been notified on this inspection report date to electronically submit Hazardous Materials Business Emergency Plans and Chemical Inventory Form within 30 days. Facility can submit forms electronically by going to www.cersbusiness.calepa.ca.gov and requesting a username and password. User guides and tutorials are located on the home page to help you get started. The facility has the following hazardous materials that exceed the required disclosure quantities: -- propane -- Hydraulic Fluid. Note: Please review the maximum amount of each chemical that is onsite. Also review the average daily amount and revise it so that it reflects the amount of each chemical that is typically onsite. Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administering agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

OSHA ESTABLISHMENT

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Date: 01-12-2015
Violations Found: Yes
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: Weather: clearing fog. Rain occurred previous day. Observed worker sweeping sediment-laden water onto adjacent lot. Contact reported that they did not own/control that lot. Contact was directed to not sweep dirt onto adjacent lot. Discussed alleged dust from bag house; Mr. Pham reported that complainant's photo was taken while they were maintaining the filters and knocking collected cement back into their stockpile. Discussed alleged discharge of water from their pit to street; Mr. Pham reported that they have a disincentive to do so: their water bill is about \$3,000/month so he collects rainwater in pit and stores excess in an empty truck when it rains. Pit was found to be less than 2-ft deep with water. See attached photos for more observations.

Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Complaint Inspection
Eval Date: 01-29-2014
Violations Found: Yes
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: Weather: clear and warm. City staff/rep in attendance. Observed evidence of discharge of wash water into gutter in Monroe Avenue. Contact claims that water in the gutter is from hydrant testing. Water marks in driveway indicates that some wash water is draining to street; Contact acknowledges that some drivers pull too far forward so not all water drains back into pit. Contact instructed to set markers to show proper truck position, install trench drains to intercept as proposed, or take other action to prevent discharge. Sweeper broke down the previous day and is in the shop across the street. Shop owner allowed viewing: sweeper is a bobcat with a sweeper attachment. Contact uses sand or pans to contain spills/leaks from vehicles; prefers sand so it can be disposed of in outgoing concrete loads. Neglected housekeeping observed in back storage area where waste concrete is among stored items; Contact instructed to clean area and push waste concrete into smaller piles to minimize exposure to storm water.

S112832455

interviewed regarding discharge of cementitious waste into storm drain alleged by City of Stanton. Contact confirmed that approx. 15 gal of wet concrete was spilled onto Monroe Street from an indendent cement truck operator, "Bernie", leaving his site. Cause was not known but Contact suspected that the capacity of the truck was overstated and the truck was overfilled or the driver inadvertently bumped controls to release the wet concrete. Contact reported that his staff cleaned the spill by pushing it out of lanes to the gutter then taking back to the plant in a trash can. Gravel bags were laid in front of storm drain and water from sweeper was used to hose off the remainder. City photos document fine cementitious powder in the gutter and in the storm drain pipes. Inspection of plant shows cementitious powder on adjacent dirt lot. Contact initially claimed that he had control over the lot but later explained that it was by way of a verbal agreement with his landlord who holds a rental agreement with the landowner. No CUP has been granted by the City. Drains at gates appear to be functioning but outlet to the pit is partly plugged with hardened concrete; workers acted to remove the plug immediately. Unattended spill of acid found near central gate. Neglected housekeeping (accumulated cement powder) under disabled truck also found.

Eval General Type: Complaint Inspection
Eval Date: 04-22-2014
Violations Found: No
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: Weather: warm and sunny. SWPPP not reviewed. Complainant alleges that facility employees were washing trucks on the street. No evidence of this observed during inspection. Contact did not confirm allegation. Interceptor swales have been constructed across two of the three gateways to prevent wastewater from leaving site. Sweeper is repaired and observed in operation. Met Contact's wife at end of inspection; warned her against washing sand/aggregate into swales as observed earlier as this may plug the drains.

