

CITY OF STANTON
STANTON CITY HALL, 7800 KATELLA AVENUE, STANTON, CA

PLANNING COMMISSION REGULAR MEETING

WEDNESDAY, FEBRUARY 21, 2024 - 6:30 P.M.

AGENDA

In compliance with the American Disabilities Act, if you need special assistance to participate in this meeting, you should contact the Community Development Department at (714) 890-4210. Notification 48 hours prior to the Commission meeting will enable the City to make reasonable arrangements to assure accessibility to this meeting.

1. CALL TO ORDER STANTON PLANNING COMMISSION REGULAR MEETING

2. PLEDGE OF ALLEGIANCE

3. ROLL CALL

Chair Adams, Vice Chair Frazier, Commissioner Ash, Commissioner Sanchez, Commissioner Tran

4. APPROVAL OF MINUTES

None.

5. PUBLIC COMMENTS

This is the time for members of the public to address the Planning Commission on any non-agendized matters within the subject matter jurisdiction of the Planning Commission.

- Each speaker will have a maximum of three (3) minutes,
- The Commission cannot discuss or take action on these items.
- All speakers must fill out a REQUEST TO SPEAK card and submit it to the Secretary of the Commission.
- The Chair will call speakers to the microphone. Please state your name, slowly and clearly, for the record.
- When three (3) minutes has expired, please return to your seat as you will not be

permitted to have additional time for comments.

6. CONSENT CALENDAR

6A. A REQUEST TO FIND THAT ACCEPTANCE OF A GRANT DEED FROM BONANNI DEVELOPMENT (LIFE ILLUMINATED, LLC) CONVEYING TO THE CITY OF STANTON A RIGHT-OF-WAY EASEMENT AND GRANT DEED FOR CERTAIN REAL PROPERTY LOCATED AT 12736 BEACH BOULEVARD (VRV) (APN: 131-501-04) IS CONSISTENT WITH THE GENERAL PLAN)

7. PUBLIC HEARING

7A. CONSIDER ADOPTION OF STANTON TOWN CENTER SPECIFIC PLAN AND CORRELATING GENERAL PLAN AMENDMENT, ZONE MAP AMENDMENT, AND SUBSEQUENT INITIAL STUDY AND MITIGATED NEGATIVE DECLARATION TO THE 2008 GENERAL PLAN ENVIRONMENTAL IMPACT REPORT.

RECOMMENDED ACTION

That the Planning Commission of the City of Stanton hereby resolves as follows:

- Conduct a public hearing then consider all oral and written evidence presented; and
- Adopt the Initial Study and Draft Subsequent Mitigated Negative Declaration (MND) prepared pursuant to CEQA and the State CEQA Guidelines; and
- Adopt Resolution No. 2563 recommending that the City Council approve the Stanton Town Center Specific Plan, General Plan Amendment, Zone Change, and certify the Subsequent Initial Study/Mitigated Negative Declaration prepared pursuant to CEQA and the State CEQA Guidelines (SP 23-01, GPA 23-01, ZC 23-01) (SCH No. 2023110397)

8. NEW BUSINESS

None.

9. OLD BUSINESS

None.

10. SPECIAL PRESENTATIONS

None.

11. PLANNING COMMISSION COMMENTS

At this time Commissioners may report on items not specifically described in the agenda which are of interest to the Commission provided no discussion or action may be taken

except to provide staff direction to report back or to place the item on a future agenda.

12. DIRECTOR'S REPORT

None.

13. ADJOURNMENT

I hereby certify under penalty of perjury under the laws of the State of California, the foregoing agenda was posted at the Post Office, Stanton Family Resource Center and City Hall, not less than 72 hours prior to the meeting. Dated this 21st day of February 2024.

Crystal Landavazo
Community & Economic Development Director

CITY OF STANTON REPORT TO THE PLANNING COMMISSION

TO: Chair and Members of the Planning Commission

DATE: February 21, 2024

SUBJECT: A REQUEST TO FIND THAT ACCEPTANCE OF A GRANT DEED FROM BONANNI DEVELOPMENT (LIFE ILLUMINATED, LLC) CONVEYING TO THE CITY OF STANTON A RIGHT-OF-WAY EASEMENT AND GRANT DEED FOR CERTAIN REAL PROPERTY LOCATED AT 12736 BEACH BOULEVARD (VRV) (APN: 131-501-04) IS CONSISTENT WITH THE GENERAL PLAN

RECOMMENDED ACTION

That the Planning Commission:

- Find that acceptance of an easement deed of public right-of-way for street purposes from Life Illuminated, LLC. is consistent with the General Plan; and
- Adopt Resolution No. 2564 finding the acceptance of a grant deed for public street and municipal purposes from Life Illuminated, LLC is consistent with the General Plan; and

Find the proposed action categorically exempt under the California Environmental Quality Act ("CEQA") under Section 15378(b)(5) – Organizational or administrative activities of governments that will not result in direct or indirect changes in the environment; and

BACKGROUND

The City has a Livable Beach Boulevard Mobility Plan, adopted in November 2010, which provides guidance for improvements within the public rights-of-way or publicly accessible areas on Beach Boulevard. The Livable Beach Boulevard Mobility Plan recommends widening sidewalks along Beach Boulevard and improving existing facilities to become ADA compliant to create streetscape beautification and enhanced pedestrian circulation. Development of the VRV apartment complex initiated improvements to the public right-

of-way that included a widening of the sidewalk. Life Illuminated, LLC is now offering to convey the expanded area to the City of Stanton.

State of California Government Code §65402 specifies, "no real property shall be acquired by dedication or otherwise for street, square, park or other public purposes, and no real property shall be disposed of, no street shall be vacated or abandoned, and no public building or structure shall be constructed or authorized, if the adopted general plan or part thereof applies thereto, until the location, purpose and extent of such acquisition or disposition, such street vacation or abandonment, or such public building or structure have been submitted to and reported upon by the planning agency as to conformity with said adopted general plan or part thereof." The Planning Commission is asked to review the proposed conveyance of property for right-of-way purposes and make a determination of consistency with the General Plan.

ANALYSIS/JUSTIFICATION

The Livable Beach Boulevard Mobility Plan recommends a wider sidewalk on Beach Boulevard between Lampson Avenue and Garden Grove Boulevard. The existing sidewalk was 9 feet wide and, as part of the development it was widened an additional 1.5 feet to achieve the total width of 10.5 feet. This resulted in an easement area of 920 sq. ft. for the right-of-way in front of the VRV development.

Additionally, the curb ramp located on the northeast corner of Beach Boulevard and Stanford Avenue did not meet Caltrans ADA standards. The ramp was removed and replaced during construction of the VRV project, as part of the Conditions of Approval. As a result of this work, an additional 176 sq. ft. of right-of-way was needed.

To make the two improvements, Bonanni Development will provide the City with a grant deed for a fee interest in 920 sq. ft. of property for public street and municipal purposes along Beach Boulevard (Attachment A) and will grant the City an easement of 176 sq. ft. of public right-of-way for street purposes on the northeast corner of Beach Boulevard and Stanford Avenue at 12736 Beach Boulevard (Attachment B). The attachments include Certificates of Acceptance (Attachments C and D) for the grant deed and easement deed.

This item will be presented to the City Council for acceptance and recordation if the Planning Commission is able to find that the action is consistent with the General Plan. In accordance with Government Code §65402, the Planning Commission's role in this matter is to determine if the acquisition of property for public street and municipal purpose and the acquisition of property for street purposes is consistent with the General Plan.

The Public Works Department has reviewed the General Plan and found the acquisition of this property to be consistent with several Goals and Strategies of the General Plan, which have been provided below for the Planning Commission's review:

Goal ICS-1.1 Provide an efficient, coherent, and well-maintained transportation network that adequately supports the General Plan Land Use Concept.

Strategy ICS-1.1.2 Improve efficiency of the City's existing transportation network

Goal ICS-1.2 Encourage alternatives to the private automobile by increasing access and opportunities to public transit, as well as to other alternative modes of transportation, such as biking and walking.

Goal ICS-2.1 Provide adequate linear infrastructure to serve new and existing development within the City of Stanton.

Strategy ICS-2.1.2 Provide for the improvement of facilities and delivery where existing systems are deficient.

Goal CD 1.1. Promote quality development and design that preserves and enhances a positive and unique image of Stanton, and fosters a sense of community pride.

Strategy CD 1.1.1. Identify a desired image and vision for the City of Stanton that can provide the basis for the design of new development, redevelopment, and all other facets of the City's physical environment.

Strategy CD 1.1.2. Ensure that new development within the City contributes to the image of Stanton in a positive way and places a high standard of architecture and site design.

Goal CD 2.1. Increase the number of public spaces within the City, as well as the quality of existing and new public spaces.

Strategy CD 2.1.2. Encourage a variety of artwork and landscape treatments in City public spaces, including parks, courtyards, and plazas.

Goal CD 4.1. Create a well-connected, multi-modal urban environment that increases mobility for all Stanton residents, whether they choose or are required to travel through the City by car, bicycle, foot, or public transportation modes.

Strategy CD 4.1.1. Promote a pedestrian friendly environment with attractive, walkable neighborhoods and commercial areas.

ENVIRONMENTAL IMPACT

This action is categorically exempt under the California Environmental Quality Act ("CEQA") under Section 15378(b)(5) – Organizational or administrative activities of governments that will not result in direct or indirect changes in the environment.

PUBLIC NOTIFICATION

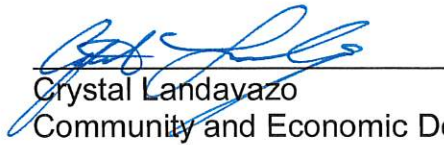

Public notification provided through the regular agenda process.

RESOLUTION NO. 2564

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF STANTON, CALIFORNIA ADOPTING A FINDING THAT ACCEPTANCE OF A GRANT DEED FROM BONANNI DEVELOPMENT (LIFE ILLUMINATED, LLC) CONVEYING TO THE CITY OF STANTON A RIGHT-OF-WAY EASEMENT AND GRANT DEED FOR CERTAIN REAL PROPERTY LOCATED AT 12736 BEACH BOULEVARD (VRV) (APN: 131-501-04) IS CONSISTENT WITH THE GENERAL PLAN

WHEREAS, the City of Stanton General Plan was adopted on September 23, 2008; and

WHEREAS, the City of Stanton adopted the Livable Beach Boulevard Mobility Plan on November 23, 2010; and

WHEREAS, the City Council adopted Ordinance No. 1102 approving a Development Agreement with Bonnani Development on June 23, 2020 for the development of a 300 unit apartment community known as VRV; and

WHEREAS, the development of the VRV apartment community required a widening of the public right-of-way, in accordance with the Livable Beach Boulevard Mobility Plan; and

WHEREAS, Bonnani Development (Life Illuminated, LLC) has completed widening and improvements of the right-of-way and now seeks to convey a right-of-way easement and grant deed for certain real property located at 12736 Beach Boulevard (APN: 131-501-04) to the City of Stanton; and

WHEREAS, pursuant to State of California Government Code Section 65402, no real property shall be acquired by dedication or otherwise for street, square, park or other public purposes, and no real property shall be disposed of, no street shall be vacated or abandoned, and no public building or structure shall be constructed or authorized, if the adopted general plan or part thereof applies thereto, until the location, purpose and extent of such acquisition or disposition, such street vacation or abandonment, or such public building or structure have been submitted to and reported upon by the planning agency as to conformity with said adopted general plan or part thereof; and

NOW THEREFORE, THE PLANNING COMMISSION OF THE CITY OF STANTON DOES HEREBY FIND, RESOLVE, AND DECLARE AS FOLLOWS:

SECTION 1: That the Planning Commission held a regular meeting on February 21, 2024 where they reviewed said request and considered all factors relating to the General Plan consistency for the acceptance of a grant deed from Bonnani Development (Life Illuminated, LLC) conveying to the City of Stanton a right-of-way easement and grant deed for real property located at 12736 Beach Boulevard (APN: 131-501-04).

SECTION 2: That the proposed projects were reviewed for compliance with the California Environmental Quality Act (CEQA), and are exempt from CEQA, pursuant to Guideline Section 15378(b)(5) – Organizational or administrative activities of governments that will not result in direct or indirect changes in the environment.

SECTION 3: That the conveyance of property is consistent with the City of Stanton's adopted General Plan because the acceptance of land for right-of-way purposes is consistent with the following General Plan goals and policies:

Goal ICS-1.1 Provide an efficient, coherent, and well-maintained transportation network that adequately supports the General Plan Land Use Concept.

Strategy ICS-1.1.2 Improve efficiency of the City's existing transportation network

Goal ICS-1.2 Encourage alternatives to the private automobile by increasing access and opportunities to public transit, as well as to other alternative modes of transportation, such as biking and walking.

Goal ICS-2.1 Provide adequate linear infrastructure to serve new and existing development within the City of Stanton.

Strategy ICS-2.1.2 Provide for the improvement of facilities and delivery where existing systems are deficient.

Goal CD 1.1. Promote quality development and design that preserves and enhances a positive and unique image of Stanton, and fosters a sense of community pride.

Strategy CD 1.1.1. Identify a desired image and vision for the City of Stanton that can provide the basis for the design of new development, redevelopment, and all other facets of the City's physical environment.

Strategy CD 1.1.2. Ensure that new development within the City contributes to the image of Stanton in a positive way and places a high standard of architecture and site design.

Goal CD 2.1. Increase the number of public spaces within the City, as well as the quality of existing and new public spaces.

Strategy CD 2.1.2. Encourage a variety of artwork and landscape treatments in City public spaces, including parks, courtyards, and plazas.

Goal CD 4.1. Create a well-connected, multi-modal urban environment that increases mobility for all Stanton residents, whether they choose or are required to travel through the City by car, bicycle, foot, or public transportation modes.

Strategy CD 4.1.1. Promote a pedestrian friendly environment with attractive, walkable neighborhoods and commercial areas.

SECTION 4: That the Secretary shall certify the adoption of this Resolution.

ADOPTED, SIGNED, AND APPROVED by the Planning Commission of the City of Stanton at a meeting held on February 21, 2024, by the following vote, to wit:

AYES:	COMMISSIONERS:	_____
NOES:	COMMISSIONERS:	_____

REPORT TO THE PLANNING COMMISSION

TO: Chairperson and Members of the Planning Commission

DATE: February 21, 2024

SUBJECT: PUBLIC HEARING TO CONSIDER ADOPTION OF STANTON TOWN CENTER SPECIFIC PLAN AND CORRELATING GENERAL PLAN AMENDMENT, ZONE MAP AMENDMENT, AND SUBSEQUENT INITIAL STUDY AND MITIGATED NEGATIVE DECLARATION TO THE 2008 GENERAL PLAN ENVIRONMENTAL IMPACT REPORT.

RECOMMENDED ACTION

That the Planning Commission:

- Conduct a public hearing;
- Adopt the Initial Study and Draft Subsequent Mitigated Negative Declaration (MND) prepared pursuant to CEQA and the State CEQA Guidelines; and
- Adopt Resolution No. 2563 recommending approval of the Stanton Town Center Specific Plan, General Plan Amendment, Zone Change, and Subsequent Initial Study/Mitigated Negative Declaration (SP 23-01, GPA 23-01, ZC 23-01).

SUMMARY

On January 17, 2024, the Planning Commission held a public hearing and took public testimony after a staff presentation on the proposed Stanton Town Center Specific Plan (TCSP). Most of the concerns raised during the public testimony were centered around potential impacts that the Specific Plan may have on existing land uses within the Specific Plan area. The Planning Commission directed staff to review the comments raised by the residents and business owners at the meeting and voted to continue the item the regular meeting of February 21, 2024.

City staff has met with some of the business owners who expressed concerns at the January 17th meeting to discuss their concerns and the goals of the Specific Plan. As a result staff has made some revisions and additions to the proposed Specific Plan intended to address the concerns raised. A grace period was incorporated into the Specific Plan allowing existing conforming land uses to make improvements without the limitations of a “nonconforming” status. The Specific Plan still sets ambitious long-term goals, but allows for a more flexible transition period that can be applied to existing conforming land uses.

The Planning Commission is asked to review the revisions to the TCSP, open public hearing to take additional comments, and recommend the revised TCSP and Subsequent IS/MND to the City Council for approval.

Figure 1: Town Center Specific Plan Area

ANALYSIS/JUSTIFICATION

The Town Center Specific Plan is designed to create a district within the City of Stanton that promotes redevelopment and incentivizes new mixed-uses while preserving existing residential neighborhoods and enhancing the district's industrial character. Much of the feedback received at the January 17th meeting was centered around the nonconformities that would be created by adoption of the Specific Plan and the potential impacts of that designation on existing residences and businesses.

A nonconforming designation is applied when a use of land lawfully existed before the effective date of a zone amendment, but which is no longer allowed in the zone in which it is located. The proposed Specific Plan will establish new land use designations that will serve as the Zoning for the area. As a result, the Specific Plan will create some nonconforming designations because there were properties that were developed with industrial uses under the existing zoning but will not be allowed in the new mixed-use zones. The nonconforming status will remain on the property and existing businesses are allowed to continue operations for as long as the use remains on the property. The Specific Plan will not require the removal of any existing uses, but the nonconforming status will set limitations on the ability to expand or alter the use and structures on the property. The limitations on expansion were of great concern to existing businesses owners and residents.

During the January 17, 2024, Planning Commission, a suggestion was made to allow a grace period for existing uses. Staff met with some of the businesses owners who spoke at the Planning Commission meeting to discuss this option along with any other concerns. As a result, Section 5.4.3.c of the TCSP was amended to include a grace period of eight years that will expire on June 30, 2032. During this grace period, none of the properties will have a nonconforming designation and they will be allowed to develop in accordance with their existing zoning designations. As a simple point of reference, Exhibit 5.1 was incorporated into the TCSP to show the existing zoning designations as of January 1, 2024.

The Specific Plan continues to have aspirational long-term goals which need to be balanced with the desire to give flexibility to existing businesses. In seeking this balance, a landscape buffer requirement was also included as Section 5.4.3.d of the TCSP for inconsistent industrial uses. This buffer would apply to an expansion of 10% or 1,000 square feet, whichever is less, and require a 10 ft. setback from the neighboring property line, with a 6 foot wide landscaped area that incorporates irrigation and canopy trees. The buffer will not be required when it abuts an alley or a separate parcel of the same development. The buffer is intended to allow flexibility and growth for existing businesses in the Specific Plan area while also creating transitions so that this growth does not hinder development of neighboring parcels. Setbacks, landscaping, and canopy trees are commonly incorporated between inconsistent uses because they have been shown to create effective transitions.

Staff was not able to meet with residences who spoke in regard to non-conforming single-family residences, however, their concerns were incorporated into revisions of the TCSP. Many of the existing single-family residences within the TCSP area have an existing nonconforming status which currently limits their ability to expand or remodel their existing homes. The new land use designations proposed in the TCSP will change many residences from non-conforming to conforming by establishing the Town Center Residential (TCR) District and allow them significantly more ability to improve their properties. Some properties will be nonconforming because they are located within areas designated as Town Center Mixed-Use (TCMU), Retail Oriented Mixed-Use (ROMU), or Town Center Industrial (TCI). Section 5.4.3.e of the TCSP has been added to allow for remodeling and expansion of existing single-family residences within the Town Center Mixed-Use and Retail Oriented Mixed-Use districts subject to Stanton Municipal Code regulations for the Single-Family Residential (RL) zone. These properties will not be allowed to demolish and build new single-family residences but, they will be allowed to remodel and add to their existing residences. Existing single-family residences in the Town Center Industrial district will not have the same flexibility. Those uses were nonconforming prior to the TCSP and will remain nonconforming.

The Land Use Districts and Plan Elements Map, Exhibit 3.1, of the TCSP has been revised to expand the Town Center Mixed-Used district and remove the Town Center Residential Designation along the north and south sides of Main Street, west of Beach Boulevard. This creates more cohesive districts and, through the addition of Section 5.4.3.e, retains the ability to preserve existing single-family residential uses within the TCSP area. Additionally, this map was revised to reflect the scale of the conceptual open

space areas more accurately, based on the requirements of the tier system in the TCSP.

During the January 17, 2024, meeting, there was brief mention of prohibiting chain stores in the TCSP area. The Specific Plan is a long-range vision for the area and needs flexibility that will allow the area to grow and develop. The vision for Main Street is that it develops into a mix of restaurant and retail uses that activates and creates a vibrant and walkable neighborhood. In line with this, Table 5.2 of the TCSP was amended to incorporate a maximum storefront width and maximum tenant space square footage to prevent a "big box" from occupying a disproportionate amount of walkable storefront in the Retail Oriented Mixed-Use district. These limitations are only applicable east of Chestnut Avenue. A mix of recognizable chains can help to grow the area and draw attention to neighboring businesses so a complete ban of chain stores was not incorporated into the proposed TCSP.

ENVIRONMENTAL ANALYSIS

California Environmental Quality Act (CEQA) and the State CEQA Guidelines, the City of Stanton (City) is the Lead Agency for the Town Center Specific Plan Project (project). Based on the Initial Study prepared for the project, the City has prepared a Draft Subsequent Mitigated Negative Declaration (MND), pursuant to CEQA and the State CEQA Guidelines, to analyze environmental impacts of the project and propose mitigation measures to reduce the significant impacts to less than significant levels.

PUBLIC NOTIFICATION

At the regular Planning Commission meeting of January 17, 2024, the Planning Commission voted to continue this item to the regular meeting of February 21, 2024. Public noticing requirements were not required because the item was continued to a date certain. However, due to the interest expressed at the January 17, 2024, meeting, staff sent emails to existing contacts and posted notices of the meeting throughout the Specific Plan area on February 8, 2024.

RESOLUTION NO. 2563

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF STANTON RECOMMENDING ADOPTION OF THE STANTON TOWN CENTER SPECIFIC PLAN AND CORRELATING GENERAL PLAN AMENDMENT, ZONE MAP AMENDMENT, AND SUBSEQUENT INITIAL STUDY AND MITIGATED NEGATIVE DECLARATION TO THE 2008 GENERAL PLAN ENVIRONMENTAL IMPACT REPORT

THE PLANNING COMMISSION DOES HEREBY RESOLVE AS FOLLOWS:

WHEREAS, on December 15, 2020 and March 1, 2021, public workshops were held to obtain community input and establish a vision for the Town Center Specific Plan; and

WHEREAS, the Draft Town Center Specific Plan was made available for public comment and review for a 30-day period: November 15, 2023 through December 14, 2023; and

WHEREAS, in 2008, the City adopted an Environmental Impact Report (EIR) in conjunction with the General Plan to analyze the potential build out of goals and strategies identifies in the General Plan; and

WHEREAS, the City of Stanton, as the Lead Agency for the for the proposed TCSP project, caused a Subsequent Initial Study/Mitigated Negative Declaration (Subsequent IS/MND) to be prepared for the project, pursuant to the California Environmental Quality Act (CEQA); and

WHEREAS, the Draft Subsequent Initial Study/Mitigated Negative Declaration (Subsequent IS/MND) was circulated to the appropriate state, regional, and county agencies, neighboring cities, interested parties and was made available to the public for review and comment for a 30-day period: November 15, 2023 through December 14, 2023 CEQA Subsequent IS/MND; and

WHEREAS, the City received three (3) comments in response to the circulated Draft Subsequent IS/MND and, as a result, the City provided responses to the comments as part of an attachment; and

WHEREAS, Government Code § 65454 provides, in pertinent part, as follows: “No specific plan may be adopted or amended unless the proposed plan or amendment is consistent with the general plan”; and

WHEREAS, on January 17, 2024, the Planning Commission of the City of Stanton, after conducting a duly noticed public hearing regarding the proposed Stanton Town Center Specific Plan, General Plan Amendment, Zone Map Amendment, and certification of the Subsequent IS/MND, voted to continue the item to February 21, 2024 so that staff could address concerns raised during the hearing over nonconformities within the project area; and,

WHEREAS, on February 21, 2024, The Planning Commission of the City of Stanton, after giving notice thereof as required by law, conducted a duly noticed public hearing concerning a

recommendation to the City Council regarding the proposed adoption of the Stanton Town Center Specific Plan, General Plan Amendment, Zone Map Amendment, and certification of the Subsequent IS/MND; and,

WHEREAS, the Planning Commission has reviewed the proposed Town Center Specific Plan and is fully advised with respect thereto. Based on the scope of the proposed Specific Plan, the Specific Plan is consistent with the goals stated in the City's adopted General Plan.

NOW THEREFORE, the Planning Commission of the City of Stanton does hereby find:

SECTION 1: The Planning Commission finds that all of the facts, findings and conclusions set forth above are true and correct.

SECTION 2: Having considered all of the oral and written evidence presented to it at said public hearings regarding the Specific Plan, the Planning Commission further finds, determines and declares that:

- A. In accordance with, and pursuant to, the requirements of California Government Code § 65454, a Specific Plan may only be adopted if first found consistent with the General Plan of the City of Stanton. The Specific Plan is consistent with several goals and strategies of the General Plan as highlighted in Appendix A, General Plan Consistency Analysis, which was specifically prepared to show compliance with Government Code Section 65454.
 1. GOAL LU-1.1: Create an economic and fiscal balance of residential, commercial, and industrial uses. The TCSP is consistent with Strategy LU-1.1.1: Encourage land uses which maximize economic development and enhance the quality of life, as well as Strategy LU-1.1.2: Ensure adjacent land uses are compatible with one another. The Specific Plan is designed to encourage a desirable mix of commercial, residential, mixed-use, and industrial uses. Design Guidelines and Development Regulations encourage high-quality development and enhanced quality of life within Stanton. Objective 12 of the Specific Plan encourages economic development and incentivize investing in infill development. The Town Center Specific Plan includes a Land Use Plan (Exhibit 3.1) where sensitive uses such as single-family residential uses are buffered from the impacts of industrial and commercial development by limiting uses and intensity surrounding the single-family residential areas.
 2. GOAL LU-2.1: Encourage land uses which provide employment opportunities for Stanton residents. The TCSP is consistent with Strategy LU-2.1.1: Encourage revitalization and intensification of underutilized commercial uses within the city through the redevelopment process. The Specific Plan includes a series of land use policies that encourage revitalization and mixed-use redevelopment, and encourages intensification of underutilized commercial development that intensifies existing uses and better responds to changing economic market conditions. The Specific Plan's second objective is to maintain existing businesses while encouraging a broader mix of uses and encouraging the

revitalization of existing industrial uses.

3. GOAL LU-3.1: A range and balance of residential densities which are supported by adequate City services. The TCSP is consistent with Strategy 3.1.1: Preserve single-family residential neighborhoods, as well as Strategy 3.1.2: Encourage infill and mixed-use development within feasible development sites. The Specific Plan maintains the existing single-family residential land uses and preserves the low-density character of these neighborhoods. The Specific Plan also includes buffers from neighboring commercial and industrial uses by limiting uses and intensity surrounding the single-family residential areas. Objective 1 of the Specific Plan aims to preserve existing residential neighborhoods and create a vibrant, pedestrian friendly environment. Mixed-use development is encouraged by the Specific Plan. The Retail Oriented Mixed-Use (ROMU), Town Center Mixed-Use (TCMU) land uses encourage mixed uses, with the ROMU and TCMU zones including residential uses. Also, Objective 12 of the Specific Plan encourages economic development and incentivize investing in infill development.
4. GOAL CD-1.1: Promote quality development and design that preserves and enhances a positive and unique image of Stanton, and fosters a sense of community pride. The TCSP is consistent with Strategy CD-1.1.1: Identify a desired image and vision for the city of Stanton that can provide the basis for the design of new development, redevelopment, and all other facets of the city's physical environment, as well as Strategy 1.1.2: Ensure that new development within the city contributes to the image of Stanton in a positive way and places a high standard of architecture and site design. Preliminary phases of the Specific Plan included extensive outreach and visioning efforts, ensuring the identity of the Plan Area and future development patterns reflect the desires of residents and stakeholders within Stanton as detailed in the project vision and objectives in Section 1.1.1. Chapter 4 of the Specific Plan includes Design Guidelines and Development Regulations that require future projects to include high-quality architecture, site design, and orientation.
5. GOAL CD-1.2: Promote an attractive streetscape and public right-of-way, especially along major primary and secondary corridors, that is consistent with the desired vision and image of Stanton. The TCSP is consistent with Strategy CD-1.2.1: Create a unified and consistent streetscape. Section 4.3 Streetscape Design Guidelines of the Specific Plan includes guidelines for streetscape within the public rights-of way, and includes recommendations for streetscaping enhancements along major arterials, such as Beach Boulevard, as well as other streets within the Plan Area.
6. GOAL CD-2.1: Increase the number of public spaces within the City, as well as the quality of existing and new public spaces. The TCSP is consistent with Strategy 2.1.1: Encourage the provision of public spaces as part of private development and redevelopment projects. The Specific Plan includes requirements for additional public open space. Section 3.4 and 4.4 of the Specific

Plan includes an open space framework that requires the future dedication of new open spaces within the Plan Area. Properties outside of these locations would be encouraged to include new open spaces.

7. GOAL CD-4.1: Create a well-connected multi-modal urban environment that increases mobility for all Stanton residents, whether they choose or are required to travel through the City by car, bicycle, foot, or public transportation modes. The TCSP is consistent with Strategy 4.1.1: Promote a pedestrian friendly environment with attractive, walkable neighborhoods and commercial areas. The Specific Plan includes improvements to the City's circulation system and streetscape that increase overall access, safety, and encourage multi-modal transit throughout the Plan Area. Through encouraging efficiency between trip origin and trip destination in the plan area, the number of vehicle trips and durations will reduce (Objective 10). The Specific Plan encourages a mix of uses that increases walkability and promotes a pedestrian-friendly environment by providing guidelines and standards related to future development, particularly pedestrian safety. Streetscaping improvements proposed within the Plan Area encourage walkability by providing an aesthetically appealing pedestrian experience (Section 3.5.4).

SECTION 3: Pursuant to Municipal Code Section 20.610.060(A), the Planning Commission hereby recommends that the City Council adopt the following findings to approve the General Plan Amendment:

- A. The amendment is internally consistent with all other provisions of the General Plan. The proposed General Plan Amendment involves a revision of the land use map to show a change from Medium Density Residential, High Density Residential, and Industrial land use designations to "Town Center Mixed-Use District" The proposed amendment will not alter any other existing provisions within the General Plan; instead it will ensure consistency between the General Plan and the new Specific Plan. The Town Center Specific Plan (TCSP) itself includes a twelve-page appendix, Appendix A – General Plan Consistency Analysis, which analyzes several goals throughout the General Plan and provide direct correlations to consistencies between the TCSP and General Plan goals and strategies. The TCSP was found to have direct consistency with the Community Development Element, the Community Design Element, the Economic Development Element, the Infrastructure and Community Services Element, the Community Health and Safety Element, and the Housing Element. The proposed TCSP promotes several of the goals and strategies identified in the General Plan, as noted in Section 2 of this Resolution and Appendix A of the Town Center Specific Plan.
- B. The proposed amendment will not be detrimental to the public interest, health, safety, convenience, or welfare of the City. The proposed General Plan Amendment involves revision of the land use map to show a change from Medium Density Residential, High Density Residential, and Industrial land use designations to "Town Center Mixed-Use District." This change will ensure consistency between the General Plan and the proposed Specific Plan which serve as the zoning for the

specific plan area. The TCSP is intended to promote a balance of residential housing types and commercial uses with a pedestrian friendly environment throughout the Specific Plan area. The Specific Plan itself was analyzed in accordance with the California Environmental Quality Act and a Subsequent IS/MND was prepared in conjunction with the Specific Plan. The Subsequent IS/MND determined that, with the appropriate mitigation measures, the adoption and implementation of the Town Center Specific Plan would not result in significant impacts that could be detrimental to the public interest, health, safety, convenience, or welfare of the City.

- C. The affected site is physically suitable in terms of design, location, shape, size, operating characteristics, and the provision of public and emergency vehicle (e.g., fire and medical) access and public services and utilities (e.g., fire protection, police protection, potable water, schools, solid waste collection and disposal, storm drainage, wastewater collection, treatment, and disposal, etc.), to ensure that the proposed or anticipated uses and/or development will not endanger, jeopardize, or otherwise constitute a hazard to the property or improvements in the vicinity in which the property is located. The proposed amendment involves changes to the land use map of the General Plan to reflect the new designation of "Town Center Mixed-Use" so that consistency is maintained between the General Plan and the TCSP which will serve as the zoning for the Specific Plan area. The TCSP includes a circulation and mobility plan that intends to improve upon the existing circulation within the Specific Plan area through a "complete streets" approach to create a true multi-modal transportation system that creates potential for new connections through the Plan area. The plan does not disturb the existing circulation and will not cause disturbances or blockages to any existing infrastructure that would jeopardize existing or future use of utilities in the area or impede emergency services. Additionally, the TCSP was evaluated pursuant the guidelines of the California Environmental Quality Act (CEQA) through the preparation of an Initial Study which led to the preparation of a Subsequent Mitigated Negative Declaration that evaluated potential impacts that could result from the additional build out of 139 residential units in the Specific Plan area, beyond the build out of 1,399 residential units that were assessed in the 2008 General Plan. The Subsequent IS/MND found that, with appropriate mitigation, the TCSP would not endanger, jeopardize, or otherwise constitute a hazard to properties in the vicinity.

SECTION 4: Pursuant to Municipal Code Section 20.610.060(B), the Planning Commission hereby recommends that the City Council adopt the following findings to approve the Zone Map Amendment:

- A. The proposed amendment is consistent with the General Plan and any applicable Specific Plan. The proposed Zone Map Amendment involves changing the zoning designations of properties within the TCSP area from Single-Family Residential (RL), Medium Density Residential (RM), Commercial Neighborhood (CN), Commercial General (GC), Industrial General (IG), and Public Institutional (PI) to Specific Plan (SP) Zone in order to identify the Specific Plan area on the Zoning Map. The Zone Map amendment will clearly establish the Town Center Specific Plan area on the Zoning Map

and ensure consistency between the Zoning Map and the Specific Plan so that all regulatory documents appropriately reference each other. The proposed map amendment will be consistent with the proposed Town Center Specific Plan which was analyzed and found to be consistent with the goals and strategies of the General Plan, as stated in Section 2 and Section 3.A of this Resolution.

- B. The proposed amendment will not be detrimental to the public interest, health, safety, convenience, or welfare of the City. The proposed amendment is a change to the zoning map to reflect the new zoning designation for the Town Center Specific Plan. This change is requested to ensure consistency between the Zoning Map, the General Plan, and the Specific Plan which will serve as the zoning for the TCSP area. The map amendment itself will not be detrimental to the public interest, health, safety, convenience, or welfare of the City. The amendment is proposed in conjunction with the adoption of the Town Center Specific Plan which is intended to encourage thoughtful design and development within the TCSP area to create a pedestrian friendly environment. As stated in Section 3.C of this Resolution, the TCSP does not proposed any changes to circulation in the area that would jeopardize access to utilities within the area or interfere with emergency responses. Additionally, the TCSP was evaluated pursuant the guidelines of the California Environmental Quality Act (CEQA) through the preparation of an Initial Study which led to the preparation of a Subsequent Mitigated Negative Declaration. The Subsequent IS/MND found that, with appropriate mitigation, the TCSP would not be detrimental to the public interest, health, safety, convenience, or welfare of the City.
- C. The affected site is physically suitable in terms of design, location, shape, size, operating characteristics, and the provision of public and emergency vehicle (e.g., fire and medical) access and public services and utilities (e.g., fire protection, police protection, potable water, schools, solid waste collection and disposal, storm drainage, wastewater collection, treatment, and disposal, etc.), to ensure that the requested zone designation and the proposed or anticipated uses and/or development will not endanger, jeopardize, or otherwise constitute a hazard to the property or improvements in the vicinity in which the property is located. The proposed amendment is a change to the zoning map to reflect the new zoning designation for the Town Center Specific Plan. This change is requested to ensure consistency between the Zoning Map, the General Plan, and the Specific Plan which will serve as the zoning for the TCSP area. The map amendment itself will not endanger, jeopardize, or otherwise constitute a hazard to the property or improvements in the vicinity in which the property is located. The amendment is proposed in conjunction with the adoption of the Town Center Specific Plan which is intended to encourage thoughtful design and development within the TCSP area to create a pedestrian friendly environment. The TCSP includes a circulation and mobility plan that intends to improve upon the existing circulation within the Specific Plan area through a “complete streets” approach to create a true multi-modal transportation system that creates potential for new connections through the Plan area. The plan does not disturb the existing circulation and will not cause disturbances or blockages to any existing infrastructure that would jeopardize existing or future use of utilities in the area or impede emergency services. Additionally, the TCSP was evaluated pursuant the guidelines of the California Environmental Quality Act (CEQA)

through the preparation of an Initial Study which led to the preparation of a Subsequent Mitigated Negative Declaration that evaluated potential impacts that could result from the additional build out of 139 residential units in the Specific Plan area, beyond the build out of 1,399 residential units that were assessed in the 2008 General Plan. The Subsequent IS/MND found that, with appropriate mitigation, the TCSP would not endanger, jeopardize, or otherwise constitute a hazard to properties in the vicinity.

SECTION 5: The Secretary to the Planning Commission shall certify the adoption of this resolution and transmit a full, true and correct copy to the City Clerk of the City of Stanton.

ADOPTED, SIGNED AND APPROVED by the Planning Commission of the City of Stanton at a regular meeting held on February 21, 2024 by the following vote, to wit:

3:PLAN ELEMENTS

Purpose and Intent

This Chapter contains a discussion of the various plan elements for the TCSP, including the following:

- Specific Plan Objectives
- Land Use Districts
- Open Space Framework
- Circulation and Mobility Plan
- Infrastructure Plan

Each element works in tandem with the other plan parts to establish a framework that ensures The Plan fosters high-quality development and a reimagined urban fabric for the TCSP area.

Specific Plan Objectives

Based on the vision established during the outreach process, This Plan aims to create a new collection of mixed-use, residential, commercial, and industrial neighborhoods while allowing existing businesses to continue and preserving existing, single-unit residential neighborhoods.

The TCSP is designed to implement a series of realistic and achievable project objectives that implement applicable City of Stanton General Plan goals and policies and ensure that the Plan Area develops as a high-quality mixed-use neighborhood. These objectives are as follows:

Preserve existing residential neighborhoods and create a vibrant, pedestrian friendly environment.

Maintain existing businesses while encouraging a broader mix of uses and encouraging the revitalization of existing industrial uses.

Improve existing streetscape and landscape.

Provide for more locally-serving retail and commercial developments.

Abandon alleys throughout the Plan Area when feasible and larger development is proposed.

Create a true "Main Street."

Link the Specific Plan area to other districts.

Create design guidelines for streetscape, open space, architecture, landscape, and public improvements.

Reduce vehicle trips and trip duration by encouraging efficiency between trip origin and trip destination.

Reduce greenhouse gas (GHG) emissions and pollution through zoning changes that would reduce reliance on motorized vehicles and support active transportation modes.

Ensure adequate and efficient infrastructure to support existing and future development.

Encourage economic development and incentivize investing in infill development.

Land Use Districts

The TCSP is the zoning for the Plan Area and implements a framework for land uses and redevelopment.

Four land use districts are identified for the approximately 156.9-acre Plan Area, as depicted on *Exhibit 3.1 – Planning Areas and Plan Elements*: Town Center Mixed-Use, Town Center Industrial, Town Center Residential, and Retail-Oriented Mixed-Use. The implementation of land use districts allows for a targeted application of the community vision established during the outreach process by tailoring land uses and development regulations to particular locations within the Plan Area. Parks illustrated in Exhibit 3.1 – Planning Areas and Plan Elements are for illustrative purposes only. Beach Boulevard Park is zoned as Retail-Oriented Mixed-Use and Eastern Neighborhood Park is zoned Town Center Mixed-Use.

Design Guidelines specifying architectural character and form are found in *Chapter 4, Design Guidelines*. Development Regulations specific to each land use district are found in *Chapter 5, Development Regulations*.

Town Center Mixed-Use

The intent of the Town Center Mixed-Use (TCMU) land use district is to increase housing stock and land use diversity within the Plan Area, and encourage residential development within walking distance of retail core areas and maximize access to multi-modal transit opportunities within the Plan Area. The TCMU district allows for a blend of standalone residential, commercial, and mixed-use development to occur.

Within the TCMU district, the Plan envisions future medium- and higher-density residential development that, while not required, is encouraged to include a retail component in its design.

Town Center Industrial

The intent of the Town Center Industrial (TCI) land use district is to allow existing industrial businesses to continue, while facilitating new research and development and light-industrial uses that are compatible with neighboring residential uses. Residential uses are not permitted within this district. In addition to industrial uses, other compatible commercial uses that may retain an industrial or artistic character, such as artisanal manufacturing and sales, distilleries, breweries, commercial cannabis uses, and tasting rooms, to occur.

