ECC Pony Rides!

We are so excited to offer pony rides and a family picnic again this year at Little Sand Bay! **Early Head Start** is scheduled for Friday, June 22nd from 10am-12. ECC Staff will meet families at Little Sand Bay at 10am and there will be pony rides from 10-12 with lunch around 11:00. Please be advised that parents are responsible for their children, along with sunblock and appropriate dress. Bring chairs, beach stuff and other needed items for your family to have a great day at the beach! If you have any questions or suggestions please contact Nicole (ext 253) at 779-5030.

Heads up!!....... ECC Construction

Starting July 30th, 2012 the ECC will begin construction in several areas! The roofing on the main building, home base/large motor building and the Memenguwa trailer will all be replaced. The kitchen will have its floors replaced along with a new walk-in fridge and freezer! The parking lot will also undergo expansion along with an exit drive that will go around the Memenguwa trailer and join back into the main entrance/exit. To let construction have as little distractions as possible and for the safety of all, the ECC staff will not be working or on site from July 30th through September 4th. As we all know construction relies heavily on the weather and although we project a start date of September 11th all we can do right now is make a projection. ECC staff will be in contact with families in late-August to confirm fall home-visits, opening ceremony and school-start dates. Any questions please contact Nicky (ext 243), LaVonne (ext 250), Dee (ext 249) at 779-5030.

Happy Birthday to:
Bella Livingston on June 30th
Dillon Gurnoe on June 10th
We hope you have a great day!!

Yay! Summer is finally here, this means it’s fun in the sun time. It is time to spend time outdoors, swimming, playing, running, games.
Reminder: At school and at home remember to wear SUNBLOCK to keep your beautiful skin protected. ;)

Gena, Cindy and Amber would like to wish all the Daddies Happy Father’s Day on the 17th of June.

June 15 and the 22nd: PONY RIDES at Little Sand Bay from 10-12
Spend the day at the Beach, riding ponies and having a great lunch prepared by our own Lori and Lorine!!
Boozhoo, we are now into June! This month we are going to be playing in the water and getting dirty. Please make sure that your child has extra clothes that he or she can change into. If you haven’t already, please sign a permission slip, in order for us to apply sunscreen.

**Mino Dibishkaa** to Connor on June 2!!

Parents: There will be Pony Rides for EHS on Friday, June 15th. Please look for the flyer to be sent home.

**Reminder:** Language table on Thursdays from 4-6

Here is a peek at what your child is doing:
- Oliver - playing hide-n-seek with friends
- Maylean - sings to Shake your whole body
- Jose - is taking steps
- Connor - enjoys painting with yogurt
- Shaun - loves to dance to daily songs
- Robert - is standing by himself
- Charlotte - loves to crawl up the ramp
- Zaiden - claps his hands to music

Parents, you are your child’s first teacher! If you have questions or concerns, please contact us at 779-5030 ext. 224.

~Jamie, Wendy and Fred
Ode’imini Giizis

Amik Abiwin

What We Did
We have been enjoying the great outdoors. Each day we have spent time outside; in our playground, nopeming (in the woods) and on walks. We have started gathering things outside to use in art projects and learning about bugs and plants.

What We Are Doing
We are starting to do more art projects. We are spending more time outside. We are learning to work as a team (wiijiwaagan, ginijii--friends). We are singing and we are speaking Ojibwe!

What We Are Going To Do
This month we are going to focus on summer activities. Gathering traditional materials (wiigwasike--gathering birch bark), exploring the woods, looking at bugs, watching the plants grow and playing in the water are all part of this month’s activities.

PLEASE

REMEMBER...

Lots of time outside means we need:
Extra clothes in case we get dirty or wet.
Hats/glasses to keep the sun off.
Sunscreen to keep our skin healthy.
Regular bug checks (for those pesky ezigaawag--woodticks).

Ariana is learning to help herself.
Braun is talking in sentences.
Brody is counting in English and Ojibwe.
Elliott is speaking with people around her.
Koda is learning to be a part of the class.
Nakita is forming friendships.
Preston is practicing his large motor skills.
Shane is climbing.
Makwa Class

Pirates and the Deep Blue Sea
This past month we had lots of fun learning about pirates and what lives in the sea/ocean. The first part of the month the children dressed up, looked for treasures and rode the ship like pirates. They sorted gems, walked the plank, did obstacle courses and made our own map. "X, marks the spot".

For the second part of the month, we focused on the ocean. Children made fish, octopus, star fish, sea horses, and more. We read books, water play-sink and float, went fishing, talked about Lake Superior, and where animals live (water or land) and more.

What's the pirate's favorite letter? You'd think it would be the aa"r", but no, it the (e)Sea!

June is Camping
This coming month we will be having fun setting up camp in our room and possibly out back for a day. Some things we will do is gather wood, do science experiments, make smores, sing campfire songs, nature walks, and much more.

From the desk of Karen and Teresa
Volume 1, 2012
June Newsletter

Special points of interest:
© Brief highlights of May lessons
© Brief highlights of June lesson plans
© Look and See

LOOK and SEE:
Aura can pedal a bike. 1
Eric can problem solve. 2
Isabella names ocean Animals. 3
Ischia tells jokes. 4
Victoria sorts the gems. 5
Sebastian sings Itsy bitsy spider. 6
Stella rides the scooter. 7
Deacon 'reads' the book from front to back. 8
May was a great month to talk about our Mother’s, take care of our babies and learn all about flowers. It is hard to believe that June is already here! In June we will be talking about our Dad’s and learning about bugs and gathering. The weather has been so nice that we are spending lots of time outdoors and learning all about our outdoor environments. Please be sure and check for wood ticks at the end of the day!

Ojibwe Words:

Ode’imin- Starwberry
Miin- Blueberry
Wiidookawishin- help me
Miinawaa izhichigen- do it again
This month the class will be learning about bear safety. Many of the children have come to school and told of incidents dealing with bears, so we will try to inform them about the safety issues when dealing with them.

In our second step the children will begin to learn about losing something and how to cope. How to identify the problem, and to figure out a solution.

We are also discussing secrets, when we should keep a secret, and when is the time to tell.

Our science area is expanding. We are hatching chick, duck, and guinea hens. We are then learning about the life cycle of a plant, and we will plant seeds.

We are also planning field trips so look out for the flyers.

Ms. Diann, Ms. Tracy, and Ms. Patsy
What's Happening....

May was another busy month in our room. We have been busy enjoying the beautiful weather every chance we get. We spent the month learning about camping and being outdoors. The children enjoyed making fishing poles they could eat as well as s'mores.

This month we will be focusing on our "Under the Sea" unit. The children will be exploring all the ocean has to offer. Be sure to ask them what they have learned and experienced each day!

We will also be working on projects for Father's Day, which is Sunday, June 17th. We hope all of the fathers enjoy their day. We appreciate all you offer to our classroom.

We would like to remind families to make sure at-home toys stay at home. They can be a distraction in our classroom. We appreciate your cooperation!

Happy Father's Day

What's New....

Just a reminder that there is a field trip coming up for our kindergarten bound children. We will be taking a field trip to the Duluth Zoo on Friday, June 15th. We are very excited!

Graduation is only a month away, we are very excited for our children who are moving on to the "big school".

Thank to all our parents for making time for home visits. We love bragging about your children and all they are learning in our classroom.

Ma'iingan

June 2012

Newsletter

© A special thank you to Jeanne Balder and the Buckholts family for making such wonderfulplay dough for our classroom!! The children love exploring the different colors and making many creations.

Chi Miigwech!!!
Dear Mashkodebizhiki class,

For the month of June we will be having summer fun activities. We will be going on more field trips and just enjoying the great outdoors. It's hard to believe how fast this year has gone. We have enjoyed your children so much. They are learning their letters and numbers. We do music, stories, math, science, culture and recess every day and the children have been awesome.... chi'-miigwetch for sharing them with us...

We still have a few home visits to finish up so if you are one that we have not met with please call us to schedule an appt... it will not take to much of your time and you will be able to see how well your child is doing and look at pictures and work samples in their portfolios..... If you ever have any questions please feel free to call us at the center our extensions are 246 and 247....

Miigwetch....
Ms. Jenn, Ms. Virginia and Ms. J.

TRIBAL ELECTION
CANDIDACY DEADLINE

If you are interested in running for an At-Large position, you must submit your name in writing to Laura J. Gordon, Tribal Secretary by Monday, June 18th, 2012 by Midnight

Polls are open 8:00 a.m. to 8:00 pm.
at Legendary Waters Resort and Casino

General Election
Tuesday, July 3rd, 2012

If you have any questions, please feel free to contact: Laura J. Gordon at 715-779-3285 (Work) or 715-779-5518 (home)
Special Education Research Study
Be part of an important part of an interview study

Are you a parent, relative, or caregiver of a child receiving special education services?

Do you want to share your concerns and ideas related to special education and your child?

If you answered YES to these questions, you may be eligible to participate in a research study on Emotional and Behavioral Disorders and special education services.

The purpose of this research study is to explore community-based perspectives of emotional behavioral disorders/special education and its impact upon the Red Cliff Lake Superior Band of Chippewa. Participants will be asked to participate in two interview sessions that may last up to 2 hours. Follow-up interviews while highly encouraged, are not required, but will further enrich the study. Participation in the study is solely voluntary. Interviews will take place in late May and early July in locations convenient to participants.

Parents and/or relatives of children with Emotional Behavioral Disorders currently receiving special education services are eligible. Parents and/or relatives of children with other special needs may also be considered. Several steps in the study design are meant to provide anonymity of participant identities and interview data will remain confidential to the greatest extent possible.

This study is being conducted by Cheryl Funmaker, doctoral student from the Rehabilitation Psychology and Special Education Department at the University of Wisconsin Madison, and Ho-Chunk Tribal Member.

