

Statement of Evidence:

HISTORY
WEST QUARTER CORNER
SECTION 29, TOWNSHIP 101 NORTH, RANGE 32 WEST
MARTIN COUNTY, MINNESOTA

The Public Land Survey of Section 29, Township 101 North, Range 32 West of the Fifth Principal Meridian was run in 1857. A charred stake and a wooden post, witnessed by pits and a mound, were placed to mark the West Quarter corner of Section 29.

In June, 1937, (Survey No. 223-G-142) County Surveyor Geo. E. Sawyer located the corner by pits east and west. He then renewed the corner with crockery 21", 9x6x5 grey granite with chiseled cross 3" deep.

In August, 1990, a Bolton & Menk, Inc. survey crew found a grey granite stone with chiseled cross 14" deep and placed a 3/4"x12" iron pipe flush with north side of stone to mark the corner.

Analysis of record data and survey measurements support the position as a valid perpetuation of the Public Land Survey Corner.
