Z83 - James/Camden Reconstruction Project

OVERVIEW

The City of Marshall has contracted Kuechle Underground of Kimball, MN to reconstruct James Avenue from Camden Drive to South 4th Street and Camden Drive from James Avenue to South 4th Street.

PROJECT DETAILS

The project includes excavation of the existing roadway, replacement of the sanitary sewer, water main, storm sewer, new pavement and sidewalk. New water and sewer service lines will be installed to each property from the main line in the street to the property line of each property. Storm sewer main will also be replaced through the golf course to outlet at the Redwood River.

PROPERTY OWNER CONSIDERATIONS

The Public Works Division and Contractor will strive to minimize disruption to the property owners along the construction project. Unfortunately, there are times during construction where access to the street and driveways will be unavailable. During underground utility construction, the roadway will be inaccessible to traffic. The Contractor will coordinate with the residents when this will occur to allow for residents to make alternate parking/travel accommodations.

The Contractor will be allowed the entire right-of-way to perform their work. If there is landscaping or other belongings within the right-of-way that you would like to have preserved, please make arrangements to have these items relocated prior to construction commencing. Please contact Public Works staff if you are unsure if your landscaping will be affected.

It is the Contractor's responsibility to ensure accommodations for mail delivery and garbage pickup. There will likely be times where water service may be disrupted for short periods of time, typically 4-6 hours. The Contractor will be required to give 24-48 hours notice prior to disrupting your water service.

TIMELINE

Kuechle Underground is expected to begin work in the area during the week of May 24th. During that week, the Contractor is expected to perform tree removal, street reclamation and driveway removal. Gravel ramps will be provided to provide temporary access to driveways. Following that work, they are expected to continue with utility work starting with the storm sewer construction through the golf course. Watermain and sanitary sewer replacement on Camden Drive and James Avenue is expected to follow shortly afterwards. The Contractor is planning to work Monday thru Friday, sunrise to sunset. Saturday work is not expected but may be necessary dependent on construction progress.

PROJECT UPDATES

The City of Marshall Public Works Division will post project updates on its Construction Projects page on the City website. To access the page, you can use the camera on your smartphone to hover over the QR Code to the right. Click on the pop-up link and you will be directed to the Construction Projects page.
