ADA TRANSITION PLAN FOR PUBLIC RIGHT OF WAY

Murray County's *ADA Transition Plan for Public Right of Way* is a document that will detail the transition from non-compliant curb ramps & pedestrian access routes to becoming compliant with the American's with Disabilities Act (ADA). The Public Right of Way Accessibility Guidelines (PROWAG) will be used to help direct efforts to meet the needs of the disabled community.

Previous Practices & History

Since the adoption of the ADA, Murray County has striven to provide accessible pedestrian features as part of the County's capital improvement projects. As additional information was made available as to the methods of providing accessible pedestrian features, Murray County updated their procedures to accommodate these methods.

Murray County has been constructing or replacing curb ramps along County Roads, usually in conjunction with reconstruction projects, since the mid-1990's. For the past few years, Murray County has also been replacing curb ramps when constructing overlay projects. Many of those ramps constructed during that time however, do not meet current ADA design requirements.

Murray County completed a self-assessment of curb ramps onto pedestrian access routes (sidewalks) in 2016 and many ramp locations were identified to be non-compliant. Sidewalks were not evaluated because it's been a long-standing Murray County policy that sidewalks are an abutting property owner's responsibility. These sidewalks are governed by individual city ordinances and each community has its own standards. The County doesn't enforce or administer sidewalk ordinances, standards or maintenance.

During the self-assessment survey, many sidewalks were found to be incomplete or in disrepair. The self-assessment completed in August 2016 is attached to this document as Appendix B. The self-assessment is a living document and will be updated regularly to incorporate the changes as they happen in a construction season.

On June 6, 2017, a meeting was held with stakeholders in Murray County to aid in the development of the ADA Transition Plan. Although all nine communities in Murray County were invited, none could make the meeting. Murray County also reached out to the general-public by placing a public hearing notice in both local papers and the County website. Those present at the meeting were the County Board of Commissioners, staff from the government center and highway department. The press was also in attendance.

A copy of this ADA Transition plan was sent to all nine Murray County communities on June 9, 2017. The next review of the ADA Transition plan is scheduled for July 11, 2017 at 10:30 AM in the Murray County Government Center. The County Board will make final edits and adopt the *ADA Transition Plan for Public Right of Way* at the meeting.

Policy

Murray County's goal is to continue to work with communities to provide accessible pedestrian design features as part of County's Capital Improvement Plan. The County has adopted Public Rights-of-Way Accessibility Guidance (PROWAG), as adopted by the Minnesota Department of Transportation (MnDOT), as its design standard. The PROWAG is attached as Appendix D. Murray County will ensure that all new or altered pedestrian facilities within the County's jurisdiction are ADA compliant to the maximum extent feasible.

Murray County will consider and respond to all accessibility improvement requests. All accessibility improvements that have been deemed reasonable will be scheduled consistent with County priorities. Construction and maintenance of pedestrian facilities within the County's public right of way will continue to follow the policies set forth by Murray County. Policies, practices and programs not identified in this document will follow the applicable ADA standards. Murray County follows its cost participation policy for County roads within communities. A copy of the *Cost Participation Policy for Construction and Maintenance on Municipal County State Aid Highways* is included as Appendix C.

Requests for accessibility improvements can be submitted to the County's ADA Title II Coordinator or the County's ADA Coordinator for Public Right of Way. Their contact information is listed below in this document.

Intersection Corners/Ramps

Curb ramps or blended transitions will attempted to be constructed or upgraded to achieve compliance within all capital improvement projects. There may be limitations which make it technically infeasible for an intersection corner to achieve <u>full</u> accessibility within the scope of any project. Those limitations will be noted and those intersection corners will remain on the transition plan. As future projects or opportunities arise, those intersection corners shall continue to be incorporated into future work. Regardless if full compliance can be achieved or not, each intersection corner shall be made as compliant as possible in accordance with the judgment of County staff.

Improvement Policy Based on Prioritization

Murray County recognizes that reconstruction of the non-compliant curb ramps & pedestrian access routes will be a considerable financial investment and must be balanced with other infrastructure needs and work throughout the county highway system. Murray County considers maximizing funding, removing the greatest restrictive barriers, and the routes most traveled by disabled citizens first while considering the infrastructure needs in those areas. Murray County intends on seeking additional funding/grants for stand-alone ADA improvement projects.

Murray County will utilize two methods for upgrading pedestrian facilities to the current ADA standards. The first and most comprehensive of the two methods are the scheduled street and utility improvement projects. Pedestrian facilities impacted by these projects will be upgraded to current ADA accessibility standards, or as technically feasible as possible. The second method is the stand-alone ADA accessibility improvement project. These projects will be on a case by case basis as determined by Murray County staff and available funding.

