RED CLIFF TESTING NUMBERS DECLINING – DON'T WAIT, GET TESTED!!

Testing numbers at the Red Cliff Health Center have decreased dramatically over the past two weeks. Testing is an important surveillance tool to help our team to respond quickly to potential outbreaks.

Who should get tested for current infection?

- People who have symptoms of COVID-19.
- Most people who have had close contact (within 6 feet for a total of 15 minutes or more over a 24-hour period) with someone with confirmed COVID-19.
 - Fully vaccinated people with no COVID-19 symptoms do not need to be tested following an exposure to someone with COVID-19, as long as they do not develop symptoms
 - People who have tested positive for COVID-19 within the past 3 months and recovered do not need to get tested following an exposure, as long as they do not develop new symptoms.

Caretakers of the medicine, protectors of your health
