination. We have also developed management strategies to further protect our sources from contamination. Please contact us if you have questions or concerns about our source protection plan.

There are many connections to our water distribution system. When connections are properly installed and maintained, the concerns are very minimal. However, unapproved, and improper piping changes or connections can adversely affect not only the availability, but also the quality of the water. A cross connection may let polluted water or even chemicals mingle into the water supply system when not properly protected. This not only compromises the water quality but can also affect your health. So, what can you do? Do not make or allow improper connections at your homes. Even that unprotected garden hose lying in the puddle next to the driveway is a cross connection. The unprotected lawn sprinkler system after you have fertilized or sprayed is also a cross connection. When the cross connection is allowed to exist at your home, it will affect you and your family first. If you would like to learn more about helping to protect the quality of our water, call us for further information about ways you can help.

We are pleased to report that our drinking water meets federal and state requirements.

This report shows our water quality and what it means to you, our customer. If you have any questions about this report or concerning your water utility, please contact Brad Roundy at 801-489-6253. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first and third Wednesday of each month at 6:00 pm, at the Mapleton City Offices.

Mapleton City routinely monitors for constituents in our drinking water in accordance with the Federal and Utah State laws. This following table shows the results of our monitoring for the period of January 1st to December 31st, 2021. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In the following table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we have provided the following definitions:

Non-Detects (ND) - laboratory analysis indicates that the constituent is not present.

ND/Low - High - For water systems that have multiple sources of water, the Utah Division of Drinking Water has given water systems the option of listing the test results of the constituents in one table, instead of multiple tables. To accomplish this, the lowest and highest values detected in the multiple sources are recorded in the same space in the report table.

Parts per million (ppm) or Milligrams per liter (mg/l) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter (ug/l) - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

Parts per trillion (ppt) or Nanograms per liter (nanograms/l) - One part per trillion corresponds to one minute in 2,000,000 years, or a single penny in \$10,000,000,000.

Parts per quadrillion (ppq) or Picograms per liter (picograms/l) - One part per quadrillion corresponds to one minute in 2,000,000,000 years or one penny in \$10,000,000,000,000.

Picocuries per liter (pCi/L) - Picocuries per liter is a measure of the radioactivity in water.

Millirems per year (mrem/yr) - Measure of radiation absorbed by the body.

Million Fibers per Liter (MFL) - Million fibers per liter is a measure of the presence of asbestos fibers that are longer than 10 micrometers.

Nephelometric Turbidity Unit (NTU) - nephelometric turbidity unit is a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

Action Level (AL) - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The “Maximum Allowed” (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The “Goal” (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Date- Because of required sampling time frames i.e., yearly, 3 years, 4 years and 6 years, sampling dates may seem outdated.

Waivers (W)- Because some chemicals are not used or stored in areas around drinking water sources, some water systems have been given waivers that exempt them from having to take certain chemical samples, these waivers are also tied to Drinking Water Source Protection Plans.

2021 Test Results

Contaminant	Violation Y/N	Level Detected ND/Low-High	Unit Measurement	MCLG	MCL	Date Sampled	Likely Source of Contamination
Microbiological Contaminants							
Total Coliform Bacteria	N	1	N/A	0	Presence of coliform bacteria in 5% of monthly samples	2021	Naturally present in the environment.
E. coli	N	N/A	N/A	0	If a routine sample & repeat sample are total coliform positive, & one is also fecal coliform or E. coli positive	2021	Human and animal fecal waste.
Lead and Copper							
Copper a. 90% results b. # of sites that exceed the AL	N	a. 0.165 b. 0	ppm	1.3	AL=1.3	2021	Erosion of natural deposits; Leaching from wood preservatives; Corrosion of household plumbing systems.
Lead a. 90% results b. # of sites that exceed the AL	N	a.1.8 b.0	ppb	0	AL=15	2021	Corrosion of household plumbing systems, erosion of natural deposits.
Inorganic Contaminants							
Arsenic	N	ND-1.2	ppb	0	10	2019	Erosion of natural deposits, Runoff from orchards, Runoff from glass & electronics production wastes.
Barium	N	.045-.097	ppm	2	2	2019	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits.
Fluoride	N	0.106	ppm	4	4	2019	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Nitrate	N	0-2.438	ppm	10	10	2021	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits.
Selenium	N	ND-6.4	ppb	50	50	2019	Discharge from petroleum and metal refineries; erosion of natural deposits; discharge from mines.
Sodium	N	3.778-39.884	ppm	500	None	2019	Discharge from petroleum and metal refineries; Erosion of natural deposits; Discharge from mines.
Sulfate	N	25.708-101.366	ppm	1000	1000	2019	Erosion of natural deposits; discharge from refineries & factories; runoff from landfills, runoff from cropland.
TDS (Total Dissolved solids)	N	180-456	ppm	2000	2000	2019	Erosion of natural deposits.
Radioactive Contaminants							
Alpha emitters	N	.31-1.1	pCi/L	0	15	2019	Erosion of natural deposits.
Radium 228	N	ND-.59	pCi/L	0	5	2019	Erosion of natural deposits.
Turbidity							
Turbidity	N	0.32-0.98	NTU	0	0.3	2019	Soil Runoff.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. We cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

All sources of drinking water are subject to potential contamination by constituents that are naturally occurring or man-made. Those constituents can be microbes, organic or inorganic chemicals, or radioactive materials. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

MCLs are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice from their health care providers about drinking water. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline 1-800-426-4791.

At Mapleton City, we work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.