Retail-Oriented Mixed-Use

The intent of the Retail-Oriented Mixed-Use (ROMU) land use district is to encourage retail and mixed-use development in areas with a high degree of exposure to vehicular and anticipated pedestrian traffic. The ROMU district occurs primarily along Beach Boulevard and Main Street within the Plan Area.

To encourage and facilitate the creation of a true “town center,” any future mixed-use development within the ROMU district is required to include ground floor commercial uses per requirements detailed in *Chapter 5*.

Town Center Residential

Neighborhoods within the Town Center Residential land use district are designated to preserve the residential character of this district. Land uses within this area will be restricted to those uses currently

allowed in the City’s residential zoning designation, and development standards will preserve the residential character of the neighborhood.

Allowable Development

Land uses within the TCSP are limited by maximum intensity. Residential uses within the Plan Area are limited by overall base dwelling units per acre. Non-residential uses, such as industrial or commercial uses, are limited by floor area ratio (FAR).

Residential development may occur at a density of as low as 8 units per acre and up to 70 units per acre, depending on the development tier used. Standalone non-residential uses are allowed to occur at a floor area ratio (FAR) of up to 1.5. Within a mixed-use development containing both residential and non-residential uses, the residential portion of development may occur at a density of up to 70 units per acre. Within a mixed-use development, non-residential uses may occur at a FAR of up to 1.0.

Table 3.1 — Land Use District Acreages, depicts the acreage of each land use district within the Plan Area.

TABLE 3.1 — LAND USE DISTRICT ACREAGES	
Land Use District	Acreage
Town Center Mixed-Use	60.7 Acres
Town Center Industrial	25.5 Acres
Retail-Oriented Mixed-Use	13.4 Acres
Town Center Residential	13.9 Acres

Open Space Framework

Open Space Concept

The TCSP area currently does not include dedicated public open space. The intent of the TCSP open space framework is to locate open space throughout the Plan Area to maximize access to recreation opportunities. *Exhibit 3.1, Land Use Districts and Plan Elements*, depicts three potential open space locations within the Plan Area that are anticipated to function as the primary public open spaces within the Plan Area. Thresholds for in-lieu fees will be the same as listed in Section 19.42 of the Stanton Municipal Code.

An enhanced pedestrian connection is envisioned along Court Street, which would help connect the open spaces at the northern and southern ends of the Plan Area. The three primary open space features within the Plan Area are described below. [These parks are only required for Tier 2 and 3 developments.](#)

Beach Boulevard Plaza

The Beach Boulevard Plaza is envisioned to be a gathering place for public and private events, public gatherings, musical performances, and passive recreation. The plaza may include elements such as public art, landscape features, outdoor seating and dining areas, fountains, outdoor amphitheaters, and/or small retail uses within the plaza such as a coffee stand or cafe. The location of the plaza along Beach Boulevard offers a high degree of visibility and generates visual interest for the future mixed-use retail corridor along Main Street and also provides an opportunity for aesthetic enhancement along Beach Boulevard. The plaza is intended to be located adjacent to retail uses that activate the open space by increasing pedestrian activity and incorporating activities such as outdoor dining.

Eastern Neighborhood Park

The eastern neighborhood park is envisioned to be a large landscaped open space area that provides access to outdoor amenities and active recreation opportunities within a walkable distance to residents within the Plan Area. The eastern neighborhood park is located at the physical and visual terminus of Main Street.

The park is anticipated to be approximately one acre in size and may include amenities such as public art, a playground/tot lot, open spaces for active recreation and exercise, outdoor pedestrian furniture and dining areas, small sport courts, and outdoor gathering spaces such as small plazas or amphitheaters.

Southern Pocket Park

The southern pocket park is depicted in a conceptual location on *Exhibit 3.1, Land Use Districts and Plan Elements*, near the intersection of Chester and Chestnut Avenues. This small open space is envisioned to provide amenities such as a playground/tot lot, open spaces for exercise and/or passive activities, and pedestrian furniture.

Open Space Components

The precise size and location of open spaces envisioned by the open space framework is conceptual and subject to change as redevelopment occurs over time.

The execution of these open spaces requires property owner cooperation and lot consolidation in order to create meaningful public open spaces that function as the hubs and anchors of activity within the Plan

Area. The precise location and size of these open spaces is flexible, but should fulfill the vision and intent of the open space framework as described within this section and meet the minimum requirements identified in *Section 5.5, Development Regulations* of this Specific Plan.

Circulation and Mobility Plan

The TCSP is planned as a mixed-use neighborhood that blends existing uses with new mixed-use development, maximizes access to existing transit opportunities, and includes a robust pedestrian and bicycle transportation network. The Plan also incorporates conceptual future transit opportunities into its design, while ensuring that the success of the multi-modal network does not depend on the completion or final details of potential future transit opportunities. A number of the Specific Plan objectives relate to circulation and mobility, including:

- Reduce vehicle trips and trip duration by encouraging efficiency between trip origin and trip destination.

- Reduce greenhouse gas (GHG) emissions and pollution through zoning changes that would reduce reliance on motorized vehicles and support active transportation modes.

- Ensure adequate and efficient infrastructure to support existing and future development.

To accomplish these objectives, the TCSP incorporates a “complete streets” approach that prioritizes creation of a true multi-modal transportation system and that creates new connections throughout the Plan Area, as described below and depicted on *Exhibit 3.1, Land Use Districts and Plan Elements*.

Existing Circulation Infrastructure

The Plan Area utilizes existing circulation infrastructure to facilitate multi-modal movement throughout the district. The Plan Area is served by OCTA Routes 29, 50, and 529, as depicted on *Exhibit 2.5, Opportunities and Challenges*. Street widths and sections for the streets within the TCSP are depicted on *Exhibits 3.3A and 3.3B, Street Sections*. Arterials and streets within the Plan Area are described in *Table 3.2, Street Sections*.

Circulation Enhancements

Circulation enhancements are included throughout the Plan Area to facilitate multi-modal connectivity and increase pedestrian safety, as depicted on *Exhibit 3.2, Circulation Plan*.

New roads are included in the northeastern portion of the Plan Area. These roads are conceptually located, but are intended to serve implementing developments and the future park within this portion of the Plan Area.

Intersection improvements are identified at the following four intersections:

- Beach Boulevard and Main Street

- Beach Boulevard and Pacific Street

- Cerritos Avenue and a future street

- Dale Street and a future street

Intersection improvements enhancements include design features that may include, but are not limited to, the following features:

- Pavement enhancements such as textured and/or colored concrete or pavers

Pedestrian bulb-out crossings to increase pedestrian visibility

New crossings for pedestrians and bicyclists

A potential future trail is depicted along the existing east-west rail corridor traversing the Plan Area. This potential future trail is to connect to another potential trail along the Stanton Storm Channel, which would also provide connectivity to the northeastern portion of the project site as depicted on *Exhibit 3.2, Circulation Plan*.

TABLE 3.2 — STREET SECTIONS

<i>Street Name</i>	<i>Overall ROW Width</i>	<i>Curb-to-Curb Width</i>	<i>Parkway and Sidewalk Width</i>	<i>Number of Travel Lanes</i>	<i>Center Median</i>	<i>On-Street Parking</i>
<i>Beach Boulevard</i>	<i>132'</i>	<i>110'</i>	<i>11'</i>	<i>8</i>	<i>Yes</i>	<i>No</i>
<i>Katella Avenue</i>	<i>120'</i>	<i>93.5'</i>	<i>13-13.5'</i>	<i>6</i>	<i>Yes</i>	<i>No</i>
<i>Cerritos Avenue</i>	<i>80'</i>	<i>64'</i>	<i>8'</i>	<i>4</i>	<i>Yes</i>	<i>No</i>
<i>Main Street</i>	<i>80'</i>	<i>56'</i>	<i>12'</i>	<i>2</i>	<i>No</i>	<i>Yes</i>
<i>Typical Street</i>	<i>60'</i>	<i>36'</i>	<i>12'</i>	<i>2</i>	<i>No</i>	<i>Yes</i>
<i>Typical Alley</i>	<i>15'</i>	<i>15'</i>	<i>0'</i>	<i>2</i>	<i>No</i>	<i>No</i>

Court Avenue is envisioned to include additional pedestrian enhancements, including a future connection across the east-west rail corridor.

The pedestrian-focused enhancements along Court Avenue run from Katella Avenue north to Main Street, increasing connectivity between the southern and northern portions of the Plan Area.

Additionally, a potential future transit station is identified on the OCTA property located along Beach Boulevard. This transit center could connect users of a potential future light-rail along the former Pacific Electric rail corridor to the multi-modal network within the Plan Area.

Alley Vacations

In an effort to facilitate the redevelopment of the commercial and industrial areas within the Plan area, this Specific Plan encourages the vacation and reuse of alleys within the areas identified in *Exhibit 3.4, Alley Vacations*. Once vacated, alleys may be built upon or repurposed for another use such as outdoor dining. Alley vacations will only be allowed for larger development and where feasible. Other properties shall not be affected by vacating alleys. All alley vacations shall adhere to the following:

All utilities within the alley shall be rerouted or an easement benefiting the public utility shall be recorded, subject to the satisfaction of the public utility company.

If an alley is to be partially vacated, adequate vehicular access and circulation shall be provided to the properties needing access via the alley, subject to review and approval of the Public Works Department. At the time of the vacation request, properties not accessing the alley do not need to maintain access to the alley (i.e. obstructed by a solid wall).

Financial agreements shall be entered into between the City and applicant to facilitate the alley vacation.

Streetscaping Enhancements

The TCSP includes a number of streetscaping enhancements intended to enhance aesthetic character of the Plan Area, improve multi-modal transportation, and foster a cohesive sense of place throughout the Plan area. These streetscaping enhancements are described in the following sections.

Streetscaping Concept

The TCSP envisions a streetscaping concept that implements various enhancements that establish the Plan Area's unique identity. The character of streetscaping elements should be modern, refined, and minimalistic while maintaining functionality. Streetscaping character is further described in *Section 4.3, Streetscaping Design Guidelines*.

Distribution and Selection of Streetscaping Elements

Streetscaping elements should be distributed throughout the Plan Area to foster a cohesive identity; however, streetscaping elements should occur more frequently near areas of high vehicular and pedestrian exposure, such as at major intersections, along Beach Boulevard, along Main Street, and near high-activity commercial centers or large mixed-use developments.

Streetscaping elements should be selected to correspond to the land use of the parcels they are adjacent to. Within residential areas, streetscaping elements should focus primarily on aesthetic, pedestrian-oriented, and mobility enhancements.

Within commercial and mixed-use areas, streetscaping elements should provide aesthetic, pedestrian-oriented, mobility, and synergistic enhancements.

Within industrial areas, streetscaping elements should focus primarily on aesthetic and pedestrian-oriented streetscaping enhancements.

Beach Boulevard Improvements

Beach Boulevard is a high-volume Smart Street traversing the TCSP area. Improvements to Beach Boulevard shall include aesthetic enhancement as well as physical improvements that increase safety and improve multi-modal access throughout the corridor. Short-term initial improvements to Beach Boulevard may be made that incur relatively low cost and yield meaningful benefits. Examples of such short-term enhancements include, but are not limited to:

- Longer crosswalk times at existing intersections.

Pedestrian crossings that utilize enhanced striping and design features to improve aesthetics and increase driver awareness of pedestrian zones.

Other traffic calming solutions, as applicable.

Landscaping improvements in existing medians and planters along Beach Boulevard.

Long term improvements to Beach Boulevard that may incur greater costs, but improve the aesthetic and mobility features of the corridor include, but are not limited to:

Introduction of new at-grade signalized pedestrian crossings across Beach Boulevard located at Main Street and Pacific Street.

Thematic vehicular- and pedestrian-scale lighting elements, such as streetlights and bollards.

Beach Boulevard will be improved, allowing for the following improvements to be made:

Street trees

Increased signage and light standards

Main Street Improvements

Main Street is envisioned as a walkable, pedestrian-oriented street within the Plan area. Streetscaping elements should be selected that are synergistic with walkable commercial uses and that encourage pedestrian movement through the corridor.

Enhancements to Main Street shown on the following page, include, but are not limited to:

Enhanced striping at pedestrian crossings

Pedestrian bulb-outs that reduce pedestrian crossing distances and improve aesthetics

Widened sidewalks, where feasible

Infrastructure and Public Services

This section describes the existing infrastructure and the related improvements needed to facilitate the build-out of the Specific Plan area, as well as public services required to serve users within the Plan Area.

Table 3.3 — Service Providers, lists the various service providers for the Plan area operating services at the time this Plan was prepared. These providers may be subject to change.

The Plan area is served by storm drain systems, sanitary sewer conveyance systems, and wastewater treatment infrastructure owned, operated, and maintained by the City of Stanton. Water service is provided by Golden State Water, electrical service is provided by Southern California Edison, and gas service is provided by Southern California Gas. Sewer and stormdrains within the Plan area are depicted on [Exhibit 3.46 - Stormwater Drainage and Sanitary Sewer](#).

TABLE 3.3 — SERVICE PROVIDERS	
Service	Current Provider
Water	Golden State Water Company
Wastewater	City of Stanton
Storm Drainage	City of Stanton
Electric Service	Southern California Edison
Natural Gas Service	Southern California Gas
Law Enforcement	Orange County Sheriff
Fire Protection	Orange County Fire Authority
Waste and Recycling Collection	CR&R Environmental Services
School Services	Savanna School District Cypress School District Anaheim Union High School District

TABLE 3.3 — SERVICE PROVIDERS

<i>Service</i>	<i>Current Provider</i>
<i>Library Services</i>	<i>Orange County Public Libraries</i>

Water Supply

Water service to the Specific Plan area is provided by the Golden State Water Company (GSWC), a private water purveyor. GSWC owns and operates the system, which serves cities within west Orange County.

In order to meet demand, GSWC supplies its customers with imported water from the Metropolitan Water District of Southern California and groundwater from the Orange County basin. The City's existing water distribution system serving the TCSP area is composed different sized pipelines including 4-, 6-, 8-, 10-, 12-, and 16-inch diameter pipelines. Much of the area within the Specific Plan is served by looping 6- and 8-inch pipelines that may not be capable of providing the required fire flow (as identified in the previous Specific Plan)

As specific developments are implemented, coordination with OCFA and GSWC and would be required to ensure infrastructure would provide adequate water capacity to serve the development.

Wastewater

The City of Stanton Public Works' Sewer Maintenance Division maintains and operates the local public sanitary sewer collection system. The City's wastewater collection system ultimately connects into Orange County Sanitation District (OC San) sewer system. OC San is a public agency that provides wastewater collection, treatment, and reuse/disposal services for approximately 2.6 million people in central and northwest Orange County.

Future development would be required to pay applicable sewerage connection fees and ensure sufficient capacity or planned expansions of wastewater infrastructure would accommodate anticipated wastewater.

Dry Utilities

Dry utilities within the Plan Area are provided as follows:

Telephone, Cable Television, and Internet

Spectrum and AT&T currently providing service to the Plan Area. Services would be provided in accordance with the provider's policies and extension rules on file with the California Public Utilities Commission (CPUC). Future developments within the TCSP area shall coordinate with the Spectrum and/or AT&T, as applicable to ensure avoidance of any notable service disruptions during the extension of, relocation of, upgrade of, or connection to services.

Electricity Service

Southern California Edison (SCE) currently provides electricity to the Plan area. Electrical service would be provided in accordance with SCE's policies and extension rules on file with the CPUC. Future developments are required to coordinate with SCE to ensure avoidance of any notable service disruptions during the extension, relocation, upgrade, or connection to services for future projects in the Plan area.

Natural Gas Service

The Southern California Gas Company (SoCalGas) currently provides natural gas service to the Plan Area. The service would be provided in accordance with SoCalGas' policies and extension rules on file with the CPUC. Future developing is required to coordinate with SoCalGas regarding future projects in the Plan area to ensure avoidance of any notable service disruptions during the extension of, relocation of, upgrade of, or connection to services.

Public Services

Public services within the Plan area are provided as follows:

Police Protection

Police protection services within the Plan Area are provided by the Orange County Sheriff Department (OCSD). The nearest station is located approximately one-quarter mile southwest of the Plan Area at 11100 Cedar Street Stanton, CA 90680.

OCSD is contracted by the City, therefore, the City would anticipate and increase the level of police service as-needed by the phased development of the Specific Plan.

Fire Protection

Fire protection services in the City are provided by the Orange County Fire Authority (OCFA) Division 7, which maintains and operates five stations that serve the City. Station No. 46 is located within the Plan area at 7871 Pacific Street.

The City takes responsibility to ensure funding is available to maintain emergency infrastructure.

Waste and Recycling Collection

Waste and recycling services within the Plan area are performed by CR&R Environmental Services. Future developing is required to coordinate with CR&R regarding to ensure adequate service capacity exists to serve the future developments.

School Services

The Plan area is served by Anaheim Union High School District, Magnolia School District, and Savanna School District. Future project-specific development would be required to pay school development fees to the relevant school district(s) for the improvement of school facilities.

Library Services

Library service to the Plan area is provided by the Orange County Public Libraries. The Orange County Stanton Branch Library is located one-quarter mile southwest of the Plan Area at 7850 Katella Avenue and is the closest library facility to future residents within the Plan area.

Remaining Service Capacity

Future development occurring within the Town Center Specific Plan Area is not anticipated to cause any utility or public service provider to exceed its capacity to adequately deliver services.

Future projects shall be evaluated on a case-by-case basis to ensure that service capacities continue to be met. Where necessary, these services shall be expanded at the fair-share cost to the developer.

|

5: DEVELOPMENT REGULATIONS

General Provisions

This Chapter establishes the permitted uses, development standards and regulations for the planned development within the Town Center Specific Plan area. The standards contained in this Chapter of the Specific Plan shall supersede those of the Stanton Municipal Code (SMC), unless otherwise stated herein.

Where the language in this Specific Plan is undefined, unclear, or vague, then the final interpretation and determination shall be made by the Community and Economic Development Director, or their designees. At their discretion, the Community and Economic Development Director may forward an item requiring interpretation to the City of Stanton Planning Commission for determination. Any determination by the Planning Commission may be appealed to the City Council. All decisions by the City Council shall be deemed final.

In instances of conflicting regulations and standards, the standards and regulations contained in this Specific Plan shall take precedence over the SMC, including the City's Design Guidelines. If this Specific Plan is silent on an issue, then the standards in the SMC or any other applicable city, state or federal code shall apply, as appropriate. The provisions in this Chapter are not intended to interfere with, abrogate, or annul any easement, covenant, or other agreement between parties.

Definitions

For the purposes of this Chapter, all definitions not defined by this Section shall be the same as described in Chapter 20.700, Definitions, of the Stanton Municipal Code (SMC).

“Affordable Housing Project” means any project that reserves a minimum of 50% of the units for income-restricted households, as defined by California State Law.

“Mobile Vendor” means any person in charge of or driving any motorized mobile vending vehicle requiring a state driver’s license to operate, either as an agent, employee, or otherwise under the direction of the owner.

“Mobile Vending Vehicle” means any motorized vehicle, including food trucks and lunch wagons, from which fruits, vegetables or foodstuffs are sold, displayed, solicited or offered for sale or bartered or exchanged, on any portion of any street within the City.

“Artisanal Manufacturing” means any the production of quality products by skilled workers, prioritizing customer value over cheap prices.

Allowable Uses

Table 5.1 — Permitted Land Uses, identifies land use regulations for the Specific Plan area. Any use not listed shall be prohibited, unless the Community and Economic Development Director finds that the proposed use is similar in characteristics to allowed uses. It should be noted that parks, plazas, and alleys not assigned a zone in *Exhibit 3.1* shall be assigned the same zone as an abutting property.

Additional Land Use Regulations

Section 5.4 describes the treatment of permitted, restricted, and nonconforming land uses within the Specific Plan area. Table 5.1 — Permitted Land Uses, identifies permitted and conditionally permitted land uses within land use districts depicted upon Exhibit 3.1. Other regulations related to land uses are listed in the sections below.

Regulations for Specific Uses

Additional regulations governing specific uses found in Table 5.1 are listed below:

Alcoholic Beverage Manufacturing Requirements. In addition to the design guidelines and development standards within the Specific Plan, the following requirements shall apply to craft alcoholic beverage manufacturing uses and accessory tasting rooms:

An alcoholic beverage manufacturing and accessory tasting room use shall comply with all federal, state and local laws and regulations, including a valid license from the California ABC Board for the specific type of alcoholic beverage manufacturing occurring on site;

An alcoholic beverage manufacturing and accessory tasting room use shall not exceed 6,000 square feet of net floor area;

An alcoholic beverage manufacturing use may not exceed production of 15,000 barrels per year;

All production activities and on-site storage shall be located completely within the alcoholic beverage manufacturing facility. Off-site storage for an alcoholic beverage manufacturing facility is permitted, provided it meets all applicable provisions of the underlying zone;

The display of alcoholic beverages shall be located within the alcoholic beverage manufacturing and accessory tasting room facility;

The alcoholic beverage manufacturing and accessory tasting room use shall be allowed to operate and be open to the public during the following hours:

Manufacturing and operation: 7:00 A.M. to 7:00 P.M. Monday through Saturday;

Accessory tasting room open to the public: 11:00 A.M. to 10:00 P.M. daily; and

Service trucks used for the purposes of loading and unloading materials, ingredients, products, and equipment shall be restricted to the hours of 7:00 A.M. to 6:00 P.M. Monday through Friday and 9:00 A.M. to 6:00 P.M. on Saturday.

The consumption, tasting and sales of alcoholic beverages shall be limited to only those products produced on-site;

Ancillary retail sales shall be limited to only those retail items directly associated with the on-site alcoholic beverage manufacturing facility and accessory tasting room;

The alcoholic beverage manufacturing use or accessory tasting room shall not charge an admission fee, cover charge or require a minimum purchase;

A security plan, including a video surveillance system and exterior lighting plan, satisfactory to the Community and Economic Development Director, or his/her designee, shall be submitted to and approved prior to the issuing of a Certificate of Occupancy. The video surveillance system shall be installed to assist with monitoring the property on both the interior and exterior. A Digital

Video Recorder (DVR) or similar video-recording device, capable of exporting images in TIFF, BMP, or JPG format shall be used. Recording shall be retained for no less than 30 days. Exterior lighting shall clearly illuminate the common areas surrounding the building including, but not limited to, the entrance and exit doors, as well as the business address;

No more than ten percent (10%) of the window display area (including any transparent doors) shall be allowed to bear advertising, signs or any other obstructions. All advertising, signage or other obstructions shall be placed and maintained to ensure a clear and unobstructed view of the establishment's interior. Window signs displaying prices shall be prohibited. No advertising or signage shall be placed in the area above three (3) feet or below six (6) feet in height of all windows measured from grade;

Tours of the alcoholic beverage manufacturing and accessory tasting room use shall occur on regularly scheduled days and times. The operator shall ensure that tours do not negatively impact adjacent businesses or property owner; and

Alcoholic beverage manufacturing and accessory tasting room uses shall be restricted from utilizing ventilation practices that may negatively impact residences and may be required to install mechanical air filtration systems to the satisfaction of the Community and Economic Development Director, or his/her designee.

Off-Premise Alcohol Sales. Boutique Wine and Beer Stores may permit the sale of wine and beer, for off-premises consumptions under a "Type 20 License" of the ABC by-right. General Liquor Stores may permit the sale of general alcohol sales, wine, and beer for off-premise consumptions under a "Type 21 License" of the ABC with an MUP. In addition to the standards within this Specific Plan, the following performance standards shall apply to Boutique Wine and Beer Stores and General Liquor Stores:

The use does not result in any adverse effects, jeopardize, or endanger the health, peace, or safety of persons residing, visiting, or working in the surrounding area;

The use is operated and maintained in accordance with all applicable local, state, or federal codes, laws, rules, regulations and statutes including those of the ABC, the City's General Plan, and all zoning or nuisance regulations of the City;

The use is operated and maintained in a neat, quiet, and orderly condition and operated in a manner so as not to be detrimental to surrounding properties and occupants. This shall encompass the upkeep and maintenance of exterior facades of the building, landscaping, designated parking areas serving the use, fences, and the perimeter of the site, including all public sidewalks, alleys, and parkways;

The use does not result in repeated nuisance activities, including but not limited to disturbance of the peace, illegal drug activity, public drunkenness, drinking in public, harassment of passersby, gambling, prostitution, sale of stolen goods, public urination, theft, assaults, batteries, acts of vandalism, excessive littering, loitering, graffiti, illegal parking, excessive loud noises especially in the late night or early morning hours, traffic violations, curfew violations, lewd conduct, or police detentions and arrests;

The exterior lighting and security measures shall comply with applicable requirements within the SMC;

No more than ten percent (10%) of the square footage of the windows and transparent doors of the premises shall be allowed to bear advertising, signs or any other obstructions including products, shelving, display items and/or coolers. All advertising, signage, product, shelving, display items and/or coolers shall be placed and maintained to ensure a clear and unobstructed view of the establishment's interior. Window signs displaying prices shall be prohibited. No advertising or signage shall be placed in the area above three (3) feet or below six (6) feet in height of all windows measured from grade; and

A copy of these performance standards, additional City or ABC imposed operating conditions, and a twenty-four (24) hour complaint telephone number shall be posted in a conspicuous and unobstructed place visible from the entrance of the establishment in public view.

Retail Sales. For all retail sales, no outdoor storage or sales is permitted in conjunction with any permitted use, except for permitted temporary sales, festivals, or special events.

Laboratories/Research and Development. A CUP is required if the use entails hazardous materials. Biosafety level 3 and 4 facilities are not permitted.

Live/Work Standards. In addition to the design guidelines and development standards within this Specific Plan, the following requirements shall apply to Live/Work units:

Intent. The development regulations of this section are intended to facilitate the creation of new, adaptable live/work units in a manner that preserves the surrounding character, supports enhanced street level activity, maintains a consistent urban streetwall, and orients buildings and pedestrians toward public streets. Live/work units are intended to be designed with adequate workspace, higher ceilings, larger doors, sufficient natural light, open floor plans, and equipped with non-residential finishes and features that support arts and production activities;

Density/Floor Area Allocation. Live/work units consistent with the provisions of this section are considered as a residential unit identified from the Residential (as specified by Density standards in Table 5.2 — Development Standards) allocations for property;

Limitations on Use. The non-residential component of a live/work unit shall be limited to those uses set forth in Table 5.1. Non-residential activities/uses shall not be required in these units;

Floor Area Requirement. A live/work unit shall have a minimum floor area of 750 square feet. At least 150 square feet of a live/work unit shall be designated as workspace, and measure not less than 15 feet in at least one dimension and not less than 10 feet in any dimension. The area for workspace in each unit shall be clearly demarcated on approved building plans;

Separation of and Access to Individual Units. Access to each individual live/work unit shall be provided from the shop fronts, directly from the sidewalk parallel to the primary or secondary street, or from common access areas, corridors, or halls. The access to each unit shall be clearly separate from other live/work units or other uses within the building.

Location of Living Space - Ground Floor Units. Ground floor live/work units shall designate the front 15 feet of the unit as an area for workspace, in order to maintain activity and commercial access along the frontage. Dedicated living space may be located in the rear portion of the ground level, provided the front 15 feet of the unit is designated for workspace;

Ceiling Height. Ground floor live/work units shall have a floor-to-ceiling height of 12 feet or greater, measured from top of floor to bottom of ceiling. Upper floor live/work units shall have a floor-to-

ceiling height of 10 feet or greater. A mezzanine space may not be included in the calculation of the minimum height for any floor level;

Integration of Living and Working Space. Areas within a live/work unit that are designated as living space shall be an integral part of the live/work unit and are not separated (or occupied and/or rented separately) from the area designated for workspace; and

Client and Customer Visits. Client and customer visits to live/work units are permitted.

Mixed-use Developments. Individual uses within a mixed-use development are subject to the provisions governing those uses found in this Chapter.

Limitations on Use

The following uses and activities shall be prohibited:

In any residential or live/work unit, storage of flammable liquids or hazardous materials beyond that normally associated with a residential use; and

Any other activity or use, as determined by the Community and Economic Development Director, to be incompatible with residential activities and/or to have the possibility of affecting the health or safety of residents due to the potential for the use to create dust, glare, heat, noise, noxious gases, odor, smoke, traffic, vibration, or other impacts, or would be hazardous because of materials, processes, products, or wastes.

Nonconforming ~~Industrial~~ Uses

The following section applies to existing nonconforming ~~industrial~~ uses within the Plan Area:

General. The purpose of this subsection is to recognize and allow for the continued use of ~~industrial~~ activities that become nonconforming with the adoption of The Plan. Except as provided in this subsection, the nonconforming use regulations set forth in Chapter 20.620 of the SMC (Nonconformities) shall apply;

Discontinuance of Nonconforming Uses. If a nonconforming use of a lot, building, or structure is discontinued for a continuous period exceeding 180 consecutive calendar days, the right to continue the nonconforming use shall expire;

~~**Allowed Expansion of Nonconforming industrial Uses.** Expansion of a legally established nonconforming industrial use is permitted on the same site with the issuance of a Conditional Use Permit; and~~

~~**Grace period.** All existing businesses and land uses within the Specific Plan shall not be required to meet to this Specific Plan until June 30, 2032. After this date, the existing businesses and land uses that do not meet the uses or regulations within this Specific Plan shall be considered nonconforming. All regulations for additions and expansions of these uses must adhere to the zoning designation as of January 1, 2024, as shown in "Exhibit 5.1 — Existing Zoning Map";~~

~~**Landscape buffer for uses not meeting the Specific Plan within the grace period.** A landscape buffer shall be required for uses that would be deemed inconsistent with the TCSP. A six (6)-foot wide landscape buffer shall be required along the sides and rear property lines of the development project unless adjacent to an alley. A landscape buffer is not required in between properties of the same development project. Front landscapes setbacks shall be pursuant to Section 20.315.040 of~~

the SMC. The buffer shall include one (1) fifteen (15)-gallon canopy tree every twenty-five (25) feet on-center. Irrigation for the buffer shall meet Section 20.315.050 of the SMC. Landscape buffers are not required if the inconsistent use is expanded by less than ten (10) percent and less than 1,000 square feet. The expanded area of the use inconsistent with the TCSP shall have a ten (10)-foot setback regardless of the underlying zone;

Existing Single-family Residences. Only single-family residences located within the TCMU and ROMU zones may be expanded and remodeled pursuant to the regulations in the Single Family Residential (RL) zone, any single-family use outside of these zones is not permitted to be expanded or remodeled. No more than fifty (50) percent of the existing square footage/floor area and/or total linear feet of interior and exterior walls shall be remodeled to single-family residences within the TCMU and ROMU zone. New single-family residences may not be established within this zone (except for Accessory Dwelling Units and other units allowed pursuant to State Law);

Change from a Nonconforming ~~industrial~~ Use to Another Nonconforming ~~industrial~~ Use. The Community and Economic Development Director may authorize a change from a legally established nonconforming ~~industrial~~ use to another nonconforming ~~industrial~~ use upon making the finding that the new use is similar in character to the existing nonconforming use and does not have the potential to result in adverse impacts on surrounding uses.

Temporary Uses

The purpose of this subsection is to regulate short-term temporary uses and special events that may occur within the Plan Area.

Temporary Outdoor and Seasonal Uses.

Except as provided in this subsection, the regulations set forth in Chapter 20.540, Temporary Use Permits and Special Use Permits, and 20.400.240, Outdoor Displays and Sales, of the SMC shall apply. Permitted temporary uses in the Plan Area are as follows.

Short-term temporary commercial uses, such as business promotions, outdoor sales seasonal sales, outdoor agricultural sales and displays, and special events that do not exceed three consecutive days may be permitted with a Temporary Use Permit. A Temporary Use Permit is not required if the temporary use is consistent with the following requirements:

Location. Temporary uses must be located upon a parcel containing only non-residential or mixed-use development. Location and display of merchandise must not disrupt normal circulation of the site, nor encroach upon pedestrian walkways, driveways or required landscape areas, or obstruct sight distances or create hazards for vehicles or pedestrians;

Frequency. No more than four (4) temporary commercial uses at one site shall be allowed within any 12-month period;

Existing Parking. The temporary use shall not cause a reduction in available parking to less than eighty-five percent (85%) of parking designated for non-residential uses required in this Specific Plan; and

Outdoor Sales. Temporary outdoor sales, such as grand opening events or other special sales, must be incidental to sales of an existing business on the same site. Special events such as farmer's markets, or mobile vending allowed by Section 5.4.4.3, Mobile Vending, are not subject to this requirement.

Temporary uses exceeding three (3) days in duration, or exceeding four (4) distinct occurrences per year, are permitted with a Special Event Permit, approved by the Community and Economic Development Director or his/her designee; and

Special events that occur on public or private property and are organized by a City agency are not subject to the requirements of this subsection.

Outdoor Dining

Outdoor dining within public rights-of-way as an accessory use is permitted with an approved special encroachment permit, and shall comply with Chapter 12.12, Encroachment Permits, of the SMC.

Outdoor dining areas with an approved special encroachment permit must occur within the street or paseo frontage of an existing or proposed food and/or beverage business and be incidental to the operation of that business.

Outdoor dining areas may be located in areas between the property line of the adjacent business and the street curb, as well as in parking areas within the street subject to approval by the Public Works and Engineering and Community and Economic Development Directors.

A minimum six-foot (6') wide pathway, free from any existing obstacles such as street furniture or landscaping, must be maintained and provide a clear linkage to each side of the property. This pathway must be maintained to the satisfaction of the Public Works and Engineering and Community and Economic Development Directors or each of his/her designees.

Establishments serving alcohol must obtain any additional permits required by the Alcoholic Beverage Control Board (ABC) of the State of California.

Any barriers required by the ABC to delineate outdoor dining spaces shall be designed to be moveable or semi-permanent in nature. These barriers shall attach to the sidewalk in a manner approved by the Public Works and Engineering Director and may be subject to additional criteria as prescribed by the ABC.

Mobile Vending

Purpose and Applicability. The purpose of this subsection is to regulate mobile vendors, such as food trucks, lunch wagons, and any distributor of food/beverage or retail goods from a motorized vehicle within the rights-of-way of the Plan Area. This subsection does not apply to mobile vendors participating in farmer's markets, street fairs or other special events permitted by the City. Vending from non-motorized vehicles within sidewalks or other paths designated for pedestrian use shall comply with SMC Chapter 5.74, Sidewalk Vending.

Operational Requirements for Mobile Vendors. All mobile vendors shall comply with the following regulations:

Vending is permitted in the rights-of-way only where mobile vendors have received permission from, or are contracted with, adjacent businesses fronting the street;

No vending within three hundred feet (300') of any school or park, except at specific parks as discussed per Section 5.4.4.3.c;

The vendor may stop for a maximum of four (4) hours per stop. A vendor's vehicle may occupy more than one (1) parking space when parking in metered spaces. Normal parking rates for each space

wholly or partially occupied shall apply. The vendor must move at least five hundred feet (500') before making another stop in the same area;

Tables, chairs, shade structures, and signs are prohibited on streets, parking spaces, and sidewalks;

No vending is allowed in congested areas where it may impede or inconvenience the public or create a traffic hazard;

The vendor shall provide waste containers and litter removal services in all areas within fifty feet (50') of the vending location and shall properly dispose of all waste;

No vendor shall use amplified sound or music to advertise vending services;

Vending may only occur when the mobile vending vehicle is legally parked in a roadway. Vendors shall comply with the California Vehicle Code, Title 10 (Vehicles and Traffic) of the SMC, and with all posted parking, stopping, and standing restrictions at all times;

Vending within the public right-of-way shall not be conducted before 9:00 A.M. or after 9:00 P.M.;

No part of the vehicle, furniture, or other equipment related to the vending operation may encroach onto the public sidewalk. Vendors may place waste containers on public sidewalks; provided, that a minimum six-foot (6') clearance for pedestrian accessibility is maintained. Vendors are responsible for managing customer queuing and ensuring that a pedestrian thoroughfare is maintained;

Mobile vendors shall prohibit loitering by persons within fifty feet (50') of the vending location;

Mobile vending vehicles shall park in a manner which ensures that customers are able to order and pick up food safely without stepping into a parking space, a street, or landscaping;

The vendor may sell only heated/prepared foods, non-alcoholic beverages, fruits, vegetable, and other consumable food products described in the application filed with the permit officer and approved by the permit officer; and

The vendor shall have a business license and an Orange County Health Department Permit, and shall comply with the California Retail Food Code. The vendor shall maintain possession of evidence of applicable licenses and permits at all times during operation and shall furnish evidence of such licenses and permits to city officials or law enforcement upon request.

Vending upon City Property. The Community and Economic Development Director or his/her designee may review and approve mobile vending activities on city parks property operated under the jurisdiction of the Community and Economic Development Department and promulgate rules of operation in these locations, including operation hours.

Vending upon Private Property. All mobile vending activity upon private property shall comply with the following regulations.

Vendors shall have the property owner's written authorization to operate on the property in their possession at all times. The written authorization shall describe the approved location and operation schedule;

Vendors shall only occupy parking spaces not required to meet the minimum requirements of SMC Chapter 25.70, Off-Street Parking requirements of this Specific Plan, or of other off-site uses if

those spaces are leased. This requirement does not apply if the hours of operation for the vendors and permitted uses do not coincide;

Vendors shall not occupy any paved area required for loading, circulation or fire access;

Tables, chairs and shade structures may be allowed in conjunction with food vendors if they occupy excess parking spaces or areas not required for loading, circulation or fire access, and they are removed daily after use. Tables and chairs may be on turf or mulched areas; provided, that precautions are taken or improvements are installed to protect and maintain landscaped areas;

Up to five (5) vendors may be on any individual property at a time; provided, that vendors do not operate before 8:00 A.M. or after 9:00 P.M.;

No vendor shall use amplified sound;

Vendors may sell only heated/prepared foods, non-alcoholic beverages, fruits, vegetables or other consumable food products;

Mobile vending operations on private properties beyond the requirements of this section may be allowed by a Temporary Use Permit pursuant to Title 25 (Zoning). In addition, the Community and Economic Development Director may require a Conditional Use Permit whenever it appears that mobile vending activities are having an adverse impact on the use of the property or neighboring properties, including traffic, circulation, parking availability, noise, trash, or other reasons of public health or safety; and

This subsection does not apply to any private event where a mobile vendor has obtained the property owner's written permission to cater for a private event that is held exclusively on the property and that is not open to the general public.

Development Standards

Development standards and development intensity within the Specific Plan Area are applied via a tiered system, as described by Table 5.2 —Development Standards. For development within the ~~CTMU~~TCMU and ROMU zones, Development Tier 1 is considered “base standard” intensity. Developments may exceed base standard intensity and qualify for higher intensity tiers of development by providing community benefit bonuses as described in Section 5.5.3, Community Benefit Bonuses.

General Development Standards

Development projects shall comply with the development standards set forth in Table 5.2 — Development Standards. The floor area ratio (FAR) standards shall apply to the non-residential component on a development site; the density standards shall apply to any residential component. The non-residential (FAR) and residential (density) components may be additive. Alley abandonments may be added to the site area of the project.

A developer may elect to develop consistent with either Tier 1, Tier 2, or Tier 3 development standards for live/work, mixed-use, residential, or commercial development within the TCMU and ROMU zones. Projects using Tiers 2 or 3 standards shall provide community benefits as described by Section 5.5.3, Community Benefit Bonuses.

All developments within the Plan Area shall undergo a Site Plan and Design Review, as described in Section 6.9, Review Procedures.

TABLE 5.2 — DEVELOPMENT STANDARDS						
Development Standards	Development within the TCMU and ROMU Zones			ICI Zone	ICR Zone ^a	Additional Regulations
	Base Standard (Tier 1)	Increased Intensity per Section 5.5.3 (Tier 2)	Maximum Intensity per Section 5.5.3 (Tier 3)

Side: Interior	10 feet	10 feet	10 feet	0 feet adjacent to industrial use, 20 feet adjacent to all other uses	5 feet	Setbacks for industrial uses apply only to new construction. Established uses shall be considered conforming with regard to required setbacks.
Rear	20 feet	20 feet	20 feet	0 feet adjacent to industrial use, 20 feet adjacent to all other uses	1 story 15 feet 2 story 20 feet	Setbacks for industrial uses apply only to new construction.