It is the intent of Murray County to address the non-compliant locations in the following general order recognizing deviation from this priority list may be beneficial to coordinate work and maximize funding. Locations to be address from top priority first (list on top) with decrease priority are as follows:

• ocations with sidewalk with full curb (no curb cut)

- Locations near facilities frequented by pedestrians with disabilities such as Senior Citizen centers, Hospitals and schools
- Locations near businesses
- Locations with drainage issues

Grievance Procedure

#

It is encouraged that anyone with a potential grievance make early contact with the County's ADA Title II Coordinator or the County's ADA Coordinator for Public Right of Way to informally discuss concerns. However, the public may file a formal grievance by submitting in writing the following. A copy of the Murray County Grievance Form is attached as Appendix A.

- Name, address, and phone number of the person filing the grievance.
- Name, address, and phone number of the person alleging the ADA violation if other than the person filing the grievance.
- A description and location of the alleged violation and the remedy sought.
- Information regarding whether a complaint has been filed with the Department of Justice or other federal or state civil rights agency or court.
- If a complaint has been filed, the name of the agency or court where the complaint was filed, and the date the complaint was filed.

The grievance will be either responded to or acknowledged within 10 working days of receipt. If the grievance filed does not concern Murray County, the grievant will be notified. If the grievance is related to Murray County public right of way, the information will be shared with County's ADA Coordinator for Public Right of Way. However, if the grievance is related to other County real estate, the information will be shared with the proper department in charge of the same, ie: Building Committee, Parks Committee, Fairgrounds Committee, Hospital, or other.

Within 60 calendar days of receipt, the ADA Title II Coordinator will conduct the investigation necessary to determine the validity of the alleged violation. If appropriate, the ADA Title II coordinator will arrange to meet with the grievant to discuss the matter and attempt to reach a resolution of the grievance. Any resolution of the grievance will be documented.

If a resolution of the grievance is not reached, a written determination as to the validity of the complaint and description of the resolution, if appropriate, will be issued by the ADA Title II Coordinator and a copy forwarded to the grievant no later than 90 days from the date of receipt of the grievance.

The grievant may appeal the written determination. The request for reconsideration shall be in writing and submitted to the ADA Title II Coordinator within 30 days after the initial determination. A final determination will be made within 90 days from the filing of the appeal.

ADA Title II Coordinator/ADA Coordinator for Public Right of Way

Murray County has designated:

Thomas Burke, Murray County Administrator as Murray County's ADA Title II Coordinator. The office for the County Coordinator is located at the Murray County Courthouse at 2848 Broadway Ave., PO Box 57, Slayton, MN 56172 Phone: 507-836-1148

Randy Groves, Murray County Highway Engineer as Murray County's ADA Coordinator for Public Right of Way. The office for the Highway Engineer is located at the Murray County Highway Department at 3051 20th St., Slayton, MN 56172 Phone: 507-836-6327, Fax: 507-836-8891

In accordance with 28 CFR 35.107(a), the Murray County has identified an ADA Title II Coordinator to oversee the County policies and procedures. Contact information for this individual is stated above.

Monitor the Progress

This document will continue to be updated as conditions within the County evolve. The appendices in this document will be updated periodically, while the main body of the document will be updated as required or if Murray County's policy changes, with regard to ADA Transition. With each main body update, a public comment period will be established to continue the public outreach.

<u>Appendix B – Self-Evaluation Results</u>

This initial self-evaluation of pedestrian facilities yielded the following results:

- 50% of curb ramps met accessibility criteria
- 1.3% intersections did not have any curb ramps
- 31% of curb ramps didn't have truncated domes or are in wrong position
- Unknown % of sidewalks met accessibility criteria. Sidewalks were not surveyed because they are governed by city ordinances and are the property owner's responsibility

COST PARTICIPATION POLICY FOR CONSTRUCTION AND MAINTENANCE ON MUNICIPAL COUNTY STATE AID HIGHWAYS

Purpose

This policy is intended to provide a standardized guideline to make clear design requirements, best practices, and cost-sharing standards related to municipal transportation infrastructure on County State Aid Highways (CSAH) and County Highways in Murray County. The policy is intended for use by the Murray County Highway Department, the Murray Board of Commissioners, and other local government officials. The basic premise is that the County pays for costs peculiar to County needs and municipalities pay for costs peculiar to municipal or local needs.

Background

The CSAH system is a network of key highways under the jurisdiction of Minnesota's counties. The portions of this system that are located within the boundaries of city governments (municipalities) are eligible for State Aid System funds.

