NOTE**There was 1 positive test for an individual residing outside the Red Cliff jurisdiction.

WHAT WE KNOW ABOUT BREAKTHROUGH INFECTIONS:

- Breakthrough infections are expected. COVID-19 vaccines are effective at preventing most infections. However, like most vaccines, they are not 100% effective.
- Fully vaccinated people with a breakthrough infection are less likely to develop serious illness than those who are unvaccinated and get COVID-19.
- Even when fully vaccinated people develop symptoms, they tend to be less severe symptoms than in unvaccinated people. This means they are much less likely to be hospitalized or die than people who are not vaccinated.
- People who get vaccine breakthrough infections can be contagious.

Caretakers of the medicine, protectors of your health