TABLE 5.2 — DEVELOPMENT STANDARDS, CONTINUED

Development Standards	Development within the TCMU and ROMU Zones			ICL Zone	ICR Zone ^a	Additional Regulations
	Base Standard (Tier 1)	Increased Intensity per Section 5.5.3 (Tier 2)	Maximum Intensity per Section 5.5.3 (Tier 3)			

Minimum Size	3,500 square feet	3,500 square feet	3,500 square feet	10,000 square feet	6,500 square feet
Width at street frontage	40 feet	40 feet	40 feet	50 feet	65 feet
g. Maximum Lot Coverage	60%⁶	60%⁶	60%⁶	60%	45%
h. Minimum Landscape Coverage	15%	20%	20%	15%	50%

Notes:

- ~~1. Accessory structures within the TCR zone do not need to meet these requirements and will be subject to Chapter 20.410 of the SMC.~~
- ~~2. Parking structures shall be exempt from FAR calculations.~~
- ~~3. Regardless of the proposed benefit tiers, maximum height cannot exceed the limitations identified in Exhibit 5.1 – Maximum Building Heights. Developments that provide the Beach Boulevard Plaza or the Eastern Neighborhood Park meeting the requirements identified in Section 5.5.2 may be granted an additional 2 stories in height and an additional 20 feet to the height limit.~~
- ~~4. Properties fronting onto Beach Boulevard and/or Main Street, a minimum of 35% of the building shall be located behind the PAE. Portions of buildings with a publicly accessible park, plaza, or outdoor dining area separating the building from Beach Boulevard or Main Street shall not be subject to this requirement.~~
- ~~5. If alley is used for direct access to a garage or parking structure, a stacking analysis shall be required to determine the adequate setback from the gate or other obstruction to ensure that queuing does not occur in the alley. Individual parking spaces that back into the alley may use the entire alley right-of-way as part of the required back-up space.~~
- ~~6. Lot coverage may be increased if additional usable common open space equivalent to the additional lot coverage (in square feet) is provided on a podium-level landscaped courtyard or plaza.~~

Additional Regulations

Publicly Accessible Open Space Requirements. As depicted in *Exhibit 3.1 – Land Use Districts and Plan Elements* and described in *Section 4.4, Open Space Framework*, the specific plan considers the addition of three public accessible parks into the City of Stanton – Beach Boulevard, the Eastern Neighborhood Park, and the Southern Pocket Park. These parks are conceptual in nature and their location may change, but shall be in the same general location as shown on *Exhibit 3.1* and meet both the intent described in *Section 4.4* and the requirements below.

Parks shall meet the following area requirements:

Beach Boulevard Plaza – 7,000 square feet minimum, with 100 of frontage along Beach Boulevard.

Eastern Neighborhood Park – 1/2 acre minimum.

Southern Pocket Park – 10,000 square feet minimum.

Parks within this section shall have a minimum dimension of at least 30 feet on any side.

Parks within this section are at least 50 percent open to the sky.

Parks within this section are located at ground level with direct pedestrian and ADA access to the adjacent public street;

Parks within this section are unenclosed by any wall, fence, gate, or other obstruction across the subject property;

Parks within this section are open to the public, without charge, each day of the year, except for temporary closures for necessary maintenance, public safety, or special/temporary events;

Parks within this section include at least one pedestrian-scaled amenity such as a water fountain, art, tot-lot, or other focal element; and

Parks within this section shall be owned, operated, and maintained by the developer or property manager in accordance with an approved maintenance plan to be reviewed and approved by the Community and Economic Development Director.

Industrial/Residential Interface. Any live/work unit or other residential unit on a site abutting an industrial use on an adjoining site shall be set back a minimum of 15 feet from the lot line shared by the property with the industrial use. A minimum six-foot masonry wall or other buffering feature shall be provided.

TABLE 5.2 — DEVELOPMENT STANDARDS, CONTINUED

<u>Development Standards</u>	<u>Development within the TCMU and ROMU Zones</u>			<u>TCI Zone</u>	<u>TCR Zone¹</u>	<u>Additional Regulations</u>
	<u>Base Standard (Tier 1)²</u>	<u>Increased Intensity per Section 5.5.3 (Tier 2)²</u>	<u>Maximum Intensity per Section 5.5.3 (Tier 3)²</u>			

<u>Minimum</u> <u>Size</u>	<u>3,500</u> <u>square feet</u>	<u>3,500</u> <u>square feet</u>	<u>3,500</u> <u>square feet</u>	<u>10,000</u> <u>square feet</u>	<u>6,500</u> <u>square feet</u>
<u>Width at</u> <u>street</u> <u>frontage</u>	<u>40 feet</u>	<u>40 feet</u>	<u>40 feet</u>	<u>50 feet</u>	<u>65 feet</u>
<u>g. Maximum</u> <u>Lot Coverage</u>	<u>60%⁶</u>	<u>60%⁶</u>	<u>60%⁶</u>	<u>60%</u>	<u>45%</u>
<u>h. Minimum</u> <u>Landscape</u> <u>Coverage</u>	<u>15%</u>	<u>20%</u>	<u>20%</u>	<u>15%</u>	<u>50%</u>
<u>i. Maximum</u> <u>Storefront</u> <u>Size⁸</u>	<u>6,000</u> <u>square feet</u>	<u>6,000</u> <u>square feet</u>	<u>6,000</u> <u>square feet</u>	<u>N/A</u>	<u>N/A</u>
<u>j. Maximum</u> <u>Storefront</u> <u>Width⁸</u>	<u>60 feet</u>	<u>60 feet</u>	<u>60 feet</u>	<u>N/A</u>	<u>N/A</u>

Notes:

1. Accessory structures within the TCR zone do not need to meet these requirements and will be subject to Chapter 20.410 of the SMC.
2. Parking structures shall be exempt from FAR calculations.
3. Regardless of the proposed benefit tiers, maximum height cannot exceed the limitations identified in Exhibit 5.1 – Maximum Building Heights. Developments that provide the Beach Boulevard Plaza or the Eastern Neighborhood Park meeting the requirements identified in Section 5.5.2 may be granted an additional 2 stories in height and an additional 20 feet to the height limit.
4. Properties fronting onto Beach Boulevard and/or Main Street, a minimum of 35% of the building shall be located within 5 feet of the right-of-way. Portions of buildings with a publicly accessible park, plaza, or outdoor dining area separating the building from Beach Boulevard or Main Street shall not be subject to this requirement.
5. If alley is used for direct access to a garage or parking structure, a stacking analysis shall be required to determine the adequate setback from the gate or other obstruction to ensure that queuing does not occur in the alley. Individual parking spaces that back into the alley may use the entire alley right-of-way as part of the required back-up space.
6. Lot coverage may be increased if additional usable common open space equivalent to the additional lot coverage (in square feet) is provided on a podium-level landscaped courtyard or plaza.
7. Parks described in Chapter 3.4 are only required for Tier 2 and 3 developments.
8. These regulations are only applicable east of Chestnut Avenue

Residential Notice. Residents of new live/work, mixed-use, and standalone residential development projects, whether owners or tenants, shall be notified in writing before taking up residence that they will be living in an urban-type environment, that the noise levels may be higher than in a strictly residential area, and that there may be odors associated with neighboring commercial and

industrial uses. The covenants, conditions, and restrictions of any development with a residential use shall require that prospective residents acknowledge the receipt of the written notification. Such written notification shall be provided in residential leases. Signatures shall confirm receipt and understanding of this information.

Parkland Dedication. Contribution towards the provision of public parks in the Town Center area can be in the form of dedication of land, provisions of improvements, or payment of fee in excess of that normally required for parks. For new residential development, parkland dedication requirements shall adhere to Chapter 19.42 of the SMC.

Street Improvements. Projects are required to fully improve adjacent rights-of-way to the centerline, except along Beach Boulevard. Where infeasible, the applicant shall contribute to a benefit fund or other fee program to fund future rights-of-way improvements.

Community Benefit Bonuses

Purpose and Applicability. To provide an incentive for development, and in partnership with the City to provide community benefits that would not otherwise be created, the Planning Commission may grant increased FAR, density, and/or building height in return for provision of specific community benefits, as listed below. These benefits shall be in the City's interest and will help implement the General Plan. A variety of objectives are listed to ensure that proposed project features are appropriate for the site and surroundings, and to allow for a wide range of possible project types.

Tier 2 - Number of Community Benefits. The Planning Commission may approve Tier 2 projects if it determines that the project includes at least three (3) community benefits from Subsection 4, below. At a minimum, the following elements shall be included: trees, landscaping, seating, bicycle racks, trash and recycling receptacles, and signage that include hours of operation.

Tier 3 - Number of Community Benefits. The Planning Commission may approve Tier 3 projects if it determines that the project includes at least four (4) community benefits from Subsection 4, below. At a minimum, the following elements shall be included: trees, landscaping, seating, bicycle racks, trash and recycling receptacles, and signage that includes hours of operation.

Community Benefit Features. The following optional community benefit features above and beyond the minimum requirements may be requested by applicants, in order to achieve higher tiers of development as described in Table 5.2 — Development Standards.

Paseo Enhancements. The project includes major pedestrian connections linking the public sidewalk to another public amenity such as a park, trail, or a sidewalk on a different street. Paseos shall be a minimum of 15 feet wide and a minimum length of 100 feet and provide pedestrian amenities such as seating and public art.

Off-site Streetscape Improvements. Off-site streetscape improvements beyond those identified in Subsection 5 of Section 5.5.2:

- Streetscapes improvements in excess of minimum improvements required for new development;

- Curb extensions, improved bicycle and pedestrian crossings/signals, transit/shelters in the public right of way;

- New pedestrian and bicycle connections to transit facilities, neighborhoods, trails, commercial areas, etc;

Removal of existing pedestrian and bicycle barriers (e.g. dead-ends and cul-de-sacs);

Upgrading traffic signals to enhance pedestrian and bicycle safety; and

Gateway elements, as described in Section 4.2.4.

Pedestrian Connections between Adjacent Properties. To effectuate the goal of creating walkable and bikeable environments, provide improved pedestrian ways and other paths open to the public that accommodate easy movement across and between properties under separate ownership. To meet this benefit, the pedestrian connection shall have a minimum width of 15 feet.

Public Parking Facilities. The project provides publicly available parking to serve area-wide parking needs. To qualify, the parking spaces should be permanently available for public use and subject to easements or restrictions acceptable to the City. To meet this benefit, there shall be a minimum of 20 parking spaces available to the public.

Community or Neighborhood Center. The project provides an on- or off-site community or neighborhood center that provides a space to the public for group activities, social support, and/or other purposes. To meet this benefit, the community or neighborhood center shall be at least 2,000 square feet in size.

Ground-Floor Retail Space. A mixed-use project shall provide ground-floor commercial or retail space equal to at least 50% or greater of the habitable square footage of the ground-floor. The commercial or retail space shall be oriented towards the street and include a separate entrance to the non-residential use. To meet this benefit, the ground-floor retail space must also have a minimum area of 6,000 square feet of gross leasable area.

Grocery Store. An operating community or neighborhood grocery store with a gross floor area of at least 10,000 square feet. Through a Development Agreement, developer shall ensure continuous operation for a period of at least 15 years (with a vacancy of no more than 6 months per 5 year period).

Affordable Housing. The project provides affordable housing to help address the state housing crisis. For Tier 2 projects to meet this benefit a minimum of 5 percent low and 5 percent moderate income housing shall be provided on-site. For Tier 3 projects to meet this benefit a minimum of 5 percent very-low, 5 percent low and 5 percent moderate income housing shall be provided on-site.

Public Art. Provide public art of at least 0.5 percent of the project valuation that may be visible to the public and/or enjoyed by the public.

Flexible (Miscellaneous) Benefit. The applicant agrees to provide a currently undefined community benefit approved by the Planning Commission that is substantially beyond normal requirements. Examples are inclusion of a child care center in a new project, off-site utility infrastructure improvements above and beyond those required to serve the development, additional funding for City programs such as contribution to a local façade improvement program, or subsidy for existing commercial tenants or other local small businesses.

Private Open Space

Common open space shall be provided with shared access for all building tenants. These may include, but are not limited to:

Courtyards;

Gardens;
Plazas;
Dog Runs;
Pool Decks;
Rooftop Amenity Areas; and
Playground Areas.

A minimum amount of private open space shall be provided for any project with a residential use as identified in Table 5.3 — Private Open Space Requirements. This requirement may be satisfied through the inclusion of personal open space (such as a private balcony or patio) or common open space (such as a courtyard or a pool).

For the purposes of this standard, an affordable housing project is defined as one that reserves a minimum of 50% of the units for income-restricted households, as defined by California State Law. Provided this definition is met, the usable private open space standard applicable to affordable housing projects would apply to all the units in the project, whether or not they are affordable.

Table 5.3 — Private Open Space Requirements	
Project Type	Private Open space Requirement
Affordable Housing Projects	150 Square Feet per Unit
All Other Residential Projects	200 Square Feet per Unit

Personal open space shall have a minimum dimension of five (5) feet in depth and eight (8) feet in width. Common open space shall have a minimum dimension of fifteen (15) feet in any direction.

Maximum Building Height

In addition to the regulations within Table 5.2, maximum building height within the Plan Area is depicted upon Exhibit 5.2 — Maximum Building Height Overlay and is five stories and 65 feet along Beach Boulevard. Building height is limited to three stories and 45 feet in areas adjacent to a sensitive use, such as an existing residential neighborhood. These sensitive uses are buffered by a minimum of 50 feet.

Developments that provide the Beach Boulevard Plaza or the Eastern Neighborhood Park are permitted to exceed the maximum height limit by an additional two stories and 20 feet.

Allowable Encroachments/Projections

An encroachment is a permitted allowance into a required ground-floor or upper-level setback or stepback. A projection is an element that is allowed to project above the maximum height limit. In all cases, all encroachments and projections shall comply with the California Building Code (CBC), as well as other applicable codes and regulations such as the American Disability Act.

No projections or encroachments into public rights-of-way shall be permitted without first obtaining an encroachment permit per the SMC Chapter 12.12. Permitted projections are described in Section 20.305.050 of the SMC.[w](#) Permitted encroachments are described in Section 20.305.070 of the SMC.

Off-Street Parking Standards

Off-Street Vehicle Parking. Required off-street parking for residential uses shall be provided as indicated in Table 5.54 — Off-Street Vehicle Parking. Parking requirements for single-family and non-residential uses are set forth in Chapter 20.320 of the SMC.

TABLE 5.4 — OFF-STREET VEHICLE PARKING	
Number of Bedrooms in a Unit	Minimum number of parking spaces required
0 (Studio, Loft)	1 space per unit (covered)
1	1 space per unit (covered)
2	1.5 spaces per unit (covered)
3 or Greater	2 spaces per unit (covered)
Guest Parking	1 space per 4 units
Live/Work Units	0.5 spaces in addition to the residential parking, above.

Vehicle Parking Stall Dimensions. All parking stalls shall have minimum dimensions of eight and one-half (8½) feet in width by seventeen (17) feet in length, except for required accessible parking spaces which shall meet the dimensions required in the California Building Code in effect at the time a project is submitted for City review. No compact parking stalls shall be allowed if only a single dimension stall is used.

Aisle Dimensions. All aisles within a parking area shall be as indicated on Table 5.65 — Parking Aisle Dimensions.

TABLE 5.5 — PARKING AISLE DIMENSIONS	
Parking Space Angle	Required Backup Aisle
90 degree	24 feet
60 degree	18 feet
30 degree	13 feet

Bicycle Parking. Bicycle parking shall be provided as indicated on Table 5.76 — Bicycle Parking Required.

TABLE 5.6 — BICYCLE PARKING REQUIRED

<i>Residential Land Uses</i>	<i>Minimum Number of Parking Spaces Required</i>
Short-term - Visitor Bicycle Parking	Per CALGreen
Long-term - Resident Bicycle Parking	0.25 spaces/unit or per CAL Green

<i>Commercial and Industrial Land Uses</i>	<i>Minimum Number of Parking Spaces Required</i>
Short-term - Visitor Bicycle Parking	5% of required vehicular parking spaces
Long-Term - Employee / Tenant Bicycle Parking	1% of required vehicular parking spaces or per CALGreen

Short-term bicycle parking (e.g. bike racks) shall be anchored permanently to the ground within 200 feet of a building's primary entrance.

Long-term bicycle parking shall be conveniently accessed from the street and occur as one of the following forms:

- Covered, lockable enclosures with permanently anchored racks for bicycles;
- Lockable bicycle rooms with permanently anchored racks; and
- Lockable, permanently anchored bicycle lockers.

Electric Vehicle (EV) Charging Stalls. Electric vehicle charging stalls for non-residential uses shall be provided as indicated on Table 5.87 — Non-residential EV Charging Stalls Required. For residential uses, 3% of all required parking spaces shall include EV charging stations. In the event that CALGreen requirements are more restrictive, the more restrictive requirements shall apply.

TABLE 5.7 — NON-RESIDENTIAL EV CHARGING STALLS REQUIRED

<i>Total Number of Actual Parking Spaces</i>	<i>Amount of EV Charging Stalls Required</i>

76-100	4
101-150	5
151-200	6
201 and over	<i>3 percent of total, rounded up to nearest whole number.</i>

Surface Parking Landscaping Requirement. Landscaping for surface parking lots shall be subject to Section 20.320.110 of the SMC.

Parking Structure Screening Requirements. Any exposed elevation of parking structure shall be designed to be compatible with the architectural character of the development it is associated with or shall be screened from public view. Preferred screening treatments include, but are not limited to:

Landscape screening in the form of trees planted at a minimum of every 25 linear feet;

Artistic architectural screening techniques, such as metal fins, louvers, or other architectural elements; and

The use of appropriate architectural and material treatments such as heavy textured concrete, planters, openings, indentations, and/or projections of exterior walls to provide visual interest.

Fences and Walls

Height

With the exception of fences and walls within the required front setback, fences and walls up to eight (8) feet in height are permitted, as measured from the lowest adjacent grade. Fences and walls within the front setback are limited to 42 inches in height. Fences of a greater height than herein permitted may be approved with the approval of the Community and Economic Development Director or his or her designee. Fences and walls shall adhere to the other requirements and limitations of the SMC Chapter 20.310.

Measurement of Height.

Except as provided in Section 20.310.040 of the SMC, the height of a fence or wall shall be measured from the lowest adjacent grade.

Traffic Visibility Area

Development proposed adjacent to a public or private street or alley intersection, or the intersection of a driveway with a street, shall be designed to provide an area of unobstructed vision to provide for pedestrian and traffic safety per the regulations of SMC Section 20.305.100.

Nonconforming Fences and Walls

Any fence or wall existing at the effective date hereof whose height exceeds that specified is nonconforming. The City Council may order, by resolution, a nonconforming fence or wall to be caused to conform upon its conclusion that a public hazard or public inconvenience results from such nonconformance.

Signage

Except as identified below, signage within the Specific Plan area shall comply with SMC Chapter 20.325, Sign Standards.

Exempted Signs

The following signs and/or sign structures are exempt from any sign permit requirements provided, that such signs shall comply with all other applicable requirements of the Specific Plan and SMC.

- All signs identified in Section 20.325.050 of the SMC;

- Temporary contractor's, future development and building sale signs that comply with the provisions in the SMC; and

- The changing of advertising copy or message on bulletin boards, and pageantry, when the basic board or pageantry is permitted under the provisions of this Specific Plan. Messages may be changed digitally or manually.

General Sign Standards

The following requirements shall apply to signs within the Specific Plan.

- All signs and community monumentation shall be included as part of an approved Sign Program;

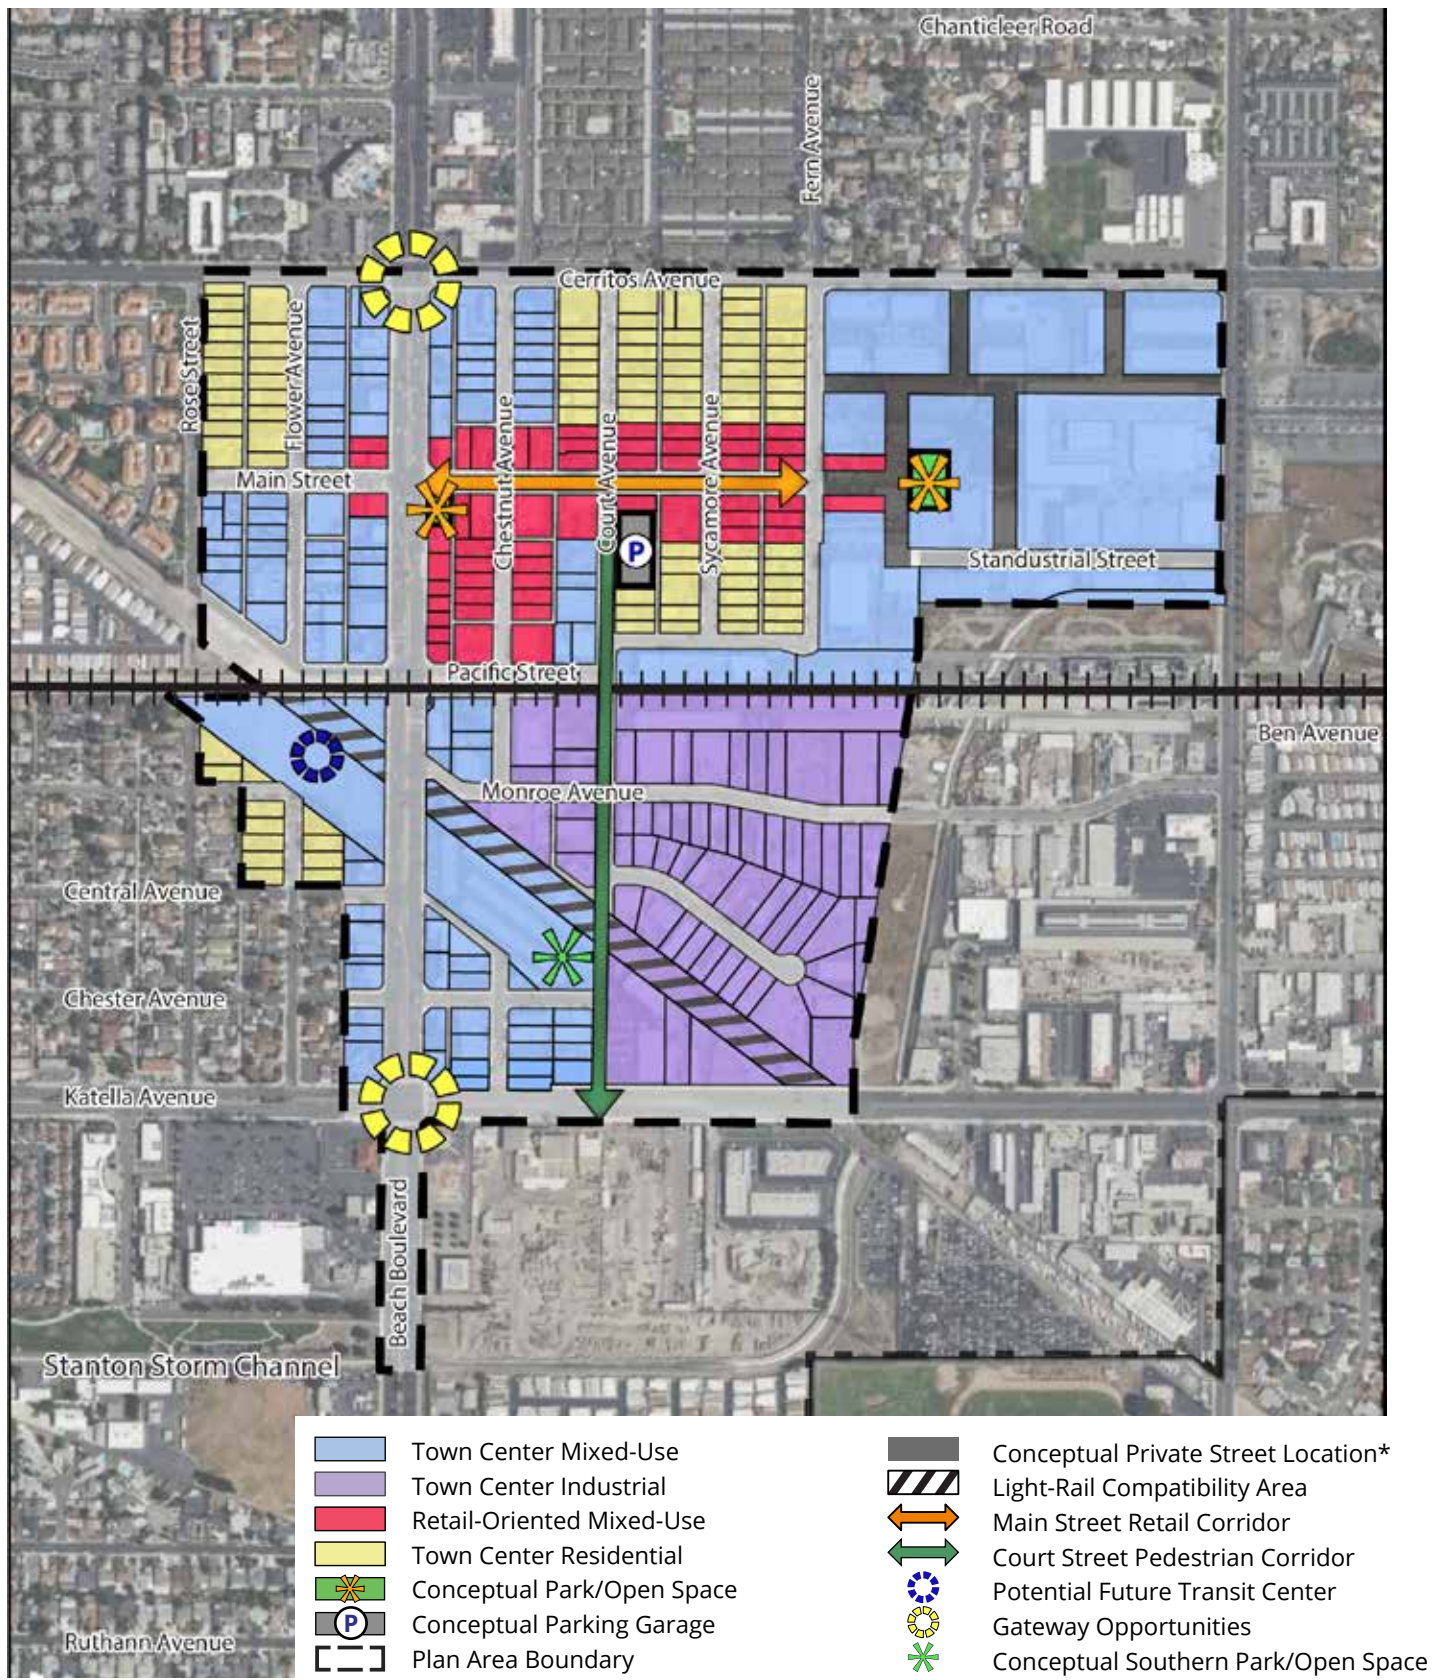

- Projecting Signs Clearance. A minimum eight (8) feet vertical clearance is required from the bottom of a projecting sign, marquee, blade or awning to the sidewalk or grade immediately below the sign;

- Unless otherwise permitted by this Section, signs that include, but are not limited to, rotating, flashing, swinging, blinking, strobing, or otherwise changing appearance are prohibited. In cases where illuminated signs display temperature and time, said sign shall receive City approval and shall include a mechanism to reduce the brightness of said sign when in proximity to a residential neighborhood; and

- All signs may be internally or externally illuminated. All direct light rays from all signs shall be confined onto the Project site and shall not shine directly upon neighboring property. All exposed raceways are prohibited. Temporary lighting such as search or flood lights that are used on a permanent basis are prohibited.

- The Planning Commission may grant approval of signs that do not comply with these regulations through the Sign Program application process; and

- Off-site advertising is permitted as part of pageantry. All pageantry with off-site signage must be located within a commercial area and shall be oriented towards internal uses and shall not be readily visible from properties outside of the Specific Plan Area.

*Locations are subject to change and do not require an Amendment

INTRODUCTION

1.1 Purpose and Intent of the Specific Plan

The Town Center Specific Plan, hereafter referred to either as “Town Center Specific Plan,” “TCSP,” or “The Plan,” provides a detailed description of the proposed land uses, infrastructure, and implementation requirements for development within the Town Center Specific Plan Area. The Plan will be implemented within the City of Stanton, California. The Design Guidelines contained in this document assist in creating a consistent urban form and landscape character for private and public development within the Plan Area. The Development Regulations establish permitted uses, building setback and height standards, and general development criteria and requirements for new development.

The TCSP is consistent with the applicable goals and policies of the City of Stanton General Plan. The provisions and regulations contained in the Plan shall apply to the Town Center Specific Plan Area and shall prevail in instances of conflict with the provisions and regulations of the Stanton Municipal Code (SMC) that regulate the same subject matter. Where the Plan is silent on an issue, the goals, objectives and implementing actions contained in the SMC shall apply, and the standards in the SMC or other applicable city, state, or federal code that regulate the same issue shall apply.

The Plan is designed with flexibility, considering changes in the economy may alter demand for various residential, commercial, and industrial development scenarios over time. The TCSP is an implementation tool that:

- Implements a cohesive, long-range plan for logical growth that is compatible with existing adjacent neighborhoods.
- Establishes development standards for permitted residential, mixed-use commercial, and industrial land uses.
- Ensures adequate circulation and infrastructure networks exist within the Plan Area, and emphasizing transit and pedestrian mobility.

- Assures appropriate financing for community facilities, including circulation and streetscape improvements, domestic water, urban runoff and drainage facilities, and sewage disposal.
- Develops a plan and identifies open space and public art opportunities within the Plan Area.
- Examines economic and market conditions in the Plan Area, and implements a plan that is economically feasible and that responds to anticipated future economic conditions.

Rodeo39, a public market featuring restaurants, art, and outdoor gathering spaces located in the City of Stanton.

1.1.1 Specific Plan Vision

The Specific Plan was prepared in accordance with the City's vision, and addresses the concerns and opinions raised during the outreach process by major stakeholders, City staff and the general public. The primary project vision and objectives for the Town Center Specific Plan are:

1. Preserve existing residential neighborhoods and create a vibrant, pedestrian friendly environment.
2. Maintain existing businesses while encouraging a broader mix of uses and encouraging the revitalization of existing industrial uses.
3. Improve existing streetscape and landscape.
4. Provide for more locally-serving retail and commercial developments.
5. Abandon alleys throughout the Plan Area where appropriate.
6. Alleys will only be vacated when feasible typically for larger development.
7. Create a true "Main Street."
8. Link the Specific Plan to other districts.
9. Create district design guidelines for architecture, streetscape, and public improvements.
10. Reduce vehicle trips and trip duration by encouraging efficiency between trip origin and trip destination.
11. Ensure adequate and efficient infrastructure to support existing and future development.
12. Encourage economic development and incentivize investing in infill development.

Existing condition of Beach Boulevard in the Plan Area.

Freight rail corridor that traverses the Plan Area.

Existing residential neighborhoods within the Plan Area.

1.2 Plan Area Location

The Town Center Specific Plan Area consists of approximately 156.9 acres located in the northern portion of the City of Stanton in the northwestern portion of Orange County, California. Plan Area proximity to regional transit corridors is depicted on *Exhibit 1.1 — Regional Location*. The Plan Area is approximately 2.2 miles north of California State Route (SR) 22, 5.2 miles west of Interstate (I) 5, and 3.6 miles south of SR 91.

Access from these major transportation corridors is provided via two historical arterials: SR 39, also called Beach Boulevard, which runs north-south through the Plan Area, and Katella Avenue, which runs east-west along the Plan Area's southern boundary. Both streets are classified as Primary Corridors by the Stanton General Plan, and are depicted on *Exhibit 1.2 — Local Context*. Additionally, SR 39 is classified as a "Smart Street" by the Orange County Transportation Authority (OCTA), which is defined as a high-flow arterial which provides a variety of measures which eliminate or reduce traffic conflicts.

Exhibit 1.1 — Regional Location

1.3 Specific Plan Summary

The planning process for the Town Center Specific Plan began with extensive outreach efforts to gain input from the community and collaboratively establish the vision for the Town Center area. These outreach efforts are detailed in *Chapter 2, Planning Context*.

As a result of this interactive community process, a consensus for the preferred land use concept was developed for a carefully designed, well-planned district that evolves over time into an area that maximizes the benefits of its urban amenities and preserves existing residential neighborhoods, while enhancing the unique character of the Plan Area.

The Plan is designed to create a district within the City of Stanton that promotes redevelopment and incentivizes new mixed-uses while preserving existing residential neighborhoods and enhancing the district's industrial character. The design of the Plan incorporates place-making principles into a pedestrian-friendly streetscape

that connects parks, lifestyle areas, walkways, future mass-transit and retail opportunities within a single mixed-use district, while preserving vehicular access to and throughout the Plan Area.

The Plan will also implement a unifying landscape and streetscaping theme that emphasizes the pedestrian and cyclist experiences, and will help identify the district as distinct from other areas in Stanton as well as uplift the aesthetics of existing neighborhoods.

The Plan encourages an environmentally conscious development approach to provide for a sustainable community. New development and redevelopment is encouraged to incorporate energy-saving materials and features to reduce energy and water consumption needs, and to minimize the impacts associated with development on the environment.

Title slide from December 15, 2020 zoom polls used to gather stakeholder preferences during outreach efforts.

1.4 Discretionary Actions and Approvals

The City of Stanton is the Lead Agency for purposes of California Environmental Quality Act (CEQA) compliance and has prepared an Initial Study and Mitigated Negative Declaration (IS/MND) to consider the following discretionary actions. These actions are required to implement the Specific Plan:

- **General Plan Amendment:** An approval of a General Plan Amendment will be necessary to change the general plan land use designation of the entire Plan Area from existing designations to “Town Center Mixed Use District” on the City’s General Plan Land Use Diagram.
- **Zone Change:** An approval of a Zone Change will be necessary to change the zoning of the entire district from existing zoning designations to “Town Center Specific Plan” (TCSP).
- **Specific Plan Approval:** The Town Center Specific Plan has been prepared to realize the objectives of the proposed district as defined herein. The Plan will be adopted by resolution by the City Council of Stanton.

- **Mitigation Monitoring and Reporting Program:** The proposed Project’s impacts on the following issue areas would be significant and would require the implementation of mitigation measures: Biological Resources, Cultural Resources, Geology and Soils, Hazards and Hazardous Materials, Hydrology and Water Quality, Noise, Population and Housing, Tribal Cultural Resources, and Utilities and Service Systems. All impacts would be avoided or reduced to less than significant levels after mitigation.

All of the above entitlements will require approval by the City Council of Stanton.

1.5 Authority and Format of the Specific Plan

The State of California Legislature has established the authority and scope to prepare and implement specific plans. The State requires all cities and counties in California prepare and adopt a comprehensive General Plan for the physical development of their areas of jurisdiction. To implement the policies described in the General Plan, regulating programs are adopted (e.g., zoning ordinances, subdivision ordinances, building and housing codes, etc.). California State law authorizes cities with complete General Plans to prepare and adopt specific plans (Government Code Section 65450 – 65457). Local planning agencies or their legislative bodies may designate areas within their jurisdiction as areas for which a specific plan is “necessary or convenient” (Government Code Section 65451).

Specific plans are intended to serve as bridges between the local general plan and the individual development proposal for a specific area. Specific plans contain both planning policies

and regulations, and may combine zoning regulations, capital improvement programs, and other regulating requirements into one document.

The Town Center Specific Plan has been created through the authority granted to the City of Stanton by the California Government Code, Sections 65450 through 65453. This Specific Plan has been prepared in accordance with the provisions of the California Government Code, which stipulate that a specific plan contain text and diagrams specifying the following:

- **Land Use:** The specific plan must specify the distribution, location, and extent of the uses of land, including open space, within the area covered by the plan. This discussion is included in *Section 3.3, Distribution of Land Use Districts*, of this Plan.
- **Public Facilities:** The specific plan must show the proposed distribution, location, extent, and intensity of major components of public and private transportation, wastewater, water, drainage, solid waste disposal, energy, and other essential facilities located within the area covered by the plan, and needed to support the land uses described in the plan. This discussion is included in *Section 3.6, Circulation and Mobility Plan*, and *Section 3.7 Infrastructure and Public Services*, in this Plan.

-
- **Development Standards:** The specific plan must include standards and criteria by which development will proceed, and standards for the conservation, development, and utilization of natural resources, where applicable. This discussion is contained in *Chapter 5, Development Regulations*, in the Plan.
 - **Implementation Measures:** The specific plan must include a program of implementation measures, including regulations, programs, and financing measures. A discussion of these topics is included throughout *Chapter 6, Implementation*, in this Plan.
 - **General Plan Consistency:** The specific plan must include a statement of the relationship of the specific plan to the General Plan. An analysis of the Town Center Specific Plan's consistency with the City's general plan is contained in *Appendix A, Consistency with the City of Stanton General Plan*, of this Plan.
 - **Optional Contents:** The specific plan may address any other subject that, in the judgement of the planning agency, is necessary or desirable for implementation of the General Plan. Landscape, architectural, and sustainability design guidelines are included as optional contents in *Chapter 4, Design Guidelines*, of this Plan.

2

PLANNING CONTEXT

2.1 Relationship to the City of Stanton General Plan and Zoning Code

As required by State Law, this Specific Plan is consistent with the applicable goals and policies contained within the adopted City of Stanton General Plan. The goals and policies identified within each element of the City of Stanton General Plan have been evaluated and a statement of compliance with the General Plan has been included in *Appendix A*. The TCSP serves as the Zoning for the Plan Area.

2.1.1 City of Stanton General Plan

The City of Stanton adopted the most recent version of the general plan in September of 2008. As depicted on *Exhibit 2.1 — Existing General Plan Land Use Designations*, the Specific Plan Area is designated as “Medium Density Residential,” “High Density Residential,” “Town Center Mixed Use District” and “Industrial.” In order to be consistent with the General Plan, all parcels within the Plan Area not currently designated “Town Center Mixed Use District” are redesignated from their current designation to “Town Center Mixed Use District,” as depicted on *Exhibit 2.2 — Proposed General Plan Land Use Designations*.

2.1.2 City of Stanton Zoning Code

As depicted in *Exhibit 2.3 — Existing Zoning Designations*, existing zoning for parcels within the Plan Area includes the following zoning designations: “CN” Commercial neighborhood Zone, “CG” Commercial General Zone, “PR” Parks and Recreation Zone, “OS” Open Space/Buffer Zone, “IG” Industrial General Zone, “RL” Single-Family Residential, “RM” Medium Density Residential, and “PI” Public Institutional Zone. A Zone Change is required to adopt the Specific Plan. As such, the zoning of the site would change from the above designations to “TCSP’ Town Center Specific Plan,” as depicted on *Exhibit 2.4 — Proposed Zoning Designations*.

| North Gateway Mixed Use District | Public/Institutional | |

2.1.3 Other Policy Documents

In addition to the above regulating documents, portions of the Plan Area along Beach Boulevard are also subject to the following plans and policy documents:

Stanton Livable Beach Boulevard Mobility Plan

The Stanton Livable Beach Boulevard Mobility Plan is intended to guide City plans and implement mobility and public realm enhancement projects. Specifically, the Plan identifies amenities, pedestrian and bicycle facilities, vehicular circulation, transit and urban design recommendations for the Beach Boulevard Corridor within the City of Stanton.

Historical photo showing Downtown Station in 1913

2.2 Project Context

2.2.1 Historical Context

According to the City of Stanton's website, the 3.1 square mile jurisdiction is located in an area once apart of the 300,000-acre Rancho Los Nietos, one of the largest land grants in California history. In 1834, the Rancho was divided into smaller Ranchos that would be used for agriculture and land development. By the late 1800's, Rancho Los Alamitos where present day Stanton is located was primarily used for agriculture.

In 1906, the Pacific Electric Railway began operating in the Stanton area, which was then an unincorporated community known under the name "Benedict." Pacific Electric Railway's Santa Ana Line connected Downtown Los Angeles to Santa Ana in Orange County and included intermediate stops at cities such as Stanton. This connection incentivized business and brought prospective land buyers out to visit available parcels until 1950, when the Pacific Electric Railway discontinued service to Orange County on the Santa Ana Line.

In 2010, the City received a grant to review development program alternatives for a 4.1 acre site owned by Orange County Transportation Authority (OCTA) within the City along Beach Boulevard. In order to develop a comprehensive long-range vision for the area, a comprehensive planning process was initiated for parcels that are within the current Plan Area, which also includes the OCTA site. Ultimately the Specific was not adopted; however, goals and objectives established by the previous plan were incorporated into the TCSP if still relevant and consistent with the findings of community outreach.

2.2.2 Opportunities and Challenges

The Plan Area includes multiple contextual factors that influence the project's suitability for redevelopment. These influences are shown on *Exhibit 2.5 — Opportunities and Challenges Analysis*, and are described below:

- Proximity of residential, commercial and industrial uses within walking distance of one another.
- Beach Boulevard, a designated “smart-street” and high-quality bus route, as the defining circulation feature within the Plan Area.
- Two major arterials, Cerritos Avenue and Katella Avenue, adjacent to the Plan Area.
- Opportunity to provide multi-modal connections and increased access via active and inactive rail corridors traversing the Plan Area.
- Vacant OCTA site at the intersection of Beach Boulevard and Pacific Street.
- Proximity to potential future trails and open spaces.
- Large parcels and multiple parcels under the same ownership, presenting lot consolidation opportunities for cohesive development.
- Low-quality of existing pedestrian and bicycle circulation within the Plan Area.
- Existing heavy-industrial land uses that may be incompatible with residential or commercial uses.
- Opportunity to encourage redevelopment along Stanton’s Main Street.