Please contact either Cheryl Funmaker at efunmaker@wisc.edu 608) 408-6144 or Dee Gokee-Rindal Ed.D. at the Early Childhood Center (715) 779-5030 ext. 249 dece.gokee@redcliff-nsn.gov for more information. Thank-you.

you find in garage sales or thrift shops—has the same words as a brand new copy for $12.95. Reading families use the 5 B’s (to help the 3 R’s): Books, Bathroom, and Bed Lamp. Make sure there’s a box for books and magazines in the bathroom for idle or captive moments, and add one near the kitchen table. Install a reading lamp near the child’s bed and allow the privilege of staying up 15 minutes later to read (or just look at book’s pictures) in bed. It might be the most important night-school he’ll ever attend.

8. THERE is a strong connection between over-viewing of TV by children and under-achieving in school. Simply put: Those who watch the most know the least. Research shows that up to 10 TV-hours a week has no impact on children’s grades but beyond that the grades decline. Sixty percent of children new have a TV in their bedroom. Oh-oh! A side-by-side comparison of third-graders’ math and reading scores tells it all in the chart below—scores of children with or without a TV in their bedroom. The average child spends 1,460 hours a year watching TV/DVD’s and playing computer games—equal to watching “Gone With the Wind” 392 times a year. What about buying those computer programs or tapes you see advertised on TV that teach reading? Read on.

9. THE most economical device to teach reading is already in your home. Finland's children have the highest reading scores in the world and they use this device more than any other country—and it's free! It's closed-captioning on the TV. Turn it on by using the “menu” button on the remote to reach the “cc” area. Children unconsciously absorb the sight of the words and their sounds, making connections to how print is used. It's like having a free magazine subscription in the home. All print counts. What about recorded books—do they count? Read on.

10. WHILE a recorded voice is not as good as a live adult who can stop and explain something in the story, it’s better than nothing. It’s also a great assist for the parent who has a reading disability or for whom English is a second language. (Incidentally, reading to a child in a foreign language accomplishes many of the same things—feeds vocabulary and builds a bridge to the love of reading and books.) Public libraries have huge collections of audio books—all available for free.

For more details on these subjects, see Jim Trelease’s Web site www.trelase-on-reading.com.
© Jim Trelease 2009. This brochure may be freely reproduced by nonprofit institutions with permission of the author (see Web site).
1. **READING** is the most important subject in school. Why? Because a child needs reading in order to master most of the other subjects. It's extremely difficult to do word problems in math if you can't read the words. How can you answer the questions in social studies or science if you can't read and understand the textbook? If it's so important, how does a child "get good at it"? Read on.

2. **ACROSS** the world, children who read the most, read the best. And that includes all social levels—rich or poor, urban or suburban. Here's a chart involving 250,000 teenagers in 32 countries. Starting with the left column (low engage.), we see students from three income levels who read the least, then those who read a moderate amount, and finally those who read the most (also the widest variety of print—books, magazines, fiction, nonfiction). Among all incomes, the more they read at home, the higher they scored, but the biggest gain for low-income students was when they entered that “most engaged” category. So how do we get them to read more at home? Read on.

3. **WE** humans are pleasure-seekers, doing things over and over if we like it. We go to favorite restaurants and order the food and beverages we like, not the stuff we hate. So if you want to ensure children visit “reading” more often, make sure they like it more than they hate it. How do we get them to like it that much? Read on.

4. **READ aloud** to them, even as infants. Initially, the sound of your voice is a beacon of calmness, conditioning the child to associate you and the book with security. As the child grows, so too does the time you should spend reading in one sitting, from a few minutes to at least 20 minutes, from picture books to chapter books. I can see the benefit for younger children but I thought my 1st-grader was supposed to come home and read to me. How can I get better at reading if I’m doing the reading? Read the next paragraph.

5. **LISTENING** comprehension comes before reading comprehension. You must hear a word before you can say it or read and write it. If you’ve never heard the word “enormous” in a meaningful way, you won’t understand it when it’s time to read or write it. There’s a kind of “word reservoir” in a child’s brain and one of the jobs of a parent is to pour so many words into it that it overflows into speech and then reading and writing. By age four, high-income children have heard 45 million words from their families and low-income children have heard just 15 million. That’s a 32 million-word difference equalling one year’s head-

6. **CHILDREN** usually read on one level and listen on a higher level. It’s usually not until eighth grade that the reading level catches up to the listening level. This means that first-graders can hear and understand third- and fourth-grade books they can’t read yet. These chapter books gradually introduce them to new words, new ideas, and the world beyond their neighborhood—and that, in turn, helps them better understand what they need to read in their school books. Simple sentences in Dr. Seuss books like “Hop on Pop” were written to be read by beginning readers to themselves; that’s why the cover label reads “I Can Read It All by Myself.” Six-year-olds are capable of understanding sentences that are longer and richer than “All Fall. Fall off the wall” but an adult must help by reading richer sentences like, “Mr. McGregor was on his hands and knees planting out cabbages, but he jumped up and ran after Peter, waving a rake and calling out, “Stop thief!” (The Tale of Peter Rabbit) What about families that can’t afford books? Read on.

7. **THE** top winter Olympians come from states where they have the most ice and snow. And reading research shows that children who come from homes with the most print—books, magazines, newspapers—have the highest reading scores. They also use the library more than those with lower scores. Libraries have the most and best books in the world—all for free. Remember: a used book for 50 cents—like
three decades ago, they make 40 percent today and the girls compose 60 percent, while annually earning 180,000 more diplomas than boys.

**A change in the male mindset**

There has been another sea change in our culture and that also began in 1970—the year that marked the birth of "Monday Night Football," the highly lucrative TV show that proved you could get men to stay awake after 8 pm if you gave them sports on a week night. You could also sell them a lot of stuff.

Soon there was ESPN, the all-sports-all-

![ESPNC logo](https://via.placeholder.com/150)

ESPNC Headquarters in Bristol, CT: Are the dishes connected to school scores too?

the-time network, followed by channels devoted to golf, rodeo, basketball, football, baseball, NASCAR and every other sport.

The landscape of the American male's attention span was being dramatically altered and boys were soaking up the changes.

Meanwhile the women's movement was growing. Mom was celebrating "take your daughter to work day." And Dad? He was busy taking his sons to the stadium or waving the remote at a cluster of sports channels.

Is there a connection here—the decline in boys' interest and achievement in school and the behavior of the male culture? You tell me.

Can a father play catch in the backyard after dinner and still read to the child that same evening? Can they go to a game one day and to the library the next? You betcha.

**Hands give way to heads**

Once upon a time a man's ability to earn a living in America was determined by what he could do with his hands—what he could dig, or plow, or weld, or lift. Not often any more. Now it's determined by what he can do with his head—if he wants a decent living wage.

As the world's job market shrinks, our children increasingly compete with children in other nations for jobs. Back in 2003, 25,000 U.S. tax returns were processed in India, outsourced by U.S. companies who wanted them done cheaply and correctly. Within two years, that number ballooned to 500,000. India now graduates more than 70,000 accountants a year. (Try Googling "India + accountants."

Jack Jennings, president and CEO of the Center on Education Policy, recently observed that we cannot compete with the rest of the world if only one American gender is working and achieving. Simply put: The countries that out-learn us will out-earn us.

Dad—what have you done for your son's head lately? Remember those sand castles? Get involved. Your son needs you. We need you. America needs both of you.

The first sand castle was pretty impressive. Watching the father and sons constructing the scene, handful by handful, I guessed the father must be an architect or engineer.

Continuing my beach walk I soon encountered another family bent over a sand castle. In fact, there were more than a dozen castles yet to be seen on my 45-minute stroll — some good, some poor, and a few spectacular.

Together they had me thinking on my walks that week: there's a common denominator among the best castles — a father (or older male) usually was involved. If dad was there, the kids worked harder and succeeded. Where the adult male was missing, so too was the achievement among the boys.

All of which connected to the research on fathers, sons, and reading. Overall, the more dad is involved, the higher the boy's scores.

**What do you mean by 'involved'?**

One study out of Modesto, California, showed: (1) boys who were read to by their fathers scored significantly higher in reading achievement; and (2) where fathers read recreationally themselves, their sons read more and scored higher than did boys whose fathers did little or no recreational reading. When the dads were surveyed, only 10 percent reported having fathers who read to them when they were children.

A second study was done by Mihaly Csikszentmihalyi (CHEEK-sent-me-HY-ee) one of today's leading experts in human behavior. That study focused on 30 men who were raised in blue-collar, working-class families, yet 15 of them became college professors and 15 remained blue-collar. If family economics and education were the same, how to explain the extreme difference in outcomes?

The researchers found four significant factors in the childhoods of those who became professors. (Incidentally, professors have a much higher life expectancy and higher income level than working class.)

- 12 of the 15 professors were read to or told stories by their parents, compared to only 4 of the blue-collar workers.
- 14 out of 15 professors came from homes where books and print were plentiful among blue-collar workers, only 4 had books.
- 13 of the professors' mothers and 12 of the fathers were identified as frequent readers of newspapers, magazines, or books; blue-collar workers identified 6 mothers and 4 fathers.
- All of the 15 professors were encouraged to read as children, compared with only 3 of the blue-collar workers.

As much as anything else, children are little sponges, soaking up the behavior and values of the dominant people around them.

A Pennsylvania social worker once told me about a family she was working with. The mother asked if it was natural for her son to pretend to be reading to his toy trucks and cars (he was too young to actually be reading). The worker had seen children read to their dolls and siblings, but to toy cars?

She told the mother this was a new slant on reading but not to worry about it. The important thing was the boy was imitating the act of reading, a very positive behavior.

Later, as she was leaving, she observed the child's father bent over the engine of his pickup truck, a repair manual balanced on the radiator, reading aloud the instructions to himself. CLICK! It was entirely natural for the little boy to think his father was reading aloud to his truck. Monkey see, monkey do.

**Danger signs across the land**

Since 1970 there has been something of a sea change in the academic lives of American boys. Prior to 1970, boys dominated the school scene in academics and leadership. Not any more.

From elementary grades through college, the girls are rising (that's good) and the boys are sinking (not good). Girls dominate the ranks of school valedictorians and salutatorians, class officers, advanced placement classes, honor rolls, and graduation rates.

On the college level there has been a complete reversal of the field. Where boys made up nearly 60 percent of college students...
WHAT DOES HEALTHY EATING FOR MY CHILD MEAN?

WHAT DO CHILDREN NEED?
Each of the five major food groups contributes specific nutrients necessary for your child's growth and development. Foods from all of the food groups are the basis of a healthy diet. Therefore, children need to eat a variety of foods each day:

- **Milk & Milk Products**: provide calcium, vitamin D and potassium for strong teeth and bones; good source of protein, magnesium and vitamin A
- **Fruits**: provide vitamin C and fiber to help the immune system, heal wounds and for good digestion
- **Vegetables**: provide vitamins A and C and fiber to protect eyesight, help the immune system, and for good digestion
- **Beans**: provide B-vitamins for energy to support activity and growth
- **Meat & Beans**: provide protein, iron and zinc for developing muscles, healthy blood and growth needs

BUILDING STRONGER BONES
Calcium, as well as vitamin D and potassium, are critical for strong bones and teeth. Sufficient calcium consumed in childhood is necessary to ensure strong bones as adults.

The primary source of calcium in the American diet is milk and milk products. Some dark green vegetables, such as broccoli, collards and kale contain calcium, as well as some types of tofu and certain corn tortillas. Calcium-fortified foods are readily available, but may not provide the full package of nutrients needed for building strong bones.

FOOD ALLERGIES
Common food allergens include eggs, fish, milk, peanuts, shellfish, soybeans, tree nuts such as almonds, pecans and walnuts, and wheat. Childhood allergies to eggs, milk, soy and wheat are commonly outgrown but peanut allergies are almost never outgrown.

Only about four to six percent of children have true food allergies. It is important to have a physician diagnose a suspected food allergy.

LACTOSE INTOLERANCE
Some children experience stomach discomfort from digesting lactose, the sugar found in milk. Yogurt and some hard cheeses, such as cheddar, are usually easier to digest. Drinking milk with meals or snacks, or drinking smaller amounts of milk at a time may help. For those with a severe intolerance, lactose-reduced dairy foods are available in most grocery stores.

If you believe your child is lactose intolerant, consult your child's doctor or a registered dietitian for further advice.

IF MY CHILD IS TAKING A MULTIVITAMIN, DOES IT REALLY MATTER WHAT HE OR SHE EATS?
A daily multivitamin may seem like "insurance" that your child is getting enough nutrients; however, other compounds in foods are necessary for good health. If your child takes a multivitamin, make sure that it provides no more than 100% of the Dietary Reference Intakes (DRI) — more than this on a regular basis can be harmful.

ARE VEGETARIAN DIETS APPROPRIATE FOR CHILDREN?
Generally, vegetarian diets that include milk products and eggs can meet the needs of growing children if they consume the recommended servings for each food group shown on the next page.

When choices are restricted solely to plant-based foods, you will need to consult your child's doctor or a registered dietitian to make sure your child is getting enough calories and important nutrients, including vitamin B-12, iron, zinc and calcium needed for growth and development.
The Focus

Young children deal with many of the same emotions adults do. Children get angry, sad, frustrated, nervous, happy, or embarrassed, but they often do not have the words to talk about how they are feeling. Instead, they sometimes act out these emotions in very physical and inappropriate ways. For example, when Maggie’s son was frustrated, he threw the puzzle piece and the puzzle.

The Solution

Parents can help their children understand and express their emotions. The following strategies are some of the ways you can help your child express his feelings:

- Help your children understand their emotions by first giving the feelings names and then encouraging them to talk about how they are feeling. For example, you might say to your child, “Daddy left on a trip, you are sad. You said you want your Daddy.” By giving your child a label for her emotions, you enable your child to develop a vocabulary for talking about feelings.

- Give children lots of opportunities to identify feelings in themselves and others. For example, you might say to your child, “Riding your bike is so much fun. I see you smiling. Are you happy?” Or you might point out a situation and ask your child to reflect on what someone else may be feeling: “Joey bumped his head on the slide. How do you think Joey feels?”

- Teach your children the different ways they can respond to specific feelings, conflicts, or problems. Talk about your own feelings with your children. “Remember yesterday when the water in the bathtub would not go down the drain? Mommy got so mad and do you remember what my face looked like when I got mad? Can you make a mad face like Mommy’s?” Talk with your children about different ways you deal with specific feelings. “When I get mad I take a deep breath, count to three, and then try to think of the best way to deal with my problem.”

- Teach your child to identify and express their emotions in ways that your family and friends find acceptable. For example, you might tell your child “Sometimes Grandfather is angry when things don’t go well at work. What does he do? He sits on the porch until he figures out what he wants to say about it. You should sit and think when you get angry.”

The Steps

1. Explain the feeling by using words your child can easily understand. Try to use pictures, books, or videos to help get your point across. “Look at Little Red Riding Hood’s face; she is so scared when she sees the wolf in her Grandma’s bed!”

2. Teach your child different ways we can deal with feelings. Let your child come up with ways she can deal with her feelings. Talk about positive and not so positive ways to express feelings. There are many strategies you can use to teach new ways to appropriately express feelings:

   - Use real-life examples or teach in the moment. For example, “You are having a difficult time putting your trike in the carport. You look frustrated. What can you do? I think you could ask for help or take a deep breath and try again. What do you want to do?”
   - Teach your child new ways to respond to feelings by discussing common situations that your child might remember or that happen frequently. For example, “Yesterday, you were angry because Joey would not let you play with his truck. You were so mad that you hit him. When you feel angry that Joey won’t let you have a turn, what should you do?”

- You can use children’s books to talk about feelings. For example, ask your child when reading a book, “What is (character in book) feeling right now? How do you know? Have you ever felt that way? What do you do when you feel that way?”

- Keep it simple, use visuals or pictures to help get your point across, and always try to relate your lesson back to something that happens in your child’s life.

- Teach your child new strategies to use when feeling emotions that may be expressed inappropriately (e.g., anger, frustration, sadness). Strategies to share with your child might include taking a deep breath when frustrated or angry, getting an adult to help resolve a conflict, asking for a turn when others won’t share, asking for a hug when sad, and finding a quiet space to calm down when distressed.
3. Praise your child the first time he tries to talk about his feelings instead of just reacting. It is REALLY important to let your child know exactly what she did right and how proud you are of her for talking about feeling. It should always be OK to say what we are feeling. It's how we choose to show our feelings and respond to them that requires special effort.

4. Support your child to talk about feelings and practice her new strategies for expressing emotions appropriately every chance you get. For example, you can talk about feelings when you are playing a game, when you are riding in the car, or when you are eating dinner. There will be all kinds of things that happen every day that will be great opportunities for you to talk about feelings. The more often your child practices, the faster your child will learn.

**WARNING** – Do not try and practice when your child is in the middle of a "meltdown." Use quiet, calm times to teach and practice the new strategies. For example, if your child is having a "meltdown" because she does not want to wait for a cookie until after dinner, she will not be in the mood to practice expressing her frustration with words, rather than a tantrum. In this situation, you have to deal with her emotions (e.g., "I know you really want a cookie now, but that is not an option, we are going to eat dinner in 5 minutes. You may have a cookie after dinner."). However, you can talk with your child about the incident after she is calm and discuss the best way for expressing those emotions ("When you are frustrated that you can't have what you want, you can tell me, but you can't hit me or shout at me. Earlier, you wanted a cookie before dinner and you hit me. The next time you feel frustrated, you can tell me and then take a deep breath and calm down if you feel angry.")

**Practice Makes Perfect**

Here are some activities that you can do with your child to help him or her understand feelings.

**Play Make a Face** with your child. You start the game by saying, "I am going to make a face, guess what I am feeling by looking at my face." Then, make a happy or sad face. When your child guesses the feeling word, respond by saying, "That's right! Do you know what makes me feel that way?" Follow by describing something simple that makes you have that feeling (e.g., "Going to the park makes me happy." "I feel sad when it rains and we can't go to the park."). Please note, this is not the time to discuss adult circumstances that are linked to your emotions (e.g., "When your Daddy doesn't call me, I feel sad."). Then say to your child, "Your turn, you make a face and I will guess what you are feeling." Don't be surprised if your child chooses the same emotion that you just displayed; it will take time before your child can be creative with this game. Once you guess, ask your child to name what makes him have that emotion. Keep taking turns until your child shows you that he is not interested in continuing the game.

**Share a story** in a new way. Read a book to your child that shows characters who experience different emotions (e.g., sad, happy, scared, worried, confused, etc.). Stop on a page where the character is showing the expression. Ask your child "What do you think he is feeling?" "Why is he feeling that way?" or "Look at her face, how can you tell that she is?". Other questions could be "Have you ever felt? What make you feel that way?" or "What will happen next?" or "What should he do?" Do not pause too long on one page and only continue the discussion as long as your child shows an interest.

