

Board of Elections GIS Applications

By: Richard J. Kotapish, GISP

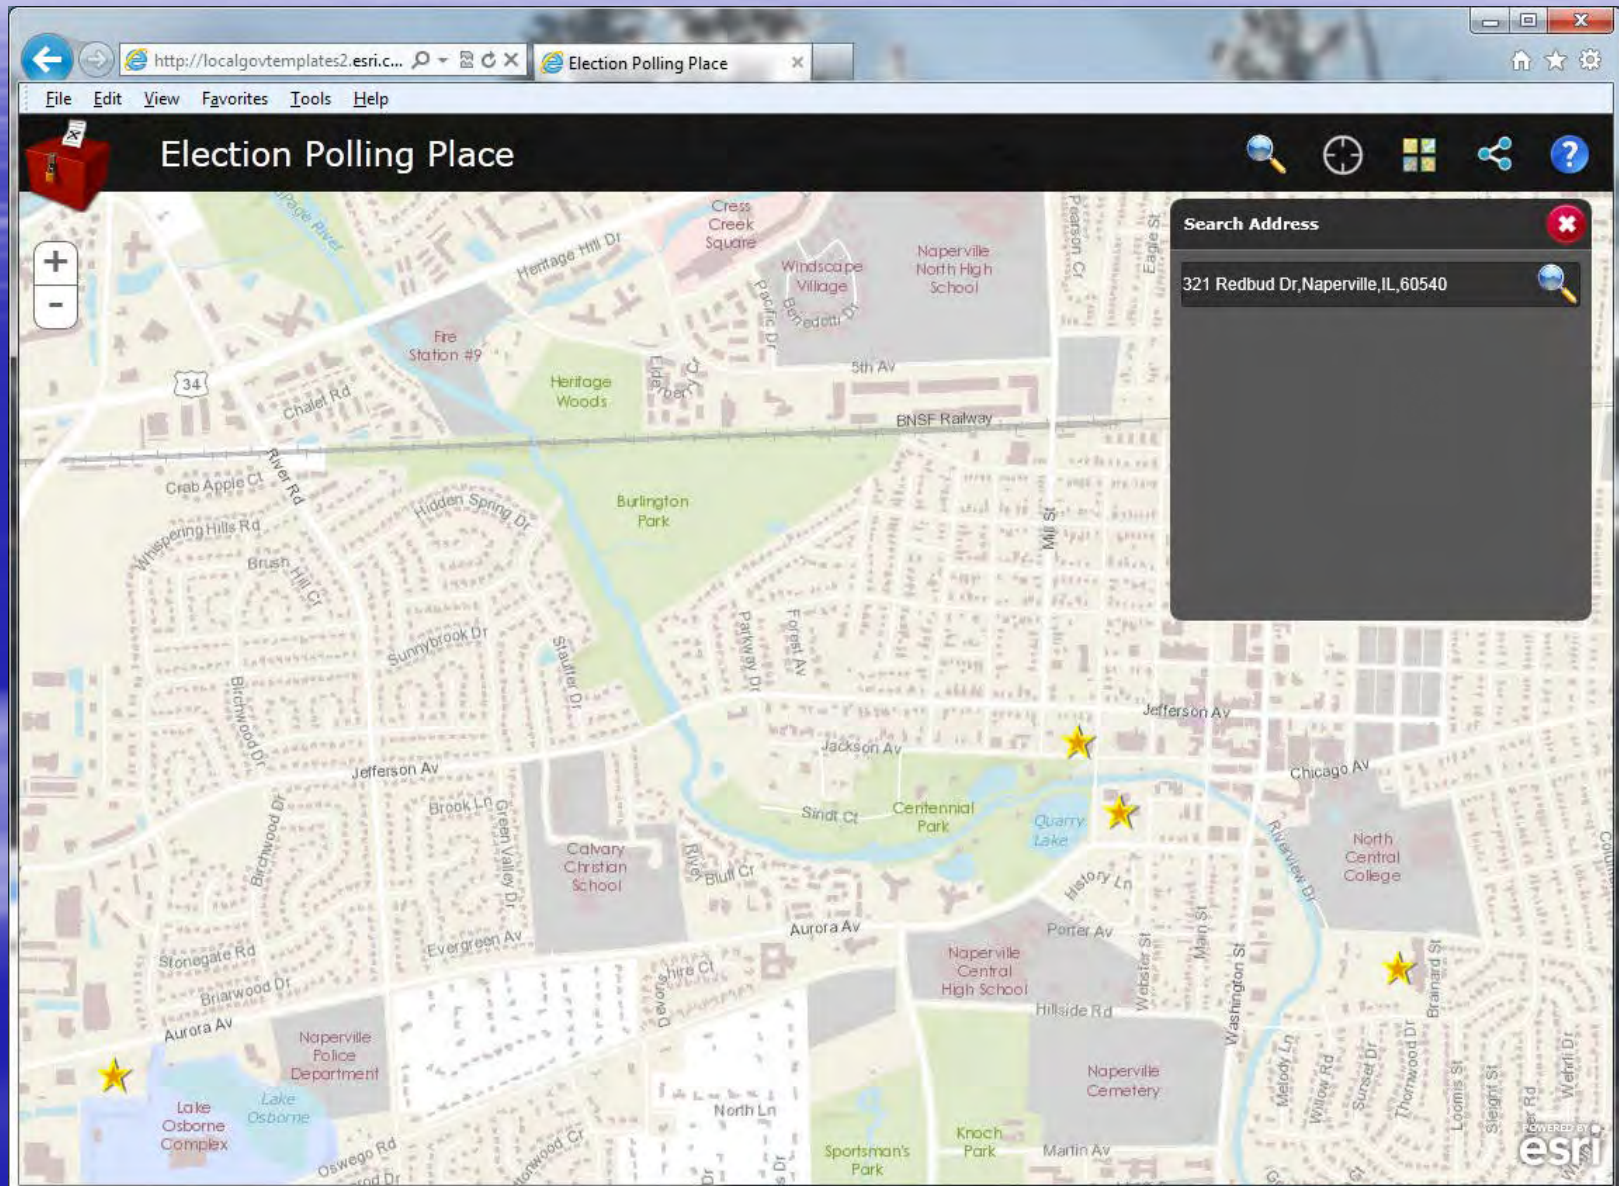

Polling Place Locator

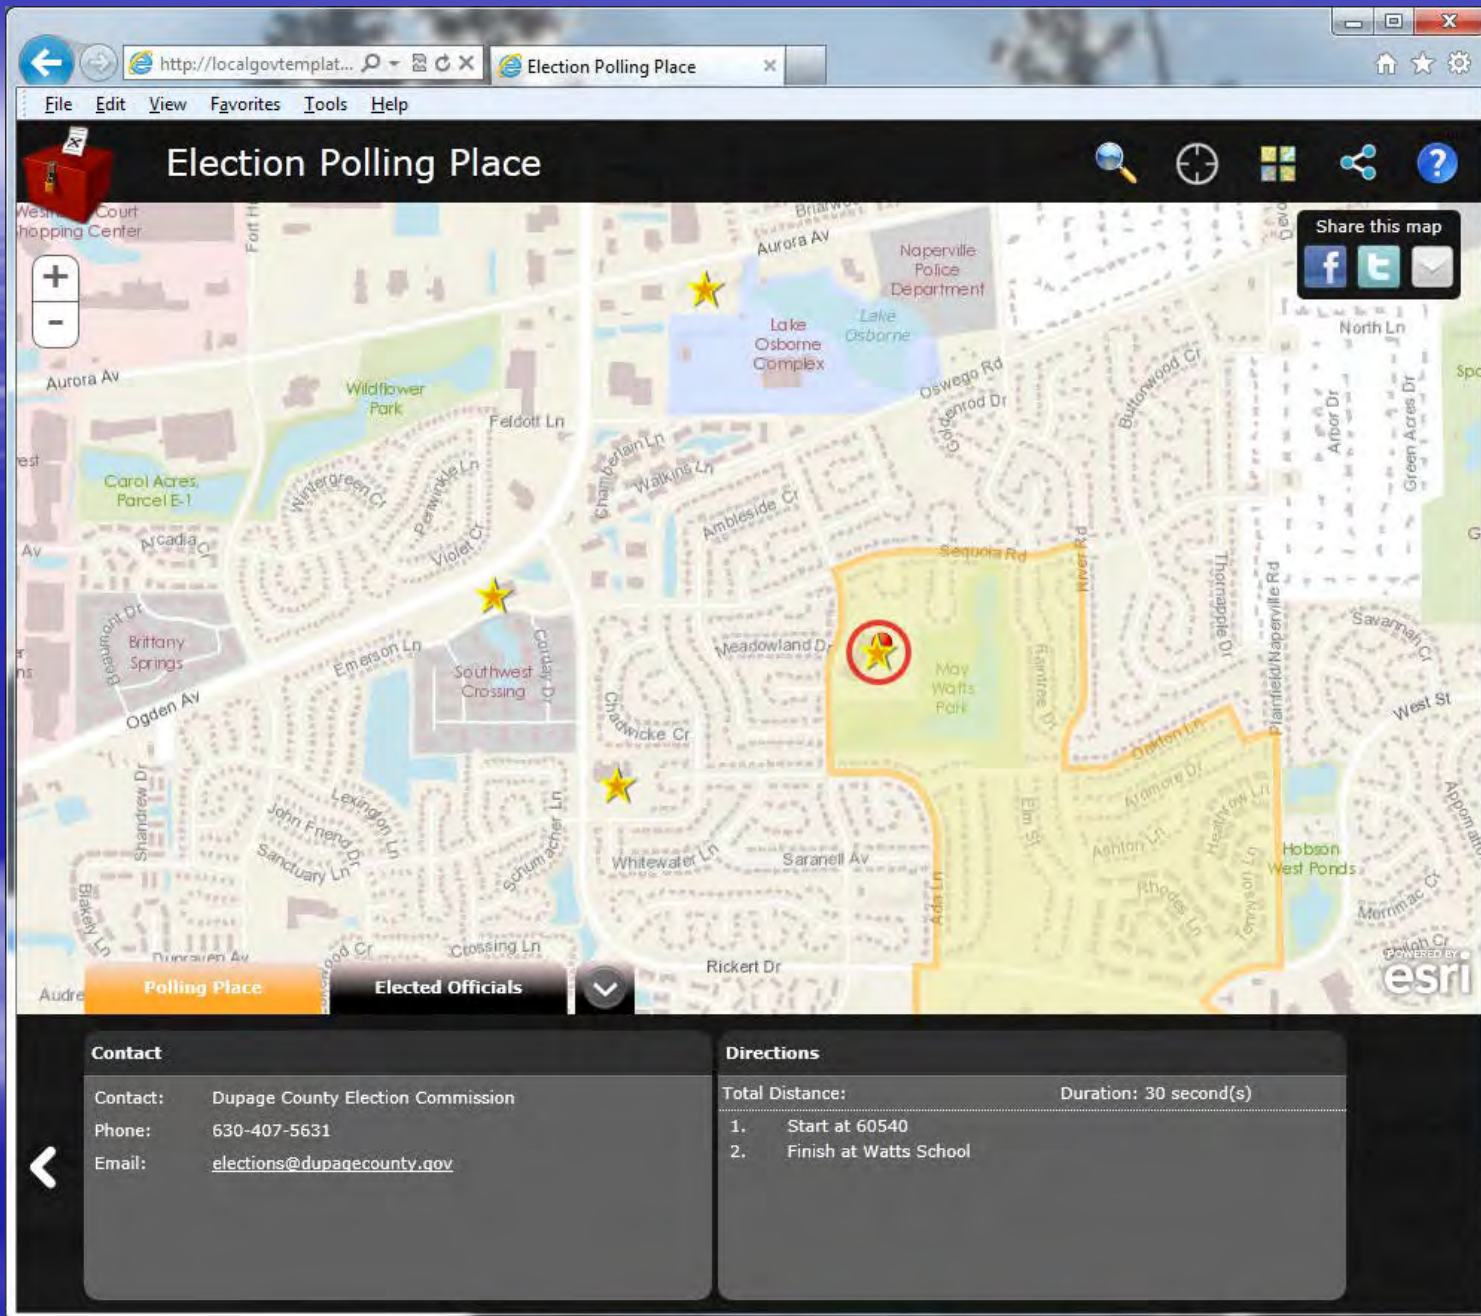

Polling Place Locator

This is an Internet-based application to provide information relative to the voting infrastructure of your County. This is an application that helps citizens locate their election polling place, view what precinct or ward they live in, comment on conditions at the polling place, and obtain information about current Board of Elections officials. It can be accessed and used by citizens on a desktop PC, mobile phone, and tablet device.

Election Results

Election Results

This is an Internet based application that provides election results information to the general public and other interested parties. This is an application that can be accessed by citizens on a desktop PC, mobile phone, and tablet device. It offers a map-based view of election results that allows users to locate an address or voting precinct and review election results that are summarized in a bar chart in the information panel at the bottom of the application and an information popup for each precinct.