2.3 Existing Site Conditions and Setting

The existing physical setting of the Plan Area varies based on the uses in that portion of the area. Areas with an industrial character tend to feature lower-rise buildings and predominantly hardscape areas mostly devoted to surface parking lots, loading zones, and driveways. Residential areas feature one- to two-story development, sidewalks, and parallel, on-street parking. There is little to no landscaping within street rights-of-way in residential neighborhoods within the Plan Area. Commercial development tends to cluster around Beach Boulevard. Beach Boulevard is maintained by CalTrans and travel is dominated by the automobile.

No trails currently exist within the Plan Area, though several potential future trails are identified by City documents following storm drain canals and existing rail rights-of-way. Additionally, no parks facilities currently exist to serve residents within the Plan Area.

Some recent commercial redevelopment has occurred along Beach Boulevard, but the majority of existing buildings within the Plan Area have a low-intensity industrial character retained from initial development in the 1950’s and 1960’s.

Exhibit 2.5 — Opportunities and Challenges

N.T.S. | Source: KTGy, Google Earth ⓘ

2.3.1 Existing Land Uses

Historically, Beach Boulevard has served as an important commercial corridor within the City of Stanton. Residential and industrial development in this area occurred in the post-war population boom of the 1950's and 1960's and has not undergone substantial redevelopment or improvements since this time.

The Stanton Town Center Specific Plan Area covers approximately 156.9 acres that generally follows the land use and development pattern of early development within the City of Stanton. Existing zoning classifications are depicted on *Exhibit 2.5*. Regardless of zone, parcels within the Plan Area commonly feature some form of rear alley access.

The primary uses along Beach Boulevard are commercial and retail uses. Some areas along Main Street also feature commercial uses.

Residential neighborhoods within the Plan Area typically feature single-family or two-story multi-family residential development constructed in the 1950's and 1960's. The majority of residential development occurs in the northeastern and northwestern portions of the Plan Area, along Rose Street, Flower Avenue, Chestnut Avenue, Court Avenue, Sycamore Avenue, and Fern Avenue.

Industrial development within the Plan Area predominantly occurs in the eastern and southeastern portion of the Plan Area. Businesses within these areas range from lumber supply yards and mini-storage facilities to chemical supply factories, autoshops, and steel fabricators. Industrial buildings tend to be concrete tilt-up structures with long, unbroken facades and flat roofs.

A small public facilities area exists along Pacific Street that contains the Orange County Fire Authority (OCFA) Station, Number 46 and ancillary support buildings.

OCTA is in possession of multiple parcels and parcel corridors throughout the plan area that are either vacant or are encumbered with easements for freight rail rights-of-way. Historically these long linear parcels served many uses, including functioning as the route of the former Pacific Electric Rail line that served the City of Stanton as well as other cities within the area. Today, the majority of these parcels are vacant, with some used for storage activities.

2.3.2 Existing Circulation

Roadway circulation in the Plan Area is facilitated by major arterial streets, as identified in the General Plan. Beach Boulevard is identified by OCTA as a "Smart Street" and serves as the primary vehicular corridor traversing the City. Other significant arterials within or adjacent to the Plan Area include Katella Avenue and Cerritos Avenue.

Streets within the Plan Area typically include sidewalks on both sides of the street and minimal to no landscaping. There are no designated bicycle lanes or trails within the Plan Area; *Exhibit 2.5* depicts potential future bike lanes and bike routes in the vicinity the Plan Area.

2.3.3 Transit Access

Exhibit 2.5, depicts transit access to the Specific Plan area. Access to a variety of transit options reduces dependency on vehicle trips which can reduce congestion, increase access to and from the Plan Area, and have a positive effect on the environment. Multi-modal access to the Plan Area is described below:

2.3.3.1 Orange County Transit Authority

Bus service is provided through and to the Plan Area via two main routes:

- Route 29, along SR-39 Beach Boulevard connecting Brea to Huntington Beach.
- Route 529, along SR-39 Beach Boulevard connecting Fullerton to Huntington Beach.
- Route 50, along Katella Avenue connecting Long Beach to Orange.

In preparation for the 2028 Los Angeles Olympic Games, Los Angeles County Metropolitan Transportation Authority (LA Metro) plans a future light-rail route that will extend to the Los Angeles County line, terminating in the City of Artesia. This proposed route follows the same Pacific Electric rail corridor that traversed the Plan Area and included a stop at the vacant parcel currently owned by OCTA. Currently, OCTA does not propose a connection to LA Metro's planned future light-rail route; however, the Plan considers this potential future connection as an opportunity that could increase multi-modal access within the Plan Area.

2.4 Public Outreach Summary

The Plan Area has a diverse group of stakeholders, including residents, business and property owners, and employees within the Plan Area. In order to reach the broadest set of participants and potentially-interested parties, the outreach strategy for the Town Center Specific Plan included multiple noticing approaches.

Each of the two virtual workshops was divided into three sessions. For each session, stakeholders were grouped with those similar to them in order to facilitate conversations that allowed the needs or desires of each group to be more easily identified. The groups were as followed:

- City staff, city officials, and interested members from adjacent jurisdictions or government agencies.
- Businesses located within the Plan Area and within 500 feet of the Plan Area boundary.
- Owners of parcels within the Plan Area and within 500 feet of the Plan Area boundary.

City staff, officials, and other interested government agencies were notified via phone calls and emails.

Preferred residential design imagery

Addresses of businesses within the Plan Area were gathered based on a registered list provided by the City of Stanton. Postcards and emails were sent in advance of each workshop informing them of the upcoming event.

Postcards were also sent out to each addressed parcel within the Plan Area to give residents and property owners an opportunity to provide input during the workshops.

In addition to these methods, City of Stanton social media accounts on Instagram and Facebook created online posts detailing the topic and timing of the workshops to allow for a more widespread attendance.

The content of the postcards, emails, and the online social media posts gave recipients the information to RSVP for the virtual workshops, as well as the link to the City's online informational webpage created for the project.

Preferred retail design imagery

2.4.1 Workshop 1: Community Visioning and Initial Outreach

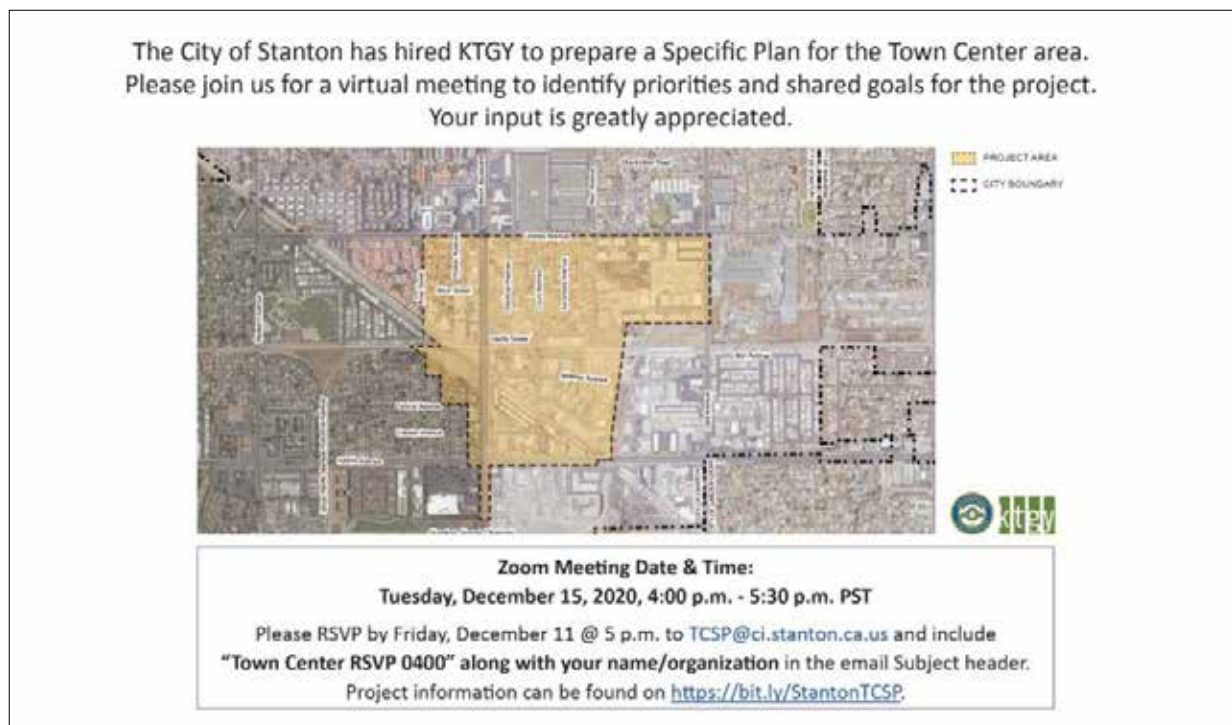

2.4.4.1 Workshop Concept

The goal of the visioning workshop was to determine perceptions of the existing condition of the Plan Area and generate ideas to help craft the vision for the Plan Area. Participants were informed of the efforts the consultant team had performed to date, and asked questions via a live online poll to gather opinions on what future priorities for the Plan Area should be. The online poll was also available after the presentation in a survey format on the City's outreach website. After each session's presentation, there was an opportunity for live questions and answers, verbally or via chat.

2.4.4.2 Workshop Results

Table 2.1 — Workshop 1 Participation Summary, lists the number of stakeholders that participated in the various sessions of Workshop 1 or responded to the online survey hosted on the City's outreach website.

TABLE 2.1 — WORKSHOP 1 PARTICIPATION SUMMARY	
Session	Number of Participants
City & Government: 2:00 PM	12
Business Owners: 4:00 PM	8
Property Owners & Residents: 6:00 PM	26
Online Survey	56

Postcard mailer sent out to the local business community for the December 15, 2020 Visioning Workshop

Participants in the sessions identified the primary existing strength of the Plan Area to be its strong mix of uses. Poll results also indicated that the area could be improved if it was safer, featured more retail and attractive streetscaping. Respondents also expressed the desire for increased pedestrian and cyclist connectivity. Members of the public identified open space, retail, and town-center uses as uses that they would appreciate being added to the area, specifically a grocery store. Workshop and survey participants also selected preferred imagery for various potential uses within the Plan Area.

Using feedback from this first workshop and information gathered during the research process, the consultant team generated three framework concepts for the Plan Area.

2.4.2 Workshop 2: Framework Plan Concepts Review

2.4.4.1 Workshop Concept

The goal of the second workshop was to confirm the vision and solicit feedback on the three framework concepts for the Plan Area, in order to create the preferred land use framework plan. Participants were informed of the results of the first workshop and how the designs of the three framework alternatives were derived. A live online poll was conducted during the presentation to gather participant opinions. This poll was also available online in survey format on

the City’s outreach website. After each session’s presentation there was an opportunity for live questions and answers, both verbally and via chat.

2.4.4.2 Workshop Results

Table 2.2 — Workshop 2 Participation Summary, lists the number of stakeholders that participated in the various sessions of Workshop 2 or responded to the online survey hosted on the City’s outreach website.

TABLE 2.2 — WORKSHOP 2 PARTICIPATION SUMMARY	
Session	Number of Participants
City & Government: 2:00 PM	8
Business Owners: 4:00 PM	10
Property Owners & Residents: 6:00 PM	18
Online Survey	33

Participants identified a preference for Framework Plan 3, which featured a Main

Street focus as well as district-wide aesthetic improvements and increased pedestrian and cyclist connections. The preference for a new retail core within the Plan Area was also expressed.

2.4.3 Online Self-Guided Outreach Survey

In January 2022, a narrated video presentation was uploaded to the TCSP project website. This presentation contained information regarding updates to the Specific Plan effort narrated by the consultant team. Participants could watch the video presentation and complete a survey regarding the efforts to date, responding to

multiple choice and open-ended questions based on the contents of the presentation. This survey was opened for a period of 17 days beginning on January 11, 2022 and ending on January 27, 2022.

A summary of participation for the online self-guided outreach is found below in *Table 2.3 — Self-Guided Presentation Participation Summary*.

TABLE 2.3 — SELF-GUIDED PRESENTATION PARTICIPATION SUMMARY

PLAN ELEMENTS

3.1 Purpose and Intent

This Chapter contains a discussion of the various plan elements for the TCSP, including the following:

- Specific Plan Objectives
- Land Use Districts
- Open Space Framework
- Circulation and Mobility Plan
- Infrastructure Plan

Each element works in tandem with the other plan parts to establish a framework that ensures The Plan fosters high-quality development and a reimagined urban fabric for the TCSP area.

3.2 Specific Plan Objectives

Based on the vision established during the outreach process, This Plan aims to create a new collection of mixed-use, residential, commercial, and industrial neighborhoods while allowing existing businesses to continue and preserving existing, single-unit residential neighborhoods.

The TCSP is designed to implement a series of realistic and achievable project objectives that implement applicable City of Stanton General Plan goals and policies and ensure that the Plan Area develops as a high-quality mixed-use neighborhood. These objectives are as follows:

1. Preserve existing residential neighborhoods and create a vibrant, pedestrian friendly environment.
2. Maintain existing businesses while encouraging a broader mix of uses and encouraging the revitalization of existing industrial uses.
3. Improve existing streetscape and landscape.
4. Provide for more locally-serving retail and commercial developments.
5. Abandon alleys throughout the Plan Area when feasible and larger development is proposed.
6. Create a true “Main Street.”
7. Link the Specific Plan area to other districts.
8. Create design guidelines for streetscape, open space, architecture, landscape, and public improvements.
9. Reduce vehicle trips and trip duration by encouraging efficiency between trip origin and trip destination.
10. Reduce greenhouse gas (GHG) emissions and pollution through zoning changes that would reduce reliance on motorized vehicles and support active transportation modes.
11. Ensure adequate and efficient infrastructure to support existing and future development.
12. Encourage economic development and incentivize investing in infill development.

3.3 Land Use Districts

The TCSP is the zoning for the Plan Area and implements a framework for land uses and redevelopment.

Four land use districts are identified for the approximately 156.9-acre Plan Area, as depicted on *Exhibit 3.1 – Planning Areas and Plan Elements*: Town Center Mixed-Use, Town Center Industrial, Town Center Residential, and Retail-Oriented Mixed-Use. The implementation of land use districts allows for a targeted application of the community vision established during the outreach process by tailoring land uses and development regulations to particular locations within the Plan Area. Parks illustrated in *Exhibit 3.1 – Planning Areas and Plan Elements* are for illustrative purposes only. Beach Boulevard Park is zoned as Retail-Oriented Mixed-Use and Eastern Neighborhood Park is zoned Town Center Mixed-Use.

Design Guidelines specifying architectural character and form are found in *Chapter 4, Design Guidelines*. Development Regulations specific to each land use district are found in *Chapter 5, Development Regulations*.

3.3.1 Town Center Mixed-Use

The intent of the Town Center Mixed-Use (TCMU) land use district is to increase housing stock and land use diversity within the Plan Area, and encourage residential development within walking distance of retail core areas and maximize access to multi-modal transit opportunities within the Plan Area. The TCMU district allows for a blend of standalone residential, commercial, and mixed-use development to occur.

Within the TCMU district, the Plan envisions future medium- and higher-density residential development that, while not required, is encouraged to include a retail component in its design.

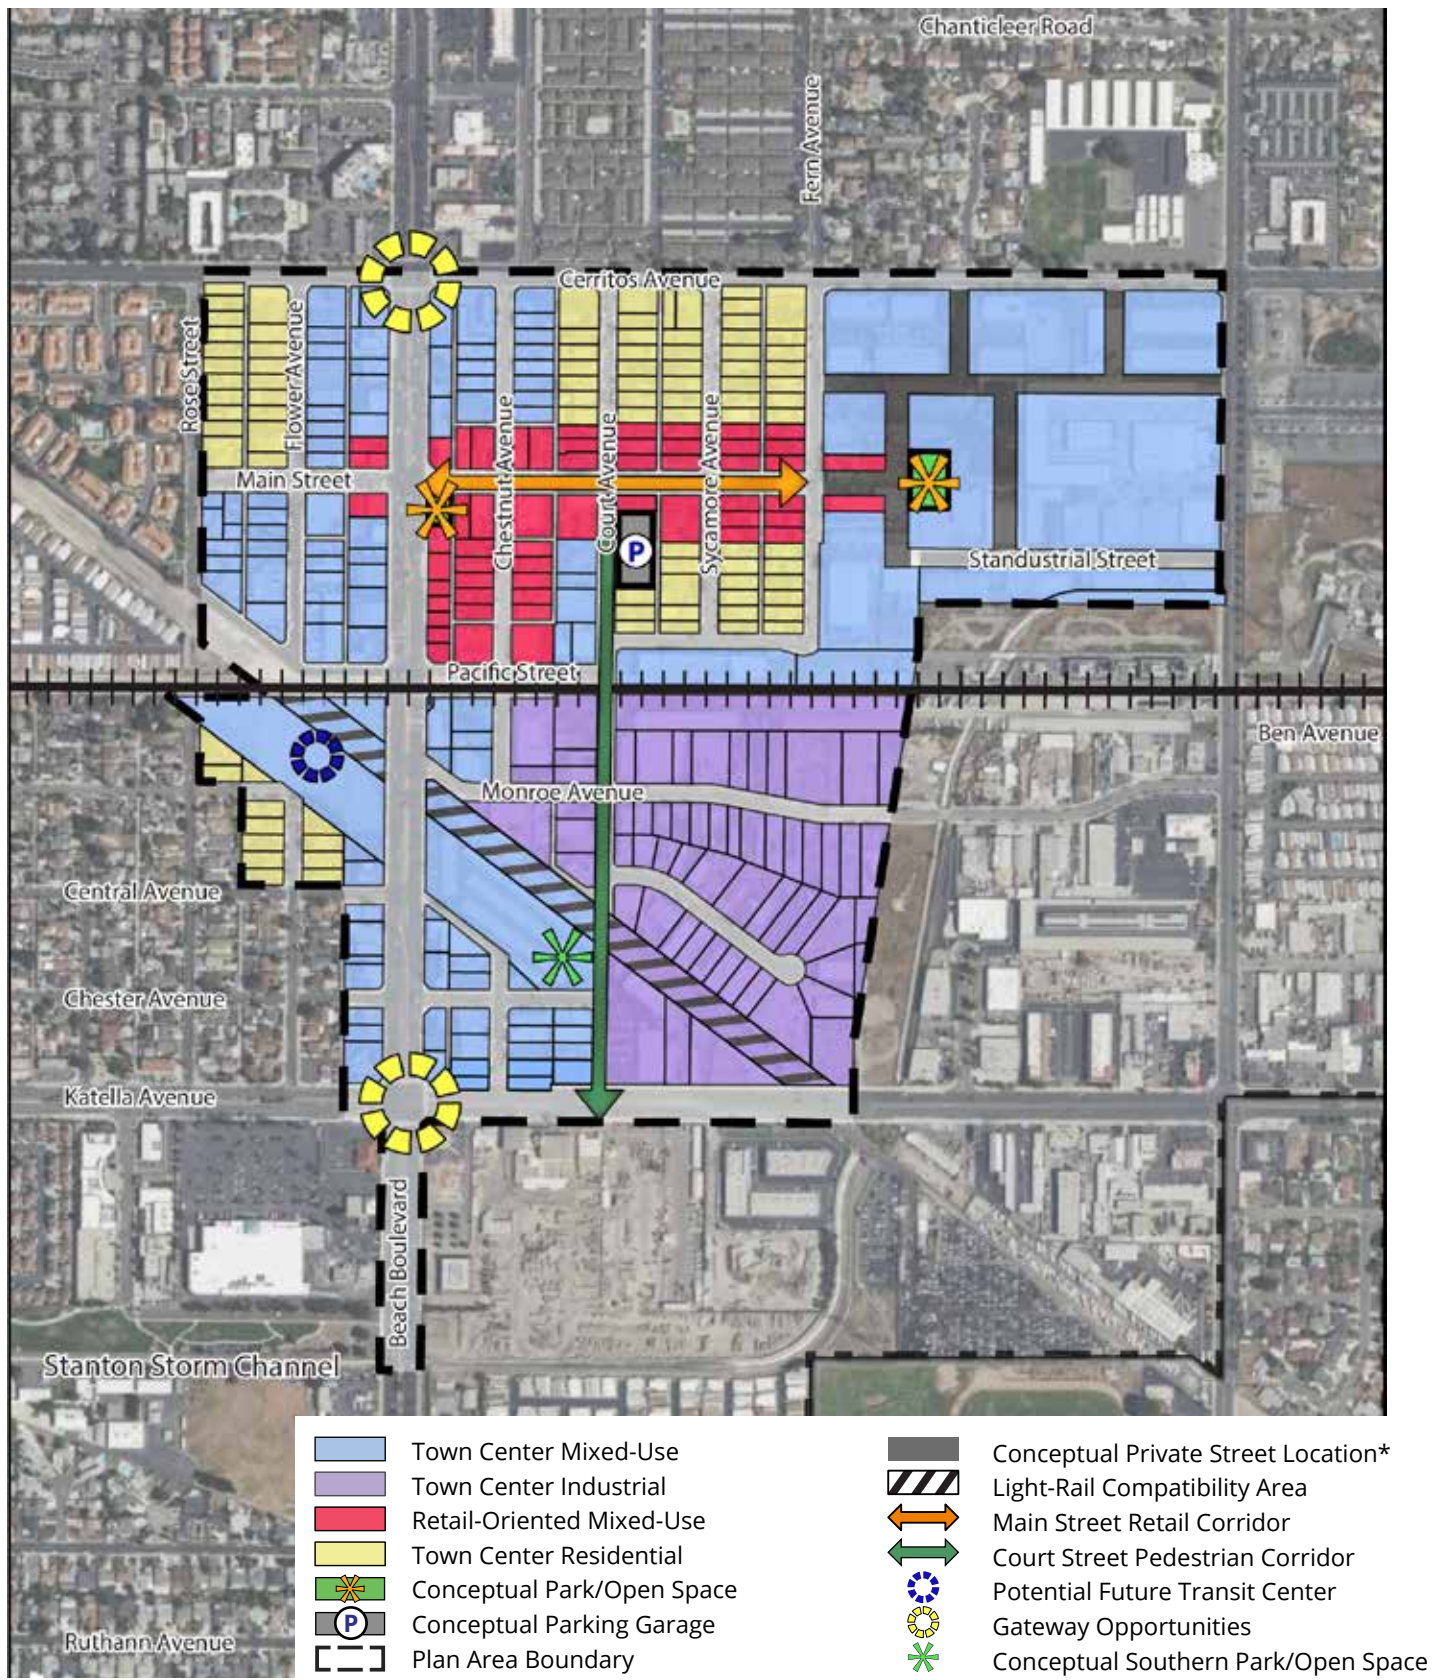

3.3.2 Town Center Industrial

The intent of the Town Center Industrial (TCI) land use district is to allow existing industrial businesses to continue, while facilitating new research and development and light-industrial uses that are compatible with neighboring residential uses. Residential uses are not permitted within this district. In addition to industrial uses, other compatible commercial uses that may retain an industrial or artistic character, such as artisanal manufacturing and sales, distilleries, breweries, commercial cannabis uses, and tasting rooms, to occur.

3.3.3 Retail-Oriented Mixed-Use

The intent of the Retail-Oriented Mixed-Use (ROMU) land use district is to encourage retail and mixed-use development in areas with a high degree of exposure to vehicular and anticipated pedestrian traffic. The ROMU district occurs primarily along Beach Boulevard and Main Street within the Plan Area.

To encourage and facilitate the creation of a true “town center,” any future mixed-use development within the ROMU district is required to include ground floor commercial uses per requirements detailed in *Chapter 5*.

*Locations are subject to change and do not require an Amendment

Exhibit 3.1 — Land Use Districts and Plan Elements

N.T.S. | Source: Google Earth ⓘ

3.3.4 Town Center Residential

Neighborhoods within the Town Center Residential land use district are designated to preserve the residential character of this district. Land uses within this area will be restricted to those uses currently allowed in the City’s residential zoning designation, and development standards will preserve the residential character of the neighborhood.

3.3.5 Allowable Development

Land uses within the TCSP are limited by maximum intensity. Residential uses within the Plan Area are limited by overall base dwelling units per acre. Non-residential uses, such as industrial or commercial uses, are limited by floor area ratio (FAR).

Residential development may occur at a density of as low as 8 units per acre and up to 70 units per acre, depending on the development tier used. Standalone non-residential uses are allowed to occur at a floor area ratio (FAR) of up to 1.5. Within a mixed-use development containing both residential and non-residential uses, the residential portion of development may occur at a density of up to 70 units per acre. Within a mixed-use development, non-residential uses may occur at a FAR of up to 1.0.

Table 3.1 — Land Use District Acreages, depicts the acreage of each land use district within the Plan Area.

TABLE 3.1 — LAND USE DISTRICT ACREAGES	
<i>Land Use District</i>	<i>Acreage</i>
Town Center Mixed-Use	60.7 Acres
Town Center Industrial	25.5 Acres
Retail-Oriented Mixed-Use	13.4 Acres
Town Center Residential	13.9 Acres

3.4 Open Space Framework

3.4.1 Open Space Concept

The TCSP area currently does not include dedicated public open space. The intent of the TCSP open space framework is to locate open space throughout the Plan Area to maximize access to recreation opportunities. *Exhibit 3.1, Land Use Districts and Plan Elements*, depicts three potential open space locations within the Plan Area that are anticipated to function as the primary public open spaces within the Plan Area. Thresholds for in-lieu fees will be the same as listed in Section 19.42 of the Stanton Municipal Code.

An enhanced pedestrian connection is envisioned along Court Street, which would help connect the open spaces at the northern and southern ends of the Plan Area. The three primary open space features within the Plan Area are described below. These parks are only required for Tier 2 and 3 developments.

3.4.2 Beach Boulevard Plaza

The Beach Boulevard Plaza is envisioned to be a gathering place for public and private events, public gatherings, musical performances, and passive recreation. The plaza may include elements such as public art, landscape features, outdoor seating and dining areas, fountains, outdoor amphitheaters, and/or small retail uses within the plaza such as a coffee stand or cafe. The location of the plaza along Beach Boulevard offers a high degree of visibility and generates visual interest for the future mixed-use retail corridor along Main Street and also provides an opportunity for aesthetic enhancement along

Beach Boulevard. The plaza is intended to be located adjacent to retail uses that activate the open space by increasing pedestrian activity and incorporating activities such as outdoor dining.

3.4.3 Eastern Neighborhood Park

The eastern neighborhood park is envisioned to be a large landscaped open space area that provides access to outdoor amenities and active recreation opportunities within a walkable distance to residents within the Plan Area. The eastern neighborhood park is located at the physical and visual terminus of Main Street.

The park is anticipated to be approximately one acre in size and may include amenities such as public art, a playground/tot lot, open spaces for active recreation and exercise, outdoor pedestrian furniture and dining areas, small sport courts, and outdoor gathering spaces such as small plazas or amphitheaters.

Inspirational Image for Eastern Neighborhood Park

3.4.4 Southern Pocket Park

The southern pocket park is depicted in a conceptual location on *Exhibit 3.1, Land Use Districts and Plan Elements*, near the intersection of Chester and Chestnut Avenues. This small open space is envisioned to provide amenities such as a playground/tot lot, open spaces for exercise and/or passive activities, and pedestrian furniture.

3.4.5 Open Space Components

The precise size and location of open spaces envisioned by the open space framework is conceptual and subject to change as redevelopment occurs over time.

The execution of these open spaces requires property owner cooperation and lot consolidation in order to create meaningful public open spaces that function as the hubs and anchors of activity within the Plan Area. The precise location and size of these open spaces is flexible, but should fulfill the vision and intent of the open space framework as described within this section and meet the minimum requirements identified in *Section 5.5, Development Regulations* of this Specific Plan.

3.5 Circulation and Mobility Plan

The TCSP is planned as a mixed-use neighborhood that blends existing uses with new mixed-use development, maximizes access to existing transit opportunities, and includes a robust pedestrian and bicycle transportation network. The Plan also incorporates conceptual future transit opportunities into its design, while ensuring that the success of the multi-modal network does not depend on the completion or final details of potential future transit opportunities. A number of the Specific Plan objectives relate to circulation and mobility, including:

- Reduce vehicle trips and trip duration by encouraging efficiency between trip origin and trip destination.
- Reduce greenhouse gas (GHG) emissions and pollution through zoning changes that would reduce reliance on motorized vehicles and support active transportation modes.
- Ensure adequate and efficient infrastructure to support existing and future development.

To accomplish these objectives, the TCSP incorporates a “complete streets” approach that prioritizes creation of a true multi-modal transportation system and that creates new connections throughout the Plan Area, as described below and depicted on *Exhibit 3.1, Land Use Districts and Plan Elements*.

3.5.1 Existing Circulation Infrastructure

The Plan Area utilizes existing circulation infrastructure to facilitate multi-modal movement throughout the district. The Plan Area is served by OCTA Routes 29, 50, and 529, as depicted on *Exhibit 2.5, Opportunities and Challenges*. Street widths and sections for the streets within the TCSP are depicted on *Exhibits 3.3A and 3.3B, Street Sections*. Arterials and streets within the Plan Area are described in *Table 3.2, Street Sections*.

3.5.2 Circulation Enhancements

Circulation enhancements are included throughout the Plan Area to facilitate multi-modal connectivity and increase pedestrian safety, as depicted on *Exhibit 3.2, Circulation Plan*.

New roads are included in the northeastern portion of the Plan Area. These roads are conceptually located, but are intended to serve implementing developments and the future park within this portion of the Plan Area.

Intersection improvements are identified at the following four intersections:

- Beach Boulevard and Main Street
- Beach Boulevard and Pacific Street
- Cerritos Avenue and a future street
- Dale Street and a future street

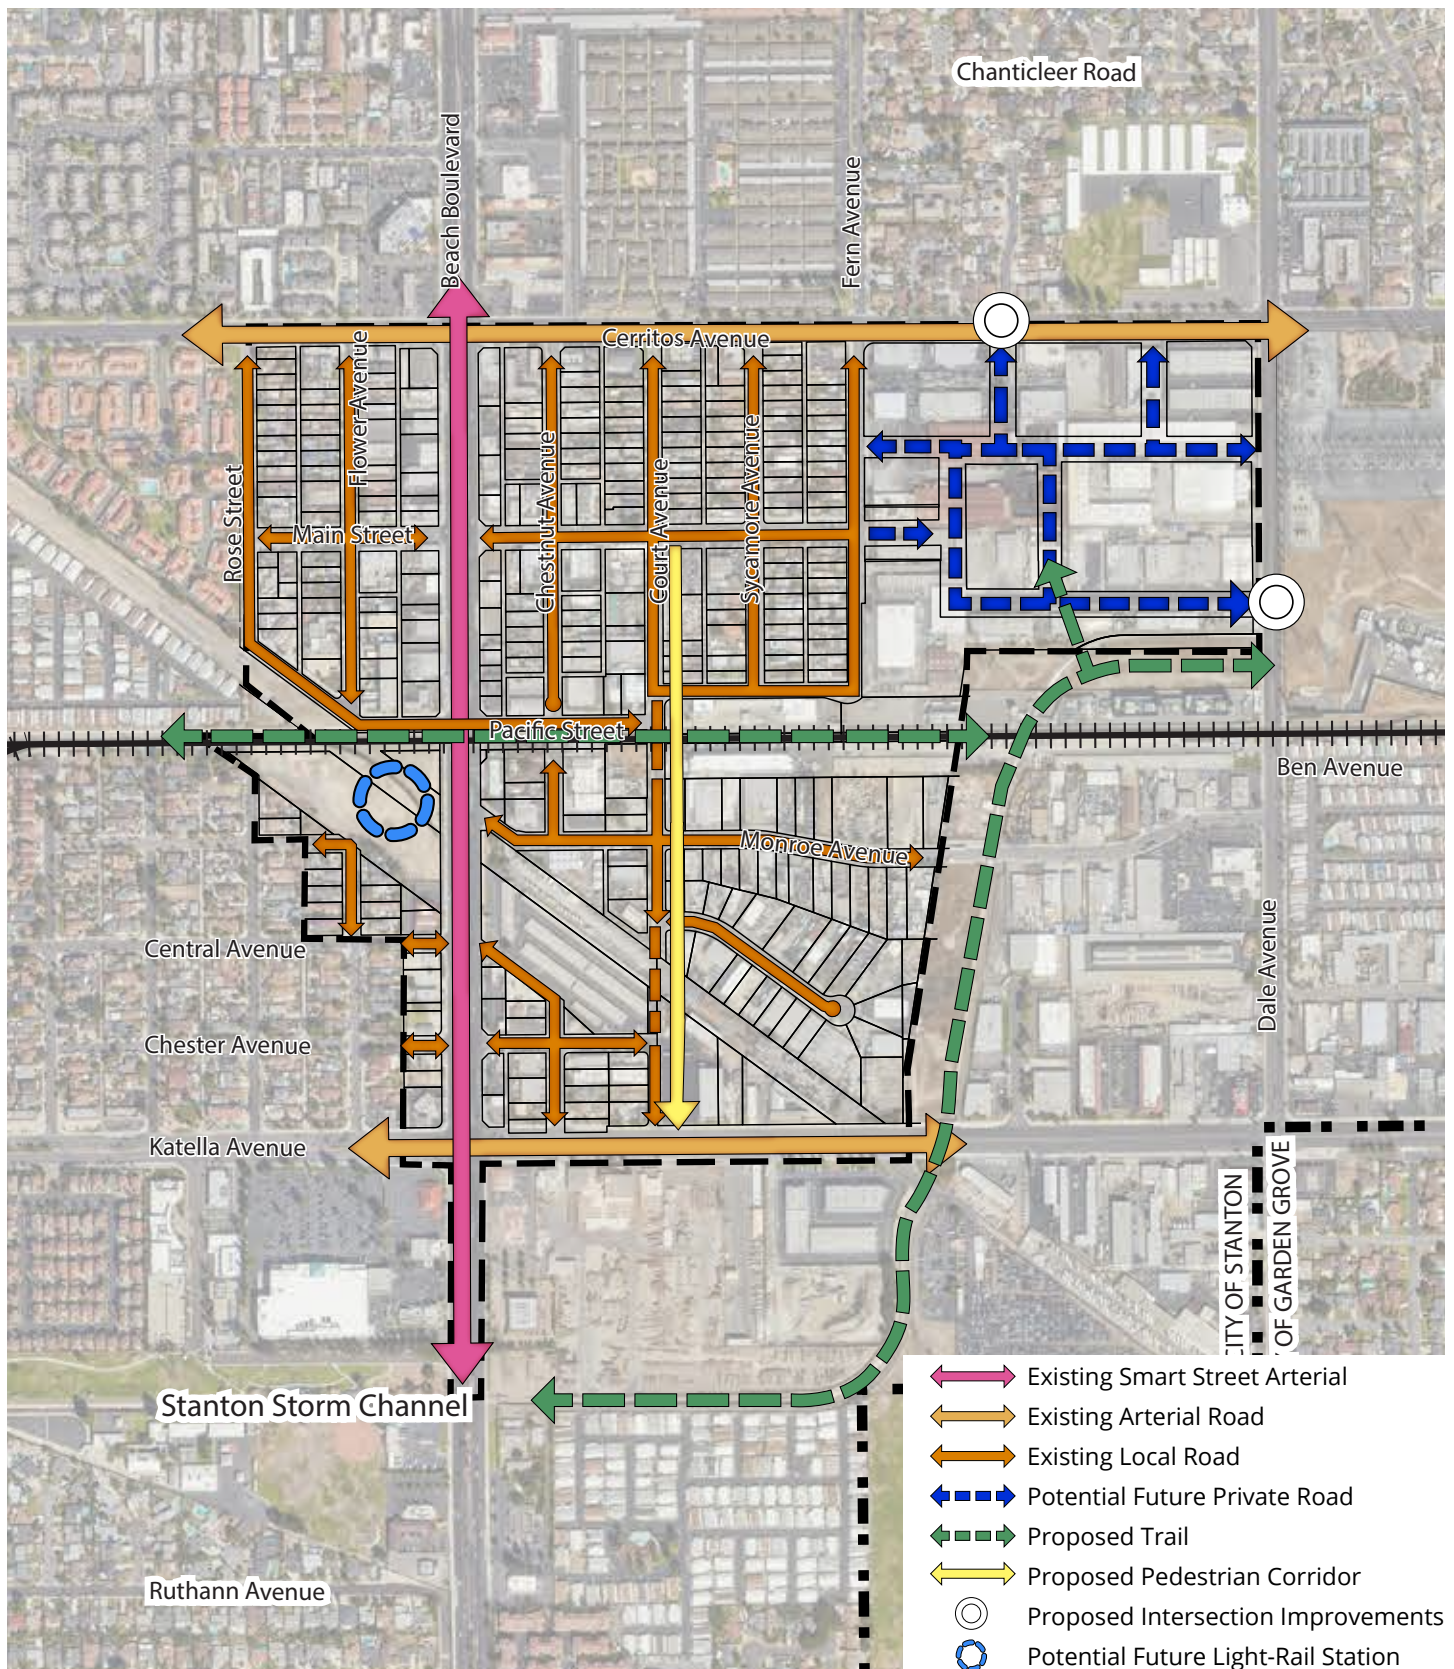

Intersection improvements enhancements include design features that may include, but are not limited to, the following features:

- Pavement enhancements such as textured and/or colored concrete or pavers
- Pedestrian bulb-out crossings to increase pedestrian visibility
- New crossings for pedestrians and bicyclists

A potential future trail is depicted along the existing east-west rail corridor traversing the Plan Area. This potential future trail is to connect to another potential trail along the Stanton Storm Channel, which would also provide connectivity to the northeastern portion of the project site as depicted on *Exhibit 3.2, Circulation Plan*.

TABLE 3.2 — STREET SECTIONS

Street Name	Overall ROW Width	Curb-to-Curb Width	Parkway and Sidewalk Width	Number of Travel Lanes	Center Median	On-Street Parking
Beach Boulevard	132'	110'	11'	8	Yes	No
Katella Avenue	120'	93.5'	13-13.5'	6	Yes	No
Cerritos Avenue	80'	64'	8'	4	Yes	No
Main Street	80'	56'	12'	2	No	Yes
Typical Street	60'	36'	12'	2	No	Yes
Typical Alley	15'	15'	0'	2	No	No

Exhibit 3.2 — Circulation Plan

Beach Boulevard

Katella Avenue

Main Street

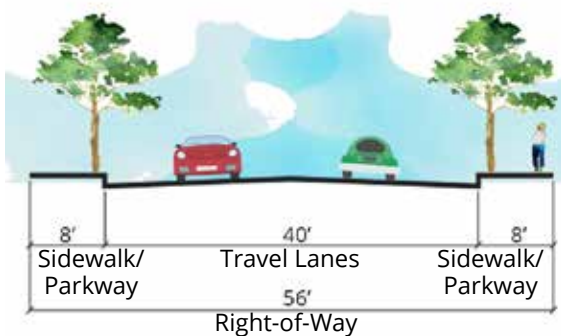

Note: any modifications to Beach Boulevard are subject to Caltrans approval.

Typical Street: Chestnut Avenue, Court Avenue, Sycamore Avenue, Fern Street

Private Street

Alley

Court Avenue is envisioned to include additional pedestrian enhancements, including a future connection across the east-west rail corridor.

The pedestrian-focused enhancements along Court Avenue run from Katella Avenue north to Main Street, increasing connectivity between the southern and northern portions of the Plan Area.

Additionally, a potential future transit station is identified on the OCTA property located along Beach Boulevard. This transit center could connect users of a potential future light-rail along the former Pacific Electric rail corridor to the multi-modal network within the Plan Area.

3.5.3 Alley Vacations

In an effort to facilitate the redevelopment of the commercial and industrial areas within the Plan area, this Specific Plan encourages the vacation and reuse of alleys within the areas identified in *Exhibit 3.4, Alley Vacations*. Once vacated, alleys may be built upon or repurposed for another use such as outdoor dining. Alley vacations will only be allowed for larger development and where feasible. Other properties shall not be affected by vacating alleys. All alley vacations shall adhere to the following:

- All utilities within the alley shall be rerouted or an easement benefiting the public utility shall be recorded, subject to the satisfaction of the public utility company.
- If an alley is to be partially vacated, adequate vehicular access and circulation shall be provided to the properties needing access via the alley, subject to review and approval of the Public Works Department. At the time of the vacation request, properties not accessing the alley

do not need to maintain access to the alley (i.e. obstructed by a solid wall).