Make an emotion book with your child. An easy project to do with your child is to create a homemade book. All you need is paper, crayons or markers, and a stapler. You can make a book about one emotion and have your child fill the pages with things that make her feel that way. For example, a "Happy Book" may have pictures that you and your child draw of things that make her happy, pictures cut out of magazines that are glued on the pages, or photographs of friends and family members. Another approach is to have the book be about a variety of feeling words and do a page on each of several emotions (happy, mad, surprised, scared, iritated, proud, etc.). For children who have a lot to say about their feelings, you may want to have them tell you a sentence about what makes them
Expressing Feelings

Sometimes children express their emotions in ways that are problematic. Your child might cry when frustrated or throw toys when angry. Here are some different ways you can teach your child to act on feelings:

- Ask for help
- Solve problems with words
  Say it, don't do it (say “I am mad” instead of throwing toys)
- Tell a grown-up
- Take a deep breath
- Describe what you are feeling
- Think of a different way to do it
- Relax and try again
- Walk away
- Ask for a hug

Putting it All Together

Understanding emotions is a critical part of children's overall development. It is up to adults to teach children to understand and deal with their emotions in appropriate ways. They are experiencing so many new and exciting things for the first time. It can be overwhelming! We need to be sure we always validate our children’s emotions and don't punish them for expressing their feelings. You might want to remind your child that, “It's ok to tell me how you feel, but it's not ok to hurt others or things when you feel”.

Teaching Feeling Words

We often only think of teaching common emotions like happy, sad, mad, etc. But there are many other feeling words that children should learn to express, such as the following:

- Brave
- Cheerful
- Pleased
- Bored
- Confused
- Surprised
- Curious
- Proud
- Disappointed
- Frustrated
- Embarrassed
- Silly
- Excited
- Uncomfortable
- Fantastic
- Worried
- Friendly
- Stubborn
- Generous
- Shy
- Ignored
- Satisfied
- Impatient
- Safe
- Important
- Relieved
- Interested
- Peaceful
- Jealous
- Overwhelmed
- Lonely
- Loving
- Confused
- Tense
- Angry
- Calm

The Center on the Social and Emotional Foundations for Early Learning

Child Care Bureau
Office of Head Start
The Thrill of Skill

Age-Appropriate Kitchen Tasks
Let older children help teach younger ones – everyone benefits!

2 years old:
Proper hand washing
Wipe table tops
Play with safe utensils
Scrub, wash, tear, snap, break into pieces
Move pre-measured ingredients from one place to another
Add ingredients to a bowl

3 years old: All of the above plus...
Handle dough, begin kneading, simple shaping
Pour cool liquids into mixture
Mix dry ingredients with wire whisk or spoon in extra large bowl
Shake liquids
Spread soft spreads
Place things in trash

4 years old: All of the above plus...
Peel loose skinned oranges; hard cooked eggs
Form round shapes with dough
Mash fruits (bananas) or cooked vegetables
Cut with dull scissors (snip green onions, dried fruits)
Set table

5 to 6 years old: All of the above plus...
Help measure dry ingredients (stir, spoon, level)
Cut with a blunt knife (plastic or tableware)
Use a hand held egg beater or whisk
Crush crackers in a bag with a rolling pin
Sprinkle ingredients on salads, cakes, cookies, casseroles

6 to 8 years old: All of the above plus...
Clean surfaces before and after
Wash fruits and/or vegetables
Gather ingredients and equipment
Grease or spray baking pans
Measure dry ingredients
Measure liquid ingredients
Add measured dry and liquid ingredients into mixing bowl
Learn to crack eggs
Cut fruit, butter or margarine sticks on cutting board (plastic or table knife)
Push buttons on blenders, processors with adult
Knead dough
Preheat oven (adults help load products in hot oven)
Wash dishes, put away ingredients or utensils

9 to 12 years old: All of the above plus...
Learn safe knife skills (chopping, dicing, and cutting)
Handle food equipment safely
Place oven racks and load oven (while oven is cold)
Safe operation of electric equipment (mixer, microwave, bread machine food processor, etc.)
Follow a recipe (measure accurately, prepare a product)
Read ingredient and food labels
Safely handle/store ingredients/finished products
Plan and prepare simple meals, snacks
Clean up (how and what to wash in dishwasher or by hand)

13 years old and up: All of the above plus...
Tasks requiring multiple preparation steps or close timing
Create new flavor combinations, shapes or decoration
Plan and prepare whole menus for meals or entertaining
Make shopping lists and shop for ingredients
Help younger children learn about food and how to prepare
Enjoy cooking with peers

**Get Moving Today Activity Calendar**

<table>
<thead>
<tr>
<th>SUNDAY</th>
<th>MONDAY</th>
<th>TUESDAY</th>
<th>WEDNESDAY</th>
<th>THURSDAY</th>
<th>FRIDAY</th>
<th>SATURDAY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Duplicated with permission from Head Start Body Start (HSBS). For more information about quality K-12 physical education visit <a href="http://www.naspe.org">www.naspe.org</a>. For more information about lifelong and inclusive physical activity visit <a href="http://www.aapar.org">www.aapar.org</a>.</td>
<td>3 Work on your underhand tossing skills. Use empty plastic bottles and toss them into a big box.</td>
<td>4 Play catch with someone. Start really close and after every 2 tosses back up one step.</td>
<td>5 Stretch your body into the shapes of each letter in your name. Stretch big and small.</td>
<td>6 Work on moving in different directions—forward, backward, sideways.</td>
<td>7 Set up a bunch of targets and work on throwing or rolling a ball at them to knock them over.</td>
<td>8 Have a three legged walk with someone in your family. Stand side by side, with your inside legs touching—these two legs should move together as one leg.</td>
</tr>
<tr>
<td>10 Make your arms strong by walking like different animals around your yard...bear, crab, seal, etc.</td>
<td>11 Put a t-shirt on the floor, bend over and put your hands on it, then push it all over the space.</td>
<td>12 Find an open space and work on rolling in different ways...long, straight body and a curled up small body.</td>
<td>13 Draw circles, squares, and triangles on the driveway and practice tossing rolled up socks into each shape.</td>
<td>14 Go for a family walk and take turns saying something you are really happy about or thankful for.</td>
<td>15 Put your favorite stuffed animal in a wagon and pull it around the house.</td>
<td>9 Ask someone to take you to a park and try to keep moving for 15 minutes without stopping...run, climb, jump, swing.</td>
</tr>
<tr>
<td>17 Turn on some slow, quiet music—lay on the floor, relax, breath and stretch.</td>
<td>18 Walk and run around your house 4 times. Each time try to go a little faster.</td>
<td>19 Work on your kicking skills. Try running up to the ball, swing your leg back and then kick through the ball.</td>
<td>20 Pretend that you are at a magical zoo. Ask mom or dad to identify an animal and as they say its name you have to move and sound like that animal.</td>
<td>21 Practice your volleying skills—find a balloon and try to keep it up in the air. Try volleying it with different parts of your body.</td>
<td>22 Work on throwing really hard. Remember to bring the ball back to your ear and take a nice big step forward.</td>
<td>16 Find a little hill and roll down it, run back up and do it again.</td>
</tr>
<tr>
<td>24 Do a job for mom or dad - like sweeping the floor or sorting the laundry. Try to find something that uses lots of muscles.</td>
<td>25 Play catch with a water balloon. Make a nice soft home for the balloon with your hands, and &quot;give&quot; with your body as you catch it.</td>
<td>26 Draw different shapes with sidewalk chalk and practice moving over, around, and into them.</td>
<td>27 Work on dribbling a ball with your feet. Try saying tap, tap, run, run as you do the same with your feet and the ball.</td>
<td>28 Practice passing a ball back and forth with someone using your feet. Start out close and keep moving further apart.</td>
<td>29 Make up a silly dance, show it to someone, and then ask them to do it with you.</td>
<td>23 Fill a bucket with some water. Try to carry it around the house without losing the water. It's probably best to Take It Outside!</td>
</tr>
<tr>
<td>30 Go back and do your favorite activity this month!</td>
<td></td>
<td></td>
<td></td>
<td></td>

15 Simple Ways to Get Moving

1. Spread paper plates on the ground. Pretend they are rocks in a stream. Get from one side to the other without stepping in the stream.

2. Work on moving in different ways - go outside and practice walking, running, galloping, skipping, jumping and hopping.

3. Time to March! Pretend to have your favorite instrument and march as you play. Can someone guess what instrument you are playing? Bring real instruments outside and march in a band with friends.

4. Rainbow Run - talk about the colors of the rainbow as you name colors, run & touch 3 things that are that color.

5. Go for a walk - breath in the air as you swing your arms and hold your head high.

6. Take a walk; first go in straight lines, then curvy lines, and then try walking backwards.

7. Get outside and practice running. When you are running work on pumping your arms front and back and moving in a straight line.

8. Set up an obstacle course using things to jump over, go around, and even under. See how fast you can do it.

9. Find an open space and work on rolling in different ways...long, straight body and a curled up small body. Rolling down a hill is fun!

11. Pretend you are at a zoo. Identify an animal - move and sound like that animal.

12. Pretend to be a growing flower. First you are a tiny seed in the ground and then grow into a big flower.

13. Pretend to be a balloon - first without air, being blown up, floating around, and then being popped.

14. Motions of the weather - use your body to pretend to be different types of weather. Rain, wind, thunder, snow...get creative.

15. Pretend to move like different foods - melt like a popsicle or pop like popcorn.
CLEARING THE AIR OF ASTHMA TRIGGERS
10 STEPS TO MAKING YOUR HOME ASTHMA-FRIENDLY

1. Take it outside. One of the most common asthma triggers in the home is secondhand smoke. Until you can quit, smoke outside, not in your home or car.

2. Good night, little mite! Dust mites are also triggers for asthma. For mite population control, cover mattresses and pillows with dust-proof (allergen impermeable) zippered covers. Wash sheets and blankets once a week in hot water.