Violations Found: No
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: Barbara Barry and Michelle Beckwith responded to complaint alleging that cement waste was being washed out onto dirt lot next to K & G Ready Mix. Regional Board staff did not observe evidence that cement waste had been washed out onto the dirt. Some tracking was observable in the driveway. The dirt lot had trash and debris. No follow-up needed.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-18-2013
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: warm and clear. City staff were present for a joint inspection. SWPPP reviewed: includes BMPs not implemented (e.g. double walled tanks) or not fully implemented (staff training). Initial Contact did not see complete training video viewed by other employees; is not fully trained per SWPPP. Mechanical sweeper is broken and will be replaced in one month per Mr. Pham. Manual sweeping is occurring; dust is being left under trucks along E-side of property where they can roll over it. Heavy layer of sand/aggregate/cement found in bulk handling area; Contact expects major improvement when mechanical sweeper is used. Loader is leaking water coolant to ground; no evidence of off-site discharge; Contact will repair in 1 week. Contacts report plans to add bumps to both entrance gates to divert water into the loading pit where it will be used in concrete loads. Washout pit is under construction; excavated material is stored exposed; Contact agreed to remove in 2 weeks. Silo is leaking water into sump then allegedly into sewer; discharge to sewer needs to be verified and documented in SWPPP. Waste tires found stored uncovered; needs to be disposed of promptly or covered during winter. Sand/aggregate found spilled over push walls. Leaks from wrecked truck being salvaged are being addressed with sand instead of spill kit per SWPPP; better addressed with drip pans.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-13-2017
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: See attachment for inspection notes.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Other/Unknown
Eval Date: 12-16-2014
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: Weather: overcast with rain forecast. Pavement in general area is wet; indicative of recent light rain. No evidence of discharge from site observed. No meaningful track-out observed. No evidence of intentional discharge of cement to adjacent dirt lot observed but site may naturally drain to the dirt lot. Dirt lot is largely vacant; items observed may or may not be part of K&G. Observed that one circular inlet in the interceptor swale across the entry gate is not draining; met Contact who was aware and was already intending to clear the plug.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-20-2017
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a joint compliance inspection with the City of Stanton for the above facility on December 20, 2017. The SWPPP was re-reviewed on site. The facility site map was present but the training records were still missing. Mr. Pham was asked to email the training records by the end of the day. A site walk was conducted and tracking was still observed from the site onto Monroe Ave from all three driveways. Mr. Pham noted that a push broom is used to sweep up the concrete tracking. Evidence of oil sheen was observed in water on site. The unlined waste concrete pit observed at the northeast portion of the site was still present. The pit has yet to be lined. They are in the process of removing some of the pit. Large amounts of uncovered and spilled concrete powder dye was observed at the northwest corner of the site in the last inspection. The concrete powder dye was still observed spilling out of the storage container and the ground is stained. An uncovered boneyard with used industrial equipment was

still observed at the northwest corner of the site. Vehicle maintenance was still observed outside and uncovered throughout the facility. Uncovered industrial materials were observed at the southwestern portion of the facility. Tires were observed uncovered and stored outside. Uncovered waste oil drums observed during the last inspection were no longer on site. Mr. Pham was asked to email the waste manifest form records by the end of the day.

WDS:

Name: FREEDMAN INDUSTRIAL SALVAGE
Address: 8192 MONROE AVE
City: STANTON
Facility ID: Santa Ana River 30I001663
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 8
Facility Telephone: 7149524104
Facility Contact: STEVE FREEDMAN
Agency Name: FREEDMAN STEVEN B
Agency Address: 8192 MONROE AVE
Agency City,St,Zip: STANTON 90680

Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS Description: Industrial Facility Storm Water

Violations:

Site ID: 532345
Site Name: Freedman Industrial Salvage Inc
Violation Date: 05-11-2012
Citation: R8-2012-0012 - Scrap Metal Recyclers Permit
Violation Description: SW - Failure to Obtain Permit
Violation Notes: Failure to obtain SMP coverage.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-09-2016
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The facility has three sites. Main office is on what is referred to as site 1. sampling points are located at each site's driveway Regarding sampling, toxicity kit was present, field sampling kit was present, and Mr. Freedman stated that there was a sample taken two weeks ago. Mr. Freedan conducts the training for his employees. He is both SM-QSD and sampling certified. In regards to their SWPPP. Presented was, a) SWPPP b) Rain event check off list (last implementation date, 3/4/2016) c) Sweeping/ Vacuuming logs for site 1, site 2, and site 3 (record keeping in a spiral notebook). Last entry dates: 1/20/2016, 1/21/2016, 1/22/2016 respectively. a. Pre-storm check lists b. Monthly inspection reports (last date of inspection 02/01/2016) Recent changes to sites are more tarps to cover storage bins.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-26-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a Scrap Metal Permit storm water compliance inspection of Freedman Industrial Salvage on August 26, 2019. Staff met with Steven Freedman. The facility SWPPP updated by Mr. Freedman. Mr. Freedman also conducts the monthly inspections, storm water trainings, and collects the storm water samples. A site walk was conducted where Mr. Freedman provided consent to conduct the inspection as well as to take photographs. The facility is divided into three sites and three discharge points at the driveways. All three discharge points are adjacent to Monroe Avenue. One site is located south of Monroe Avenue (yard 1) and two of the sites are directly north from Monroe Avenue (yards 2 and 3). Regional Board staff inspected yard 1 first. The facility contained numerous uncovered containers of aluminum wheels and stainless steel. Staff continued the inspection across the street on yards 2 and 3. Yards 2 and 3 contained many uncovered containers and roll-offs full of aluminum wheels and other various metals.

Completed Document Type: Site Screening
Completed Date: 10/25/1994
Comments: Because the County was overseeing the UG tank removal, Staff recommends NFA for DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/09/1992
Comments: The SSI Report was reviewed by Region 4 staff. The former Diversified Chemical Corp. (Di-Chem) property occupied both sides of Electric Ave. N. of Court St. in the City of Stanton, Orange County. Presently, the property is occupied by: Paint Illustrations by Linda, California Comfort Vans, Boyd's Hotrods, and Charbonneau Tractor Maintenance. All the properties have controlled access. The buildings are still in place but the underground tanks are either removed or in process of being removed under the oversight of Orange County Health Care Agency. EPA recommended NFA because: a clay layer overlies the drinking water aquifers; there is a lack of drinking water or food chain targets via surface water; and low potential for air release because the majority of the site is paved. No sampling was done by EPA, but results of OCHCA's sampling (1989) done during underground tank removal was used. Staff recommends PEARM to determine if there is a risk that DTSC should address in the future.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS

functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.
US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Big Tex West Trailer Sales DV Trailer Home of DV Trailers and DV Manufacturing, Inc, 8072 Monroe Ave. Stanton, CA 90680 Founder Dennis Vonlossberg Email : dennis@bigtexwest.com (714-828-9900) On site to conduct a new facility inspection with regards to the Hazardous Materials Business Emergency Program. Consent to inspect and take photos of the facility was provided by Dennis Vonlossberg. This facility is responsible for identifying all hazardous materials and hazardous wastes, which are above the disclosure thresholds. Reporting thresholds for hazardous substances stored at the facility are 500 pounds of solids or 55 gallons of liquid or 200 cubic feet of gas. Hazardous wastes should have a separate disclosure. The facility was observed with the following Hazardous Materials and Hazardous Wastes being stored at the site. HM -Propane 10 x 7 gallon cylinders -Oxygen Cylinders -ATF Hydraulic fluid -Argon / CO2 The HMBEP documents can be [Truncated]
Eval Division: Orange County Environmental Health

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-29-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: The facility has one 55 gallon steel drum of waste paint booth filters near a paint booth in the rear end of the yard. The drum was observed labeled as hazardous waste, and empty.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-29-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: The following Hazardous Materials were observed on site in quantities that meet or exceed Hazardous Materials Disclosure Thresholds: Oxygen, 1000 cubic feet Argon/Carbon Dioxide mixture, 1200 cubic feet Acetylene, 400 cubic feet Propane, 63 gallons The facility had not yet submitted their Hazardous Materials Disclosure & Business Emergency Plan (HMD/BEP) to California Environmental Reporting System (CERS). This date I worked with Angela Garcia, General Manager, on creating a CERS account. Together we completed the facility's HMD/BEP and submitted to CERS, the submission has been accepted.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 06-12-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: CERS ID 10750492 HMBP submitted on 6/11/18 was reviewed and accepted. All submittal elements were approved.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: T/A PUMP SALES AND SERVICE INC
Violation Date: 01-21-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 06/12/2017. During an on site verification the following will need to be updated: --Acetylene needs to be added to inventory -- Waste oil needs to be added to inventory -- Waste hydraulic oil needs to be added to inventory -- Propane needs to be added to inventory -- Hydraulic Oil needs Chemical name: Hydraulic oil, needs a CAS number -- Oxygen chemical name is Compressed Oxygen, cas number is 7782-44-7, fire cod hazard class is Oxidizer gas, Fed hazard cat: Fire, acute and chronic, mark days on site 365, storage pressure is above ambient. -- Compressed mixed gas chemical name is Argon/CO2 Common name is Argon Carbon Dioxide gas mix (blueshield), Fire code hazard class is compress gas. Hazardous component Carbon Dioxide 25 % cas 124-38-9 Argon 75% CAs 7440-37-1. Fire hazard cat: fire acute and chronic. Days on site 365. storage pressure : above ambient. Approximately 1,1885 cf on site. Correct violation within 30 days.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-21-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a Hazardous Waste Inspection. Met with Brent Avila who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: waste oil, waste oily sludge, mineral spirits waste and used oil filters Hazardous waste

WDS:

Name: LEISURE WORLD UNION TOWING
Address: 8181 ELECTRIC AVE
City: STANTON
Facility ID: Santa Ana River 30I017669
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 8
Facility Telephone: 5624307939
Facility Contact: JIM KRUGER

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes: Returned to compliance on 09/13/2017. Inspection logs for 2015, 2016, and January through April of 2017 were not available. Conduct and maintain inspections for aboveground petroleum storage (the diesel tank, hydraulic and motor oil containers, and used motor oil tank). Do these inspections according to the frequency of what your SPCC states, which would be monthly. Have these inspection records available for review.

Service, Inc. and the facility has 5 employees. Walked throughout the facility and observed the hazardous waste storage area. Containers were closed and properly labeled. Manifests were available for review. The facility's EPA ID number is active. Employees are trained. Emergency plan is posted in the office down the street. The facility's dumpster was observed and there are no signs of hazardous/universal waste at this time. No hazardous waste violations were observed this date. A copy of this inspection report was emailed to Dale Huss at dale@harpereq.com.

Eval Notes: INSPECTOR COMMENTS: On site for routine Aboveground Petroleum Storage Tank (APST) inspection. Consent to enter and inspect was given by Dale Huss, President and Tony Linares, Mechanic. The facility has the following petroleum storage capacity: - Diesel, 2,000 gallons - Hydraulic Oil, 100 gallons - Motor Oil, 100 gallons - Used Motor Oil, 240 gallons An SPCC Plan is maintained on site. The last SPCC renewal date was March of 2010. SPCC Plans are required to be reviewed and recertified every five years. Employee training records for employees that conduct oil-handling activities were not available for review. The facility is not maintaining signed records or logs of inspections and tests as required by their SPCC Plan for up to 3 years. Today Tony and I conducted a walkthrough of the facility and he did an inspection log for the month of May. I instructed Tony to do these inspections according to the frequency stated in the facility's SPCC Plan. The [Truncated]

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Reviewed the facility's CERS HMBEP Submission. Hazardous Materials Inventory Declined - Add fire hazard classes to all materials reported in the inventory submitted. Also, the 240 gallons of used oil observed during the inspection is missing from the inventory - please make sure to distinguish the hazardous material type as a waste and add the state waste code 221. Also, the 244 cubic feet of oxygen disclosed on the inventory does not meet hazardous material disclosure thresholds. Please confirm the volume of oxygen on site, if it the volume on site is below 1,000 cubic feet, remove it from the submission.