- Financial agreements shall be entered into between the City and applicant to facilitate the alley vacation.

3.5.4 Streetscaping Enhancements

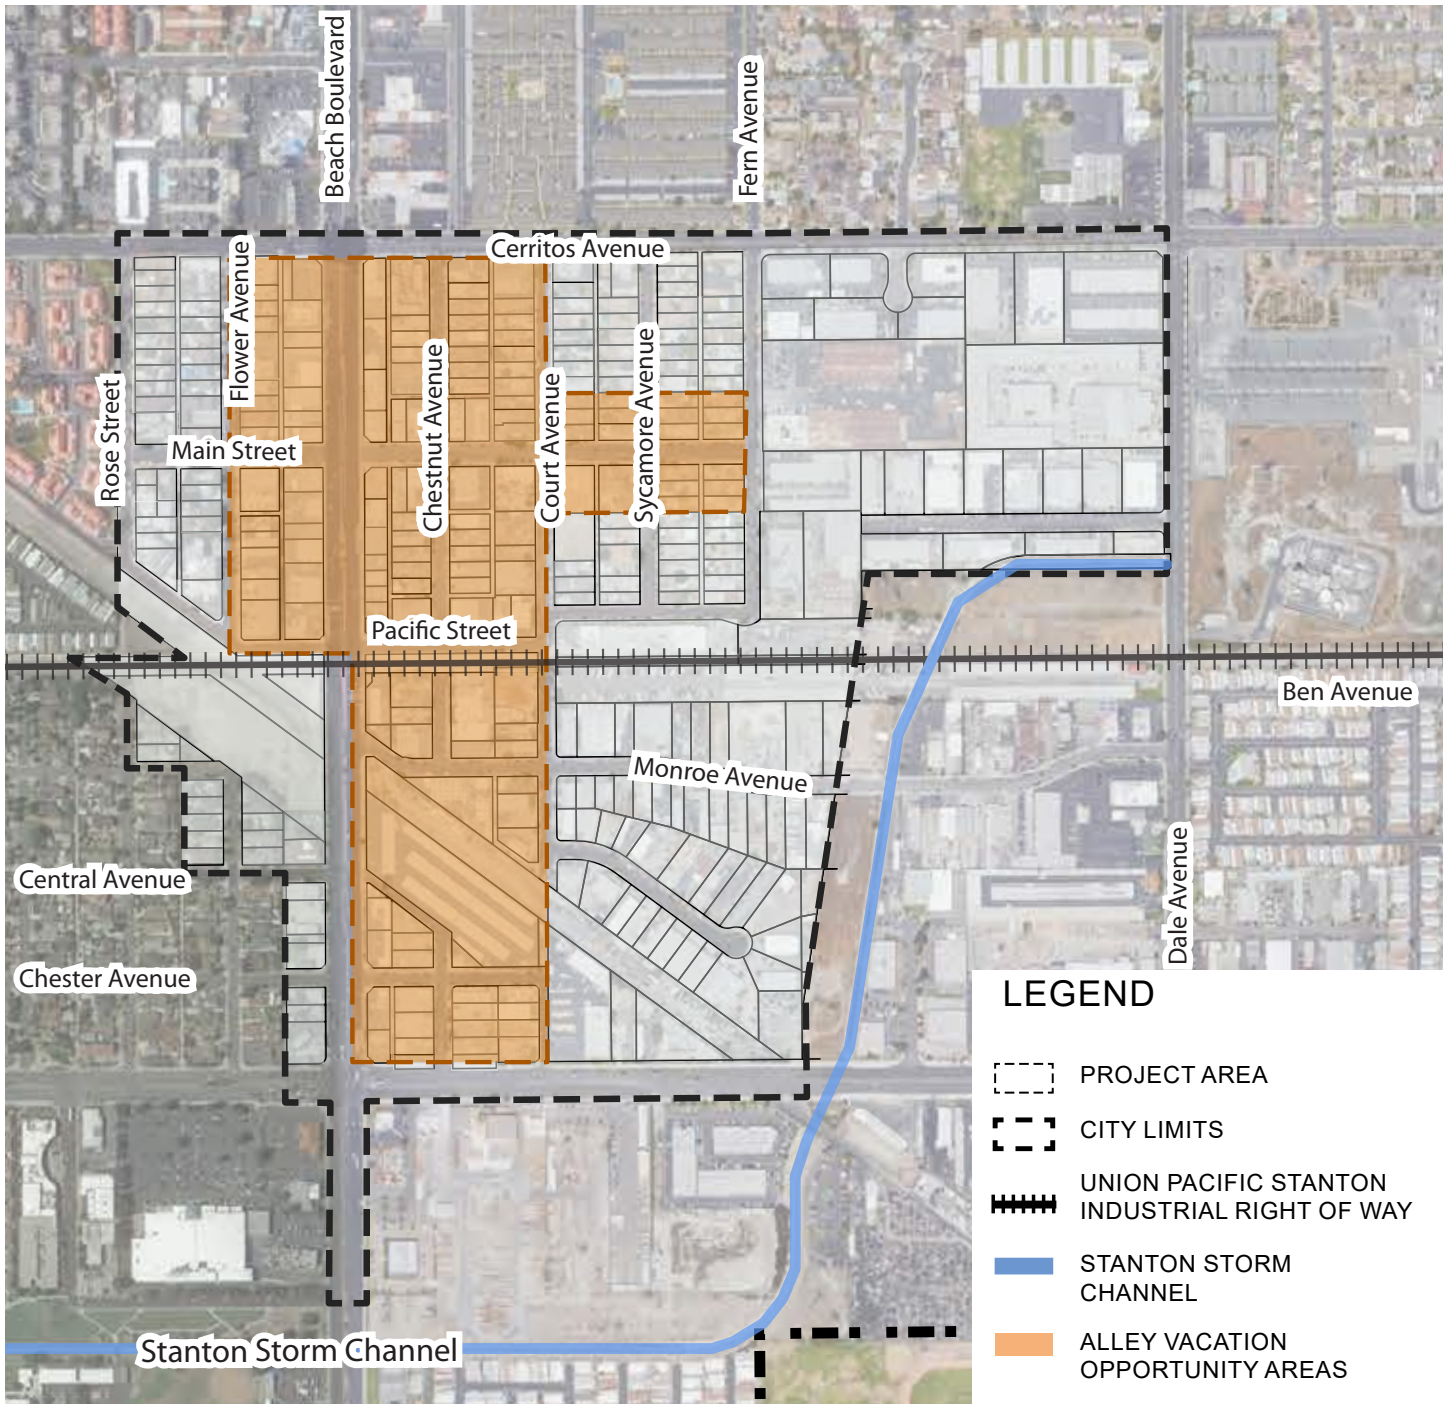

The TCSP includes a number of streetscaping enhancements intended to enhance aesthetic character of the Plan Area, improve multi-modal transportation, and foster a cohesive sense of place throughout the Plan area. These streetscaping enhancements are described in the following sections.

3.5.4.1 Streetscaping Concept

The TCSP envisions a streetscaping concept that implements various enhancements that establish the Plan Area's unique identity. The character of streetscaping elements should be modern, refined, and minimalist while maintaining functionality. Streetscaping character is further described in *Section 4.3, Streetscaping Design Guidelines*.

3.5.4.2 Distribution and Selection of Streetscaping Elements

Streetscaping elements should be distributed throughout the Plan Area to foster a cohesive identity; however, streetscaping elements should occur more frequently near areas of high vehicular and pedestrian exposure, such as at major intersections, along Beach Boulevard, along Main Street, and near high-activity commercial centers or large mixed-use developments.

Streetscaping elements should be selected to correspond to the land use of the parcels they are adjacent to. Within residential areas, streetscaping elements should focus primarily on aesthetic, pedestrian-oriented, and mobility enhancements.

Within commercial and mixed-use areas, streetscaping elements should provide aesthetic, pedestrian-oriented, mobility, and synergistic enhancements.

Within industrial areas, streetscaping elements should focus primarily on aesthetic and pedestrian-oriented streetscaping enhancements.

Beach Boulevard Improvements

Beach Boulevard is a high-volume Smart Street traversing the TCSP area. Improvements to Beach Boulevard shall include aesthetic enhancement as well as physical improvements that increase safety and improve multi-modal access throughout the corridor. Short-term initial improvements to Beach Boulevard may be made that incur relatively low cost and yield meaningful benefits. Examples of such short-term enhancements include, but are not limited to:

- Longer crosswalk times at existing intersections.
- Pedestrian crossings that utilize enhanced striping and design features to improve aesthetics and increase driver awareness of pedestrian zones.
- Other traffic calming solutions, as applicable.
- Landscaping improvements in existing medians and planters along Beach Boulevard.

Long term improvements to Beach Boulevard that may incur greater costs, but improve the aesthetic and mobility features of the corridor include, but are not limited to:

- Introduction of new at-grade signalized pedestrian crossings across Beach Boulevard located at Main Street and Pacific Street.
- Thematic vehicular- and pedestrian-scale lighting elements, such as streetlights and bollards.
- Beach Boulevard will be improved, allowing for the following improvements to be made:
 - Street trees
 - Increased signage and light standards

Main Street Improvements

Main Street is envisioned as a walkable, pedestrian-oriented street within the Plan area. Streetscaping elements should be selected that are synergistic with walkable commercial uses and that encourage pedestrian movement through the corridor.

Enhancements to Main Street shown on the following page, include, but are not limited to:

- Enhanced striping at pedestrian crossings
- Pedestrian bulb-outs that reduce pedestrian crossing distances and improve aesthetics
- Widened sidewalks, where feasible

Existing Main Street

Crosswalks designate pedestrian areas in an intersection

Street trees and landscaping improve aesthetics.

Proposed Main Street Improvements

3.6 Infrastructure and Public Services

This section describes the existing infrastructure and the related improvements needed to facilitate the build-out of the Specific Plan area, as well as public services required to serve users within the Plan Area.

Table 3.3 — Service Providers, lists the various service providers for the Plan area operating services at the time this Plan was prepared. These providers may be subject to change.

The Plan area is served by storm drain systems, sanitary sewer conveyance systems, and wastewater treatment infrastructure owned, operated, and maintained by the City of Stanton. Water service is provided by Golden State Water, electrical service is provided by Southern California Edison, and gas service is provided by Southern California Gas. Sewer and stormdrains within the Plan area are depicted on *Exhibit 3.6 - Stormwater Drainage and Sanitary Sewer*.

TABLE 3.3 — SERVICE PROVIDERS	
Service	Current Provider
Water	Golden State Water Company
Wastewater	City of Stanton
Storm Drainage	City of Stanton
Electric Service	Southern California Edison
Natural Gas Service	Southern California Gas
Law Enforcement	Orange County Sheriff
Fire Protection	Orange County Fire Authority
Waste and Recycling Collection	CR&R Environmental Services
School Services	Savanna School District Cypress School District Anaheim Union High School District
Library Services	Orange County Public Libraries

3.6.1 Water Supply

Water service to the Specific Plan area is provided by the Golden State Water Company (GSWC), a private water purveyor. GSWC owns and operates the system, which serves cities within west Orange County.

In order to meet demand, GSWC supplies its customers with imported water from the Metropolitan Water District of Southern California and groundwater from the Orange County basin. The City’s existing water distribution system serving the TCSP area is composed different sized pipelines including 4-, 6-, 8-, 10-, 12-, and 16-inch diameter pipelines.

Source: City of Stanton | N.T.S.

Exhibit 3.6 - Stormwater Drainage and Sanitary Sewer

Much of the area within the Specific Plan is served by looping 6- and 8-inch pipelines that may not be capable of providing the required fire flow (as identified in the previous Specific Plan)

As specific developments are implemented, coordination with OCFA and GSWC and would be required to ensure infrastructure would provide adequate water capacity to serve the development.

3.6.2 Wastewater

The City of Stanton Public Works' Sewer Maintenance Division maintains and operates the local public sanitary sewer collection system. The City's wastewater collection system ultimately connects into Orange County Sanitation District (OC San) sewer system. OC San is a public agency that provides wastewater collection, treatment, and reuse/disposal services for approximately 2.6 million people in central and northwest Orange County.

Future development would be required to pay applicable sewerage connection fees and ensure sufficient capacity or planned expansions of wastewater infrastructure would accommodate anticipated wastewater.

3.6.3 Dry Utilities

Dry utilities within the Plan Area are provided as follows:

Telephone, Cable Television, and Internet

Spectrum and AT&T currently providing service to the Plan Area. Services would be provided in accordance with the provider's policies and extension rules on file with the California Public Utilities Commission (CPUC). Future developments within the TCSP area shall coordinate with the Spectrum and/or AT&T, as applicable to ensure avoidance of any notable service disruptions during the extension of, relocation of, upgrade of, or connection to services.

Electricity Service

Southern California Edison (SCE) currently provides electricity to the Plan area. Electrical service would be provided in accordance with SCE's policies and extension rules on file with the CPUC. Future developments are required to coordinate with SCE to ensure avoidance of any notable service disruptions during the extension, relocation, upgrade, or connection to services for future projects in the Plan area.

Natural Gas Service

The Southern California Gas Company (SoCalGas) currently provides natural gas service to the Plan Area. The service would be provided in accordance with SoCalGas' policies and extension rules on file with the CPUC. Future developing is required to coordinate with SoCalGas regarding future projects in the Plan area to ensure avoidance of any notable service disruptions during the extension of, relocation of, upgrade of, or connection to services.

3.6.4 Public Services

Public services within the Plan area are provided as follows:

Police Protection

Police protection services within the Plan Area are provided by the Orange County Sheriff Department (OCSD). The nearest station is located approximately one-quarter mile southwest of the Plan Area at 11100 Cedar Street Stanton, CA 90680.

OCSD is contracted by the City, therefore, the City would anticipate and increase the level of police service as-needed by the phased development of the Specific Plan.

Fire Protection

Fire protection services in the City are provided by the Orange County Fire Authority (OCFA) Division 7, which maintains and operates five stations that serve the City. Station No. 46 is located within the Plan area at 7871 Pacific Street.

The City takes responsibility to ensure funding is available to maintain emergency infrastructure.

Waste and Recycling Collection

Waste and recycling services within the Plan area are performed by CR&R Environmental Services. Future developing is required to coordinate with CR&R regarding to ensure adequate service capacity exists to serve the future developments.

School Services

The Plan area is served by Anaheim Union High School District, Magnolia School District, and Savanna School District. Future project-specific development would be required to pay school development fees to the relevant school district(s) for the improvement of school facilities.

Library Services

Library service to the Plan area is provided by the Orange County Public Libraries. The Orange County Stanton Branch Library is located one-quarter mile southwest of the Plan Area at 7850 Katella Avenue and is the closest library facility to future residents within the Plan area.

3.6.5 Remaining Service Capacity

Future development occurring within the Town Center Specific Plan Area is not anticipated to cause any utility or public service provider to exceed its capacity to adequately deliver services.

Future projects shall be evaluated on a case-by-case basis to ensure that service capacities continue to be met. Where necessary, these services shall be expanded at the fair-share cost to the developer.

4

DESIGN GUIDELINES

4.1 Introduction

This Chapter provides the design framework for landscape, streetscape, building architecture and overall character envisioned for the Town Center Specific Plan area. These Design Guidelines provide inspiration, recommendations, criteria, and requirements for future development within the Plan area to:

- Promote a walkable and livable environment.
- Develop a strategy for providing open space amenities.
- Promote state-of-the-art green building practices.
- Transform the Plan area into a mixed-use district with increased housing density and transit supportive uses.

The purpose of the design guidelines is to provide guidance to builders and their design professionals, city staff, and decision makers when designing and approving future development proposals within the Plan area.

These guidelines provide general directions on implementing the vision and fundamental concepts established by the Specific Plan. The guidelines are not a set of rigid requirements and are not intended to unduly limit creative designs; rather, they are general and illustrative in nature to encourage innovation and variety. In addition to the regulations within this document, all residential and mixed-use developments shall comply with all applicable objective development standards established by the City of Stanton.

The strongest level of design intent is specified by the use of terms such as “must,” “shall” and “prohibited.” Preferred design items are designated as a condition which is “encouraged,” “preferred,” “recommended,” “appropriate,” or as one that “should” be included. Preferred design items are considered voluntary and need not be included in a proposed development.

These design guidelines are intended to be flexible in nature while establishing basic evaluation criteria for the review of future developments as part of the development review process. With the

exception of the guidelines indicated as “must,” “shall,” “prohibited,” or Objective Design Standards, these design guidelines are not regulatory only non-residential and mixed-use projects that are at least 34 percent non-residential shall conform to general consistency with the design guidelines. Residential or mixed-use projects that is at least 66 percent residential need to meet every objective standard within this Specific Plan. The city may find a development consistent with the purpose and intent of this Chapter without the proposal being consistent with each guideline, only for non-residential and mixed-use projects with more than 34 percent non-residential. Non-residential and mixed-use projects with more than 34 percent non-residential that do not adhere strictly to the guidelines but achieve the design intent and vision for the Specific Plan and meet the Development Regulations set forth in Chapter 5 may be deemed in substantial conformance with the Specific Plan. The Objective Design Standards in this chapter are interim until adopted by the city. Once adopted by the City of Stanton, the City-wide Objective Design Standards shall supersede the Objective Development Standards within this chapter.

4.1.1 Objective Design Standards

Objective Design Standards are minimum design requirements that apply to all multi-family residential and mixed-use development that are at least 66 percent residential in the Plan area.

As a result of Senate Bill (SB) 330 signed into law in 2019, multi-family residential and predominately residential mixed-use development projects meeting certain eligibility requirements are subject to specific review processes within the State of California.

Eligible projects will be reviewed according to standards that “involve no personal or subjective judgement by a public official and are uniformly verifiable by reference to an external and uniform benchmark or criterion available and knowable by both the development applicant and public official prior to submittal.”

Projects in the Plan area that are covered under SB 330 are subject to the Objective Design Standards within this Chapter. These projects are not required to comply with subjective design guidelines; however, the intent and application of subjective guidelines is encouraged to be implemented to the greatest extent feasible to ensure high-quality development that is consistent with the community identity of the Plan area.

All other non-qualifying residential development, commercial, industrial, and mixed-use development with less than 66 percent residential is required to comply with the design guidelines as described in *Section 4.1*. This includes landscaping standards such as:

- a. Trees shall be planted along streets and in parking lots.
- b. Drought-tolerant plant materials and water-efficient irrigation controllers shall be utilized where feasible.
- c. New development shall comply with Model Water Efficient Landscape Ordinance (MWELO) and SMC Section 20.315.050, Irrigation Plans and Water Conservation Standards.
- d. Landscape shall not obstruct circulation or view clearances for safety.

Enhance the streetscape and open space network, and provide housing opportunities within the Plan area.

Transform the character of the existing Plan area by adding features such as gateway monumentation and landscape focal elements.

Walkable, community-focused open space was revealed as a stakeholder priority during the outreach process.

4.2 Key Project Design Concepts

Community outreach conducted for the Plan area indicated stakeholder priorities that generated key design concepts of the Specific Plan. These key elements work in tandem to achieve the goals outlined during the outreach process and are described below.

4.2.1 Utilize and Transform the Existing Character of the Plan area

The existing Plan area includes a variety of land use types such as residential neighborhoods, industrial districts, and a commercial corridor along Beach Boulevard. The Plan utilizes the existing character of these land use districts as a baseline for redevelopment, and transforms and elevates their urban character to achieve the community vision of a mixed-use district that features pedestrian-friendly amenities.

4.2.2 Implement an Open Space Framework

Stakeholder feedback during the outreach process revealed a lack of outdoor recreational amenities in the Plan area. The vision of a walkable mixed-use district includes easily accessible open spaces that provide a variety of forms of active and passive recreation for all ages. The Specific Plan responds to the stakeholder feedback with an open space framework that includes a series of open space amenities distributed throughout the Plan area to address this need. These open space amenities vary in size, location, and programming.

4.2.3 Revitalize Main Street Retail Corridor

Stanton's Main Street historically served as a significant commercial center for the City. Stakeholders expressed the explicit desire for access to a wider variety of retail opportunities within the Plan area and identified Main Street as a desirable location for these uses to occur. Revitalizing Main Street as a commercial corridor is consistent with the "town center" mixed-use district concept envisioned for the Plan area. Main Street is intended to function as the heart of the Plan area.

4.2.4 Provide Gateway Features

Beach Boulevard bisects the Plan area and intersects two major arterials at the Plan area boundary: Katella Avenue and Cerritos Avenue. These two heavily traveled intersections provide an opportunity to establish the identity and "sense of place" for the mixed-use district at its entries at Katella Avenue and Cerritos Avenue.

Visually distinguishing the Plan area with gateway features fosters a sense of arrival and can create interest that draws traffic off the street and into the Plan area. Site-specific signage, monumentation, public art, and landmark architectural features may be utilized to create gateway features.

4.2.5 Enhance Pedestrian Safety and Lighting

Well-lit spaces that ensure pedestrian safety is critical to encouraging walking within the Plan area. Stakeholders expressed an interest in measures that could be taken to make walking through the Plan area safer, especially at night.

Pedestrian-oriented retail streetscene.

Public art can function as a gateway element.

Identity feature functioning as a gateway element.

Attractive streetscape character features landscaping and pedestrian amenities.

4.3 Streetscape Design Guidelines

Streetscape includes objects and landscaping within the public right-of-way, typically within street medians and upon sidewalks. This includes trees, parkway landscaping, street furniture, lighting, and utility equipment.

The Plan implements streetscape design guidelines that contribute to the character and identity for the Plan area identified during the stakeholder outreach process, and specifies elements and street designs that minimize multi-modal conflicts to create safe, convenient circulation and access.

4.3.1 Streetscape Character

An attractive streetscape character affects the perception of an area for all modes of transportation. Landscaping and street furniture create interest to those driving by and provide buffering, shade, and seating to pedestrians and cyclists.

A variety of street types exist in the Plan area, ranging from local access roads to major arterials. The Plan envisions these streets be upgraded over time to provide continuous sidewalks, sharrows or bike lanes, and parkway strips with street trees on both sides of the street, where feasible. These elements create interest and improve the aesthetics of an area.

4.3.2 Streetscape Elements

Streetscape elements include various objects and plantings within public rights-of-way and includes elements such as landscaping, hardscaping, pedestrian furniture, public art, fountains, lighting, and other focal elements and identity features. Streetscape elements provide aesthetic enhancement, contribute to a positive pedestrian experience, and may be arranged to create functional spaces within the public realm. Streetscape elements should balance the aesthetic intent of the TCSP with the functional requirements of an active streetscape.

Examples of streetscape elements that are envisioned to foster a unique identity within the Plan area include, but are not limited to, the following:

Aesthetic Enhancements

Aesthetic enhancements improve the perception of a place and foster a cohesive identity within the Plan area. Aesthetic enhancements include, but are not limited to, the following

- Gateway features
- Tree grates
- Landscape plantings
- Street trees
- Vehicular and pedestrian lighting
- Enhanced paving materials
- Art features

Mobility streetscape elements provide wayfinding functionality while contributing to the identity of the Plan area.

Bike racks serve a functional purpose and can contribute to the desired identity of the Plan area.

Attractive streetscape with landscaping elements and street furniture that create an inviting pedestrian experience.

Bus shelters, benches, and trash receptacles that contribute to a consistent district-wide identity and theme.

Lighting and bench integrate function with creative designs.

Pedestrian-Oriented Enhancements

Pedestrian-oriented enhancements include streetscape features that are designed to improve the pedestrian experience along the street. These features should augment pedestrian safety, provide functionality, and offer spaces for respite. Pedestrian-oriented enhancements include, but are not limited to:

- Benches
- Street furniture
- Waste receptacles
- Sidewalks with increased widths
- Sidewalks with increased street setbacks
- Wayfinding pageantry

Mobility Enhancements

Mobility enhancements include streetscape features that are intended to increase the efficiency of multi-modal movement throughout the Plan area. Mobility enhancements include, but are not limited to, the following elements:

- Pedestrian and vehicular wayfinding signage
- Enhanced pedestrian crossings
- Additional pedestrian and cyclist crossings
- Short- and long-term bicycle parking

Synergistic Enhancements

Synergistic enhancements improve the vitality of an area by maximizing the interaction between the private and public realms. These enhancements offer spaces within the private realm that generate excitement and pedestrian activity and are visible from the public realm. Synergistic enhancements within the Plan area include, but are not limited to, the following:

- Plaza spaces
- Outdoor seating areas
- Outdoor dining areas
- Shaded areas and shade structures

Pedestrian-oriented enhancements featuring wider sidewalks and street furniture

Paved areas and landscaping buffers pedestrian areas. Thematic plantings add interest and foster district identity.

Mobility enhancements may feature bicycle parking that contributes to the overall character of the Plan area.

Synergistic enhancements, such as small plazas and art features, allow for activation of private realm spaces.

Fountains and art features enhance the aesthetic quality of the public realm.

To create an aesthetically pleasing and functional streetscape that foster a unique and consistent identity throughout the Plan area, guidelines for streetscape elements within the Plan area are as follows:

- e. Streetscape elements should provide aesthetic quality and function to the public realm.
- f. Streetscape elements should be distributed throughout the Plan area to create a consistent district-wide identity.
- g. Additional streetscape elements should be concentrated in high-traffic, high-visibility areas such as at major intersections or along Beach Boulevard.
- h. Unique street benches and outdoor dining areas are encouraged to integrate function with creative designs.
- i. Streetscape elements should reflect and strengthen Plan area identity.
- j. A clear path of travel shall be maintained in all sidewalks.

4.3.3 Streetscape Lighting

Lighting character shall be consistent throughout all land use districts to foster a consistent identity in the Plan area. Four types of lighting should be considered within the public rights-of-way:

- **Roadway lighting:** Lighting fixtures that illuminate vehicular areas
- **Pedestrian lighting:** Lighting that illuminates pedestrian areas such as sidewalks or trails
- **Accent Lighting:** Lighting that emphasizes landscape or architectural focal elements.
- **Decorative Lighting:** Lighting that provides visual interest to public spaces.

Streetscape lighting within public rights-of-way shall include, but not be limited to, the following elements:

- Street light fixtures consistent with the identity of the Plan area.
- Pedestrian-scaled light fixtures at 12' to 14' in height.
- Lower-height pedestrian light fixtures such as bollards or walkway lighting.
- Accent lighting that emphasizes signage, gateway features, and landscape and architectural focal points within the public rights-of-way.
- Decorative lights, such as outdoor string lights for ambience.

Pedestrian-scaled lighting fixture that provides space for affixing signage and is consistent with community theme.

Bollard lights function as pedestrian lighting elements.

Decorative lighting adds interest to a retail courtyard.

Contemporary lighting design that is compatible with the selected identity theme.

Lighting within the streetscape and public realm should contribute to nighttime aesthetics, increase safety and visibility for drivers and pedestrians, and minimize light pollution and impacts upon the night sky. Guidelines for streetscape lighting within the Plan area are as follows:

- a. All lighting types throughout the Plan area should be selected for compatibility with the selected landscape and architectural theme of the Plan area.
- b. Light fixtures should be designed and installed to minimize light pollution.
- c. All exterior lighting should minimize glare and light spill onto adjacent properties.
- d. Roadway lighting should thoroughly illuminate pedestrian crossings and paths.
- e. Roadway light fixtures shall allow for signage and custom pageantry to be attached.
- f. Accent and decorative lighting should be utilized in areas with high visibility to contribute to nighttime aesthetics.
- g. Pedestrian lighting should be utilized along sidewalks and trails within the Plan area and maximize pedestrian safety.
- h. Light fixtures should be energy efficient.

4.4 Open Space Framework Concept

A green network enhances the vitality and well-being of a community, and public gathering spaces heighten a sense of community and shared experience.

The open space network within the Plan area should promote non-vehicular travel and multi-modal connectivity as a primary feature. Whenever possible, indoor/outdoor spaces should be utilized. New plazas and public space are encouraged. Outdoor areas should serve as gathering spaces to meet the needs of new and existing residents, visitors, workers and businesses.

The proposed open space network consists of retail-oriented plaza spaces, semi-public open spaces, private open spaces, and a potential neighborhood park. These open spaces connect to create a green tapestry and network of interconnected open spaces for residents, workers, shoppers, and visitors to enjoy.

The proposed conceptual locations and sizes of major open space features within the Plan area are shown on *Exhibit 3.1*. These open spaces are described in the subsequent sections.

Pedestrian focused landscape corridor promotes multi-modal connectivity.

Implement an open space framework that enhances the pedestrian experience and provides visual interest.

Create interesting public plazas with access to commercial uses.

An outdoor amphitheater provides terraced seating and a space for community events.

Pedestrian-oriented retail experience adjacent to a public open space plaza.

Outdoor gathering space with recreational elements appropriate for adjacent retail uses.

4.4.1 Beach Boulevard Plaza

The retail-oriented plaza is intended to be a public pedestrian-oriented space that provides opportunities for dining, entertainment, arts, and events. The plaza is intended to be a community gathering space for the City of Stanton that maximizes the benefits of public spaces adjacent to retail areas. Plazas may host art installations, interactive art experiences, live music, and community exhibits. Guidelines for the retail-oriented plaza are as follows:

- a. Retail-oriented plaza space shall be fully accessible and maximize its visibility from Beach Boulevard.
- b. The plaza should provide flexible spaces that allow for a wide range of uses and events to occur.
- c. Plaza spaces should provide shaded areas for daytime use and lighting throughout to promote safe evening use.
- d. Landscape elements shall include trees, planter areas, and shrubs.
- e. Hardscaping elements and pedestrian amenities such as, but not limited to, wayfinding signage, outdoor seating, sculptures, bicycle racks, trash receptacles, and decorative lighting and should be included in the plaza design to generate interest.
- f. The retail-oriented plaza should be designed to maximize the benefits of adjacency to retail uses by including elements such as gathering spaces and outdoor dining.

4.4.2 Eastern Neighborhood Park

The eastern neighborhood park is intended to increase access to landscaped green areas, play features, and active and passive recreation within the Plan area. The park is conceptually located within the eastern portion of the Plan area, surrounded by predominantly Town Center Mixed-Use development, as depicted on *Exhibit 3.1*. The eastern community park also functions as the visual and physical terminus of the Main Street retail corridor. This park should function similarly to a traditional neighborhood park and include, but is not limited to, the following features:

- a. Landscaping and other physical elements, such as art, sculpture, or fountains, that visually anchor the eastern terminus of the Main Street retail corridor.
- b. An integration of natural landscape elements with the urban hardscape.
- c. Programmed areas that provide spaces for various forms of outdoor recreation, such as small sports-courts, outdoor kitchen areas, and outdoor seating or lounge areas.
- d. A variety of active recreation spaces for various age groups, such as a tot-lot that appeals to children and an exercise track that appeals to adults.
- e. Unprogrammed, flexible open spaces that provide the opportunity for a variety of forms of active and passive recreation to occur.
- f. Landscaping that provides shade as well as visual interest to an urban mixed-use neighborhood.

Neighborhood park adjacent to residential uses.

Children's play area provides outdoor recreation amenities for specific age groups.

Bench seating provides an opportunity for passive recreation.

Open space provides areas for passive and active recreation uses.

Open space provides a mix of landscape and hardscaped areas for flexible recreation uses.

4.4.3 Southern Pocket Park

The Southern Pocket Park is intended to provide access to active or passive recreation in the southern portion of the Plan area. The southern open space also serves as a logical terminus to the Court Street Pedestrian Corridor depicted on *Exhibit 3.1*.

The southern open space may be provided as a public park or a semi-public recreation amenity associated with a specific development in this area. The open space concept is flexible in design and programming, and will be refined as redevelopment occurs to address the specific needs of future development in the southerly portion of the Plan area.

- a. The southern open space shall function as a southerly node in the open space network and a terminus of the Court Street Pedestrian Corridor.
- b. The southern open space shall provide a mix of landscaped and hardscaped areas that are tailored to serve the development in the surrounding area.
- c. The southern open space shall include general programming elements to maximize the flexibility of this space.

4.4.4 Private Open Space

Private open space occurs throughout the Plan area as outdoor landscaping and recreational areas that are not intended for use by the general public. Private open space may be personal outdoor space (areas intended for use by a single household) or common outdoor space (shared areas intended for use by a single development or building and its users/residents). Private open space should be pedestrian oriented and provide a variety of amenities that make the spaces functional and enjoyable. These elements may include, but are not limited to, the following:

- a. Courtyards or rooftop decks that provide recreational amenities for residents, such as pools, outdoor kitchen and dining areas, dog runs, and fitness areas.
- b. Plazas, courtyards, and decks that maximize exposure to sunlight in outdoor spaces.
- c. Green roofs that provide planting areas for landscaping, space for passive outdoor recreation, lower cooling costs and reduce the impacts of the urban heat-island effect.

Courtyard areas within a private development provide amenitized outdoor recreation space.

Outdoor seating area within private common open space

4.4.5 Trails

There is no existing trail within the Plan area; however, multiple opportunities exist for future trails to be provided along the existing rail corridors that traverse the Plan area.

The following guidelines address the desired elements and characteristics of potential future trails within the Plan area:

- a. Trails should be a minimum of eight feet wide.
- b. Trails should be surfaced with either decomposed granite (DG) material or paving such as concrete or asphalt.
- c. Trails should prioritize connections between open spaces and activity nodes within the Plan area.
- d. Trails should be oriented to minimize inter-modal conflicts between pedestrians, cyclists, and vehicles.

Decomposed granite trail

4.5 Gateway Elements

The TCSP area is bisected by Beach Boulevard, which intersects with Cerritos Avenue and Katella Avenue at the Plan area's northern and southern boundaries, respectively. These high-volume, high-visibility intersections provide a unique opportunity to create identity statements and are identified on *Exhibit 3.1*.

Streetscape Gateway Elements

Streetscape gateway elements occur within the public rights-of-way. Streetscape gateway elements should include the character and design elements found in *Section 4.3, Streetscape Elements*, as well as create a pronounced identity statement at the two gateway locations. Streetscape gateway elements shall be designed as follows:

- a. Intersection corners shall include visual markers that feature district identity monumentation signage, enhanced landscaping areas, extensive use of decorative and accent lighting, and/or public art.
- b. Entry monumentation design and materials should be complementary of the Plan area's intended urban mixed-use character.
- c. Entry features and monumentation at intersections shall function as identity statements, and could include public art, fountains, or other design features that create a community landmark.
- d. Planting areas shall include flowering shade trees, accent plantings, and colorful groundcover at intersection corners and within medians.

- e. Intersections should utilize colorful paving and varying materials to highlight pedestrian crossings and intersection areas.

Private Realm Gateway Features

Parcels with 75' or greater of linear parcel frontage directly adjacent to a gateway intersection identified on *Exhibit 3.1* are subject to the additional guidelines below. Gateway features within the private realm provide an opportunity for additional Plan area identity elements that mark the entry into an area with a unique "sense of place."

Parcels subject to these guidelines shall implement a minimum of two of the following elements. These elements should provide identity statements that help establish the intended character of the Plan area:

- a. Public art at or near an intersection corner.
- b. Landscape architectural focal points, such as fountains, feature trees, or enhanced landscaping.
- c. Enhanced architectural features, such as additional fenestration or detailing that increases visual interest.
- d. Plazas or park space located at or near the street intersection.
- e. Monumentation and/or signage consistent with Plan area identity.

Large signage features create identity statements that announce entry into the Plan area.

Retail plaza with an art feature and tower element faces a prominent intersection, fostering a strong gateway statement.

Identity monumentation and linear landscaping elements create a strong gateway statement that is consistent with the desired modern aesthetic.

4.6 Landscape Design Guidelines

Landscaping contributes to the overall open space network of parks, plazas, paseos, gathering areas, and outdoor spaces that weave through the Plan area. Landscaping should provide visual interest, shade, and assist with air quality and stormwater treatment.

The following general guidelines apply to landscaping within the Plan area:

- a. Landscape design should promote the unique character and theme of the Plan area.
- b. Implement a landscape concept that is low-water use, well adapted to the environment, and enhanced with various planting materials and patterns that provide year-round color, depth, and visual interest.
- c. Enhance the public and private realms by providing a structured, pedestrian friendly streetscape, sidewalks, parks, amenity areas, and gathering spaces that facilitate walking and biking to local retail and entertainment uses.
- d. Landscape design should consider visibility to ensure natural surveillance.
- e. Landscape should contribute to wayfinding and sense of place.
- f. Utilize turf grass only in parks and other important public gathering places.
- g. Provide opportunities to collect and treat stormwater runoff.

Water-efficient landscape design

4.7 Site and Building Design Guidelines

This Section provides site and building design guidelines for new building types permitted within the private realm of the Plan area. The overall design intent is to provide for an eclectic mix of residential, live/work, commercial, and light industrial development that has an industrial and contemporary character.

4.7.1 Site Design

The following general site and building design guidelines apply to all building types and locations within the Plan area.

4.7.1.1 Parking Lots and Garages

- a. Structured parking facing public streets should be fronted or wrapped with actively occupied spaces such as storefronts, live/work units, residential community amenities, and lobbies. Access to parking shall be designed so that it is not prominent and ties into the adjacent architectural style.
- b. Ingress and egress to and from parking areas and loading facilities shall be clearly marked with appropriate directional signage and/or pavement markings.
- c. All parking areas and access driveways shall be designed to minimize intermodal conflicts in design and maximize pedestrian safety.
- d. Pedestrian routes shall have separate, well-defined and easily discernible routes through parking areas.

Parking structure utilizes a combination of exterior art and fenestration to reduce impacts on the public realm.

Clearly defined pedestrian route through parking areas

A network of pedestrian pathways connects various open spaces and buildings throughout a site.

-
- e. Any surface parking facilities shall be located to the side or rear of any proposed project and aesthetically minimized to the greatest extent feasible.
 - f. Parking lots and garages should be accessed from secondary streets. Access driveways from Beach Boulevard should be avoided.
 - g. Vehicular entrances to parking garages should be clearly marked with appropriate signage.
 - h. Parking garage entrances and exits should be limited to minimize the amount of curb-cuts made to access public rights-of-way, especially along Beach Boulevard.
 - i. On parcels with two street frontages, primary access to parking areas should connect to the smaller of the two roads, as feasible.

4.7.1.2 Loading and Service Areas

- a. Unenclosed service and loading areas shall be screened from residential areas and integrated with the design of the building. Special attention shall be given when designing loading facilities in a location that is proximate to residential uses. Techniques such as block walls, enhanced setbacks, or enclosed loading shall be used to minimize adverse impacts to residents.

4.7.1.3 Pedestrian Access

On-site pedestrian circulation and access shall be provided per the following guidelines:

- a. A system of pedestrian walkways shall connect all buildings on a site to each other, to on-site automobile and bicycle parking areas, and to any on-site open space areas or pedestrian amenities.
- b. Regular and convenient connections at least 10 feet in width between on-site walkways and the public sidewalk and other existing or planned pedestrian routes, such as safe routes to school, shall be provided. An on-site walkway shall connect the primary building entry or entries to a public sidewalk on each street frontage.
- c. Direct and convenient access shall be provided among adjoining residential and commercial areas, to public trails, along creeks, to the maximum extent feasible while still providing for safety and security. These connections will be a minimum of 10 feet in width.
- d. Safe and convenient pedestrian connections shall be provided via paved and lighted pathways from transit stops to adjacent building entrances.

4.7.2 Building Typology and Character

The architectural character of buildings and structures helps create and reinforce the identity of a neighborhood. The Plan area, as it exists today, includes residential, commercial and industrial uses and a character that is unique within the City. As redevelopment occurs in the Plan area, the goal of a blended approach that retains existing uses and context can also be applied to the architectural character of the buildings. That said, very ornate architecture that resembles Colonial, Neoclassical, or Italianate style characteristics is not appropriate for the Plan area and is not recommended.

These guidelines and examples are not intended to establish a particular architectural style for the Plan area. Rather, they focus on how a neighborhood's recognizable identity can be created through a building's exterior expression and details. These guidelines and examples are to be used with the general urban design guidelines and standards.

Development within the Plan area shall occur in the land use districts established in *Exhibit 3.1*: Town Center Mixed-Use (TCMU), Retail-Oriented Mixed-Use (ROMU), Town Center Industrial (TCI), and Town Center Residential (TCR). The expected typology and character of future development within these land use districts is as follows:

Town Center Residential (TCR)

Buildings in the TCR land use district shall be compatible with existing residential development and preserve the character of the existing neighborhoods. Building remodeling, additions, and reconstruction in the TCR land use district shall conform to the applicable guidelines in the City of Stanton Zoning Code.

Town Center Mixed-Use (TCMU)

Buildings within the TCMU land use district shall consist of both residential and mixed-use developments that may occur at a higher intensity than in the TCR district.

Retail-Oriented Mixed-Use (ROMU)

Buildings within the ROMU land use district are envisioned to consist of commercial and mixed-use buildings that include a prominent commercial component.

