Six-Year Plan

Primary Roads

PRELIMINARY ALTERNATIVES CARRIED FORWARD

US 29 / 15 / 17 Interchange Study

This Interchange Study carried two alternatives forward for further study. For each alternative concept the geometric layout, operational functionality, right-of-way impacts, constructability, and costs were analyzed.

The concepts were re-designed to carry the 2040 forecast traffic volumes for the project area. The cross-street has a design speed of ≥ 40 mph and the ramps a design speed of ≥ 25 mph.

The two preliminary alternatives carried forward are:
