Hi Mandy,

Thank you for sending over these comments.

In regards to comment (1) and (2):

1. Straw bales - We can definitely make this change and ensure that straw bales are used in place of hay bales
2. The customer has an existing dry well on his property at the base of the gravel that is currently in place water collection.

Please let me know what changes or reflections are needed on our end to ensure we are compliant with your recommendations. I really appreciate your feedback and support through this process.

Thanks,

Alex Ciccio