3. Play it Safe. Ozone and particle pollution can cause asthma attacks. Watch for the Air Quality Index (AQI) during your local weather report. When AQI reports unhealthy levels, limit outdoor activities.

4. A little goes a long way. Reduce everyday dust build-up by regularly dusting with a damp cloth and vacuuming carpet and fabric-covered furniture.

5. Stake your claim. Household pets can trigger asthma with skin flakes, urine, and saliva. Keep pets outdoors, if possible.

6. Uninvite unwelcome guests. Cockroaches can trigger asthma. Don’t invite them into your home by leaving food or garbage out. Always clean up messes and spills and store food in airtight containers.

7. Think before you spray. Instead of pesticide sprays, control pests by using baits or traps. If sprays are necessary, always circulate fresh air into the room being treated and keep asthma sufferers out of that room for several hours after any spraying.

8. Break the mold. Mold is another asthma trigger. The key to controlling mold is controlling moisture. Wash and dry hard surfaces to prevent and remove mold. Replace moldy ceiling tiles and carpet.

9. Air it out. Reducing the moisture will control asthma triggers like mold, cockroaches, and dust mites. Use exhaust fans or open windows when cooking and showering. Fix leaky plumbing or other unwanted sources of water.

10. Plan before the attack. Work with your doctor or health care provider to develop a written asthma management plan for your child that includes information on your child’s triggers and how to manage them.

Post a note. Post this plan on your refrigerator to help control asthma triggers and reduce asthma attacks in your home. Share it with those who spend time with your child like teachers, babysitters, and coaches.
**Obesity and Children**

Recent studies in obesity show:

- Many children are watching TV while eating evening meals. Overweight children eat more meals in front of the TV than normal-weight children.
- Physically active children are more likely to become physically active adults.
- Lack of exercise is a major reason for the growing rate of childhood obesity.
- A possible link between the amount of soft drinks consumed and obesity.
- Large amounts of juice may contribute to obesity.
- After an obese child reaches the age of six, the chance that obesity will persist is more than 50 percent.

A healthcare provider should be consulted if a parent thinks a child is overweight. A child’s weight history, body build, and growth will be evaluated to determine if a weight loss plan is necessary. Sometimes a child’s weight grows faster than his height. Over time, height may catch up to weight. Parents should not put a child on a strict weight-loss diet. Limiting calories and nutrients can interfere with a child’s normal growth.

To help a child who is overweight:

- Serve meals and snacks on a regular schedule. Choose low-fat snack foods, such as fruit, pretzels, graham crackers, and juices, instead of potato chips, soda, and cookies.
- Become an active family. Teach children to play hopscotch, tag, jump rope, and other active sports. Ride tricycles or bicycles and play in the park. Preschoolers have a short attention span, so plan several activities and quit when a child begins to get tired or bored.
- Limit TV and computer time.

Overweight children are often teased. Children should feel good about themselves no matter what they weigh. To build self-esteem in an overweight child, parents should not make fun of a child’s weight, and should treat an overweight child the same as other children. Help a child notice that all children get teased about something—wearing glasses or even for being smart.

Sometimes children think they are too fat when they aren’t. They hear adults talk about diets and weight. Children want to be like adults, so they worry about weight just as adults do. Children need to know that some children are larger than others and that they are still growing. If they eat and exercise in a healthy way, their body will find a weight that is right for them.

---

**Pita Bread Stuffers**

Pita (Pee-tah) bread comes from the Middle East. Fill its pocket with different salads and spreads.

**Tuna-Apple Salad**

3 cups shredded cabbage
1 (6-ounce) can tuna, drained and flaked
3/4 cup shredded American cheese
1/2 cup thinly sliced celery
2/3 cup low-fat salad dressing or mayonnaise
1 tablespoon milk
1 tablespoon lemon juice
1 tablespoon salad oil
1/2 teaspoon sugar
1/4 teaspoon salt
2 cups apples, cored and chopped

How To Fix:

2. Stir together salad dressing or mayonnaise, milk, lemon juice, oil, sugar, and salt.
3. Add chopped apples and chill. To serve, pour dressing mixture over tuna mixture. Mix well. Serves 4.
Activities for Sick Children

When children are sick, they need activities to help take their minds off their illness. Time goes by slowly for a child confined to bed. Activities should be brief, since concentration levels may be short.

Most children like sympathy when they are sick. Rubbing their backs or planning a small surprise, such as a flower on a breakfast tray, mean a lot.

Activities for sick children:
- Make a bed table from a cardboard box. Cut holes in the sides for the knees. Or cut down a box top to make a table for games and puzzles; the rim prevents pieces from flying all over the bed. Travel dominoes, tiddley-winks, and checkers are all games a child can play in bed.
- If you can get other work done, place an alarm clock by your child's bed. Set it for 15 or 30 minutes. When the alarm goes off, tell your child that you'll be in to read a book or play a game.
- Give children a flashlight to play with under the blankets or to make shadows on the wall.
- Shoe storage bags help organize crayons, toys, and tissues.

Calcium and Pregnancy

Pregnant women need 1,000 mg of calcium a day. Adequate calcium during pregnancy helps maintain calcium balance and may help protect a woman from osteoporosis later in life. Adequate calcium can help maintain normal blood pressure during pregnancy and may also help reduce the risk of pre-eclampsia — high blood pressure that develops during the late stage of pregnancy.

Calcium is important for the unborn baby's growth and development. The fetus gets the calcium it needs from its mother's blood supply. A fetus uses about 250 to 300 mgs of calcium daily from the mother's supply.

It's best to get the recommended daily amount of calcium by eating foods high in calcium. Excellent sources of calcium include:
- Yogurt. One cup of yogurt contains 490 mg calcium.
- Milk. 1 cup of milk contains 300 mg calcium.
- Swiss cheese. 1 ounce contains 270 mgs calcium.
- Cheddar cheese. 1 ounce contains 205 mgs calcium.

Pregnant women should eat only cheeses that are pasteurized.

Handwashing

Handwashing is a quick and easy way to cut down on infections in your household. Colds, flu, ear infections, strep throat, foodborne illnesses, and diarrhea are spread by unwashed, or poorly washed, hands. Most bacteria and viruses infect a person after entering the body through the mouth or nose. Many times these germs get to the mouth and nose by dirty hands.

To properly wash hands, rub them together for at least 10 seconds — enough time for children to say their ABCs. Use hot water with soap. Soap breaks down oils and greases which helps kill germs. Wash under fingernails. Rinse in warm water.

Wash hands:
- Before meals or snacks.
- After using the bathroom.
- At bedtime or naps (vital for thumb sucking).
- After blowing your nose, sneezing or coughing.
- After handling raw meat, money, or taking out the trash.
- After diaper changes.

Highchairs

Many children die each year from accidents that happen in the home. Making sure baby furniture is safe will cut down on accidents. If you buy a new highchair, borrow, or buy one used, there are certain safety items to look for. Make sure a highchair has:
- Wide base so it won't tip over.
- Waist and crotch strap that is not joined to the tray. Your child should be secure even if the tray is not used. Buckle on the waist and crotch strap that is easy to fasten. It should not be easy for a child to undo.
- Tray that locks tightly.
- Caps or plugs made from metal tubing can't be pulled off. A baby can swallow them and choke.

Never leave a child alone in a highchair. Many children have wiggled loose, fallen and hurt themselves when left alone. When a highchair is not in use, lock the tray in place. Toddlers like to use chairs to reach other things on counters.
Safe and Fun in the Sun

May is Skin Cancer Detection and Prevention month, the perfect time to brush up on ways to protect your loved ones, since warmer weather means more time spent soaking up the sun.

Each year, 3.5 million cases of skin cancer are diagnosed, making it the most common form of cancer in the United States. The good news is that skin cancer is easily cured if detected early, so doctors recommend that you perform a monthly self-examination. Here’s what to look for:

- A skin growth that increases in size and looks pearly, translucent, tan, brown, black or multicolored.
- Any brown spot (including moles, birthmarks, etc.) that:
  - Changes color or texture
  - Increases in size or thickness
  - Is irregular in outline
  - Is larger than ¼ inch
  - Appears after age 21.
- A spot or sore that continues to itch, hurt, crust, scab, erode or bleed.
- An open sore that does not heal within three weeks.

Here are a few ways you can protect your skin when spending time outside:

- Generously apply a water-resistant sunscreen of SPF 30 or higher whenever outside, even on cloudy days. Reapply every two hours and after swimming or sweating.
- Wear breathable, protective clothing, such as a long-sleeve shirt, pants, a wide-brimmed hat and sunglasses when possible.
- Seek shade between 10 a.m. and 4 p.m. as the sun’s rays are strongest during this time.
- Use extra caution—and extra sun screen—near water, snow and sand which can reflect and intensify the sunlight.
- Avoid tanning beds as the ultraviolet light from them can cause skin cancer and wrinkling.

Outdoor Exercise

Ready to move your exercise routine outdoors? As the temperature climbs, so does your risk of suffering from a heat-related illness. Review the list below to stay safe as the mercury rises:

- Stay hydrated by drinking plenty of water the day before, the day of, and after your workout.
- Avoid exercising between 10 a.m. and 4 p.m., the hottest period of the day.
- Wear a hat and sunglasses to reduce exposure to the sun.
- Be aware of the symptoms of a heat-related illness and take immediate precautions if you begin to feel faint, dizzy, nauseated, are sweating heavily, or experiencing a weak or rapid heartbeat.

DID YOU KNOW

Without taking the necessary precautions, exercising in high temperatures can lead to:

- Heat cramps
- Heat exhaustion
- Heatstroke
Food Safety Tips for Grilling

It's grilling season! When planning your next outdoor menu (see kebabs recipe below), one item you'll definitely want to leave off the plate is foodborne illness—here's how:

- **Wash everything** — Before and after cooking, wash all indoor and outdoor surfaces that will come into contact with food. Be especially careful to wash everything that comes into contact with raw meat or poultry and wash your hands often to prevent contamination.