CERS Description: Chemical Storage Facilities

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-21-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan Inspection. Consent to enter and inspect was given by Steve Freedman, President. The facility does not have Hazardous Materials on site, the facility owns another yard of land across the street, 8211 Monroe and 8201 Monroe Ave, which do have hazmat on site. The CERS submission this facility has submitted has been edited to reflect the correct address. This facility will be inactivated in the HMBEP program. A copy of this inspection report was sent to freesteve@aol.com.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 07-26-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: hmbep conditionally accepted This submittal is being conditionally approved in order to facilitate transfer of data to California Electronic Reporting System (CERS) database. The facility will need to make the following revisions in CERS following notification of data transfer: Emergency Plan: Please fill out the emergency plan and employee training program. This is a crucial component to your submission for emergency first responders and the fire department. Employees should be trained annually and documentation should be kept for 3 years. For further assistance please contact Justin Bechara at

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: On site to conduct a Hazardous Waste Inspection. Met with Angela and Chijoke who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: Waste oil, oil filters and oil/water separator Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words G HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. G toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. HMBP

Eval Notes: On site to conduct a follow-up APST inspection in order to verify the volume of the Aboveground Petroleum stored at the facility. I met with Chijoke Akunyili and he provided a tour of the oil storage components. The oil filled electrical equipment, the 3000 gallon Standard Gravity Oil Water Separator and the 330 gallon Pressure vessel storing lubricating oil do not qualify as the part of the volume counted toward the 1320 gallons limit requiring the them to be in the APST program. Without these storage tanks of oil the total volume of Petroleum stored on site in 55 gallons or more oil stored in containers or tanks is below 1320 gallons. Therefore the facility is not be required to be in the APST program and can be removed from the program. If the volume of Petroleum storage in Aboveground tanks increase to above the 1320 gallons, please notify this agency for a re-inspection.

Eval Notes: On site for an aboveground petroleum storage tank (APST) inspection. Met with Chijioki Akunyili of SCE. Consent was provided to enter and conduct inspection activities. Facility is regulated under the Aboveground Storage Tank Act (APSA). Based on current inventory, the facility has approximately 2,049 gallons of regulated petroleum products (not including mineral oil). Based on the current facility Tank statement, SCE is including mineral oil stored in electrical equipment. Note that California does not regulate oil-filled electrical equipment. Federal Law (SPCC Rule 112) does include oil filled electrical equipment. Facility has the following: 1) On site SPCC prepared and implemented: a. Facilities that are a qualified Tier 1 facility (store less than 10,000 gallons, with no single tank/container having a volume greater than 5,000 gallons) can create their own SPCC Plan using a federal template. b. SPCC Plan was certified on 8/13/2014. 2) Periodic tank [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Notes:	Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

FINDS:

Registry ID: 110002775783

Click Here:

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Date:	11-06-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for hazardous waste inspection. Consent to enter and inspect given by Dale Bodwell, President. Walked throughout facility, observed hazardous waste storage and dumpster areas. No hazardous/universal waste observed in dumpster. One 300 gallon latex paint waste tote bin at the back of the facility was labeled with Hazardous Waste label during the inspection. Manifests were available for review. Emergency Plan is posted in the office.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	04-08-2014
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site for routine inspection. Permission to enter, inspect, and take photographs granted by Dale Bodwell this date. Hazardous Waste receipts from Veolia made available and reviewed. 6 drums of waste latex paint are at site and properly labeled as hazardous waste for disposal. The un-used latex paint/water is brought back from job-sites and placed into 55-gallon drums and is disposed of The un-used paint and sealants are stored outside behind the building in a bermed area. Some paints are re-used at sites and some are donated. The paints that cannot be re-used are determined to be waste or a recyclable material and disposed of periodically. OCFA BEP on-site. But a plan has not been completed online yet. The facility has obtained a password and is in the process of completing the BEMP online Inspected trash/dumpster and it does not appear to contain any hazardous waste. The perimeter of the facility was also inspected; no obvious signs of releases were [Truncated]

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year. ICIS (Integrated Compliance Information System) is the Integrated

Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Address:	8121 KATELLA AV
City,State,Zip:	STANTON, CA 90680
Site ID:	411597
CERS ID:	10546672
CERS Description:	Chemical Storage Facilities
Violations:	
Site ID:	411597
Site Name:	KATELLA PLYWOOD & LUMBER
Violation Date:	03-20-2019
Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 03/20/2019. OBSERVATION: The business failed to update business plan within 30 days when one of the following occurs: a 100 percent or more increase in the quantity of a previously disclosed material; any handling of a previously undisclosed hazardous material; a change of business address, business ownership, or business name; or a substantial change in the handler's operations that requires modification to any portion of the business plan. CORRECTIVE ACTION: Facility updated hazardous materials inventory during the inspection to reflect the correct amount of Propane on site. No further action required.
Violation Division:	Orange County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Evaluation:	
Eval General Type:	Other/Unknown
Eval Date:	03-10-2016
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Accepted Esubmit submission. Re certified per on site inspection.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-09-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct hazardous materials chemical inventory and business emergency plan inspection this date, consent to enter, inspect and take photographs was given by Brian. The HMBEP has been submitted through ----E-submit The facility has the following hazardous materials that exceed the required disclosure quantities: -- Propane -- Regular Gasoline Note: Please review the maximum amount of each chemical that is onsite. Also review the average daily amount and revise it so that it reflects the amount of each chemical that is typically onsite. Reporting thresholds are 500 pounds of solid or 55 gallons of liquid or 200 cubic feet of gas. .

