In Wisconsin between 11/17/2021 - 11/30/2021, the case activity level was very high.

This page shows information on case burden (rate per 100,000) and trajectory (percent case change). Case activity is a combination of burden and trajectory. For definitions of burden, trajectory, and disease activity levels, see below "About our data: How we measure case activity". Confirmed case activity is an important starting metric to understand current COVID-19 levels in your community. For additional information beyond cases, look at the COVID-like illness (CLI) and influenza-like illness (ILI) sections which provide more insight into the levels of respiratory illness in your community.