Town Center Industrial (TCI)

Buildings within the TCI district are envisioned to consist of light industrial and commercial developments that complement the character of existing industrial developments in this district. Future development should expand upon and enhance the industrial character of this district.

Townhouses may be located to transition between high-density development and existing neighborhoods adjacent to the Plan area.

Attached townhouse development may feature live/work space on the ground floor.

Stacked flat building. Single-level floorplates are vertically stacked and accessed from a central lobby and parking area.

4.7.2.1 Residential Building Typology and Character

Residential Building Typology

Residential buildings within the Plan area refers to stand-alone residential development where there are no non-residential components, as well as primarily residential buildings where less than 5% of the building floor area is not ancillary to a residential use.

Residential building typologies include, but are not limited to: townhouses, stacked flats, wraps, and podium style construction with density ranges of approximately 18 to 70 dwelling units per acre, inclusive of density bonuses, and building heights of 3 to 5 stories. Under certain circumstances, residential buildings may include a building height of 7 stories as shown in *Table 5.2, Development Standards* of the TCSP.

- **Townhouse Buildings.** Three or more dwelling units attached in a building, typically at the sides, but stacking of units or flats may occur. Townhouse buildings are alley loaded with entry stoops/porches to each unit that leads to a pedestrian path or paseo, promoting walkability and enhancing the pedestrian experience. Townhouse buildings can have finer levels of articulation compared to stacked flat buildings by designing façades to express each individual unit.
- **Stacked Flats.** Stacked flat buildings are also alley loaded and share a central lobby space that fronts onto a landscaped path or street frontage. Stacked flat buildings will be designed to be larger than townhouse buildings and are vertically stacked; these

buildings would be appropriate on busier street frontages as they present a more urban street character. These buildings offer units with a larger, one-level floor plate, which may appeal to demographics seeking accessible living spaces.

- **Wrap Buildings.** Wrap buildings include attached flats, lofts, and/or townhouse units oriented around a central parking structure. Ground-level programming may include residential units, lobby space, amenities, and/or retail uses. Main recreational amenities are typically provided at-grade in a courtyard or on the rooftop. Wrap buildings commonly include a series of courtyard open spaces for its residents.
- **Podium Buildings.** Podium buildings have attached flats, lofts and/or townhouses located on top of a parking garage that may be either on-grade, subterranean or both. Ground-level programming may include residential units, lobby space, amenities, and/or retail uses, and parking garages (hidden behind aforementioned uses). Main recreational amenities in this building type are usually provided on top of the podium structure in a courtyard, or upon the roof.
- Other forms of residential buildings that meet the density and building height standards are also permitted and encouraged.

Residential Building Character

Residential buildings should be designed to fit into the context of neighboring development as best possible. A mix of housing types appealing to a wide variety of residents and family sizes is encouraged.

Wrap building features central parking garage, wrapped by residential units.

Five-story podium structure includes parking on lower stories with dwelling units located above.

Podium building featuring a two-story parking garage on lower levels

Commercial development with flat roof features and design that is compatible with industrial development

Walkable, neighborhood-serving commercial uses, such as coffee shops

Commercial development with a material palette that is compatible with a 'gritty' industrial character

4.7.2.2 Commercial Building Typology and Character

Commercial Building Typology

Commercial development within the Plan area refers to stand-alone commercial projects. In a mixed-use district, the vehicular trips to commercial uses are reduced by increasing walkability in an area. The design guidelines ensure that commercial development is designed to promote walkability and contribute positively to neighborhood identity. The ROMU land use district occurs in high-visibility, high-volume areas conducive to commercial uses. Building design should respond to and facilitate retail activity.

Commercial Building Character

Commercial buildings in the Plan area can be either stand-alone or integrated into a vertical mixed-use building. The intended character of the commercial uses is boutique, artisan-inspired, locally owned, and artistically oriented. Where appropriate, commercial uses should interface with the public realm and incorporate experiential retail and outdoor dining adjacent to and within the public realm. This may include potential murals to activate the art scene in the area.

4.7.2.3 Industrial Building Typology and Character

Industrial Building Typology

The TCI land use district has a long history as an industrial district in the City of Stanton. The TCSP intends to preserve and build upon this industrial character and ensure that future industrial buildings are aesthetically compatible with other buildings within the Plan area.

Industrial Building Character

The Plan area has a large amount of existing industrial development. Over time as the economy of the City has changed, different forms of industrial development are preferred.

A “gritty,” warehouse district character is encouraged and should be implemented such that the industrial feel of the Plan area is preserved and remains a defining feature of mixed-use district. Future development should be arranged to foster a village feeling that supports smaller-scale maker and artisanal manufacturing.

Industrial development featuring a flat roof form

Newer industrial development utilizing public art to enhance an area while maintaining its character

Commercial use in an industrial building with a pitched roof form

Mixed-use development with non-residential uses on the ground-floor and dwelling units in upper stories

Mixed-use development with non-residential uses on the ground floor and dwelling units on upper stories

Mixed-use building utilizes consistent and compatible design language between residential and non-residential portions of development.

4.7.2.4 Mixed-Use Building Typology and Character

Recognizing the varied commercial and industrial character of the area, new buildings and redevelopment projects are encouraged to feature a blend of both commercial and residential design features, including modern, contemporary, and industrial building design.

The following sections describe the typology and character of mixed-use developments within the Plan area.

Mixed-Use Building Typology

Mixed-use development within the Plan area may include a range of residential, retail, office, and neighborhood-serving commercial uses. The physical and visual integration of these elements will activate the urban, mixed-use character of the district. Mixed-use development may occur vertically (varying uses within the same building on different floors) or horizontally (different uses spread out in separate buildings across a site), and will typically include a residential component in the form of a wrap- or podium-construction building. Live/work units may occur as a type of mixed-use development in any residential typology.

Mixed-Use Building Character

Mixed-use buildings in the Plan area refers to buildings that have a vertical mix of residential and commercial/retail uses. These buildings typically range from 3 to 5 stories in height or more. A mixed-use building should present a cohesive design theme between land uses.

4.7.3 Residential Architectural Guidelines

Residential buildings within the Plan area should be designed to create a cohesive neighborhood feel within the mixed-use district. Guidelines herein apply to stand-alone residential developments.

4.7.3.1 Site Planning Guidelines

- a. Buildings should be arranged to create a variety of outdoor spaces, such as courtyards, plazas, squares, eating areas, and other usable open spaces that promote human activity.
- b. Buildings shall include at least one primary entrance facing the adjacent street right-of-way.

4.7.3.2 Building Orientation

A building's orientation plays an essential role in determining how a building interacts with the public realm.

- a. The main building of a residential development shall be oriented to face a public street. Building frontages shall be generally parallel to streets. Orientation towards an adjacent paseo, plaza or open space is also encouraged.

4.7.3.3 Building Entries

Building entries provide an opportunity to create a space for transition between the building interior and the public realm.

- a. Where buildings occur on corner lots, primary entrances should face the intersection or include entries on both street frontages.

Building constructed at, or near, the minimum setback creates a sense of enclosure for the pedestrian realm.

Main portions of development are oriented to face the public realm.

Development features a primary entry facing the street intersection.

Buildings arranged to create a transitional space between the street and primary entry

Flat roof forms are the typical roof form expected for residential developments within the Plan area.

Vertical roof plane breaks divide the vertical massing and rooflines into sections.

- b. Buildings that utilize shared pedestrian entries should increase detailing surrounding the entry to generate interest.
- c. New residential buildings shall provide pedestrian elements in the transitional spaces between the primary street and entrances. Pedestrian elements include porches, courtyards, patios, stoops, arcades and/or single story projections that express the architectural style of the building and add human scale.

4.7.3.4 Rooflines

Roofs should be designed for functionality and to enhance or complement the overall architectural design of the building.

- a. Roofs should be flat to very low pitched roofs.
- b. Vertical roof plane breaks, changes in building/ridge height or other accent roof forms are encouraged. Variations in building height and massing are encouraged to break up the mass of the building.
- c. Form, materials, fascia and/or cornice elements should be integrated with the overall building design.
- d. Roofing material shall not be highly reflective, and is encouraged to be a light color to reduce solar heat gain.
- e. Rooftop decks and amenity areas should be designed to not intrude, aesthetically or architecturally, upon the privacy of surrounding residential developments.

4.7.3.5 Articulation

Offset Massing Forms

Front elevations and elevations facing a street, drive, or park are encouraged to have offset masses or wall planes (horizontally or vertically) to help break up the overall mass of a building.

- a. Offset forms shall include appropriate changes in materials and colors.
- b. Offsets forms should be consistent with the architectural style of the building and incorporated as a functional element or detail enhancement.
- c. Wrap, podium, and mixed-use buildings shall have varied wall planes. Stepped massing and layered wall planes may include:
 - Cantilevered masses or balconies.
 - Recessed masses or inset balconies.
 - Volume spaces.
 - Common open spaces.

Façades

Façade articulation can be used to facilitate the interplay of light and depth upon a building to generate interest and help reduce the appearance of bulk upon the public realm.

- a. Buildings should be articulated with layered wall planes, banding, architectural details, and/or accent materials and colors.
- b. Large expanses of reflective, opaque, or highly tinted glass are discouraged.
- c. Details that modulate the light and demonstrate artistry and craft, or that offer both function and articulation, are encouraged. This could include window

Cornice elements are well integrated with the building's overall design in both form and materials.

Façade articulated with layered wall planes and architectural details.

Recessed massings above the first floor and lower height entry features increase façade articulation.

Awnings are an example of functional ornamentation, providing both shade and articulation.

Lower height elements, such as a courtyard, decorative pillars and landscaping, establish pedestrian scale.

Perceived bulk of the building is reduced by using courtyards to break up the massing and divide the building into sections.

shutters, awnings, and louvers that are proportional to the window size and detailed with more geometric and simple lines.

- d. Lower height elements, such as recessed massings above the first floor, porches, entry features, courtyards, and pergolas are encouraged to establish pedestrian scale and add variety to the streetscene.
- e. The perceived height and bulk of a building shall be reduced by incorporating courtyards and ground level architectural details to divide the building into sections and maintain human scale.
- f. Building elevations facing the railroad right-of-way can have larger massings and wall planes than the general requirements to help mitigate potential noise impacts from trains.

Architectural Projections

- a. Projections may be used to emphasize design features such as entries, major windows, or outdoor space. Projections are encouraged on all residential building forms. Projections include, but are not limited to:

- Awnings (cloth, metal, wood)
- Roof overhangs
- Projecting upper-story elements
- Tower elements
- Window/door surrounds
- Recessed windows
- Bay windows or dormers
- Trellis elements
- Porch or balcony elements.

4.7.3.6 Common Open Space

- a. Courtyards, gardens or plazas contribute to the recreational opportunities and needs for open space for building residents. These spaces should optimize daylight access, views and privacy for units facing them.

4.7.3.7 Materials and Color

- a. The following techniques should be used in the design of building façades to enhance building architecture:
 - Color change and color variation
 - At least three (3) different exterior materials
 - Changes in texture
 - Exterior materials, windows and details should be consistent with the scale, proportion and architectural style of the building.
 - Major building entries should be emphasized using accent colors and materials.
 - Material and color changes shall occur at an inside corner or massing underside, or at an appropriate location on the building façade such as a massing projection or architectural accent feature.
 - Bars and security grills on windows and doors are prohibited.
 - White or neutral-tone colors are encouraged to be used as the primary base color. Undesirable colors on building exteriors include fluorescent colors, neon colors, primary colors (i.e. red, yellow and blue), and bright colors as the primary wall color.

Colors, materials, and massing breaks divide the building into sections and foster human scale.

Massing, color, and first-floor architectural details highlight the building entry.

Development demonstrates appropriate range of color application and an excess of three materials.

Building architecture screens a centralized parking structure from public view.

Secure enclosed bicycle storage provided within a private area of development.

4.7.3.8 Parking Areas

The following techniques should be used in the design of residential parking lots and garages to reduce conflicts between vehicles and pedestrians and limit aesthetic impacts of these areas upon the public realm:

- a. Podium-style residential buildings shall screen parking structures using exterior structural/architectural features, aesthetic treatments and/or landscaping screening in order to minimize visual impacts of parking areas to the public and private realms.
- b. Secure, covered bicycle storage for residents shall be provided in areas that are inaccessible to the general public.

4.7.4 Mixed-Use Architectural Guidelines

4.7.4.1 Location of Non-Residential Uses within a Mixed-Use Development

Mixed-use buildings should be located to maximize its economic potential and minimize impacts upon residential uses.

- a. The design of any live/work or mixed-use project shall take into consideration potential impacts on adjacent properties and shall include specific design features to minimize potential impacts.
- b. The design of the mixed-use project shall ensure that privacy between residential units and between different uses on the site is maximized.
- c. Site design shall encourage integration of the pedestrian environment with the non-residential uses through the provision of plazas, courtyards, walkways, and street furniture.
- d. Site planning and building design shall be compatible with and enhance the adjacent and surrounding built environment in terms of scale, building design, color, exterior materials, roof styles, lighting, landscaping, and signage.
- e. Within a vertical mixed-use building, the non-residential uses shall be located on the ground floor.
- f. Live/work shall have the commercial portion of the unit on the ground floor.

Development design encourages a vibrant pedestrian environment.

Vertical mixed-use development with retail uses on the ground floor and residential uses above

Live/work units with non-residential uses on the ground floor

Vertical mixed-use development with retail and commercial on the ground floor

Mixed-use building arranged to imply a composition of smaller buildings

Ground-floor retail and plaza spaces integrated alongside residential development

4.7.4.2 Site Planning Guidelines

- Buildings should be arranged to create a variety of outdoor spaces, such as courtyards, plazas, squares, eating areas, and other usable open spaces that promote human activity.
- Buildings shall include at least one primary entrance facing the adjacent street right-of-way.
- Site and building design shall ensure compatibility among different uses in terms of noise, hours of operation, vehicle and pedestrian circulation, access, use of open space, and similar operating characteristics.

4.7.4.3 Building Orientation

- Open spaces and amenities intended solely for resident use should be located away from the street within internal courtyards, or upon upper stories if facing the public realm.
- Mixed-use buildings should generally appear as a composition of smaller building façades rather than an uninterrupted single-tenant building

4.7.4.4 Building Entries

- Mixed-use buildings shall have primary entries connected to the street, trail, paseo, or other publicly accessible open space.
- Where multiple uses are located in the same building, separate and distinct entrances for each use shall be provided.
- Corner buildings should include glazing on the façades facing the intersection, with the primary entry near the corner.

- d. Where buildings occur on corner lots, primary entrances should face the intersection, or include entries on both street frontages.
- e. Buildings that utilize shared pedestrian entries should increase detailing surrounding the entry to generate interest.

4.7.4.5 Articulation

Offset Massing Forms

Front elevations and elevations facing a street, drive, or park are encouraged to have offset masses or wall planes (horizontally or vertically) to help break up the overall mass of a building.

- a. Offset forms shall include appropriate changes in materials and colors.
- b. Offsets forms should be consistent with the architectural style of the building and incorporated as a functional element or detail enhancement.
- c. Wrap, podium, and mixed-use buildings shall have varied wall planes. Stepped massing and layered wall planes may include:
 - Cantilevered masses or balconies.
 - Recessed masses or inset balconies.
 - Volume spaces.
 - Common open spaces.

Street-oriented retail uses occur on the ground floor with other uses, such as a restaurant, occurring on upper stories.

Residential portion of a mixed-use development features a dedicated entry that is separate from non-residential uses.

Development on a corner lot includes entry facing intersection.

Increased ground floor to finished ceiling height in non-residential use areas increases the flexibility of these spaces.

Open spaces and amenities intended for resident use, located away from the public realm.

Horizontal banding and massing breaks distinguish various uses within the same structure.

Façades

Façade articulation can be used to facilitate the interplay of light and depth upon a building to generate interest and help reduce the appearance of bulk upon the public realm:

- a. Buildings should be articulated with layered wall planes, banding, architectural details, and/or accent materials and colors.
- b. Large expanses of reflective, opaque, or highly tinted glass are discouraged.
- c. Details that modulate the light and demonstrate artistry and craft, or that offer both function and articulation, are encouraged. This could include window shutters, awnings, and louvers proportional to the window size and detailed with more geometric and simple lines.
- d. Lower height elements, such as recessed massings above the first floor, porches, entry features, courtyards, and pergolas are encouraged to establish pedestrian scale and add variety to the streetscene.
- e. The perceived height and bulk of a building shall be reduced by incorporating courtyards and ground level architectural details, to divide the building into sections and maintain human scale.
- f. Ground floor façade treatments should be distinct from upper floors and utilize increased fenestration to encourage pedestrian interest and commercial activity.
- g. Special architectural treatments should be provided at street corners and other key focal areas. Examples of these treatments include, but are not limited to, entry features, feature windows, tower elements, and additional architectural detailing.

Architectural Projections

- a. Projections may be used to emphasize design features such as entries, major windows, or outdoor space. Projections are encouraged on all mixed-use building forms. Projections include, but are not limited to:

- Awnings (cloth, metal, wood)
- Roof overhangs
- Projecting upper-story elements
- Tower elements
- Window/door surrounds
- Recessed windows
- Bay windows or dormers
- Trellis elements
- Porch or balcony elements

4.7.4.6 Rooflines

- a. Typically, roof forms should be flat. Low-pitched roofs on lower height buildings may be considered at the discretion of the Community and Economic Development Director.

4.7.4.7 Colors and Materials

- a. Changes in colors and materials should be used to visually distinguish various uses within the same development.
- b. The following techniques should be used in the design of building façades to enhance building architecture:
- Color change and color variation.
 - At least three (3) different exterior materials.
 - Changes in texture.
 - Exterior materials, windows and details should be consistent with the scale, proportion and architectural style of the building.
 - Major building entries should be emphasized using accent colors and materials.
 - Material and color changes shall occur at an inside corner or massing underside, or at an appropriate location on the building façade such as a massing projection or architectural accent feature.
 - Bars and security grills on windows and doors are prohibited.
 - White or neutral-tone colors are encouraged to be used as the primary base color. Undesirable colors on building exteriors include fluorescent colors, neon colors, primary colors (i.e. red, yellow and blue), and bright colors as the primary wall color.

4.7.4.8 Parking and Loading Areas

- a. Noise, vibration and traffic impacts resulting from loading and delivery related to non-residential uses should be reduced to the greatest extent feasible by strategically locating these areas away from residential uses within the development.
- b. Surface parking lots between development and adjacent streets is discouraged. Surface parking lots should be located to the side or rear of development, bringing architecture closer to the public street.
- c. Residential and non-residential uses are encouraged to utilize shared parking facilities and reduce curb-cuts into adjacent rights-of-way.
- d. Wayfinding signage in parking areas should clearly indicate access to each use within the development to visitors of the site.
- e. Short-term bicycle racks dedicated to non-residential uses shall be provided near the entrances of the buildings they serve.
- f. Secure, covered bicycle storage for residents shall be provided in areas that are inaccessible to the general public.

Short-term bicycle racks located near building entries

Wayfinding signage to parking and building areas

4.7.5 Architectural Objective Design Standards

Residential and applicable mixed-use buildings within the Plan area shall comply with the objective design standards described in this section. These projects are also encouraged, but not required, to comply with the intent of the applicable architectural design guidelines.

Exhibit 4.1, Residential Architectural Standards Diagram, depicts various standards applied in diagrammatic format.

4.7.5.1 Building Orientation

- a. To promote pedestrian-oriented streetscene, a minimum of 35 percent of building frontage shall be constructed at the edge of the public access easement (PAE) area along Beach Boulevard and Main Street.

4.7.5.2 Building Entries

- a. Residential buildings adjacent to Main Street shall include a primary pedestrian entry along this street frontage facing either the street or a publicly accessible courtyard or plaza.
- b. Residential buildings along Beach Boulevard shall have at least one residential entry along Beach Boulevard.

4.7.5.3 Façade and Street-Facing Architectural Articulation

- a. Buildings with 100 feet or greater of street frontage shall implement the following

techniques to ensure adequate articulation. This applies to any building façade visible from the ground level within a public right-of-way:

- There shall be an offset plane break or opening in the façade at least every 25 feet of linear building frontage. Openings fulfilling this requirement shall have transparent glazing and provide views into work areas, display areas, sales areas, lobbies, or similar active spaces. Offsets shall vary in depth and/or direction of at least 18" and 4' in length, or with a repeated pattern of offsets, recesses, or projections of similar depth.
 - For buildings that are 4 stories or taller, a minimum of 25 percent of the building façade shall be modulated into sections such that it is offset a minimum of 3 feet back from the front plane of the ground floor.
- b. At least 30 percent of the exterior walls on the ground floor facing the street shall include windows, doors, or other openings. Percentage of exterior walls shall be calculated based on the length of the façade frontage and the floor-to-ceiling height of the ground floor.
 - c. Residential buildings along Beach Boulevard and Main Street shall include leasing and indoor amenity areas on the ground floor facing the streets to increase pedestrian interest, overall activity, and architectural diversity along the street.
 - d. For mixed-use buildings within the Retail-Oriented Mixed-Use (ROMU) zone and with 100 feet or greater of linear street frontage along Beach Boulevard and Main Street, a minimum of 25 percent of such

- ① **4.6.5.3.a:** For buildings with 100' or greater of street frontage, plane breaks at least every 25 feet include glazing and provide adequate articulation.
- ② **4.6.5.3.b:** A minimum of 30% of exterior walls on the ground floor facing the street shall include windows, doors, or other openings.

- ③ **4.6.5.3.a:** For four-story buildings with street frontage in excess of 100', a minimum of 25% of frontage shall be modulated into sections such that it is offset a minimum of three feet from the front plane of the ground floor.
- ④ **4.6.5.3.c:** Residential developments along Beach Boulevard and Main Street shall include leasing and indoor amenity areas on the ground floor, increasing architectural diversity along the street.

frontage shall be designed to accommodate commercial and office uses. These pedestrian oriented spaces shall have a minimum interior depth of 35 feet.

- e. The ground floor of the commercial portion of a mixed-use building shall have a minimum finished ceiling height of 14 feet.
- f. Incorporate one or more of the following techniques to vary building massing and articulation:
 - Vertically articulate roof height at least every 50 feet along the street frontage through the use of parapets, varying cornices, reveals, clerestory windows, and varying roof height/form.
 - Provide a minimum 2-foot roof eave on elevations adjacent to a public street.
- g. Include a minimum of two features such as balconies, cantilevers, dormers, bay windows, patios, ground-floor resident amenities, individualized entries, or accent materials, into all building elevations facing a public street.

4.7.6 Commercial Architectural Guidelines

4.7.6.1 Site Planning Guidelines

- a. Buildings should be arranged to create a variety of outdoor spaces, such as courtyards, plazas, squares, eating areas, and other usable open spaces that promote human activity and is scaled to the street-scene.
- b. Building massing should be concentrated along the street to articulate the street interface, particularly along Beach Boulevard.
- c. All ground-floor uses shall include at least one primary entrance facing the adjacent street right-of-way.
- d. Site and building design shall ensure compatibility among different uses in terms of noise, hours of operation, vehicle and pedestrian circulation, access, use of open space, and similar operating characteristics.

4.7.6.2 Building Orientation

Building placement and orientation are two key factors that influence how a building interacts with the public realm. The following guidelines are intended to encourage pedestrian engagement with commercial spaces, particularly along Beach Boulevard and Main Street.

- a. Façade details and street furniture should be provided to enhance the pedestrian experience. These may include, but are not limited to, landscape planters, seating areas, focal objects (art, landscape, fountains), awnings, bay windows, and accent/decorative lighting.

Furniture and seating areas along the street enhance pedestrian experience.

Building massing concentrated along the street, with clearly marked and recessed pedestrian entry.

- b. Primary pedestrian entries should be clearly delineated through a combination of the recessed entry ways, vertical and horizontal architectural breaks in the façade, and a high level of detailing on the ground floor near the entrance. Entries shall be clearly defined features of the front façades and of a scale that is in proportion to the size of the building. Larger buildings shall have a more prominent building entrance while maintaining a pedestrian scale.
- c. Pedestrian entries should be accompanied by increased fenestration to generate interest and allow views into the space.

4.7.6.3 Rooflines

Roofs should be designed for functionality and be appropriate to the architectural style of the building.

- a. Roofs should be typically flat. Given that a majority of existing buildings in the project area have flat roofs, pitched roof forms with contemporary materials that recall sawtooth, shed, gable, or similar roof forms of commercial and industrial buildings may be allowed per the discretion of the Community and Economic Development Director.
- b. Vertical roof plane breaks, changes in roof lines or ridge height or other accent roof forms are encouraged.
- c. Form, materials, fascia and/or cornice elements should be integrated with the overall design vocabulary.
- d. Parapets, when used, should be contiguous and incorporate side/rear elevation returns.

- e. If utilized, roofing tile material should be compatible with the architectural style of the building. Wooden roofs are prohibited for fire safety.
- f. Exterior lighting should be located to avoid light spillage onto adjacent property, especially when adjacent to residential or mixed-use development.

4.7.6.4 Façade Articulation

Commercial buildings should incorporate articulation to generate pedestrian scale and visual interest along the streetscape.

- a. Architectural design of buildings should minimize blank walls, especially when situated adjacent streets or walkways.
- b. When buildings of a single form and height are used, these buildings should be articulated with layered wall planes, banding, architectural details and/or materials.
- c. Large expanses of reflective, opaque, or highly-tinted glass are discouraged.
- d. Artwork is encouraged for retail buildings to help create a dynamic and interesting streetscene.
- e. Details that modulate the light and demonstrate artistry and craft are encouraged.
- f. Projections, overhangs, recesses, banding and architectural details should be used to provide shadow, articulation and scale to building elevations.
- g. Façades facing streets shall provide a minimum of 50% fenestration on the ground floor to generate pedestrian

Vertical roof plane breaks and changes in building height

Façades facing the street implement a minimum of 50% fenestration on the ground floor facing the public realm.

Parking areas screened from the street using landscaping

interest. Percentage of fenestration shall be calculated based on the length of the façade frontage and the floor-to-ceiling height of the ground floor.

4.7.6.5 Materials and Color

a. The following techniques should be used in the design of building façades to enhance building architecture:

- Color change and color variation.
- At least three (3) different exterior materials.
- Changes in texture.
- Exterior materials, windows and details should be consistent with the scale, proportion and architectural style of the building.
- Major building entries should be emphasized using accent colors and materials.

- Material and color changes shall occur at an inside corner or massing underside, or at an appropriate location on the building façade such as a massing projection or architectural accent feature.
- Bars and security grills on windows and doors are prohibited.
- White or neutral-tone colors are encouraged to be used as the primary base color. Undesirable colors on building exteriors include fluorescent colors, neon colors, primary colors (i.e. red, yellow and blue), and bright colors as the primary wall color.

4.7.6.6 Parking and Loading Areas

The following guidelines apply to commercial parking areas to reduce visual impacts upon the public realm and reduce conflicts between cars, pedestrians, and cyclists to the greatest extent feasible.

- a. Commercial parking areas should be connected to public sidewalks, trails, and walkways where feasible.
- b. Within parking areas, pedestrian walkways and crosswalks should be clearly delineated from vehicular areas.
- c. Parking areas should be placed to the rear or side of the street to reduce their visual impacts on the public realm.
- d. Bicycle parking should be provided in parking areas, near primary building entrances.

Pedestrian walkways within a commercial parking lot are clearly delineated from vehicular areas.

4.7.7 Industrial Architectural Guidelines

Industrial development is a key component of the Plan area's existing and historical character. These guidelines are intended to minimize the visual and physical impacts of industrial development upon the public realm while preserving the economic potential and operational capacity of industrial development within the Plan area.

4.7.7.1 Site Planning Guidelines

- a. Buildings should be arranged to create a variety of outdoor spaces, such as courtyards, plazas, squares, eating areas, and other usable open spaces that promote human activity.
- b. Where future buildings are located adjacent to Beach Boulevard and Main Street, they shall be oriented towards these streets and include a pedestrian entrance from this street.
- c. All ground-floor uses shall include at least one primary entrance facing the adjacent street right-of-way.

4.7.7.2 Building Orientation

- a. Street-facing industrial buildings should be designed to emphasize the view of non-industrial interior areas, such as primary entry ways, foyers, and offices from the street.
- b. The location, configuration, size, and design of new or remodeled industrial buildings should be compatible with the character and quality of surrounding sites, buildings, and structures.

Industrial development featuring a flat roof form

Industrial development utilizing expansive wall-planes to create visual interest with public art

Non-industrial portions of industrial development, such as offices and entryways, face the street.

Vertical plane breaks reduce the overall appearance of bulk.

Awnings and overhangs that provide shade and character to the streetscape.

Overall massing of development reduced by breaking building into smaller sections

- c. Buffers should be incorporated from adjacent mixed-use or residential development to protect these uses from noise, vibration and/or odors resulting from the industrial use.

4.7.7.3 Articulation

Offset Massing and Forms

- a. Offset forms shall include appropriate changes in materials and colors.
- b. Offsets forms should be consistent with the architectural style of the building and incorporated as a functional element or detail enhancement.

Façades

- a. Large, unbroken expanses should be avoided. Façades should be broken into smaller sections by incorporating vertical and horizontal plane breaks that reduce overall appearance of bulk.
- b. Exterior walls should generate visual interest through the use of colors, materials, and/or art is encouraged. Murals and signage on large wall areas enliven a building façade to create a visually interesting streetscape and help define a creative, artistic character for the Plan area.
- c. Façade details such as score lines, windows, paint, or minor material changes, are not acceptable substitutes for substantial breaks in massing and form.
- d. Eaves, canopies, awnings, and overhangs that provide shade and articulation are encouraged.

-
- e. Buildings should be articulated with layered wall planes, banding, architectural details and/or accent materials and colors.

Architectural Projections

- a. Projections may be used to emphasize design features such as entries, major windows, or outdoor space. Projections are encouraged on all industrial building forms. Projections may include, but are not limited to:
 - Awnings (cloth, metal, wood)
 - Roof overhangs
 - Projecting upper-story elements
 - Tower elements
 - Window/door surrounds
 - Recessed windows
 - Bay windows or dormers
 - Trellis elements

4.7.7.4 Rooflines

- a. Roof forms should be flat; however, pitched roof forms with contemporary materials (such as standing seam metal and thermoplastic polyofin (TPO) that recall sawtooth, shed, gable, or similar appropriate to the architectural style of the buildings are allowed.
- b. Vertical roof plane breaks, changes in building/ridge height or other accent roof forms are encouraged.
- c. Rooftop equipment should be shielded or integrated into the building design from view of street.
- d. Roofing material shall not be highly reflective and is encouraged to be a light color to reduce solar heat gain.

4.7.7.5 Materials and Color

- a. The following techniques should be used in the design of building façades to enhance building architecture:
 - Color change and color variation.
 - At least three (3) different exterior materials.
 - Changes in texture.
 - Exterior materials, windows and details should be consistent with the scale, proportion and architectural style of the building.
 - Major building entries should be emphasized using accent colors and materials.
 - Material and color changes shall occur at an inside corner or massing underside, or at an appropriate location on the building façade such as a massing projection or architectural accent feature.
 - Bars and security grills on windows and doors are prohibited.
 - White or neutral-tone colors are encouraged to be used as the primary base color. Undesirable colors on building exteriors include fluorescent colors, neon colors, primary colors (i.e. red, yellow and blue), and bright colors as the primary wall color.

4.7.7.6 Parking and Loading Areas

- a. Parking areas should be located to the side or rear of the building, away from the primary street frontage.
- b. Loading areas should be located to the side or rear of the building where feasible and shall be screened from the view of the public realm.
- c. Trash storage areas should be screened from public view. Screening methods should utilize landscaping or an architecturally consistent enclosure.
- d. Where feasible, loading and delivery areas should be located away from adjacent residential development.
- e. Bicycle parking should be provided in parking areas, near primary building entrances.

4.8 Sustainability Guidelines

The Specific Plan provides a sustainability framework that can be implemented through a variety of project-specific design solutions. The most appropriate project-specific design features will be determined at the individual development approval stage based, in part, upon feasibility and overall sustainability.

4.8.1 Energy Efficiency

Most buildings can reach energy efficiency levels that exceed California Title 24 standards, yet most only strive to meet the standard. It is reasonable to strive for energy reduction in excess of that required by Title 24 standards. Where feasible and appropriate, the following strategies are encouraged, but not required:

- a. Passive design strategies can dramatically affect building energy performance. These measures may include building shape and orientation, passive solar design, and the use of natural lighting.
- b. Incorporate the use of Low-E windows or use Energy Star windows.
- c. Use a properly sized and energy-efficient heating/cooling system in conjunction with a thermally efficient building shell.
- d. Consider utilizing light colors for wall finish materials.
- e. Install high R-value wall and ceiling insulation.
- f. Incorporate photovoltaic systems into building design.
- g. Install high-efficiency lighting (LED, fluorescent lighting, etc.) where possible.

Development within this Specific Plan is encouraged to implement some of the strategies of the EnergyStar program, which is an energy performance rating system developed by the U.S. Department of Energy and the Environmental Protection Agency. The program certifies products and buildings that meet strict energy-efficiency guidelines. Involvement in the EnergyStar program will be at the discretion of the developer/builder.

4.8.2 Exterior Lighting

Proper lighting design promotes safety, eliminates light trespass onto adjacent properties, and minimizes disruption to human's circadian rhythms to promote better sleep and healthier communities. Solar-powered lighting and energy-efficient lighting can reduce energy consumption, thereby reducing emissions and improving air quality.

The sustainable lighting guidelines should be considered by future developers:

- a. High-efficiency solid-state light emitting diode (LED) lighting for outdoor applications, including signage.
- b. Appropriate color spectral distribution to reduce glare and enhance safety and navigation.

4.8.3 Minimizing Heat Island

The Specific Plan addresses the heat island effect by providing the majority of parking in structures or below ground, significantly reducing the amount of paving on-site. Additional guidelines to reduce the heat island effect include the following.

- a. For surface parking lots, plant evergreen canopy trees to meet the parking lot tree requirements described in *Section 5.7, Off-Street Parking Standards*. Planting trees above the minimum amount required in said Section is encouraged.
- b. Encourage the use of low albedo (reflection coefficient) materials in paving, roofing, and building materials to reflect, rather than absorb, incoming solar radiation.
- c. Encourage green roofs.
- d. Artificial turf is discouraged.

4.8.4 Water Conservation

- a. All development within the Plan area shall comply with SMC Section 20.315.050, Irrigation Plans and Water Conservation Standards.
- b. Greywater recycling systems are encouraged to be implemented, where feasible.

5

DEVELOPMENT REGULATIONS

5.1 General Provisions

This Chapter establishes the permitted uses, development standards and regulations for the planned development within the Town Center Specific Plan area. The standards contained in this Chapter of the Specific Plan shall supersede those of the Stanton Municipal Code (SMC), unless otherwise stated herein.

Where the language in this Specific Plan is undefined, unclear, or vague, then the final interpretation and determination shall be made by the Community and Economic Development Director, or their designees. At their discretion, the Community and Economic Development Director may forward an item requiring interpretation to the City of Stanton Planning Commission for determination. Any determination by the Planning Commission may be appealed to the City Council. All decisions by the City Council shall be deemed final.

In instances of conflicting regulations and standards, the standards and regulations contained in this Specific Plan shall take precedence over the SMC, including the City's Design Guidelines. If this Specific Plan is silent on an issue, then the standards in the SMC or any other applicable city, state or federal code shall apply, as appropriate. The provisions in this Chapter are not intended to interfere with, abrogate, or annul any easement, covenant, or other agreement between parties.

5.2 Definitions

For the purposes of this Chapter, all definitions not defined by this Section shall be the same as described in *Chapter 20.700, Definitions*, of the Stanton Municipal Code (SMC).

- **“Affordable Housing Project”** means any project that reserves a minimum of 50% of the units for income-restricted households, as defined by California State Law.
- **“Mobile Vendor”** means any person in charge of or driving any motorized mobile vending vehicle requiring a state driver’s license to operate, either as an agent, employee, or otherwise under the direction of the owner.
- **“Mobile Vending Vehicle”** means any motorized vehicle, including food trucks and lunch wagons, from which fruits, vegetables or foodstuffs are sold, displayed, solicited or offered for sale or bartered or exchanged, on any portion of any street within the City.
- **“Artisanal Manufacturing”** means any the production of quality products by skilled workers, prioritizing customer value over cheap prices.

5.3 Allowable Uses

Table 5.1 — Permitted Land Uses, identifies land use regulations for the Specific Plan area. Any use not listed shall be prohibited, unless the Community and Economic Development Director finds that the proposed use is similar in characteristics to allowed uses. It should be noted that parks, plazas, and alleys not assigned a zone in *Exhibit 3.1* shall be assigned the same zone as an abutting property.

TABLE 5.1 — PERMITTED LAND USES

5.4 Additional Land Use Regulations

Section 5.4 describes the treatment of permitted, restricted, and nonconforming land uses within the Specific Plan area. *Table 5.1 — Permitted Land Uses*, identifies permitted and conditionally permitted land uses within land use districts depicted upon *Exhibit 3.1*. Other regulations related to land uses are listed in the sections below.