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-20-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect granted by Brian Wilson, Owner. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - 1,000 gallons of Gasoline - 306 gallons of Propane The following documentation submitted to CERS on 3/20/2019 has been reviewed and ACCEPTED: - Business Activities - Owner/Operator Information - Hazardous Materials Inventory - Site Map - Emergency Response Plan - Employee Training Plan The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds of 55 gallons for liquids, 500 pounds for solids, & 200 cubic feet for gases. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 [Truncated]

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 04-19-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Reviewed facility's CERS HMBP submission. All submittal elements accepted. Suggestions were made for the hazardous material inventory. The emergency response plan will need to be updated at time of inspection. Submission accepted however please note for the following: Hazardous Materials Inventory - The maximum daily amount should reflect the maximum amount of that material that you may have on site at any one time. The average daily amount should reflect the amount of that material that may be present at any one time. For example, a 55 gallon drum of motor oil has a maximum daily amount of 55 gallons, but may have an average daily amount of 30 or 40 gallons.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-12-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On site for a routine Hazardous Waste inspection. Consent to inspect and take any necessary photos was given by Cesar Lopez, Human Resources Manager. Facility ownership and number of employees were verified. Ownership is under Trimas Corp and the facility has 55 employees. Walked throughout the facility and observed the hazardous waste storage area. Containers were closed and properly labeled. Manifests were available for review. The facility's EPA ID number is inactive. To activate your EPA ID number please go to the following website, <http://www.dtsc.ca.gov/IDManifest/ReactivateEPAID.cfm>. Download the EPA Form 8700-12 (EPA ID Number Instructions and Form) and follow instructions. Employees are trained. Emergency plan is posted in the shipping and receiving department. The facility's dumpsters were observed and there are no signs of hazardous/universal waste at this time. No hazardous waste violations were observed this date. A copy [Truncated]

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Notes: On site for routine UST inspection and monitoring system certification and spill bucket testing. Site contact is Maria Rosales. The facility has four double-walled tanks (a 12,000-gallon regular unleaded (87) tank, and three 10,000-gallon tanks containing supreme (91), diesel, and E85) monitored by a Veeder Root TLS-350 system. The monitor is operational for audible and visual alarms. The panel display reads G all functions normal. G Flapper valves are used for overfill prevention in tanks. The sensors in the fuel tank annulars (301G s), piping and turbine sumps (208G s in the 87, 91, and diesel tanks and 323G s in the E85 tank) all shut down the turbines when submerged in liquid. The two UDCs without E85 nozzles are monitored by 208 sensors and the two UDCs with E85 nozzles are monitored by 323 sensors. The sensors shut down the turbines when submerged in fluid. The mechanical line leak detectors were tested with a simulated 3 gph leak and were determined to be operational. [Truncated]

Eval Notes: Reviewed all outstanding UST electronic submittals. Package was declined and an email sent to the facility contact. The following corrections are needed: Tank information pages G submittal indicates that an overfill alarm is present, however the 2016 monitoring system results indicate that in-tank gauging (MAG probe) is only used for inventory purposes. This means that the MAG probe was not tested for overfill prevention which would be required if the MAG probe is being used as an additional overflow prevention method. Either adjust your forms to indicate only flappers are used for overfill prevention or conduct and submit overflow prevention testing results for the MAG probe to this agency. Certificate of Financial Responsibility G the amount that the State Fund will cover is limited at \$1M. Please update your form to reflect this limit and update your CFO Letter. Leak Response Plan G the plan that you have submitted is outdated (2008 form). Please submit a current [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Year: 2010
Gepaid: CAL000040299
TSD EPA ID: CAD008252405
CA Waste Code: 352 - Other organic solids
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.1

Year: 2009
Gepaid: CAL000040299
TSD EPA ID: CAD008252405
CA Waste Code: 133 - Aqueous solution with total organic residues 10 percent or more
Disposal Method: H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons: 0.37113

Year: 2005
Gepaid: CAL000040299
TSD EPA ID: CAD008302903
CA Waste Code: 214 - Unspecified solvent mixture
Disposal Method: R01 - Recycler
Tons: 0.6876

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-07-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On site for a routine Hazardous Materials and Business Emergency Plan (HMBEP) inspection. Consent to enter and inspect was given by Willy Valdez, Body Shop Manager, and Maria Garcia, Office Manager. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Used Oil, 165 gallons - Motor Oil, 55 gallons - Waste Antifreeze, 55 gallons - Lacquer thinner, 55 gallons - Waste lacquer thinner, 55 gallons The facility had submitted their HMBEP to Esubmit, but our file transfer from Esubmit to CERS (California Environmental Reporting System) did not transfer the facility's HMBEP submission. Today I worked with Maria on completing and submitting the facility's HMBEP. The facility still had open violations from 2014 for not submitting an adequate hazardous materials disclosure and business emergency plan. The submission will be [Truncated]

