

A PLACE FOR TODAY. TOMORROW. THE FUTURE.

SEWER CONNECTION LETTER

The Village of Roscommon has agreed to allow the owner(s) to operate a separate septic system. In the event that the property's septic system fails, the owner will be required to connect to the Village of Roscommon's Sewer System.

Per the Sewer Ordinance under the Connection to Public Sewer System section, the applicant shall notify the Village when the building sewer is ready for inspection and connection to the public sewer. The Director of Public Works or designated representative shall then inspect the installation and, if such construction is found to conform to the established specifications, and be in a safe and sanitary condition, approval shall be granted to connect the building sewer to the public sewer system.

For sewer requirements, please refer to Sewer Requirements section on page 9 of the current Sewer Ordinance.

The owner will be required to pay for any costs not including the service and inspection of the new sewer connection.