5.4.1 Regulations for Specific Uses

Additional regulations governing specific uses found in *Table 5.1* are listed below:

a. **Alcoholic Beverage Manufacturing**

Requirements. In addition to the design guidelines and development standards within the Specific Plan, the following requirements shall apply to craft alcoholic beverage manufacturing uses and accessory tasting rooms:

1. An alcoholic beverage manufacturing and accessory tasting room use shall comply with all federal, state and local laws and regulations, including a valid license from the California ABC Board for the specific type of alcoholic beverage manufacturing occurring on site;
2. An alcoholic beverage manufacturing and accessory tasting room use shall not exceed 6,000 square feet of net floor area;
3. An alcoholic beverage manufacturing use may not exceed production of 15,000 barrels per year;
4. All production activities and on-site storage shall be located completely within the alcoholic beverage manufacturing facility. Off-site storage for an alcoholic beverage manufacturing facility is permitted, provided it meets all applicable provisions of the underlying zone;
5. The display of alcoholic beverages shall be located within the alcoholic beverage manufacturing and accessory tasting room facility;
6. The alcoholic beverage manufacturing and accessory tasting room use shall be allowed to operate and be open to the public during the following hours:
 - Manufacturing and operation: 7:00 A.M. to 7:00 P.M. Monday through Saturday;
 - Accessory tasting room open to the public: 11:00 A.M. to 10:00 P.M. daily; and
 - Service trucks used for the purposes of loading and unloading materials, ingredients, products, and equipment shall be restricted to the hours of 7:00 A.M. to 6:00 P.M. Monday through Friday and 9:00 A.M. to 6:00 P.M. on Saturday.
7. The consumption, tasting and sales of alcoholic beverages shall be limited to only those products produced on-site;

-
8. Ancillary retail sales shall be limited to only those retail items directly associated with the on-site alcoholic beverage manufacturing facility and accessory tasting room;
 9. The alcoholic beverage manufacturing use or accessory tasting room shall not charge an admission fee, cover charge or require a minimum purchase;
 10. A security plan, including a video surveillance system and exterior lighting plan, satisfactory to the Community and Economic Development Director, or his/her designee, shall be submitted to and approved prior to the issuing of a Certificate of Occupancy. The video surveillance system shall be installed to assist with monitoring the property on both the interior and exterior. A Digital Video Recorder (DVR) or similar video-recording device, capable of exporting images in TIFF, BMP, or JPG format shall be used. Recording shall be retained for no less than 30 days. Exterior lighting shall clearly illuminate the common areas surrounding the building including, but not limited to, the entrance and exit doors, as well as the business address;
 11. No more than ten percent (10%) of the window display area (including any transparent doors) shall be allowed to bear advertising, signs or any other obstructions. All advertising, signage or other obstructions shall be placed and maintained to ensure a clear and unobstructed view of the establishment's interior. Window signs displaying prices shall be prohibited. No advertising or signage shall be placed in the area above three (3) feet or below six (6) feet in height of all windows measured from grade;
 12. Tours of the alcoholic beverage manufacturing and accessory tasting room use shall occur on regularly scheduled days and times. The operator shall ensure that tours do not negatively impact adjacent businesses or property owner; and
 13. Alcoholic beverage manufacturing and accessory tasting room uses shall be restricted from utilizing ventilation practices that may negatively impact residences and may be required to install mechanical air filtration systems to the satisfaction of the Community and Economic Development Director, or his/her designee.

b. **Off-Premise Alcohol Sales.** Boutique Wine and Beer Stores may permit the sale of wine and beer, for off-premises consumptions under a “Type 20 License” of the ABC by-right. General Liquor Stores may permit the sale of general alcohol sales, wine, and beer for off-premise consumptions under a “Type 21 License” of the ABC with an MUP. In addition to the standards within this Specific Plan, the following performance standards shall apply to Boutique Wine and Beer Stores and General Liquor Stores:

1. The use does not result in any adverse effects, jeopardize, or endanger the health, peace, or safety of persons residing, visiting, or working in the surrounding area;
2. The use is operated and maintained in accordance with all applicable local, state, or federal codes, laws, rules, regulations and statutes including those of the ABC, the City’s General Plan, and all zoning or nuisance regulations of the City;
3. The use is operated and maintained in a neat, quiet, and orderly condition and operated in a manner so as not to be detrimental to surrounding properties and occupants. This shall encompass the upkeep and maintenance of exterior facades of the building, landscaping, designated parking areas serving the use, fences, and the perimeter of the site, including all public sidewalks, alleys, and parkways;
4. The use does not result in repeated nuisance activities, including but not limited to disturbance of the peace, illegal drug activity, public drunkenness, drinking in public, harassment of passersby, gambling, prostitution, sale of stolen goods, public urination, theft, assaults, batteries, acts of vandalism, excessive littering, loitering, graffiti, illegal parking, excessive loud noises especially in the late night or early morning hours, traffic violations, curfew violations, lewd conduct, or police detentions and arrests;
5. The exterior lighting and security measures shall comply with applicable requirements within the SMC;
6. No more than ten percent (10%) of the square footage of the windows and transparent doors of the premises shall be allowed to bear advertising, signs or any other obstructions including products, shelving, display items and/or coolers. All advertising, signage, product, shelving, display items and/or coolers shall be placed and maintained to ensure a clear and unobstructed view of the establishment’s interior. Window signs displaying prices shall be prohibited. No advertising or signage shall be placed in the area above three (3) feet or below six (6) feet in height of all windows measured from grade; and

-
7. A copy of these performance standards, additional City or ABC imposed operating conditions, and a twenty-four (24) hour complaint telephone number shall be posted in a conspicuous and unobstructed place visible from the entrance of the establishment in public view.
- c. **Retail Sales.** For all retail sales, no outdoor storage or sales is permitted in conjunction with any permitted use, except for permitted temporary sales, festivals, or special events.
 - d. **Laboratories/Research and Development.** A CUP is required if the use entails hazardous materials. Biosafety level 3 and 4 facilities are not permitted.
 - e. **Live/Work Standards.** In addition to the design guidelines and development standards within this Specific Plan, the following requirements shall apply to Live/Work units:
 1. Intent. The development regulations of this section are intended to facilitate the creation of new, adaptable live/work units in a manner that preserves the surrounding character, supports enhanced street level activity, maintains a consistent urban streetwall, and orients buildings and pedestrians toward public streets. Live/work units are intended to be designed with adequate workspace, higher ceilings, larger doors, sufficient natural light, open floor plans, and equipped with non-residential finishes and features that support arts and production activities;
 2. Density/Floor Area Allocation. Live/work units consistent with the provisions of this section are considered as a residential unit identified from the Residential (as specified by Density standards in *Table 5.2 — Development Standards*) allocations for property;
 3. Limitations on Use. The non-residential component of a live/work unit shall be limited to those uses set forth in *Table 5.1*. Non-residential activities/uses shall not be required in these units;
 4. Floor Area Requirement. A live/work unit shall have a minimum floor area of 750 square feet. At least 150 square feet of a live/work unit shall be designated as workspace, and measure not less than 15 feet in at least one dimension and not less than 10 feet in any dimension. The area for workspace in each unit shall be clearly demarcated on approved building plans;
 5. Separation of and Access to Individual Units. Access to each individual live/work unit shall be provided from the shop fronts, directly from the sidewalk parallel to the primary or secondary street, or from common access areas, corridors, or halls. The access to each unit shall be clearly separate from other live/work units or other uses within the building.
 6. Location of Living Space - Ground Floor Units. Ground floor live/work units shall designate the front 15 feet of the unit

as an area for workspace, in order to maintain activity and commercial access along the frontage. Dedicated living space may be located in the rear portion of the ground level, provided the front 15 feet of the unit is designated for workspace;

7. **Ceiling Height.** Ground floor live/work units shall have a floor-to-ceiling height of 12 feet or greater, measured from top of floor to bottom of ceiling. Upper floor live/work units shall have a floor-to-ceiling height of 10 feet or greater. A mezzanine space may not be included in the calculation of the minimum height for any floor level;
8. **Integration of Living and Working Space.** Areas within a live/work unit that are designated as living space shall be an integral part of the live/work unit and are not separated (or occupied and/or rented separately) from the area designated for workspace; and
9. **Client and Customer Visits.** Client and customer visits to live/work units are permitted.
- f. **Mixed-use Developments.** Individual uses within a mixed-use development are subject to the provisions governing those uses found in this Chapter.

5.4.2 Limitations on Use

The following uses and activities shall be prohibited:

- a. In any residential or live/work unit, storage of flammable liquids or hazardous materials beyond that normally associated with a residential use; and
- b. Any other activity or use, as determined by the Community and Economic Development Director, to be incompatible with residential activities and/or to have the possibility of affecting the health or safety of residents due to the potential for the use to create dust, glare, heat, noise, noxious gases, odor, smoke, traffic, vibration, or other impacts, or would be hazardous because of materials, processes, products, or wastes.

5.4.3 Nonconforming Uses

The following section applies to existing nonconforming uses within the Plan Area:

- a. **General.** The purpose of this subsection is to recognize and allow for the continued use of activities that become nonconforming with the adoption of The Plan. Except as provided in this subsection, the nonconforming use regulations set forth in Chapter 20.620 of the SMC (Nonconformities) shall apply;
- b. **Discontinuance of Nonconforming Uses.** If a nonconforming use of a lot, building, or structure is discontinued for a continuous period exceeding 180 consecutive calendar days, the right to continue the nonconforming use shall expire;
- c. **Grace period.** All existing businesses and land uses within the Specific Plan shall not be required to meet to this Specific Plan until June 30, 2032. After this date, the existing businesses and land uses

that do not meet the uses or regulations within this Specific Plan shall be considered nonconforming. All regulations for additions and expansions of these uses must adhere to the zoning designation as of January 1, 2024, as shown in “Exhibit 5.1 — Existing Zoning Map”;

- d. ***Landscape buffer for uses not meeting the Specific Plan within the grace period.*** A landscape buffer shall be required for uses that would be deemed inconsistent with the TCSP. A six (6)-foot wide landscape buffer shall be required along the sides and rear property lines of the development project unless adjacent to an alley. A landscape buffer is not required in between properties of the same development project. Front landscapes setbacks shall be pursuant to Section 20.315.040 of the SMC. The buffer shall include one (1) fifteen (15)-gallon canopy tree every twenty-five (25) feet on-center. Irrigation for the buffer shall meet Section 20.315.050 of the SMC. Landscape buffers are not required if the inconsistent use is expanded by less than ten (10) percent and less than 1,000 square feet. The expanded area of the use inconsistent with the TCSP shall have a ten (10)-foot setback regardless of the underlying zone;

- e. ***Existing Single-family Residences.*** Only single-family residences located within the TCMU and ROMU zones may be expanded and remodeled pursuant to the regulations in the Single Family Residential (RL) zone, any single-family use outside of these zones is not permitted to be expanded or remodeled. No more than fifty (50) percent of the existing square footage/floor area and/or total linear feet of interior and exterior walls shall be remodeled to single-

family residences within the TCMU and ROMU zone. New single-family residences may not be established within this zone (except for Accessory Dwelling Units and other units allowed pursuant to State Law);

- f. ***Change from a Nonconforming Use to Another Nonconforming Use.*** The Community and Economic Development Director may authorize a change from a legally established nonconforming use to another nonconforming use upon making the finding that the new use is similar in character to the existing nonconforming use and does not have the potential to result in adverse impacts on surrounding uses.

5.4.4 Temporary Uses

The purpose of this subsection is to regulate short-term temporary uses and special events that may occur within the Plan Area.

5.4.4.1 Temporary Outdoor and Seasonal Uses.

Except as provided in this subsection, the regulations set forth in Chapter 20.540, Temporary Use Permits and Special Use Permits, and 20.400.240, Outdoor Displays and Sales, of the SMC shall apply. Permitted temporary uses in the Plan Area are as follows.

- a. Short-term temporary commercial uses, such as business promotions, outdoor sales seasonal sales, outdoor agricultural sales and displays, and special events that do not exceed three consecutive days may be permitted with a Temporary Use Permit. A Temporary Use Permit is not required if the temporary use is consistent with the following requirements:

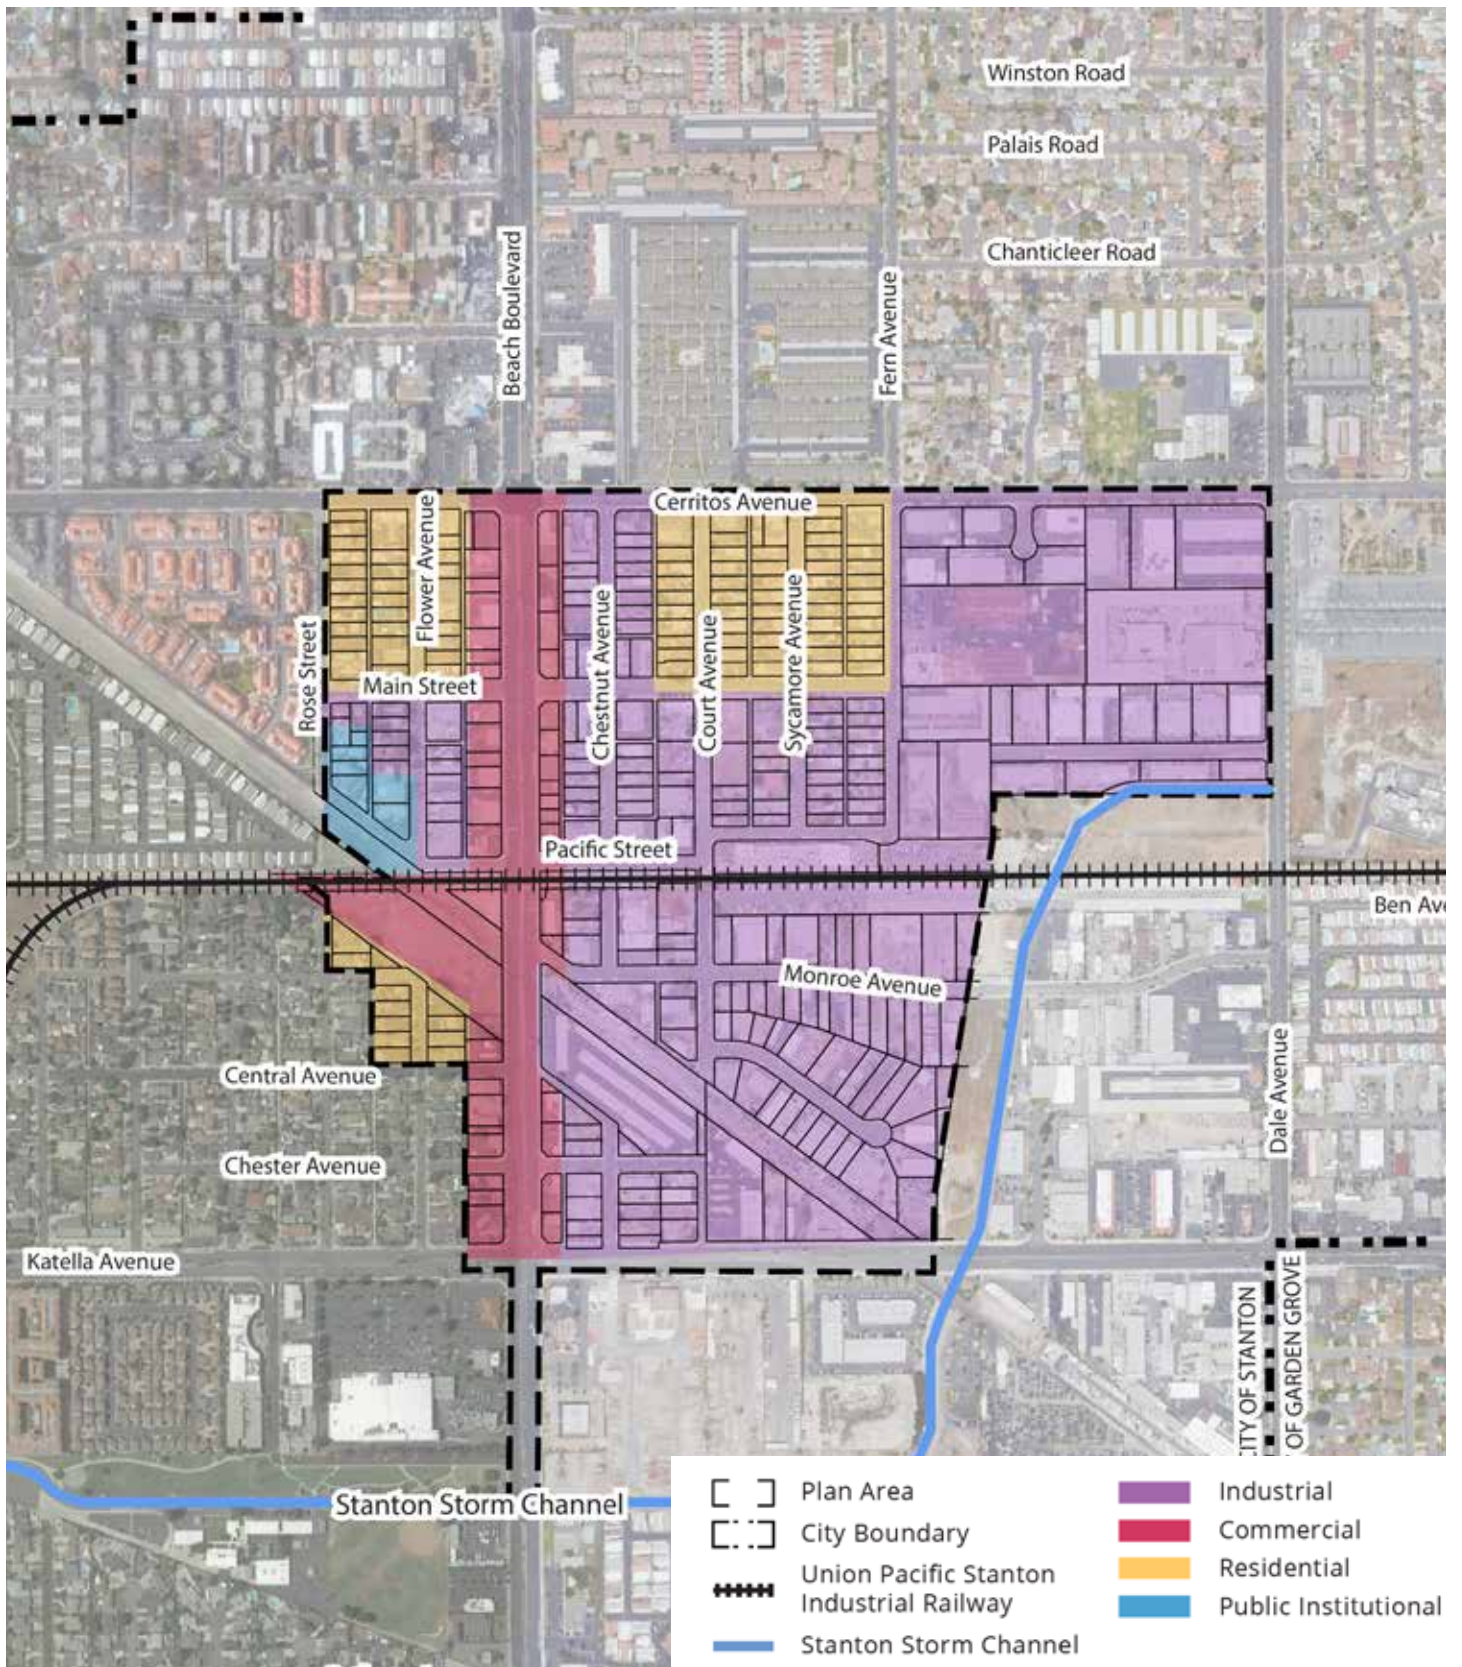

Exhibit 5.1 — Existing Zoning Map

| N.T.S. | Source: Rincon, Google Earth

-
1. Location. Temporary uses must be located upon a parcel containing only non-residential or mixed-use development. Location and display of merchandise must not disrupt normal circulation of the site, nor encroach upon pedestrian walkways, driveways or required landscape areas, or obstruct sight distances or create hazards for vehicles or pedestrians;
 2. Frequency. No more than four (4) temporary commercial uses at one site shall be allowed within any 12-month period;
 3. Existing Parking. The temporary use shall not cause a reduction in available parking to less than eighty-five percent (85%) of parking designated for non-residential uses required in this Specific Plan; and
 4. Outdoor Sales. Temporary outdoor sales, such as grand opening events or other special sales, must be incidental to sales of an existing business on the same site. Special events such as farmer's markets, or mobile vending allowed by *Section 5.4.4.3, Mobile Vending*, are not subject to this requirement.
- b. Temporary uses exceeding three (3) days in duration, or exceeding four (4) distinct occurrences per year, are permitted with a Special Event Permit, approved by the Community and Economic Development Director or his/her designee; and
 - c. Special events that occur on public or private property and are organized by a City agency are not subject to the requirements of this subsection.

5.4.4.2 Outdoor Dining

- a. Outdoor dining within public rights-of-way as an accessory use is permitted with an approved special encroachment permit, and shall comply with Chapter 12.12, Encroachment Permits, of the SMC.
- b. Outdoor dining areas with an approved special encroachment permit must occur within the street or paseo frontage of an existing or proposed food and/or beverage business and be incidental to the operation of that business.
- c. Outdoor dining areas may be located in areas between the property line of the adjacent business and the street curb, as well as in parking areas within the street subject to approval by the Public Works and Engineering and Community and Economic Development Directors.
- d. A minimum six-foot (6') wide pathway, free from any existing obstacles such as street furniture or landscaping, must be maintained and provide a clear linkage to each side of the property. This pathway must be maintained to the satisfaction of the Public Works and Engineering and Community and Economic Development Directors or each of his/her designees.
- e. Establishments serving alcohol must obtain any additional permits required by the Alcoholic Beverage Control Board (ABC) of the State of California.
- f. Any barriers required by the ABC to delineate outdoor dining spaces shall

be designed to be moveable or semi-permanent in nature. These barriers shall attach to the sidewalk in a manner approved by the Public Works and Engineering Director and may be subject to additional criteria as prescribed by the ABC.

5.4.4.3 Mobile Vending

a. **Purpose and Applicability.** The purpose of this subsection is to regulate mobile vendors, such as food trucks, lunch wagons, and any distributor of food/ beverage or retail goods from a motorized vehicle within the rights-of-way of the Plan Area. This subsection does not apply to mobile vendors participating in farmer's markets, street fairs or other special events permitted by the City. Vending from non-motorized vehicles within sidewalks or other paths designated for pedestrian use shall comply with SMC Chapter 5.74, Sidewalk Vending.

b. **Operational Requirements for Mobile Vendors.** All mobile vendors shall comply with the following regulations:

1. Vending is permitted in the rights-of-way only where mobile vendors have received permission from, or are contracted with, adjacent businesses fronting the street;
2. No vending within three hundred feet (300') of any school or park, except at specific parks as discussed per *Section 5.4.4.3.c*;

3. The vendor may stop for a maximum of four (4) hours per stop. A vendor's vehicle may occupy more than one (1) parking space when parking in metered spaces. Normal parking rates for each space wholly or partially occupied shall apply. The vendor must move at least five hundred feet (500') before making another stop in the same area;
4. Tables, chairs, shade structures, and signs are prohibited on streets, parking spaces, and sidewalks;
5. No vending is allowed in congested areas where it may impede or inconvenience the public or create a traffic hazard;
6. The vendor shall provide waste containers and litter removal services in all areas within fifty feet (50') of the vending location and shall properly dispose of all waste;
7. No vendor shall use amplified sound or music to advertise vending services;
8. Vending may only occur when the mobile vending vehicle is legally parked in a roadway. Vendors shall comply with the California Vehicle Code, Title 10 (Vehicles and Traffic) of the SMC, and with all posted parking, stopping, and standing restrictions at all times;
9. Vending within the public right-of-way shall not be conducted before 9:00 A.M. or after 9:00 P.M.;
10. No part of the vehicle, furniture, or other equipment related to the vending operation may encroach onto the

public sidewalk. Vendors may place waste containers on public sidewalks; provided, that a minimum six-foot (6') clearance for pedestrian accessibility is maintained. Vendors are responsible for managing customer queuing and ensuring that a pedestrian thoroughfare is maintained;

11. Mobile vendors shall prohibit loitering by persons within fifty feet (50') of the vending location;
12. Mobile vending vehicles shall park in a manner which ensures that customers are able to order and pick up food safely without stepping into a parking space, a street, or landscaping;
13. The vendor may sell only heated/prepared foods, non-alcoholic beverages, fruits, vegetable, and other consumable food products described in the application filed with the permit officer and approved by the permit officer; and
14. The vendor shall have a business license and an Orange County Health Department Permit, and shall comply with the California Retail Food Code. The vendor shall maintain possession of evidence of applicable licenses and permits at all times during operation and shall furnish evidence of such licenses and permits to city officials or law enforcement upon request.

c. ***Vending upon City Property.*** The Community and Economic Development Director or his/her designee may review and approve mobile vending activities on city parks property operated under the jurisdiction of the Community and Economic Development Department and promulgate rules of operation in these locations, including operation hours.

d. ***Vending upon Private Property.*** All mobile vending activity upon private property shall comply with the following regulations.

1. Vendors shall have the property owner's written authorization to operate on the property in their possession at all times. The written authorization shall describe the approved location and operation schedule;
2. Vendors shall only occupy parking spaces not required to meet the minimum requirements of SMC Chapter 25.70, Off-Street Parking requirements of this Specific Plan, or of other off-site uses if those spaces are leased. This requirement does not apply if the hours of operation for the vendors and permitted uses do not coincide;
3. Vendors shall not occupy any paved area required for loading, circulation or fire access;
4. Tables, chairs and shade structures may be allowed in conjunction with food vendors if they occupy excess parking spaces or areas not required for loading, circulation or fire access, and they are removed daily after use. Tables and

chairs may be on turf or mulched areas; provided, that precautions are taken or improvements are installed to protect and maintain landscaped areas;

5. Up to five (5) vendors may be on any individual property at a time; provided, that vendors do not operate before 8:00 A.M. or after 9:00 P.M.;
6. No vendor shall use amplified sound;
7. Vendors may sell only heated/prepared foods, non-alcoholic beverages, fruits, vegetables or other consumable food products;
8. Mobile vending operations on private properties beyond the requirements of this section may be allowed by a Temporary Use Permit pursuant to Title 25 (Zoning). In addition, the Community and Economic Development Director may require a Conditional Use Permit whenever it appears that mobile vending activities are having an adverse impact on the use of the property or neighboring properties, including traffic, circulation, parking availability, noise, trash, or other reasons of public health or safety; and
9. This subsection does not apply to any private event where a mobile vendor has obtained the property owner's written permission to cater for a private event that is held exclusively on the property and that is not open to the general public.

5.5 Development Standards

Development standards and development intensity within the Specific Plan Area are applied via a tiered system, as described by *Table 5.2 — Development Standards*. For development within the TCMU and ROMU zones, Development Tier 1 is considered “base standard” intensity. Developments may exceed base standard intensity and qualify for higher intensity tiers of development by providing community benefit bonuses as described in *Section 5.5.3, Community Benefit Bonuses*.

5.5.1 General Development Standards

- a. Development projects shall comply with the development standards set forth in *Table 5.2 — Development Standards*. The floor area ratio (FAR) standards shall apply to the non-residential component on a development site; the density standards shall apply to any residential component. The non-residential (FAR) and residential (density) components may be additive. Alley abandonments may be added to the site area of the project.
- b. A developer may elect to develop consistent with either Tier 1, Tier 2, or Tier 3 development standards for live/work, mixed-use, residential, or commercial development within the TCMU and ROMU zones. Projects using Tiers 2 or 3 standards shall provide community benefits as described by *Section 5.5.3, Community Benefit Bonuses*.
- c. All developments within the Plan Area shall undergo a Site Plan and Design Review, as described in *Section 6.9, Review Procedures*.

5.5.2 Additional Regulations

1. **Publicly Accessible Open Space**

Requirements. As depicted in *Exhibit*

3.1 – Land Use Districts and Plan Elements and described in *Section 4.4, Open Space Framework*, the specific plan considers the addition of three public accessible parks into the City of Stanton – Beach Boulevard, the Eastern Neighborhood Park, and the Southern Pocket Park. These parks are conceptual in nature and their location may change, but shall be in the same general location as shown on *Exhibit 3.1* and meet both the intent described in *Section 4.4* and the requirements below.

- a. Parks shall meet the following area requirements:
 - Beach Boulevard Plaza – 7,000 square feet minimum, with 100 of frontage along Beach Boulevard.
 - Eastern Neighborhood Park – 1/2 acre minimum.
 - Southern Pocket Park – 10,000 square feet minimum.
- b. Parks within this section shall have a minimum dimension of at least 30 feet on any side.
- c. Parks within this section are at least 50 percent open to the sky.
- d. Parks within this section are located at ground level with direct pedestrian and ADA access to the adjacent public street;
- e. Parks within this section are unenclosed by any wall, fence, gate, or other obstruction across the subject property;

- f. Parks within this section are open to the public, without charge, each day of the year, except for temporary closures for necessary maintenance, public safety, or special/temporary events;
- g. Parks within this section include at least one pedestrian-scaled amenity such as a water fountain, art, tot-lot, or other focal element; and
- h. Parks within this section shall be owned, operated, and maintained by the developer or property manager in accordance with an approved maintenance plan to be reviewed and approved by the Community and Economic Development Director.

2. **Industrial/Residential Interface.** Any live/work unit or other residential unit on a site abutting an industrial use on an adjoining site shall be set back a minimum of 15 feet from the lot line shared by the property with the industrial use. A minimum six-foot masonry wall or other buffering feature shall be provided.

TABLE 5.2 — DEVELOPMENT STANDARDS

Development Standards	Development within the TCMU and ROMU Zones			TCI Zone	TCR Zone¹	Additional Regulations
	Base Standard (Tier 1)⁷	Increased Intensity per Section 5.5.3 (Tier 2)⁷	Maximum Intensity per Section 5.5.3 (Tier 3)⁷			
a. Maximum Density (applies to residential component)	30 du/ac	50 du/ac	70 du/ac	N/A	6 du/ac	
b. Maximum Floor Area Ratio (applies to non-residential component) ²	0.50	0.75	1.0	1.0	N/A	
c. Maximum Height ³	3 stories 45 feet	4 stories 55 feet	5 stories 65 feet	45 feet	2 stories 32 feet	
d. Setbacks						
Beach Boulevard & Main Street ⁴	5 feet min., 15 feet max.	5 feet min., 15 feet max.	5 feet min., 15 feet max.	N/A	N/A	
All other streets	10 feet	10 feet	15 feet	15 feet	20 feet (except 10 feet on street side)	
Side: Interior	10 feet	10 feet	10 feet	0 feet adjacent to industrial use, 20 feet adjacent to all other uses	5 feet	Setbacks for industrial uses apply only to new construction. Established uses shall be considered conforming with regard to required setbacks.
Rear	20 feet	20 feet	20 feet	0 feet adjacent to industrial use, 20 feet adjacent to all other uses	1 story – 15 feet 2-story – 20 feet	Setbacks for industrial uses apply only to new construction.

TABLE 5.2 — DEVELOPMENT STANDARDS, CONTINUED

<i>Development Standards</i>	<i>Development within the TCMU and ROMU Zones</i>			<i>TCI Zone</i>	<i>TCR Zone¹</i>	<i>Additional Regulations</i>
	<i>Base Standard (Tier 1)⁷</i>	<i>Increased Intensity per Section 5.5.3 (Tier 2)⁷</i>	<i>Maximum Intensity per Section 5.5.3 (Tier 3)⁷</i>			
Minimum Size	3,500 square feet	3,500 square feet	3,500 square feet	10,000 square feet	6,500 square feet	
Width at street frontage	40 feet	40 feet	40 feet	50 feet	65 feet	
g. Maximum Lot Coverage	60% ⁶	60% ⁶	60% ⁶	60%	45%	
h. Minimum Landscape Coverage	15%	20%	20%	15%	50%	
i. Maximum Storefront Size ⁸	6,000 square feet	6,000 square feet	6,000 square feet	N/A	N/A	
j. Maximum Storefront Width ⁸	60 feet	60 feet	60 feet	N/A	N/A	

Notes:

1. Accessory structures within the TCR zone do not need to meet these requirements and will be subject to Chapter 20.410 of the SMC.
2. Parking structures shall be exempt from FAR calculations.
3. Regardless of the proposed benefit tiers, maximum height cannot exceed the limitations identified in Exhibit 5.1 – Maximum Building Heights. Developments that provide the Beach Boulevard Plaza or the Eastern Neighborhood Park meeting the requirements identified in Section 5.5.2 may be granted an additional 2 stories in height and an additional 20 feet to the height limit.
4. Properties fronting onto Beach Boulevard and/or Main Street, a minimum of 35% of the building shall be located within 5 feet of the right-of-way. Portions of buildings with a publicly accessible park, plaza, or outdoor dining area separating the building from Beach Boulevard or Main Street shall not be subject to this requirement.
5. If alley is used for direct access to a garage or parking structure, a stacking analysis shall be required to determine the adequate setback from the gate or other obstruction to ensure that queuing does not occur in the alley. Individual parking spaces that back into the alley may use the entire alley right-of-way as part of the required back-up space.
6. Lot coverage may be increased if additional usable common open space equivalent to the additional lot coverage (in square feet) is provided on a podium-level landscaped courtyard or plaza.
7. Parks described in Chapter 3.4 are only required for Tier 2 and 3 developments.
8. These regulations are only applicable east of Chestnut Avenue

-
3. **Residential Notice.** Residents of new live/work, mixed-use, and standalone residential development projects, whether owners or tenants, shall be notified in writing before taking up residence that they will be living in an urban-type environment, that the noise levels may be higher than in a strictly residential area, and that there may be odors associated with neighboring commercial and industrial uses. The covenants, conditions, and restrictions of any development with a residential use shall require that prospective residents acknowledge the receipt of the written notification. Such written notification shall be provided in residential leases. Signatures shall confirm receipt and understanding of this information.
 4. **Parkland Dedication.** Contribution towards the provision of public parks in the Town Center area can be in the form of dedication of land, provisions of improvements, or payment of fee in excess of that normally required for parks. For new residential development, parkland dedication requirements shall adhere to Chapter 19.42 of the SMC.
 5. **Street Improvements.** Projects are required to fully improve adjacent rights-of-way to the centerline, except along Beach Boulevard. Where infeasible, the applicant shall contribute to a benefit fund or other fee program to fund future rights-of-way improvements.

5.5.3 Community Benefit Bonuses

1. **Purpose and Applicability.** To provide an incentive for development, and in partnership with the City to provide community benefits that would not otherwise be created, the Planning Commission may grant increased FAR, density, and/or building height in return for provision of specific community benefits, as listed below. These benefits shall be in the City's interest and will help implement the General Plan. A variety of objectives are listed to ensure that proposed project features are appropriate for the site and surroundings, and to allow for a wide range of possible project types.
2. **Tier 2 - Number of Community Benefits.**
The Planning Commission may approve Tier 2 projects if it determines that the project includes at least three (3) community benefits from Subsection 4, below. At a minimum, the following elements shall be included: trees, landscaping, seating, bicycle racks, trash and recycling receptacles, and signage that include hours of operation.
3. **Tier 3 - Number of Community Benefits.**
The Planning Commission may approve Tier 3 projects if it determines that the project includes at least four (4) community benefits from Subsection 4, below. At a minimum, the following elements shall be included: trees, landscaping, seating, bicycle racks, trash and recycling receptacles, and signage that includes hours of operation.

4. **Community Benefit Features.** The following optional community benefit features above and beyond the minimum requirements may be requested by applicants, in order to achieve higher tiers of development as described in *Table 5.2 — Development Standards*.

- a. **Paseo Enhancements.** The project includes major pedestrian connections linking the public sidewalk to another public amenity such as a park, trail, or a sidewalk on a different street. Paseos shall be a minimum of 15 feet wide and a minimum length of 100 feet and provide pedestrian amenities such as seating and public art.
- b. **Off-site Streetscape Improvements.** Off-site streetscape improvements beyond those identified in *Subsection 5 of Section 5.5.2*:
 - Streetscapes improvements in excess of minimum improvements required for new development;
 - Curb extensions, improved bicycle and pedestrian crossings/signals, transit/shelters in the public right of way;
 - New pedestrian and bicycle connections to transit facilities, neighborhoods, trails, commercial areas, etc;
 - Removal of existing pedestrian and bicycle barriers (e.g. dead-ends and cul-de-sacs);
 - Upgrading traffic signals to enhance pedestrian and bicycle safety; and
 - Gateway elements, as described in *Section 4.2.4*.

- c. **Pedestrian Connections between Adjacent Properties.** To effectuate the goal of creating walkable and bikeable environments, provide improved pedestrian ways and other paths open to the public that accommodate easy movement across and between properties under separate ownership. To meet this benefit, the pedestrian connection shall have a minimum width of 15 feet.
- d. **Public Parking Facilities.** The project provides publicly available parking to serve area-wide parking needs. To qualify, the parking spaces should be permanently available for public use and subject to easements or restrictions acceptable to the City. To meet this benefit, there shall be a minimum of 20 parking spaces available to the public.
- e. **Community or Neighborhood Center.** The project provides an on- or off-site community or neighborhood center that provides a space to the public for group activities, social support, and/or other purposes. To meet this benefit, the community or neighborhood center shall be at least 2,000 square feet in size.
- f. **Ground-Floor Retail Space.** A mixed-use project shall provide ground-floor commercial or retail space equal to at least 50% or greater of the habitable square footage of the ground-floor. The commercial or retail space shall be oriented towards the street and include a separate entrance to the non-residential use. To meet this benefit, the ground-floor retail space must also have a minimum area of 6,000 square feet of gross leasable area.

-
- g. **Grocery Store.** An operating community or neighborhood grocery store with a gross floor area of at 10,000 square feet. Through a Development Agreement, developer shall ensure continuous operation for a period of at least 15 years (with a vacancy of no more than 6 months per 5 year period).
- h. **Affordable Housing.** The project provides affordable housing to help address the state housing crisis. For Tier 2 projects to meet this benefit a minimum of 5 percent low and 5 percent moderate income housing shall be provided on-site. For Tier 3 projects to meet this benefit a minimum of 5 percent very-low, 5 percent low and 5 percent moderate income housing shall be provided on-site.
- i. **Public Art.** Provide public art of at least 0.5 percent of the project valuation that may be visible to the public and/or enjoyed by the public.
- j. **Flexible (Miscellaneous) Benefit.** The applicant agrees to provide a currently undefined community benefit approved by the Planning Commission that is substantially beyond normal requirements. Examples are inclusion of a child care center in a new project, off-site utility infrastructure improvements above and beyond those required to serve the development, additional funding for City programs

such as contribution to a local façade improvement program, or subsidy for existing commercial tenants or other local small businesses.

5.5.4 Private Open Space

Common open space shall be provided with shared access for all building tenants. These may include, but are not limited to:

- Courtyards;
- Gardens;
- Plazas;
- Dog Runs;
- Pool Decks;
- Rooftop Amenity Areas; and
- Playground Areas.

A minimum amount of private open space shall be provided for any project with a residential use as identified in *Table 5.3 — Private Open Space Requirements*. This requirement may be satisfied through the inclusion of personal open space (such as a private balcony or patio) or common open space (such as a courtyard or a pool).

For the purposes of this standard, an affordable housing project is defined as one that reserves a minimum of 50% of the units for income-restricted households, as defined by California State Law. Provided this definition is met, the usable private open space standard applicable to affordable housing projects would apply to all the units in the project, whether or not they are affordable.

5.6 Allowable Encroachments/ Projections

An encroachment is a permitted allowance into a required ground-floor or upper-level setback or stepback. A projection is an element that is allowed to project above the maximum height limit. In all cases, all encroachments and projections shall comply with the California Building Code (CBC), as well as other applicable codes and regulations such as the American Disability Act.

No projections or encroachments into public rights-of-way shall be permitted without first obtaining an encroachment permit per the SMC Chapter 12.12. Permitted projections are described in Section 20.305.050 of the SMC. Permitted encroachments are described in Section 20.305.070 of the SMC.

TABLE 5.3 — PRIVATE OPEN SPACE REQUIREMENTS

<i>Project Type</i>	<i>Private Open space Requirement</i>
Affordable Housing Projects	150 Square Feet per Unit
All Other Residential Projects	200 Square Feet per Unit

Personal open space shall have a minimum dimension of five (5) feet in depth and eight (8) feet in width. Common open space shall have a minimum dimension of fifteen (15) feet in any direction.

5.5.5 Maximum Building Height

In addition to the regulations within Table 5.2, maximum building height within the Plan Area is depicted upon *Exhibit 5.2 — Maximum Building Heights* and is five stories and 65 feet along Beach Boulevard. Building height is limited to three stories and 45 feet in areas adjacent to a sensitive use, such as an existing residential neighborhood. These sensitive uses are buffered by a minimum of 50 feet.

Developments that provide the Beach Boulevard Plaza or the Eastern Neighborhood Park are permitted to exceed the maximum height limit by an additional two stories and 20 feet.