Eval Notes:	INSPECTOR COMMENTS: On site for a routine Hazardous Waste inspection. Consent to inspect and take any necessary photos was given by Willy Valdez, Body Shop Manager. Confirmed ownership of the facility is under International Auto Tech, Inc., and the facility has 20 employees. Walked throughout the facility and observed hazardous waste storage areas. Containers were closed and properly labeled. Manifests were available for review. The facility's EPA ID number is active. Employees are trained. Emergency plan is posted in the office. The facility's dumpster was observed and there were no signs of illegal disposal. No hazardous waste violations were observed this date. A copy of this inspection report was sent to goldentouchautocenter@hotmail.com.

WDS:

Name: ORCO BLOCK COMPANY - STANTON
Address: 8042 KATELLA AVE
City: STANTON
Facility ID: Santa Ana River 30I004559
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 8
Facility Telephone: 7145272239
Facility Contact: GEORGE SPICKELMIER
Agency Name: ORCO BLOCK COMPANY
Agency Address: 8042 KATELLA AVE
Agency City,St,Zip: STANTON 90680
Agency Contact: CLINTON RUSSELL
Agency Telephone: 9099283839
Agency Type: Private
SIC Code: 3271
SIC Code 2: Not reported
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste: STORMS

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

re-tested and passed testing. Violation was corrected on site.

Violation Division: Orange County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 140288
Site Name: ORCO BLOCK & HARDSCAPE
Violation Date: 03-10-2020
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 04/07/2020. Secondary containment pallet under the three 15 gallon containers of waste grease was observed with accumulated liquid. Per Mr. Hemby liquid will be removed and hauled on a hazardous waste manifest. Secondary containment pallet is currently acting as a hazardous waste container and must stored closed when not adding or removing waste. Alternatively the liquid can be removed from the pallet and placed into a container that is stored closed. Provide photographs to this agency demonstrating secondary containment pallet is being stored closed or waste has been placed into a container that is stored closed.

Site Name: ORCO BLOCK & HARDSCAPE
Violation Date: 03-11-2019
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 04/15/2019. OBSERVATION: Check that all testing and maintenance has been completed and documented; the designated operator (DO) report did not note the compliance issues (overfill prevention test not completed). CORRECTIVE ACTION: Submit a copy within 30 days via email to the Agency of the next DO report showing all compliance issues (if any) have been addressed.

Violation Date: 03-11-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 03/18/2019. OBSERVATION: Facility failed to test overfill prevention equipment at least once as of 10/13/2018 and every 36 months thereafter. CORRECTIVE ACTION: Overfill prevention equipment was tested this date. Submit passing test results to this Agency within 30 days to abate this violation.

Eval Notes: On site for routine UST inspection, monitoring system certification,
and spill bucket testing. The facility has one double-walled tanks
(87) monitored by a EBW system. The site has double-walled pressurized
piping with mechanical line leak detector. Positive shutdown and fail
safe programming were verified. Flapper valves is used for overfill
prevention. Testing was conducted by Rich Ruston of Orange County Tank
Testing. Tester certifications (ICC, VMI, Redjacket) were verified.
Secondary containment testing was last conducted on 03/31/2017. It
must be tested every 36 months. Overfill prevention testing was last
conducted on 03/01/2019. It must be tested every 36 months. Please
submit the test reports to this Agency within 30 days.

Violation Date: 03-10-2020
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 04/07/2020. Secondary containment pallet under the three 15 gallon containers of waste grease was observed with accumulated liquid. Per Mr. Hemby liquid will be removed and hauled on a hazardous waste manifest. Secondary containment pallet is currently acting as a hazardous waste container and must stored closed when not adding or removing waste. Alternatively the liquid can be removed from the pallet and placed into a container that is stored closed. Provide photographs to this agency demonstrating secondary containment pallet is being stored closed or waste has been placed into a container that is stored closed.

monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 04/15/2019. OBSERVATION: Check that all testing and maintenance has been completed and documented; the designated operator (DO) report did not note the compliance issues (overfill prevention test not completed). CORRECTIVE ACTION: Submit a copy within 30 days via email to the Agency of the next DO report showing all compliance issues (if any) have been addressed.

Eval Notes:	INSPECTOR COMMENTS: On site for a routine Hazardous Materials and Business Emergency Plan (HMBEP) inspection. Consent to enter and inspect was given by Ray Flores, EHS Manager. Observed the facility and inspected hazardous materials storage. Hazardous materials observed on site match hazardous material inventory reported in CERS (California Environmental Reporting System). Employee training is conducted throughout the year and documentation was reviewed. The facility has submitted their HMBEP to CERS. The HMBEP is maintained on site in the maintenance shop and office. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds (55 gallons liquids, 200 cubic feet compressed gases, 500 pounds solids). If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. Please refer to [Truncated]