Municipal State Aid System funds are allocated to Murray County for construction, improvement, and maintenance on designated State Aid Highways in cities with a population less than 5,000. The annual amount of State Aid revenue available in Murray County is determined by income generated from the Highway Users Tax Distribution Funds and based on the distribution formula which determines the share of the funds that will be received by each county. A greater degree of county participation is afforded municipalities having a population of less than 5,000, because of the absence of direct state aid allocations to these municipalities.

The availability of funding, the applicable Minnesota Statutes and Rules, and Murray County policies (such as this one) govern what construction, engineering, and maintenance items are eligible for State Aid and County Aid System funding. Moreover, these factors will determine how Municipal State Aid funding will be allocated by the County Board to the CSAH infrastructure in each city.

It is recognized that there may be occasional differences between these policies and written participation policies of the Minnesota Department of Transportation. In those cases, participation will be negotiated by the County Engineer.

When federal aid highway funds are utilized on a county highway project, these cost participation policies will be applied to the non-federal share of any specific item of work. In the event federal or state grant funds are made available to a project on a lump sum basis, the county will determine the items for which those funds will be utilized.

Roadway Improvement and Construction Design Requirements

In order to be eligible for State Aid funding, projects must meet the following requirements:

- State Aid and Public Right-of-Way Accessibility Guidance (PROWAG) standards.
- Minimum width of all streets built under this Policy shall be per State Aid Rules
- Maximum width of all streets built under this policy shall be as agreed upon by the County and the City for each project.

Construction and Improvement Costs

For projects built under this policy, the County will allocate Municipal State Aid Funds and/or County Funds for the total costs of construction, engineering, supervision and other administrative expenses as follows:

- Up to 100% of the eligible costs for the following:
 - o Grading and sub-grade correction
 - o Base and bituminous or concrete surfacing
 - Culverts
 - o Removal of pavements and curb and gutter
 - o Clearing and Grubbing
 - o Removal and installation of sidewalk, if required due to the construction of the roadway
 - o Retaining wall in lieu of right of way
 - o Highway signs
 - o Right of Way by negotiation
- Up to 100% of the eligible costs for the following*:
 - o Curb and gutter
 - o Storm sewer and drainage structures
 - o Gravel shoulder if no curb and gutter present

*The actual County contribution rate will be based on the ratio, as determined by a MnDOT Hydraulic Engineer, of the drain structure area in the CSAH and/or County Highway right-of-way to the total area drained.

- Up to 100% of the eligible costs for the following:
 - o Removal and installation of pedestrian curb ramps for the first time they are constructed or needed to be replaced to bring them up to standards.

For projects built under this policy, the Municipality will allocate funds for the costs of construction, engineering, supervision, and other administrative expenses as follows:

- 100% of the costs for the following:
 - O All non-eligible items; including sanitary sewer, sanitary sewer connection, water-mains, water-main connection, hydrants, telephone or electric poles or buried cable, sidewalks, and other items not related to constructing the roadway.
 - O Storm sewer outlets outside of the right of way
 - o Storm water treatment items
 - Street lighting
 - o Removal and installation of sidewalks not required due to the roadway construction
- The remainder of total costs not covered by State Aid and/or County funds for the items above. The items listed above are not 'complete', but are a representation of major items.

Maintenance Costs

For maintenance of CSAH and County Highway infrastructure, costs will be funded as follows:

- The County will pay for 100% of the following**:
 - o Pavement preservation (patching, seal coats, overlays)
 - o Pavement marking (except for parking and crosswalk)
 - o Snow plowing (except that when the Municipality deems it desirable to remove snow by hauling, it shall do so at Municipality's own expense).
 - o Back of curb to back of curb road maintenance
 - o Gravel shoulder to gravel shoulder road maintenance if no curb and gutter present

**The County may enter into an agreement with the Municipality whereby the Municipality performs maintenance items in exchange for compensation from the County.

- The Municipality will pay for 100% of the following:
 - o Sanitary sewer, water, or other public utilities (manholes, water shut offs, curb stops, etc.)
 - O Curb and gutter, storm sewer and drainage structures (which means city is responsible for keeping the curb and gutter cleaned of debris, and the storm sewer system is clean of debris, flushed and operating at capacity. Any repair cost will follow the requirement under Construction and Improvement Cost)
 - o Culvert crossings (which means clean of debris and flush clean if needed)
 - O Sidewalks and pedestrian ramps (which means keep these areas clean of debris and any repair costs necessary to keep them serviceable.)
 - o Retaining walls
 - o Maintenance of grasses, shrubs, trees
 - o Pavement markings for parking areas and crosswalks

The items listed above are not 'complete', but are a representation of major items.