- **Marinate safely** — If you plan on marinating raw meat, do so in a covered container in a refrigerator, not on the counter. This decreases the risk of bacteria.

- **Keep everything covered** — Cover all food with tin foil while outside. This keeps insects or bacteria from landing on and contaminating your food.

- **Keep hot foods hot** — Grilled food that is finished cooking can be kept hot until serving by moving it to the side of the grill rack. This keeps the food from overcooking and prevents bacteria from forming.

Budget-friendly Vacations

Dreaming of a summer get-away that doesn't bust your budget? As you plan your trip, consider these money-saving travel tips.

- **Comparison shop airport options.** Big cities often have multiple airports, or smaller ones nearby. The cheapest option might be worth the drive.

- **Pack a single carry-on bag.** Many airlines are charging up to $100 for each checked piece of luggage. Plus, if your luggage is lost or delayed, you may have to purchase new items for your vacation.

- **Consider vacationing with friends or family.** Sharing a rental townhome is often less expensive than staying in a hotel. Check out www.airbnb.com, a vacation rental service that matches travelers seeking cheaper short-term accommodations with private rental options.

- **To save on food, many websites offer deals at certain restaurants, so be sure to research any specials before you hit the road. Or, rent accommodation with a kitchen so you can cook "at home."**

- **Convert to foreign currency before you leave.** Many airport currency exchanges and foreign ATMs charge hefty fees, so it is best to change your money at a bank before you leave.

- **Staycation instead.** The best way to save money might be to take a few days off to explore your city or one nearby. You might be surprised to discover that you don't have to travel far or spend a lot of money to feel like you got away from it all.

Cilantro-lime Shrimp Kebabs

Celebrate the weather by dusting off your grill and cooking up these simple, delicious cilantro-lime shrimp kebabs.

- 16 large shrimp, uncooked, deveined
- the juice of 3 large limes, or about 1/4 cup of juice
- 2 cloves of garlic, crushed and peeled
- 1 tsp black pepper
- 2 tbsp olive oil
- 2 tbsp fresh cilantro, cleaned and chopped
- 10 medium cherry tomatoes, rinsed and dried
- 10 white button mushrooms, wiped clean and stems removed

In a glass measuring cup, add the lime juice, garlic, pepper, olive oil, and cilantro and stir. Place the shrimp in a medium bowl and pour the cilantro lime marinade over the shrimp. Let marinate for only 10 to 15 minutes in the refrigerator. Alternate cherry tomatoes, mushrooms and shrimp on four skewers. Grill the skewers over a medium heat for 3 to 4 minutes on each side until the shrimp are just cooked through.

Yield: 2 servings. Each serving provides 180 calories, 6g total fat, 1g saturated fat, 17g carbohydrates, 95mg sodium and 4g fiber.

Firework Safety for Summer

The Fourth of July is just around the corner, and for many Americans, fireworks are an integral part of the celebration. June is Firework Safety Month and the perfect time to brush up in preparation for Independence Day.

According to the Consumer Product Safety Commission, hospitals treat 200 firework-related injuries daily during the months surrounding the Fourth of July. Follow these tips to make sure you and your loved ones have a safe and enjoyable holiday:

- Never allow young children to play with or ignite any type of firework—even sparklers burn at temperatures around 2,000 degrees.
- Always have an adult supervise the use of fireworks.
- Be sure that any fireworks you purchase are intended for use by the general public. Some fireworks are made strictly for professional use and could cause serious injury or even death.
- Don’t carry fireworks in a pocket, purse or backpack, as a single spark could cause them to ignite.
- Never attempt to re-light or pick up any firework that has not ignited properly—it may still be dangerous.
- Light fireworks one at a time to prevent confusion and accidents.
- Have a bucket of water or garden hose on hand in case of an emergency and to douse fireworks before discarding them.
- Keep unused fireworks away from the lighting area to prevent a spark from accidentally igniting them.
- Many parts of the country prohibit the use of fireworks. Make sure they are legal in your area before buying or using them. If your area is experiencing a drought, fireworks may be temporarily banned.

Whether you’re watching your community’s firework display, or setting them off in your own backyard, put safety first!

Buying Organic: The Dirty Dozen

Want to go organic but not sure if it’s worth the extra cost? For some types of produce, it almost certainly is. According to data from the U.S. Department of Agriculture (USDA), some types of produce are more susceptible to pesticides than others. The USDA found that some fruits and veggies without a tough, protective skin often contained residue from pesticides.

The “Dirty Dozen” are the 12 types of produce most likely to contain pesticides. To avoid chemicals, consider going organic when purchasing these fruits and vegetables:

1. Apples 7. Grapes
2. Celery 8. Sweet Bell Peppers
5. Spinach 11. Lettuce

DID YOU KNOW

While most non-organic produce contain some amount of pesticide residue, a few types are fairly resistant. Onions, sweet corn, pineapples, avocados, asparagus and sweet peas have been found to have very small amounts of residue.
Outdoor Exercise: Getting the Right Gear

Transitioning from running indoors to outside? Prepare yourself for the outdoor elements by investing in the following three key pieces of equipment:

1. **New shoes** – If your running shoes are worn out from a winter of running on the treadmill, look into ditching the old ones in favor of a new, water-resistant pair. After you spend some time running on the hard asphalt and through puddles, your feet will thank you.

2. **A running pack** – If you plan on running long distances, make sure you get a light-weight running backpack or fanny pack. These packs can store a water bottle for a run in the sun, or rain gear in case the weather turns.

3. **Rain gear** – If you don’t have any already, consider picking up packable, water-resistant pants and jacket. That way you won’t have to call off your run on account of rain.

Save on Seasonal Style

In need of a wardrobe refresh but don’t want to pay full price? Check out the following tips to discover how to dress for the summer season without breaking the bank.

- **Buy your summer clothes nine months early.** By shopping the sales racks at the end of summer you’ll be able to save significant amounts on a new summer wardrobe. Store the clothes with the tags intact and be sure to save the receipt, that way if you go up or down a size you can get back what you paid for them.

- **Summer is garage sale season and the perfect time to find a few gently-used items.** Remember to negotiate with the owner; they may be willing to offer a reduced price if you are purchasing more than one item.

- **Going to a consignment shop or second-hand store may be well worth the trip.** The prices are almost always rock-bottom and are better organized than garage sales.

- **Check out the lots of summer clothing on www.ebay.com.** Often times you can find large quantities of seasonal clothing in a single size for a small price.

- **If you have growing children in your family, organize a clothing swap with your friends, family or in your neighborhood.** Everyone can trade out their kids’ outgrown clothes for larger sizes. You get rid of unneeded clothing and get a brand new wardrobe for your child—for free!

Fresh Summer Gazpachco

Keep your cool with this refreshing chilled soup! Gazpacho originated in the south of Spain and is typically served during the warm months to help people beat the heat—perfect for the first day of summer.

- 3 medium tomatoes, peeled and chopped
- 1/2 cup cucumber, seeded and chopped
- 1/2 cup green pepper, chopped
- 2 green onions, sliced
- 2 cups low-sodium vegetable juice cocktail
- 1 tbsp. lemon juice
- 1/2 tsp. basil, dried
- 1/4 tsp. hot pepper sauce
- 1 clove garlic, minced

Combine all ingredients, except for 1/4 cup of cucumber, in a large bowl, mixing them thoroughly. Cover and store in refrigerator for several hours, until completely chilled. When ready to serve, garnish with the remaining chopped cucumber.

Yield: 4 servings. Each serving provides 53 calories, less than 1g total fat, less than 1g saturated fat, 12g carbohydrates, 41mg sodium and 2g fiber. Source: www.nhlbi.nih.gov
Confetti Corn Bread

Ingredients:
1 cup cornmeal, white, yellow or whole grain
1 cup all-purpose flour
1 cup or 2 tablespoons sugar, optional
2 ⅛ teaspoons baking powder
⅔ teaspoon salt
1 egg
3 tablespoons vegetable oil or melted butter
1 cup low-fat milk or skim milk
1 cup grated Cheddar cheese or reduced fat cheese
¼ cup chopped green onions
½ cup chopped green, red or yellow bell peppers

Preparation Time: 10 minutes
Baking Time: 25 to 30 minutes
Makes: 12 squares or wedges

Directions:
1. Preheat oven to 425 degrees F.
2. Grease bottom and sides of a 9-inch square or round baking pan.
4. In a separate cup or bowl, beat the egg with a fork or whisk. Add the oil or melted butter and milk, beating well.
5. Add the egg mixture to the dry ingredients and mix only until dry ingredients are combined.
6. Stir in cheese, onions and peppers. Do not over mix; the batter will not be smooth. Pour batter into the greased pan.
7. Bake 25 to 30 minutes until golden brown and wooden pick inserted in center comes out clean. Serve with butter.

Option: Pour batter into greased muffin cups. Bake 18 to 20 minutes. Makes 12 muffins.

Fun Fact:
Corn is a grain and staple crop of ancient cultures and the Aztecs cultivated it early as 300 B.C.

Vocabulary:
Cornmeal = dried corn kernels ground into fine, medium or coarse meal.

The Baking for Success DVD at HomeBaking.org includes more teaching aids for select recipes in this book.

Benjamin Franklin Award winner and 2011 Kansas Notable Book

By Sharon Davis and Charlene Patton, Illustrations by Coleen McIntyre

With quirky animals like Dragonfly Bakers and Bumble bee Spice Specialists, this unique baking book with recipes from the Home Baking Association will excite children into learning to bake their own special creations.

