## COVID-19 Vaccines for Children

Red Cliff Health Center is planning a vaccination clinic for children ages 5 and older. Information will be provided as soon as details are finalized.

Getting a COVID-19 vaccine can help protect children ages 5 years and older.

- Vaccinating children can help protect family members, including siblings who are not eligible for vaccination and family members who may be at increased risk of getting very sick if they are infected.
- Vaccination can also help keep children from getting seriously sick even if they do get COVID-19.
- Vaccinating children ages 5 years and older can help keep them in school and help them safely participate in sports, playdates, and other group activities.
