## RED CLIFF COMMUNITY IMMUNITY –

Herd Immunity is the resistance to the spread of a contagious disease within a population that results if a sufficiently high proportion of individuals are immune to the disease, especially through vaccination. We like to call this “Community Immunity”. The Red Cliff goal to reach “Community Immunity” is 80%.

Community Immunity protects those that are unable to receive the vaccine. Do your part to protect our community!

52.04 % of adults in the Red Cliff community have been fully vaccinated!!

*Caretakers of the medicine, protectors of your health*