Baking is a great family activity. It covers a wide array of life skills including learning how to find a recipe, shopping for ingredients, measuring, and even cleaning up. What a valuable way to teach the children in your life the importance of following instruction and self-sufficiency. And then there is always sharing in the tasty success.

ISBN: 0971236828 - Hardcover - 74 pages - 8.5 x 11 - $20.00, includes 60-min CD
SAFE KIDS: IN OR ON THE WATER

Spending time with family and friends at the pool, the beach or on a river or lake is a favorite summer activity. Wherever you get your water fix this summer, keeping an eye on kids at all times is essential to their safety. We hope you’ll celebrate the season by reviewing and sharing Safe Kids boating safety and pool and spa safety tips.

Summer is a great time to spend time with family and friends at the beach or at the lake. Keep these safety tips in mind when spending time with family and friends in or near water this summer.

LOOK

- Always watch children when they are in or near water.
- When you are watching children, don’t be distracted by phone calls, text messages, reading or talking to others.
- Watch children even if they know how to swim.
- Children and adults should wear U.S. Coast Guard approved life jackets – especially those who can’t swim well or can’t swim at all. Wear life jackets when boating and participating in water sports.
- Keep an eye on the weather, waves and currents.
- Keep a phone near you – use it only to call for help if there is an emergency.
- If a child is missing, check the water first.

LEARN

- Learn how to swim – both children and adults should know how to swim.
- Learn How to Choose the Right Life Jacket.
- The life jacket should be appropriate for the child’s size and weight.
- The child’s chin or ears should not slip through the neck opening in the life jacket.
- The life jacket should be properly fastened.
- The life jacket should keep the child’s head above water.
- Learn how to swim out of a rip current.
- Learn how to use rescue equipment.
- Learn adult and infant CPR.
- Teach children never to swim alone and only to swim in designated swimming
Teach children how to swim/float with a life jacket.

Teach children that swimming in open water is not the same as swimming in a pool. Teach them about uneven surfaces, river currents, ocean undertow and changing weather.

NEVER leave your child alone in a car.

DID YOU KNOW

You might be surprised to hear that a child can die from heat stroke on a 72-degree day. There's a medical reason why this happens to children - their bodies aren't the same as adults. A child's body can heat up five times faster than an adult's.

Now think of how your car usually feels warmer inside than out. Did you know that even on a mild day, the temperature inside a car can rise 20 degrees in just 10 minutes? On an 80-degree day, the inside of a closed car can quickly reach 100 degrees in the time it takes to run into the store for an errand. Heat stroke happens when the body cannot cool itself fast enough and the core temperature rises to dangerous levels.

WHAT WE DO

When young children are left unattended in cars, there is no one there to be sure the inside temperature is safe for them. That's why Safe Kids is committed to educating parents and caregivers about these risks because statistics show these heat stroke incidents can happen anytime during the year.

THE NUMBERS

Since 1998, more than 500 children across the U.S. have died from hyperthermia, when unattended in a vehicle. Sadly, more than half of these reported heat stroke deaths occurred when a distracted caregiver forgot their child was in the car or truck. Other heat stroke fatalities occurred when a child was playing in an unattended vehicle and became trapped, or when a child was intentionally left unattended by an adult "for just a few minutes."

DEADLINE: Open Till Filled
JOB DESCRIPTION

POSITION: Community Health Representative-Prevention Coordinator
NON-EXEMPT POSITION
LOCATION: Red Cliff Community Health Center
REPORTS TO: Community Health Nurse
Health Center Administrator
SCHEDULE: Permanent, Full-time
WAGE: $9.00-$10.00 per hour depending on qualifications

GENERAL:

DUTIES AND RESPONSIBILITIES:
Prevention Coordinator:
1. Develop and administer a smoking cessation and support program for the Red Cliff Community and Red Cliff Tribal employees.
2. Collaborate with Community Health Nurse to develop and administer a Tribal Employee Health Initiative.
3. Organize and produce Health Center monthly newsletter.
4. Coordinate annual community events to include 5K walk/run, winter fitness activity, Women's Health Fair, Health Fair.
Optical
5. Maintain optical files including client card, prescriptions and order information according to Red Cliff Health Center HIPAA guidelines.
6. Collaborate with Contract Health Program to verify client eligibility.
7. Assist clients with frame selection including color, fit, quality and size.
8. Measure frame including pupil distance, bifocal/trifocal heights to ensure proper fit.
9. Prepare cost figures and accept payment as needed.
10. Prepare, verify and send order to eyeglass vendor.
11. Check incoming orders to ensure correct prescription and frames are satisfactory.
12. Dispense eyewear and adjust frames as needed for comfortable fit and best eyesight.
13. Complete minor repairs; forward major repairs to manufacturer.
14. Order and maintain adequate optical supplies according to Red Cliff Health Center policy to ensure proper inventory control and proper fiscal accounting.
Community Health Representative
15. Transport coordinator, to include intake, scheduling and transports of clients in accordance with the Red Cliff CHR transportation policy.
16. Track and coordinate annual staff CPR recertification classes.
17. Provide home visits when necessary.
18. Communicate with clients and families via telephone and on an individual basis.

GENERAL
19. Complete monthly, quarterly, and annual reports as required by Health Center Administration, Health Board, Tribal Council, regulatory bodies, and/or third party payers. Maintain a record of all reports and supporting documentation as required.
20. Maintain the confidentiality of all client specific information and data in accord with federal and state guidelines and requirements.
21. Present a professional, caring image for the Health Center and its programs.
   a) Maintain a cooperative relationship with other Health Center staff and employees.
   b) Demonstrate tact, courtesy, and respect in communication and interaction with Health Center patients, visitors, and staff and with outside agencies and programs.
   c) Promote a working environment noted for effective cooperation and collaboration between programs, services, and co-workers.
   d) Dress appropriately to promote professionalism within the Health Center.
22. Participate in quality assurance measures conducted within the Health Center.
23. Adhere to a professional code of conduct and applicable federal and state laws and regulations in the discharge of these assigned duties.
24. Attend staff and other meetings, in-services, and other events as directed by supervisor.
25. Participate in the implementation of grants, contracts, and projects being carried out under the auspices of the Red Cliff Community Health Center and at the direction of the Administrator. These activities are to comply with the directives of the Tribal Council and Health Center Administration and to fulfill the conditions of the individual contract grant, or project. The specific duties will reflect the individual program in initiative and the concurrent needs and resources of the Health Center. These assignments will vary from time to time due to the cyclical nature of these program efforts.
26. Perform other job related duties as directed by the immediate supervisor or Tribal Administration.

KNOWLEDGE:
1. High school diploma, HSED, or GED.
2. Certified Nursing Assistant or Community Health Representative Certificate.
3. Computer literacy, in particular, MS Office software including Powerpoint, & Publisher.
4. Capacity to deal with conflict and stress.
5. Good communication skills, written and oral.
6. Yearly certification in CPR.
7. Knowledge of and sensitivity for Ojibwe culture and traditions.
8. Non-Smoker preferred due to smoking cessation responsibilities.

PERSONNAL CONTACTS:
Daily contact with patients, visitors, primary care providers, Tribal and Health Center Administration, and other Health Center staff.

WORK ENVIRONMENT:
1. Red Cliff Community Health Center; office and clinic settings.
2. Exposure to hazards of the health care industry.
3. Work setting must be maintained as a clean, nonsmoking, well-ventilated area in compliance with all applicable safety regulations.
4. Information Access: Class 2
5. Private residences, when utilized for professional activities, will not necessarily meet the criteria of the established environmental safety regulations.

PHYSICAL REQUIREMENTS:
The duties assigned to this position involve bending, stooping, lifting, and carrying. Items may be placed on overhead storage. Weights to be carried are usually less than 50 pounds.
TRAVEL REQUIREMENTS:
Must have valid WI driver's license, vehicle, and at least liability insurance. If no insurance, must get within three weeks. Must also be eligible for the Tribe's vehicle insurance.

May require overnight travel to attend meetings or training. May be asked to perform visits to patient homes.

5. Takes the initiative to develop correspondence, draft notices of events occurring, etc., for the staff and work group.
6. Answer telephone, route calls to appropriate staff, take messages, etc.
7. Must be able to work with other tribal departments for example the Procurement and Accounting staff to make travels arrangements and the required documentation required
8. Maintain appropriate filing and recording system which will maintain all records of project activities,
9. Function in a respectable manner to all contacts, resources, individuals, etc., who make contact with the staff.

SUPERVISORY AUTHORITY: None

KNOWLEDGE: Candidate must be knowledgeable or have the ability to acquire the knowledge
- Of the Tribal Child Support enforcement
- Of the Red Cliff Tribe, Tribal history and its families.
- Must have knowledge and acceptance of the need for and relevancy of evaluation methods and procedures and its usefulness in making appropriate change to program design.
- Must have knowledge about the practical application of core Anishinaabe values in working with tribal youth and families and in generating interest in gaining insight from community as it relates to program development incorporating these values into the Child Support enforcement agency and program.
- Must have knowledge of Historical/cultural trauma as it effects current generations and the ability to relate this to the project.
- Must have knowledge of benefits gained in working together as a collaborative with other tribal and non tribal entities that interface now and will in the future with this Tribal child support enforcement agency.