Eval Notes:	INSPECTOR COMMENTS: On site for routine Aboveground Petroleum Storage Tank (APST) inspection. Consent to enter and inspect was given by Ray Flores, EHS Manager. The facility has the following petroleum storage capacity: - 1,100 gallons of Diesel - 600 gallons of Motor Oil/Hydraulic Oil/Tractor Fluid - 550 gallons of Used Oil The diesel APSTs, 10 (55gallon) drums of various motor and hydraulic oils, and used oil APSTs have secondary containment, which are free of liquid and debris. One drum of motor oil was observed without secondary containment, but spill absorbent is readily available. An SPCC Plan is maintained on site and is dated 11/1/2016 and is up for renewal 11/1/2021. Employee training records for employees that conduct oil-handling activities were available and reviewed. The facility is maintaining signed records/logs of inspections and tests as required by their SPCC Plan for up to 3 years. No APSA violations were observed this date. A of [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Admin Agency:	Orange County Emergency Management Division
Amount:	Not reported
Contained:	Yes
Site Type:	Storm Drain
E Date:	Not reported
Substance:	non-PCB Mineral Oil
Quantity Released:	20
Unknown:	Not reported
Substance #2:	Not reported
Substance #3:	Not reported
Evacuations:	Not reported
Number of Injuries:	Not reported
Number of Fatalities:	Not reported
#1 Pipeline:	No
#2 Pipeline:	No
#3 Pipeline:	No
#1 Vessel >= 300 Tons:	No
#2 Vessel >= 300 Tons:	No
#3 Vessel >= 300 Tons:	No
Evacs:	No
Injuries:	No
Fatals:	No
Comments:	Not reported
Description:	RP states: Cable failed on pad mount transformer

Address: 8042 KATELLA AVE
City,State,Zip: STANTON, CA 90680
Site ID: 82800
CERS ID: 10164145
CERS Description: Chemical Storage Facilities

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 03-13-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: CERS 2017 - Accepted / No change to HM Inventory - filed prior to 3/1/17
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-18-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On site for a routine Hazardous Materials and Business Emergency Plan (HMBEP) inspection. Consent to enter and inspect was given by Scott Baker, Cell Technician. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Lead Acid Battery Electrolyte, 74 gallons - Diesel, 55 gallons The facility has submitted their HMBEP to CERS. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds (55 gallons liquids, 200 cubic feet compressed gases, 500 pounds solids). If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. Please refer to occupainfo.com for more information. No HMBEP violations observed this date. A copy of this [Truncated]

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 01-08-2004
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a drive-by inspection of the above mentioned facility on January 8, 2004. Staff observed unauthorized nswd (water tracking) leaving the front driveway of the facility. Neither Steve of David Ewles were available. Staff spoke with a representative of the facility about the discharge, discussed permit requirements and potential fines. This is the third visit to this facility for this exact complaint/observation.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-31-2012
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: warm and sunny. SWPPP dated 7/7/2003. Vehicle maintenance does not occur except for topping off fluids. Site drains internally either to the un-paved stockpile/processing area or to a catch basin inlet. Inlet has a raised outlet to the storm drain that is capped off. Water is pumped to a water truck and used for dust suppression. Sump is fitted with a removable box at its bottom to collect and remove sludge. Sludge is placed with stockpiles and incorporated into product. All drainage found in working condition; no track out observed; no ponded water observed; outlet cap found in place; a small amount of weathered litter found behind the above-ground fuel tank.

Eval General Type: Complaint Inspection
Eval Date: 11-12-2003
Violations Found: No
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: On November 12, 2003. Regional Water Board staff conducted a complaint spills response at the above mentioned site. Contact was made with Steve Ewles the owner of the company. On August 16, 2003 a citizen reported a spill that occurred from a wash down of the drive approach and water entered the storm drain system. Upon review of the SWPPP all elements were in order and were presented upon request. Steve was questioned about the discharge but had no knowledge of the discharge. A verbal warning was issued to stop or control all non storm water discharges and question all employees as to what had happened. On December 1, 2003. Steve call this office to confirm that an accidental wash down had occurred and that the employee was given notice to stop this action. A verbal warning was given again to control all non storm water discharges over the phone.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 10/12/2020. OBSERVATION: The business did not provide one or more of the following: initial employee training, adequate employee training, annual employee training and/or maintain records of employee training. CORRECTIVE ACTION: Provide all employees with required training that includes: safe handling hazardous materials, emergency response procedures, and proper use of response equipment. Maintain records of training available for 3 years. Submit training records via email to correct this violation.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-03-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENT: On site for a routine CalARP inspection, accompanied by Marco Escobedo, Hazardous Materials Specialist. Facility has a 5,000 gallons tank of aqueous ammonia at 19% concentration. The tank is not filled to capacity and will be kept at a maximum amount of 4,250 gallons. Facility is regulated as a Level 1 facility. Tank has secondary and tertiary containment. Polyballs are added the secondary containment to reduce surface area evaporation and volatility in the event of a catastrophic release. Routine maintenance are performed on the system per manufacturer recommendations. System is designed to shut down when sensors reaches 25% IDLH limits; the whole plant shut down if a leak is detected in the storage area.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-15-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site for routine inspection. Permission to enter, inspect, and take photographs granted by Rudy Mellow this date. Hazardous Waste receipts made available and reviewed. HW containers properly labeled. Emergency numbers posted. The perimeter of the facility was also inspected; no obvious signs of releases were noted.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 02-29-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Called back facility. a follow up inspection will have to be conducted to verify less than 55 gallon drums.

Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	03-01-2016
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On site with Rudy for a HMBP(Hazardous Materials Business Plan) inspection. Martin requested this agency come out to do a verification of chemicals. The facility has the following hazardous materials that exceed the required disclosure quantities: -- 55 gallon drum of Thinner -- This agency discussed that the solvent base paint was very close to threshold 50 gallons. Note: Please review the maximum amount of each chemical that is onsite. Also review the average daily amount and revise it so that it reflects the amount of each chemical that is typically onsite. Reporting thresholds are 500 pounds of solid or 55 gallons of liquid or 200 cubic feet of gas. Second and subsequent re-inspections may result in a re-inspection fee of \$112/hour. .

Eval Notes:	The facility was issued violations I292 and I169 on 10/16/14 for failure to submit an HMBEP (Hazardous Materials Disclosure and Business Emergency Plan) and Hazardous Materials Inventory electronically to this Agency through California Environmental Reporting System (CERS). The facility has still not submitted their HMBP to CERS and these violations remain outstanding. Please follow the instructions for creating and submitting an HMBEP to CERS sent in the email with this report. Please complete and submit your HMBEP to CERS within 30 days. For assistance contact Justin Bechara at jbechara@ochca.com or (714)290-5786. A copy of this report was sent to Alex Hernandez at m12103@cfgauto.com.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	07-30-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Consent to inspect was given by Alex Hernandez, General Manager. The facility has undergone a change of ownership. The facility has two containers of hazardous waste on site: - One cubic yard box for bondo and waste paint sanding dust, debris and filters - One 55 gallon drum for waste paint mixed with acetone Containers were labeled properly. Discussed best management practices and disposal documentation with Alex. No hazardous waste was observed in the facility's municipal trash. No violations were observed this date.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	07-30-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Consent to inspect was given by Alex Hernandez, General Manager. The facility had previously not submitted their Hazardous Materials Disclosure & Business Emergency Plan (HMBP) to California Environmental Reporting System (CERS). I worked with Alex this date on creating a CERS account. Together we created the facility's HMBP, it was submitted to CERS and accepted. Violation I208 is corrected on site. The following materials were observed on site in quantities that meet or exceed disclosure thresholds: - Waste paint mixed with acetone, 55 gallon drum The facility has no outstanding violations at this time.

Violation Date: 02-22-2019
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 03/18/2019. OBSERVATION: Facility did not comply with the following DO monthly inspection requirements: Check that all testing and maintenance has been completed and properly document compliance issues in the report; compliance issue regarding overfill equipment test overdue was not noted in the compliance issue section of the DO reports. DO inspections conducted after 9/30/2018 must be every 30 days and in accordance with sections 2716(a)-(e). CORRECTIVE ACTION: Ensure that the Designated Operator is complying with all the requirements noted above. Submit a copy of the next monthly designated operator report showing all deficiencies listed above have been corrected.

Eval Notes: An on-site inspection was conducted this date to witness the annual monitoring system certification. Rich Ruston (OC Tank Testing) conducted the monitoring system certification and provided current Veeder-Root and ICC certifications. This facility contains: 1 - USTs (diesel) 1 G Dispenser Monitor system is a Veeder-Root monitor panel and reads all functions normal. The tank system is a suction system. Overfill protection provided by fill-tube shut-off valve (flapper). Sensors were observed positioned so as to initiate alarms at the earliest point possible. Sensors were re-positioned in a true vertical position upon installation after testing. Alarm history and setup tape reviewed while on site. The following were tested: - Sensors, initiated alarm when tested in water - Spill buckets using a visual hydrostatic test - UDC float and chain assembly Documents reviewed onsite: - Permit to operate - Previous Monitoring System Certification conducted on [Truncated]

Eval Notes: Martin Schwartz of Orange County Tank Testing provided the following valid certifications: ICC, Veeder-Root. There is one 3000-gallon, double-walled, diesel tank onsite. The system is suction. Overfill protection is provided by a flapper valve in the drop tube. The fill/piping sump is monitored by a VR-208 sensor. A VR-420 sensor is in use in the dry annular. A float and chain mechanism is in use in the UDC. The UST system is monitored by a Veeder-Root TLS-300C panel. The sensors initiate audible and visual alarms when immersed in water. The spill bucket was tested hydrostatically for 1 hour. All components that were tested passed. Reviewed CERS ID# 10513306 UST submittal dated 1/3/18. Make the following changes and resubmit within 30 days: Facility Information: Financial Responsibility Mechanism(s) = STATE FUND AND CFO LETTER. Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 04-26-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: The facility has corrected their Financial Responsibility Mechanism to indicate State Fun and CFO letter on their Permit Application. Violation I582 is corrected. The facility has submitted their CFR, dated 3/15/18 covered continuously, and submitted their leak response plan which are adequate. Violations I583, I673, and I022 have been corrected. The facilityG s plot plan in CERS has been declined due to it not showing piping lines, location of UDC or VR panel, or sensor models and numbers. Violation I161 remains outstanding. This Agency has received the following documents: - Monitoring system certification dated 2/22/2018 - Spill bucket test report dated 2/22/2018 Tank components match the facilityG s CERS submission and what was observed on site. All components that were tested, including the spill bucket, passed.
