

### **Public Notice – Martin General Hospital Update**

Martin County Government in conjunction with some of the staff of Martin General Hospital met on August 3, 2023. This meeting was following the announcement by Quorum closing of the hospital. During this meeting, a plan was discussed in how to keep the Emergency Room of the hospital open. If the legalities can be resolved, this would help in providing emergency service while we await a decision on the Rural Emergency Hospital authorization. Martin County has a team of attorneys working to help us with the bankruptcy by Quorum. Martin County EMS with the assistance of East Care will still provide air medical service to surrounding hospital's if needed. We ask for your patience during this time. Martin County Commissioners remain committed in helping to making health care available to all of its citizens.