QUALIFICATIONS:
- A High School diploma or GED is required. If a High School diploma is the only education the individual has, they will also be require to have four years experience as an Administrative or Program Assistant with skills as indicated in duties. Or a two year degree in Human Services or Administrative Assistance and one year experience with skills indicated in duties.
- Must possess good verbal and written communication skills.
- Must be skilled in working with computers, various word processing, publishing, power-point, scanning, and data based computer programs, e-mailing, and use of internet and recordkeeping and organizing people, events and reports.
- Have worked with tribal communities, preferably within a system providing services to families.
- Must be a positive role model in the tribal community.
- Be able to pass a child care giver back ground check.
- Must have a valid driver's license and an insurance or the ability to get insurance within two weeks of employment, as well as the ability to be placed upon the tribes insurance.
- Must be able to build positive relationships and maintain a positive perspective in working with tribal people and with colleagues.
- Native American preference will be applied in the event of equally qualified applicants.

PERSONAL CONTACTS: There will be a number of contacts with individuals associated with the Grant Project. These may consist of, and not limited to, Red Cliff and other Tribal Staff, County/State staff members of various Agencies particularly child support enforcement agency staff, contact with individuals from the Funding Agency (Federal), contacts with various sub group with -in the tribal governmental services, elders and tribal population in general.
PHYSICAL REQUIREMENTS: The physical requirements associated with this position include bending, stooping, lifting, over head lifting, and carrying items which are typically less than 50 pounds.

WORK ENVIRONMENT: The work environment will mainly consists of work in an Office setting. However, some of the work associated with the position will involve training session, Community type sessions to gather information, and other data related to the Grant Project. There may also be occasions where Grant Project staff may attend outdoor setting for ceremonies and other Traditional related gatherings, facilitation of project activities in a large group indoor setting such as convention-workshop typesetting will also occur.

TRAVEL REQUIREMENTS: The Administrative Assistant for the Title IV-D Child Support Enforcement Agency Planning initiative will be required to travel to meetings, trainings session, Community events, etc., related to the Grant Project; locally, regionally, and nationally.

SUBMISSION REQUIREMENTS: APPLICANT MUST COMPLETE TRIBAL APPLICATION AND SUBMIT A RESUME. APPLICANT MUST PROVIDE A ONE PAGE ESSAY ON YOUR INTEREST IN THIS POSITION. THE ESSAY WILL BE USED IN ASSESSING WRITTEN COMMUNICATION SKILLS. APPLICANT MUST PROVIDE THREE LETTERS OF REFERENCE.

Are you looking for a new career opportunity?
Do you want to work for an agency that values Wisconsin’s children and families?
Would you like to make a difference in the lives of Wisconsin’s Native American Indian children and families?
Then come join the Department of Children and Families team!

The Department of Children and Families (DCF) is seeking well-qualified, knowledgeable candidates who will be responsible for the planning, policy development, administration and coordination of Department programs for Wisconsin Native American Indians. These programs cut across agency bodies, geographic and functional program jurisdictions at the state and federal levels as well as encompassing various state and federal laws.

DCF is located on East Washington Avenue in the heart of downtown Madison, near the state capitol and the Madison Metro route. In addition, there is an on-site cafeteria and plenty of nearby restaurants and shopping venues. For more information about DCF, visit our website at http://dcf.wi.gov/.

Job Duties: The Tribal Liaison plans and coordinates the activities of the Department staff that provide program management, technical assistance, program support and monitoring. The position is responsible for assuring quality services are integrated, available, and efficiently delivered to Tribal communities. The Tribal Liaison provides leadership by facilitating a dynamic consultation process with Tribes in systems development, quality improvement, development and compliance with quality outcomes and measurement, and implementation of initiatives and policies.

Special Notes: Due to the nature of this position, all applicants who may be appointed to this position will be required to allow the Department of Children and Families to conduct a background check to determine whether the circumstances of any pending charge or any conviction may be related to the job being filled.

Job Knowledge, Skills and Abilities: Ability to work effectively with the leaders of sovereign tribal nations and complex government to government relationships; write and speak clearly and effectively; form and maintain positive working relationships with Department units and state agencies to support program collaboration and coordination of efforts with tribes; analyze administrative data and fiscal reports; lead teams and workgroups; facilitate problem resolution, including identifying solutions and negotiating agreement among parties; and provide technical assistance to tribal agencies on effective delivery of services.

Knowledge of the political, cultural and social status of Tribal governments and Native American experience; children and family services, including child welfare, TANF/W-2, child support and child care subsidy; other programs impacting children and families, such as mental health, substance
abuse, economic support, workforce development, health care, developmental disabilities, juvenile justice and the legal system; and the principles and practice of public administration.

**How To Apply:** You must apply online to be considered for this position. If you are logged in on WiscJobs, click on "Apply Now" at the top of the screen. (If you have not yet created an account on WiscJobs, you must do so before you can apply online.) The online application process will ask you to complete/update your personal information, add your resume and complete the exam. Please limit your resume to two pages. Your responses to the exam questions are considered an examination and will be used to determine your eligibility for this recruitment. Your resume will NOT be used in conjunction with your paper to determine your eligibility.

A panel of job experts will be convened to review your examination materials. The most qualified candidates will be invited to participate further in the next step of the selection process.

You must complete the application/exam process by the end of the day (11:59 p.m.) on **Wednesday, June 6, 2012** in order to be considered for this position.

Please direct any questions you have regarding this recruitment to kathy.helland@wisconsin.gov or call (608) 266-8998.
JOB DESCRIPTION

POSITION: Residential Treatment Assistant - Day
LOCATION: Red Cliff AODA-Mishomis House / Red Cliff Health Department
SALARY: $9.50 per hour, 29 hours per week (increase to $9.00 per hour after successful completion of probationary period)

THIS IS A REGULAR PART-TIME NON-EXEMPT POSITION

SUPERVISOR(S): AODA Treatment Director/Coordinator

JOB SUMMARY: This position will insure that the CBRF is brought to code in compliance with State rules, and maintained and kept in compliance. All function of program will be scheduled, and kept going. Clients will be kept safe, prepared for emergency situations. Person will transport residents to all assigned meetings, recreational and cultural activities.

DUTIES AND RESPONSIBILITIES:
1. Direct, coordinate, and oversee the day-to-day operation of the residential facility, the activity of residents, and the duties of support staff.
2. Participate in the selection, admission, and orientation of residents.

4. Assist residents to insure their compliance with individual treatment plans.
5. Participate in resident treatment experiences as warranted and in accord with facility policy.
6. Develop and implement cultural programming that supports AODA treatment strategies and respects individual preferences and differences.
7. Oversee the activities of relief managers and other staff assigned to the Residential Program.
8. Assist program administration in the preparation maintenance of manuals, records, documents, financial reports, and other materials required by the AODA Program Director/Coordinator, the Administrator of the Health Center, the Health Board, the Tribal Council, funding sources, and certification bodies. Maintain proper and adequate documentation for all program expenditures.
9. Complete monthly, quarterly, and annual reports as required by Health Center Administration, the Health Board, Tribal Council, regulatory bodies, and/or third party payors. Maintain a record of all reports and supporting documentation as required.
10. Meal planning under the general direction of dietary consultants and program administration. Will provide noon meal for residents.
11. The purchase or other procurement of groceries, foodstuffs, and supplies.
12. Maintain adequate stores of foodstuffs and supplies for use by the residential treatment program. Purchase replacement items according to health Department Policy to insure accurate inventory control and proper fiscal accounting. Oversee the proper storage of such items.
13. Maintain the confidentiality of all client specific information and data in accord with federal and state guidelines and requirements.
14. Transport residents in accord with facility policy and as directed by administration and in collaboration with treatment staff.
15. Utilize the resources, materials, office supplies, equipment and physical plant purchased on behalf of or allocated for use by the Red Cliff AODA Treatment Program in accord with professional practice norms and Tribal Policy.
16. Participate in quality assurance measures conducted with the AODA Treatment Program.
17. Adhere to a professional code of conduct and applicable federal and state laws and regulations in the discharge of these assigned duties.
18. Present a professional, caring image for the Health Center and its programs.
   a. Maintain a cooperative relationship with other Health Center staff and co-workers.
   b. Demonstrate tact, courtesy, and respect in communication and interaction with Health Center patients, visitors, and staff and with outside agencies and programs.
   c. Promote a working environment noted for effective cooperation and collaboration between programs, services, and co-workers.
19. Attend staff and other meetings, in-services, and other events as specified by the immediate supervisor or Tribal administration.
20. Participate in the implementation of grants, contracts, and projects being carried out under the auspices of the AODA Treatment Program and at the direction of the Director/Coordinator. These activities are to comply with the directives of the Tribal Council and Health Center Administration and to fulfill the conditions of the individual grants, contract, or project. The specific duties will reflect the individual program initiative and the concurrent needs and resources of the AODA Treatment Program. These assignments will vary from time to time due to the cyclical nature of these program efforts.
21. Perform other job-related duties as directed by the immediate supervisor or Tribal Administration.
22. Maintain a clean and safe working environment.

SUPERVISORY AUTHORITY: This position will assist in the supervision of night coordinator, 3 weekend relief coordinator.

KNOWLEDGE:
1. Personal commitment to a drug and alcohol-free lifestyle consistent with the accept norms for abstinence and sobriety. If there is a personal history of alcohol and/or chemical dependency, a minimum of two years of absolute sobriety is required.
2. Sound judgment and the capacity to respond to unusual circumstances and emergencies.
3. Ability to deal constructively with emergencies and conflicts.
4. Possession of a valid drivers license and regular access to a motor vehicle with appropriate insurance coverage.
5. Able to travel throughout the community, make home visits, attend meetings, and participate in community educational programs.
6. Available for out of town and overnight travel.

QUALIFICATIONS: High school Diploma, GED or HSED. Credentials: CBRF training required. Good interpersonal skills and the ability to get along with diverse populations (clients, co-workers, professional staff, administration and the public). Good communication skills, written and oral. Knowledge of and sensitivity for Ojibwa culture and traditions. Work experience or volunteer activities in the field of substance abuse treatment preferred.