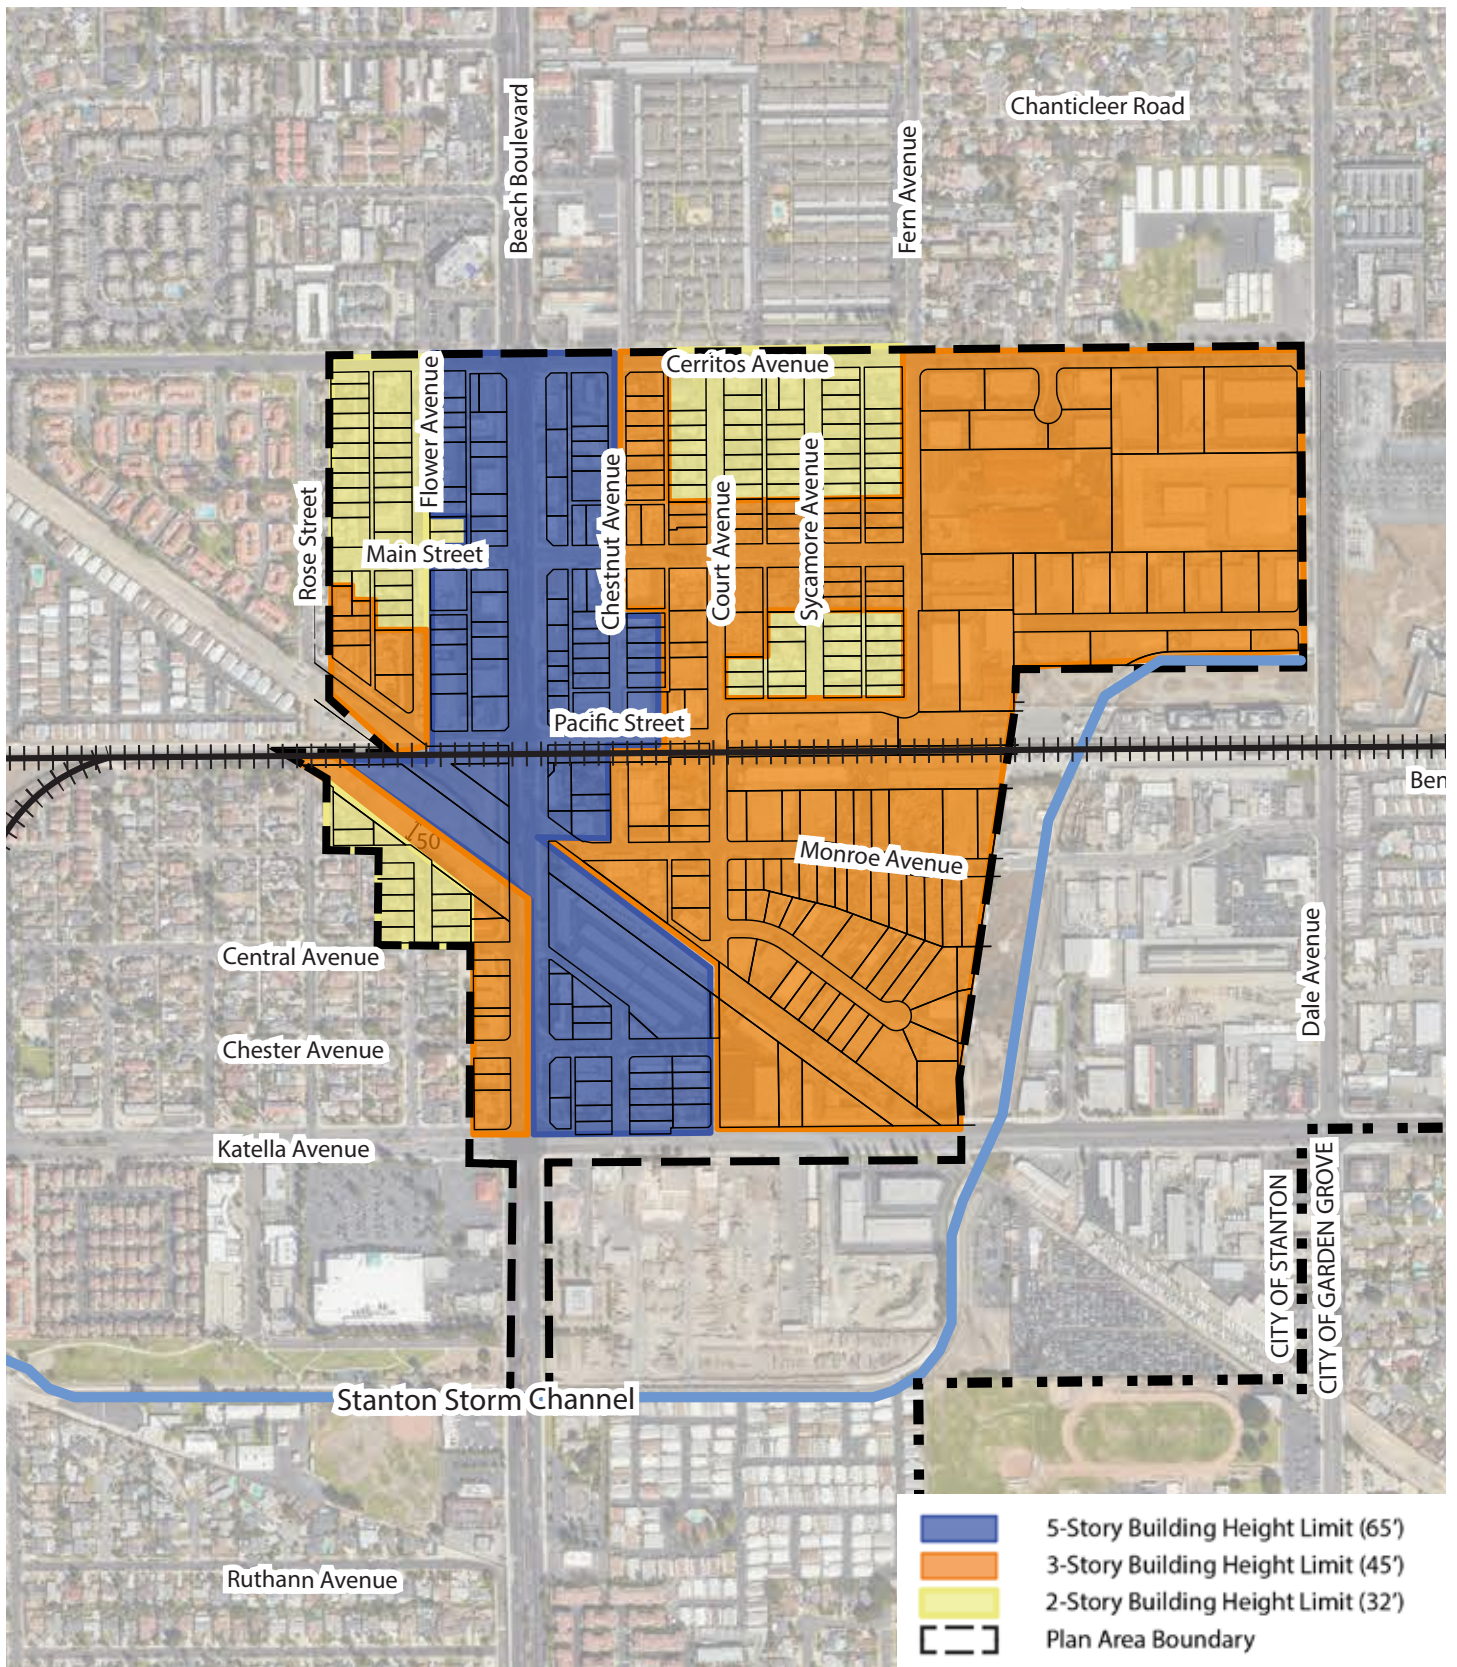

Exhibit 5.2 — Maximum Building Heights

| N.T.S. | Source: KTGY, Google Earth

5.7 Off-Street Parking Standards

- a. **Off-Street Vehicle Parking.** Required off-street parking for residential uses shall be provided as indicated in *Table 5.4 — Off-Street Vehicle Parking*. Parking requirements for single-family and non-residential uses are set forth in Chapter 20.320 of the SMC.

TABLE 5.4 — OFF-STREET VEHICLE PARKING

Number of Bedrooms in a Unit	Minimum number of parking spaces required
0 (Studio, Loft)	1 space per unit (covered)
1	1 space per unit (covered)
2	1.5 spaces per unit (covered)
3 or Greater	2 spaces per unit (covered)
Guest Parking	1 space per 4 units
Live/Work Units	0.5 spaces in addition to the residential parking, above.

- b. **Vehicle Parking Stall Dimensions.** All parking stalls shall have minimum dimensions of eight and one-half (8½) feet in width by seventeen (17) feet in length, except for required accessible parking spaces which shall meet the dimensions required in the California Building Code in effect at the time a project is submitted for City review. No compact parking stalls shall be allowed if only a single dimension stall is used.
- c. **Aisle Dimensions.** All aisles within a parking area shall be as indicated on *Table 5.5 — Parking Aisle Dimensions*.

TABLE 5.5 — PARKING AISLE DIMENSIONS

Parking Space Angle	Required Backup Aisle
90 degree	24 feet
60 degree	18 feet
30 degree	13 feet

- d. **Bicycle Parking.** Bicycle parking shall be provided as indicated on *Table 5.6 — Bicycle Parking Required*.

TABLE 5.6 — BICYCLE PARKING REQUIRED

Residential Land Uses	Minimum Number of Parking Spaces Required
Short-term - Visitor Bicycle Parking	Per CALGreen
Long-term - Resident Bicycle Parking	0.25 spaces/unit or per CAL Green
Commercial and Industrial Land Uses	Minimum Number of Parking Spaces Required
Short-term - Visitor Bicycle Parking	5% of required vehicular parking spaces
Long-Term - Employee / Tenant Bicycle Parking	1% of required vehicular parking spaces or per CALGreen

- Short-term bicycle parking (e.g. bike racks) shall be anchored permanently to the ground within 200 feet of a building's primary entrance.
- Long-term bicycle parking shall be conveniently accessed from the street and occur as one of the following forms:
 - Covered, lockable enclosures with permanently anchored racks for bicycles;
 - Lockable bicycle rooms with permanently anchored racks; and
 - Lockable, permanently anchored bicycle lockers.

e. **Electric Vehicle (EV) Charging Stalls.**

Electric vehicle charging stalls for non-residential uses shall be provided as indicated on *Table 5.7 — Non-residential EV Charging Stalls Required*. For residential uses, 3% of all required parking spaces shall include EV charging stations. In the event that CALGreen requirements are more restrictive, the more restrictive requirements shall apply.

TABLE 5.7 — NON-RESIDENTIAL EV CHARGING STALLS REQUIRED

<i>Total Number of Actual Parking Spaces</i>	<i>Amount of EV Charging Stalls Required</i>
0-9	0
10-25	1
26-50	2
51-75	3
76-100	4
101-150	5
151-200	6
201 and over	3 percent of total, rounded up to nearest whole number.

f. **Surface Parking Landscaping Requirement.**

Landscaping for surface parking lots shall be subject to Section 20.320.110 of the SMC.

g. **Parking Structure Screening Requirements.**

Any exposed elevation of parking structure shall be designed to be compatible with the

architectural character of the development it is associated with or shall be screened from public view. Preferred screening treatments include, but are not limited to:

1. Landscape screening in the form of trees planted at a minimum of every 25 linear feet;
2. Artistic architectural screening techniques, such as metal fins, louvers, or other architectural elements; and
3. The use of appropriate architectural and material treatments such as heavy textured concrete, planters, openings, indentations, and/or projections of exterior walls to provide visual interest.

5.8 Fences and Walls

5.8.1 Height

With the exception of fences and walls within the required front setback, fences and walls up to eight (8) feet in height are permitted, as measured from the lowest adjacent grade. Fences and walls within the front setback are limited to 42 inches in height. Fences of a greater height than herein permitted may be approved with the approval of the Community and Economic Development Director or his or her designee. Fences and walls shall adhere to the other requirements and limitations of the SMC Chapter 20.310.

5.8.2 Measurement of Height.

Except as provided in Section 20.310.040 of the SMC, the height of a fence or wall shall be measured from the lowest adjacent grade.

5.8.3 Traffic Visibility Area

Development proposed adjacent to a public or private street or alley intersection, or the intersection of a driveway with a street, shall be designed to provide an area of unobstructed vision to provide for pedestrian and traffic safety per the regulations of SMC Section 20.305.100.

5.8.4 Nonconforming Fences and Walls

Any fence or wall existing at the effective date hereof whose height exceeds that specified is nonconforming. The City Council may order, by resolution, a nonconforming fence or wall to be caused to conform upon its conclusion that a public hazard or public inconvenience results from such nonconformance.

5.9 Signage

Except as identified below, signage within the Specific Plan area shall comply with SMC Chapter 20.325, Sign Standards.

5.9.1 Exempted Signs

The following signs and/or sign structures are exempt from any sign permit requirements provided, that such signs shall comply with all other applicable requirements of the Specific Plan and SMC.

- a. All signs identified in Section 20.325.050 of the SMC;
- b. Temporary contractor's, future development and building sale signs that comply with the provisions in the SMC; and
- c. The changing of advertising copy or message on bulletin boards, and pageantry, when the basic board or pageantry is permitted under the provisions of this Specific Plan. Messages may be changed digitally or manually.

5.9.2 General Sign Standards

The following requirements shall apply to signs within the Specific Plan.

- a. All signs and community monumentation shall be included as part of an approved Sign Program;
- b. Projecting Signs Clearance. A minimum eight (8) feet vertical clearance is required from the bottom of a projecting sign, marquee, blade or awning to the sidewalk or grade immediately below the sign;

-
- c. Unless otherwise permitted by this Section, signs that include, but are not limited to, rotating, flashing, swinging, blinking, strobing, or otherwise changing appearance are prohibited. In cases where illuminated signs display temperature and time, said sign shall receive City approval and shall include a mechanism to reduce the brightness of said sign when in proximity to a residential neighborhood; and
 - d. All signs may be internally or externally illuminated. All direct light rays from all signs shall be confined onto the Project site and shall not shine directly upon neighboring property. All exposed raceways are prohibited. Temporary lighting such as search or flood lights that are used on a permanent basis are prohibited.
 - e. The Planning Commission may grant approval of signs that do not comply with these regulations through the Sign Program application process; and
 - f. Off-site advertising is permitted as part of pageantry. All pageantry with off-site signage must be located within a commercial area and shall be oriented towards internal uses and shall not be readily visible from properties outside of the Specific Plan Area.

6

IMPLEMENTATION

6.1 General Provisions

The City of Stanton shall administer the provisions of the Town Center Specific Plan in accordance with the State of California Government Code, the Stanton General Plan, the City of Stanton Municipal Code, the Subdivision Map Act, and other applicable State and City regulations.

The Specific Plan development procedures, regulations, standards, and specifications shall supersede the relevant provisions of the City's Municipal Code, as they currently exist or may be amended in the future. Any development regulation and building requirement not addressed in the Specific Plan shall be subject to the City's adopted codes and regulations.

6.1.1 Interpretation

In instances where any section, subsection, sentence, clause, phrase, portion or word contained within The Plan is undefined, unclear or vague, then the Community and Economic Development Director, or their designee, shall make a determination as to its meaning and intent. The Community and Economic Development Director may elect to forward any item to the Planning Commission for final determination. Said determination shall be considered to be final.

6.1.2 Severability

If any section, subsection, sentence, clause, phrase, or portion of this Specific Plan, or any future amendments or additions hereto, is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions of this Specific Plan, or any future amendments or additions hereto. The City hereby declares that it would have adopted these requirements and each sentence, subsection, clause, phrase, or portion or any future amendments or additions thereto, irrespective of the fact that any one or more sections, subsections, clauses, phrases, portions or any future amendments or additions thereto may be declared invalid or unconstitutional.

6.1.3 Compliance with the Adopted Specific Plan

The City of Stanton shall monitor compliance with the adopted Specific Plan and mitigation measures at these stages, as appropriate:

- During the review and approval of subsequent Site Plan and Design Reviews, Tentative Maps, Conditional Use Permits, and other permits, as appropriate.
- During the review of construction documents, and prior to the issuance of grading and building permits.
- Prior to the issuance of a certificate of occupancy for any building within the Specific Plan area.
- Prior to the recordation of any final map within the Specific Plan boundaries.

6.1.4 Implementing Development Process Approvals

Table 6.1 — Development Process Approvals, depicts the process of entitlement through the City of Stanton for various applications and action. *Table 6.1* applies only to future developments being implemented within the Town Center Specific Plan area.

The following administrative standards governing implementation of future development applications (including Site Plan and Design Reviews, Tract Maps, Parcel Maps, Variances, and Conditional Use Permits) for future developments within the Plan Area.

- a. No development shall occur or building permits issued within the adopted Plan Area until the proposed development is reviewed

by the City's Planning Division and found to be consistent with the adopted Specific Plan. Criteria for review and approval of proposed development shall include, but not be limited to the following:

1. Conformance with the land use designation;
 2. Conformance with the specific development standards and regulations, goals, and policies of the Specific Plan; and
 3. Conformance with the intended density/intensity of the Plan Area.
- b. All Tentative Tract or Parcel Maps shall be consistent with this Specific Plan, as adopted.

6.2 Enforcement

This Specific Plan shall generally be enforced in a manner identical to the prevailing City of Stanton procedure(s) to enforce the provisions of the zoning and subdivision codes. The City or Stanton Community & Economic Development Department shall enforce the Development Regulations and Design Guidelines set forth herein, in accordance with the State of California Government Code, Subdivision Map Act, the Stanton General Plan, and the City of Stanton Municipal Code. The development procedures, regulations, standards, and specifications contained in the adopted Specific Plan shall supersede the relevant provisions of the City's Municipal Code, as they currently exist or may be amended in the future.

6.3 Nonconforming Uses

Nonconforming industrial uses within the Plan Area are governed by *Section 5.4.3* of the TCSP. All other nonconforming uses within the Plan Area shall be as described Chapter 20.620, Nonconformities, of the SMC.

Site Plan and Design Reviews, including deviation from objective design standards (TCSP Section 6.8(d))	●		

6.4 Project Phasing

Redevelopment of the Plan Area will take place over time. As the majority of the parcels within the Plan Area are privately owned, redevelopment upon these parcels will be initiated by the property owner in accordance with the regulations of this Specific Plan.

Streetscaping improvements may be initiated by the City of Stanton as funds are made available. The City of Stanton may implement comprehensive street improvements to any or all rights-of-way within the Plan Area.

6.5 Financing

A successful mixed-use district requires a high standard of street and landscaping improvements in order to create a positive multi-modal experience and to implement the vision of the Specific Plan. These types of improvements will be initiated by the City of Stanton and as a part of the redevelopment process of the district.

Several types of financing strategies and tools are available for financing district-wide improvements. It is anticipated that the Plan Area will be redeveloped over time using a combination of financing strategies and tools which could include, but are not limited to, the strategies indicated in *Sections 6.5.1 through 6.5.4*.

6.5.1 Bonds

Street and landscaping improvements within the public right-of-way may be funded via the issuance of municipal bonds.

6.5.2 Assessment District

Special assessment districts, such as those permitted by the Municipal Improvement Act of 1913, the Improvement Bond act of 1915, and the Lighting and Landscape Maintenance Act of 1972, provide methods of leveraged financing whereby a public entity determines an area in which the provision of facilities will benefit real property.

A special assessment district may be created for the Plan Area to cover improvements to properties benefitting from infrastructure and streetscaping improvements. This financing tool can be used for public improvements that directly benefit specific properties that are assessed to pay for the improvements at no risk to public agency general funds.

6.5.3 Maintenance or Community Benefit District

- a. A maintenance district could be created to fund the ongoing maintenance of the streetscape and open space within the Plan Area.
- b. A community benefit district could be created to fund improvements and the ongoing maintenance of the streetscape and open space within the Plan Area. Community benefit districts may be administered by a private corporation or by the City of Stanton.

6.5.4 Infrastructure Financing

- a. The storm drain and flood control systems shall be funded and constructed by the developer, Community Facilities District (or other similar mechanism), or some combination thereof.
- b. The backbone water facilities and infrastructure shall be owned, operated, and serviced by the Golden State Water District. Any necessary improvements to the water system as a result of development shall be borne by the developer.
- c. The backbone sewer facilities and infrastructure shall be owned and operated by the City of Stanton. Any necessary improvements to the sewer system as a result of development shall be borne by the developer.
- d. Telephone, electricity, gas lines, and cable television lines shall be installed and maintained by the appropriate utility companies.

6.6 Maximum Development Analyzed per CEQA

Table 6.2 — Maximum Development Analyzed per CEQA, depicts the maximum allowed overall development within the Plan Area determined by the environmental analysis performed for this Specific Plan. As the Plan Area is developed over time, remaining development capacity shall be tracked by the City of Stanton. A sample tracker is provided in Appendix B of this Specific Plan. The City may elect to track development within this Specific Plan or as a separate methodology.

Development exceeding the thresholds identified in *Table 6.2* is permitted; however, additional environmental review may be required. For residential development within the Plan Area, dwelling units identified in *Table 6.2* are “base units.” Affordable housing bonuses pursuant to Chapter 20.330 of the SMC and/or the California Government Code may allow developments to exceed both the maximum allowable new development threshold for new dwelling units identified in *Table 6.2*, as well as maximum development standard densities identified in *Table 5.2*. These bonuses do not affect non-residential development capacity within the Plan Area.

TABLE 6.2 — MAXIMUM DEVELOPMENT ANALYZED PER CEQA	
Land Use	Maximum Allowable New Development
Multi-family Residential	1,534 dwelling units

Upon performing additional environmental review, *Table 6.2* may be amended upon certification of the appropriate environmental document pursuant to CEQA and at the discretion of the Community and Economic Development Director or his/her designee, per *Section 6.7.1(h)* of this Specific Plan.

6.7 Specific Plan Adjustments and Amendments

6.7.1 Minor Adjustments to the Specific Plan

Minor adjustments to the plans, guidelines, regulations, and standards contained in this Specific Plan may be approved at the discretion of the Community and Economic Development Director; provided, however, that such deviations are deemed to be in substantial conformance with this Specific Plan and are not detrimental to the public health, safety and welfare.

Minor adjustments to the adopted Specific Plan must be consistent with the purpose and intent of the originally approved Specific Plan. Any decisions made by the Community and Economic Development Director may be appealed to the Planning Commission. Decisions of the Planning Commission may be appealed to the City Council. Decisions by the City Council shall be deemed to be final. The following modifications constitute “minor adjustments” to the approved Town Center Specific Plan:

- a. *Table 6.2, — Maximum Allowable Development Analyzed per CEQA*, may modified with administrative review with the approval of the Community and Economic Development Director or his or her designee, if the required CEQA review demonstrates that the Plan Area may accommodate additional development;
- b. Minor changes to the circulation plan to accommodate actual conditions on-site or

modify ingress and egress locations, or to respond to new information that was not available at the time the Specific Plan was originally prepared;

- c. Minor changes to the design of the roadway cross-sections, provided that the streets have adequate capacity to handle the anticipated volumes of traffic and the design changes are deemed acceptable by the City's Traffic Engineer;
- d. Minor modifications to the architectural or landscape design guidelines;
- e. Minor modifications to the water, sewer, and/or drainage plan;
- f. Addition of new information or data to the Specific Plan maps, figures, and/or text which does not change the effect of any concepts or regulations.

6.7.2 Specific Plan Amendments

Modifications to the Plan not identified in Section 6.7.1, *Minor Adjustments to the Specific Plan*, require a Specific Plan Amendment.

- a. The City of Stanton, a property owner within the Plan Area, or designee shall have the authority to initiate an amendment to the adopted Specific Plan at any time. No authorization by City staff, the Planning Commission, or the City Council shall be necessary to initiate a Specific Plan Amendment to the Town Center Specific Plan.

-
- b. Said amendment shall not require a concurrent General Plan Amendment unless it is determined by the City of Stanton that the proposed amendment would be inconsistent with the General Plan goals, objectives, policies, or programs.
 - c. All Specific Plan Amendments shall be subject to the requirements of CEQA and any applicable City of Stanton environmental guidelines.
 - d. The Planning Commission and City Council shall each hold a public hearing on the proposed amendment of The Plan. Any hearing may be continued from time to time as deemed appropriate and necessary by the Planning Commission and City Council.
 - e. The Planning Commission shall review all proposed amendments to the adopted Specific Plan. Upon the close of the required public hearing, the Planning Commission shall act by resolution to recommend to adopt, reject, or modify the proposed Specific Plan Amendment and forward its recommendation and findings to the City Council for action.
 - f. The City Council shall review the Planning Commission's findings and

recommendations. Upon the close of the required public hearing, the City Council shall act to adopt, reject, or modify the proposed Specific Plan Amendment.

- g. Prior to approving or conditionally approving any Specific Plan Amendment, the Planning Commission and City Council must make that the following findings regarding the Amendment:
 - It is consistent with the goals and policies of the City of Stanton General Plan;
 - It is consistent with the goals and policies of the Specific Plan and with its purposes, regulations, standards, and guidelines;
 - Results in development of desirable character that will be compatible with existing and proposed development in the surrounding neighborhoods; and
 - Respects the aesthetic assets of the community consistent with economic realities.

6.8 Review Procedures

- a. Site Plan and Design Review Required. Site Plan and Design Review is required for all projects within the Specific Plan area pursuant to Chapter 20.530 (Site Plan and Design Review) of the SMC.
- b. Residential and mixed-use projects meeting eligibility requirements for Senate Bill (SB) 35 are not subject to discretionary design review, and are instead only subject to the objective design standards found within this Specific Plan and the SMC. A summary of eligibility requirements for SB 35 under California Government Code (CGC) Section 65913.4 are as follows:
 1. The project is a multi-family housing development consisting of two or more units. (CGC subsection (a)(1)).
 2. The project dedicates a minimum of 50% of units as housing affordable to households making below 80% of the area median income (AMI)(CGC subsection (a)(4)(B)).
 3. The site is in an “urbanized area” or “urban cluster” as designated by the Census (CGC subsection (a)(2)(A)).
 4. At least 75% of the perimeter of the site adjoins parcels currently or formerly developed with “urban uses” (CGC subsection (a)(2)(B), (h)(8)).
 5. Mixed-use developments must propose at least 2/3rds square footage as residential uses.
 6. The project must not include a subdivision of land, subject to certain exemptions (CGC subsection (a)(9)).
 7. The project must be consistent with objective design review standards and objective zoning standards at the time the application is submitted. Objective standards are those that require no personal, subjective or discretionary judgement, and must be verifiable by reference to an external and uniform source knowable prior to submittal. (CGC subsection (a)(5)).
 8. The project must be located outside of the following areas (CGC subsection (a)(6)-(a)(7)):
 - Coastal zone
 - Prime farmland or farmland of statewide importance
 - Wetlands, as defined under federal law
 - Earthquake fault zones
 - High or very high fire hazard severity zones
 - Hazardous waste sites
 - FEMA designated flood plain or floodway
 - Protected species habitat or lands designated for conservation in a habitat conservation plan
 - Lands under a conservation easement
 - A site that would require the demolition of any housing subject to recorded rent restrictions, housing

subject to rent control, a historic structure on a local, state, or federal register, or housing occupied by tenants within the past 10 years.

- A site that previously contained housing occupied by tenants within the past 10 years.
- A parcel of land governed by the Mobilehome Residency Law, the Recreational Vehicle Park Occupancy Law, the Mobilehome Parks Act, or the Special Occupancy Parks Act.

9. The entire development must be a “public work” for purposes of prevailing wage law, or construction works shall be paid at least the prevailing wage within the area (CGC subsection (a)(8)(A)).
10. The project proponent must certify that “a skilled and trained workforce” will be used to complete the development if any of the following conditions in *Table 6.3, Skilled and Trained Workforce Applicability*, apply.

- c. Projects that meet the eligibility requirements for SB 35 may utilize an “streamlined” review process. Applicants shall submit to the City a memo summarizing project compliance with the eligibility requirements of SB 35. City staff shall review project compliance with the Government Code through a ministerial process. Deviations from the Specific Plan’s objective design standards are permitted, at the discretion of the Community and Economic Development Director. SB 35 eligible projects are exempt from the California Environmental Quality Act (CEQA).
- d. Planning Commission Approval of Community Benefits Bonuses. The Planning Commission shall be the final review authority for an application for Tier 2 and Tier 3 projects.
- e. Should SB 35 be updated or amended, or should the State Department of Housing and Community Development modify the City of Stanton housing determination, changes in state law or determination shall supersede this Section.

TABLE 6.3 — SB 35 SKILLED AND TRAINED WORKFORCE APPLICABILITY

<i>Bay/Coastal Counties >225K in population</i>	<i>Non-Bay/Coastal Counties <550K in population</i>
Until 2022: Projects >75 Units	Until 2020: Projects >75 Units
After 2022: Projects >50 Units	2020-2022: Projects >50 Units
---	After 2022: Projects >25 Units

6.9 Main Street Parking Program

During the initial outreach process, stakeholders expressed a preference for a shared parking facility that serves businesses located on and around the Main Street corridor.

A future shared parking program will be explored by the City. Aspects of this parking program could include allowing businesses on Main Street to count street-parking towards their parking requirements, or the establishment of a surface or garaged shared parking facility to serve the Main Street corridor.

Program details, design, and funding mechanisms shall be examined by the City of Stanton in the future.

6.10 Impact Fees

Parks Fees

In-lieu parkland dedication fees collected within the Plan Area as a result of new development shall be collected and administered pursuant to the City of Stanton Park In-Lieu Fee Program, as described in SMC Chapter 19.42.

Parking District Fees

Fees collected within the Plan Area as a result of a future parking program serving Main Street and the surrounding businesses shall be collected and administered pursuant to the implementation procedures of that future parking program.

This page intentionally blank

APPENDIX A — GENERAL PLAN CONSISTENCY ANALYSIS

This Appendix contains a consistency analysis between The Town Center Specific Plan and the goals and policies contained in the City of Stanton General Plan as required by Section 65454 of the California Government Code. As shown by this consistency analysis, The Town Center Specific Plan is consistent with the City of Stanton General Plan.

Chapter 2 — Community Development

Policy		Consistency Analysis
GOAL LU-1.1: CREATE AN ECONOMIC AND FISCAL BALANCE OF RESIDENTIAL, COMMERCIAL AND INDUSTRIAL USES.		
Strategy LU-1.1.1	Encourage land uses which maximize economic development and enhance the quality of life.	The Specific Plan is designed to encourage a desirable mix of commercial, residential, mixed-use, and industrial uses. Design Guidelines and Development Regulations encourage high-quality development and enhanced quality of life within Stanton. Objective 12 of the Specific Plan encourages economic development and incentivize investing in infill development.
Strategy LU-1.1.2	Ensure adjacent land uses are compatible with one another.	The Town Center Specific Plan includes a Land Use Plan (Exhibit 3.1) where sensitive uses such as single-family residential uses are buffered from the impacts of industrial and commercial development by limiting uses and intensity surrounding the single-family residential areas.

Policy		Consistency Analysis
GOAL LU-2.1: ENCOURAGE LAND USES WHICH PROVIDE EMPLOYMENT OPPORTUNITIES FOR STANTON RESIDENTS.		
Strategy LU-2.1.1	Encourage revitalization and intensification of underutilized commercial uses within the city through the redevelopment process.	The Specific Plan includes a series of land use policies that encourage revitalization and mixed-use redevelopment, and encourages intensification of underutilized commercial development that intensifies existing uses and better responds to changing economic market conditions. The Specific Plan's second objective is to maintain existing businesses while encouraging a broader mix of uses and encouraging the revitalization of existing industrial uses.
GOAL LU-2.2: PROMOTE QUALITY, CONTEMPORARY INDUSTRIAL DEVELOPMENT.		
Strategy LU-2.2.1	Develop an incentive program and other measures to encourage "business park" environments and improve project design.	Section 4.7.2.3 of the Specific Plan includes design guidelines for future industrial development within the Plan Area to be of high-quality designs and the development regulations included allow for only light-industrial uses that have fewer impacts on surrounding uses.
GOAL LU-3.1: A RANGE AND BALANCE OF RESIDENTIAL DENSITIES WHICH ARE SUPPORTED BY ADEQUATE CITY SERVICES.		
Strategy LU-3.1.1	Preserve single-family residential neighborhoods	The Specific Plan maintains the existing single-family residential land uses and preserves the low-density character of these neighborhoods. The Specific Plan also includes buffers from neighboring commercial and industrial uses by limiting uses and intensity surrounding the single-family residential areas. Objective 1 of the Specific Plan aims to preserve existing residential neighborhoods and create a vibrant, pedestrian friendly environment.

Policy		Consistency Analysis
Strategy LU-3.1.2	Encourage infill and mixed-use development within feasible development sites.	Mixed-use development is encouraged by the Specific Plan. The Retail Oriented Mixed-Use (ROMU), Town Center Mixed-Use (TCMU) land uses encourage mixed uses, with the ROMU and TCMU zones including residential uses. Also, Objective 12 of the Specific Plan encourages economic development and incentivize investing in infill development.
GOAL LU-5.1: ENCOURAGE THE CONSOLIDATION OF EXISTING NON-CONFORMING LOTS IN COMMERCIAL, INDUSTRIAL, AND MEDIUM AND HIGH-DENSITY RESIDENTIAL AREAS.		
Strategy LU-5.1.1	Increase the non-financial incentives for lot consolidation in selected industrial, commercial, and medium and high-density residential areas.	Section 2.2.2 of the Specific Plan includes new regulations that encourages private development to consolidate lots for industrial, commercial, high-density residential, and mixed-use development. Lot consolidation aligns with the Specific Plans seventh objective of creating a true “main street” through focusing on developing in a centralized area.
GOAL LU-7.1: PROVIDE INFRASTRUCTURE TO CREATE FOUNDATION FOR FUTURE DEVELOPMENT.		
Strategy LU-7.1.2	Ensure adequate funding for the financing of public facilities and capital improvements related to new development.	Chapter 6 of the Specific Plan identifies various funding mechanisms that may be utilized to ensure adequate funding for public facilities, capital improvement, and expansion of future services. This encourages Objective 11 of the Specific Plan to ensure adequate and efficient infrastructure to support existing and future development.

Chapter 3 — Community Design

Policy		Consistency Analysis
GOAL CD-1.1: PROMOTE QUALITY DEVELOPMENT AND DESIGN THAT PRESERVES AND ENHANCES A POSITIVE AND UNIQUE IMAGE OF STANTON, AND FOSTERS A SENSE OF COMMUNITY PRIDE.		
Strategy CD-1.1.1	Identify a desired image and vision for the city of Stanton that can provide the basis for the design of new development, redevelopment, and all other facets of the city's physical environment.	Preliminary phases of the Specific Plan included extensive outreach and visioning efforts, ensuring the identity of the Plan Area and future development patterns reflect the desires of residents and stakeholders within Stanton as detailed in the project vision and objectives in Section 1.1.1.
Strategy CD-1.1.2	Ensure that new development within the city contributes to the image of Stanton in a positive way and places a high standard of architecture and site design.	Chapter 4 of the Specific Plan includes Design Guidelines and Development Regulations that require future projects to include high-quality architecture, site design, and orientation.
GOAL CD-1.2: PROMOTE AN ATTRACTIVE STREETScape AND PUBLIC RIGHT-OF-WAY, ESPECIALLY ALONG MAJOR PRIMARY AND SECONDARY CORRIDORS, THAT IS CONSISTENT WITH THE DESIRED VISION AND IMAGE OF STANTON.		
Strategy CD-1.2.1	Create a unified and consistent streetscape.	Section 4.3 <i>Streetscape Design Guidelines</i> of the Specific Plan includes guidelines for streetscape within the public rights-of way, and includes recommendations for streetscaping enhancements along major arterials, such as Beach Boulevard, as well as other streets within the Plan Area.

Policy		Consistency Analysis
GOAL CD-1.3: PROMOTE COMPATIBILITY BETWEEN LAND USES, INCLUDING EXISTING, REDEVELOPED, AND NEW USES, TO FURTHER COHESIVENESS ALONG THE CITY'S PRIMARY AND SECONDARY CORRIDORS.		
Strategy CD-1.3.1	Discourage placement of incompatible land uses next to each other.	The Town Center Specific Plan includes varying land uses and development regulations that eliminate incompatible uses being located next to each other and minimizes the effects of commercial and industrial development upon residential uses (Table 5.1—Permitted Land Uses). Industrial uses are envisioned to be those compatible with residential uses.
Strategy CD-1.3.2	Support redevelopment of existing commercial, industrial, and residential structures and site improvements.	By increasing the allowed intensity within the Plan Area, the Specific Plan supports the redevelopment of existing commercial, industrial, and residential parcels. In an effort to facilitate the redevelopment of the commercial and industrial areas within the Plan area, section 3.5.3 <i>Alley Vacations</i> of the Specific Plan encourages the vacation and reuse of alleys within the areas.
GOAL CD-2.1: INCREASE THE NUMBER OF PUBLIC SPACES WITHIN THE CITY, AS WELL AS THE QUALITY OF EXISTING AND NEW PUBLIC SPACES.		
Strategy CD-2.1.1	Encourage the provision of public spaces as part of private development and redevelopment projects.	The Specific Plan includes requirements for additional public open space. Section 3.4 and 4.4 of the Specific Plan includes an open space framework that requires the future dedication of new open spaces within the Plan Area. Properties outside of these locations would be encouraged to include new open spaces.

Policy		Consistency Analysis
Strategy CD-2.1.2	Encourage a variety of artwork and landscape treatments in city public spaces, including parks, courtyards, and plazas.	The Specific Plan encourages public art for private development by providing guidelines and encouraging their installation throughout Chapter 4. Public art is identified as one of the community benefit bonuses in section 5.5.3.
GOAL CD-4.1: CREATE A WELL-CONNECTED, MULTI-MODAL URBAN ENVIRONMENT THAT INCREASES MOBILITY FOR ALL STANTON RESIDENTS, WHETHER THEY CHOOSE OR ARE REQUIRED TO TRAVEL THROUGH THE CITY BY CAR, BICYCLE, FOOT, OR PUBLIC TRANSPORTATION MODES.		
Strategy CD-4.1.1	Promote a pedestrian friendly environment with attractive, walkable neighborhoods and commercial areas.	The Specific Plan includes improvements to the City's circulation system and streetscape that increase overall access, safety, and encourage multi-modal transit throughout the Plan Area. Through encouraging efficiency between trip origin and trip destination in the plan area, the number of vehicle trips and durations will reduce (Objective 10).
Strategy CD-4.1.2	Promote a pedestrian friendly environment with attractive, walkable neighborhoods and commercial areas.	The Specific Plan encourages a mix of uses that increases walkability and promotes a pedestrian-friendly environment by providing guidelines and standards related to future development, particularly pedestrian safety. Streetscaping improvements proposed within the Plan Area encourage walkability by providing an aesthetically appealing pedestrian experience (Section 3.5.4).

Policy		Consistency Analysis
Strategy CD-4.1.3	Provide for points of connection between various modes of transportation, including pedestrian, bicycle, and public transportation connections.	Section 3.5 of the Specific Plan includes improvements to the circulation network and streetscape that will facilitate multi-modal transportation throughout the Plan Area. The Specific Plan also includes additional connections between existing circulation facilities to increase access (e.g. Court Street crossing).

Chapter 4 — Economic Development

GOAL ED-1.2: PREVENT RETAIL LEAKAGE – ENCOURAGE STANTON RESIDENTS TO SHOP WITHIN THE CITY BY PROVIDING A RETAIL AND SERVICE MARKET THAT CAN COMPETE WITH NEW COMMERCIAL DEVELOPMENTS IN SURROUNDING CITIES.

Strategy ED-1.2.1	Improve the competitiveness of shopping centers within Stanton through the provision of a greater mix of available retailers and more attractive retail centers.	The Specific Plan includes providing a new set of development regulations and design guidelines to existing retail areas, as well as updating uses to allow for a greater mix of businesses. This will create opportunities for new commercial development to better respond to changing demands in the retail space, as well as encourage more attractive retail centers. Additionally, this will provide for more locally-serving retail and commercial developments (Objective 4).
--------------------------	--	---

Policy		Consistency Analysis
GOAL ED-1.3: IMPROVE THE QUALITY OF INDUSTRIAL USES LOCATED WITHIN THE CITY.		
Strategy ED-1.3.1	Direct industrial business attraction efforts at light manufacturing and flex tech industrial uses.	Chapter 4 of the Specific Plan includes Design Guidelines and Development Regulations for the existing industrial area that prohibit incompatible development with neighboring residential neighborhoods. The provisions within the Specific Plan allows for light-industrial and tech-oriented industrial uses that are appropriate for anticipated mixed-use developments within the Plan Area.
GOAL ED-2.2: PROMOTE ECONOMIC REVITALIZATION AT KEY LOCATIONS WITHIN THE CITY, SPECIFICALLY THE MAJOR ARTERIALS BEACH BOULEVARD AND KATELLA AVENUE, WHICH CARRY COMMUTERS AND OTHER TRAVELERS THROUGH STANTON.		
Strategy ED-2.2.1	Encourage mixed-use development along major corridors, specifically Beach Boulevard and Katella Avenue, as well as at major city intersections and activity nodes.	The Specific Plan includes mixed-use zones for the portions of the Specific Plan along Beach Boulevard, Katella Avenue, and Main Street, as seen in Exhibit 3.1.
Strategy ED-2.2.2	Improve the look and character of commercial developments located along Beach Boulevard and Katella Avenue, or at other major arterials, corridors and intersections.	Chapter 4 of the Specific Plan includes Design Guidelines and Development Regulations that require high-quality architecture for future developments and improvements to existing businesses. Special treatments are required at major gateway intersections.

Policy		Consistency Analysis
GOAL ED-3.2: AVOID FURTHER OVER-SATURATION OF CONVENIENCE USES AND STRIP COMMERCIAL CENTERS.		
Strategy ED-3.2.1	Strengthen Stanton's mix of retailers to improve shopping and employment opportunities for residents.	Chapter 5 of the Specific Plan includes providing a new set of development regulations and design guidelines to existing retail areas, as well as updating uses to allow for a greater mix of businesses. This will create opportunities for new commercial development to better respond to changing demands in the retail space, as well as encourage more attractive retail centers.

Chapter 5 — Infrastructure and Community Services

GOAL ICS-1.1: PROVIDE AN EFFICIENT, COHERENT, AND WELL-MAINTAINED TRANSPORTATION NETWORK THAT ADEQUATELY SUPPORTS THE GENERAL PLAN LAND USE CONCEPT.		
Strategy ICS-1.1.2	Improve efficiency of the city's existing transportation network.	The Specific Plan includes the potential for the creation of a parking district within the Plan Area. Additionally, Section 2.2.2 of the Specific Plan includes new connections to increase multi-modal accessibility, via active and inactive rail corridors traversing the Plan Area.
GOAL ICS-1.2: ENCOURAGE ALTERNATIVES TO THE PRIVATE AUTOMOBILE BY INCREASING ACCESS AND OPPORTUNITIES TO PUBLIC TRANSIT, AS WELL AS TO OTHER ALTERNATIVE MODES OF TRANSPORTATION, SUCH AS BIKING AND WALKING.		
Strategy ICS-1.2.2	Proactively plan for the reuse of the Pacific Electric and Union Pacific Corridors as a light rail facilities, or other alternative transportation use, such as a regional bikeway and linear park.	As described in section 2.3.3 of the Specific Plan, the Plan incorporates the Pacific Electric and Union Pacific rail corridors into a light rail network or part of the open space networks. The Specific Plan also allows for the potential rail station at the vacant parcel along Beach Boulevard.

Chapter 6 — Community Health and Safety

Policy		Consistency Analysis
GOAL CHS-3.3: ESTABLISH LAND USES WHICH ARE COMPATIBLE WITH NOISE LEVELS WITHIN THE COMMUNITY.		
Strategy CHS-3.3.1	Land use planning decisions directly relate to potential noise impacts. Therefore, careful consideration of noise impacts should be a part of all land use decisions.	The Specific Plan includes new land uses and development regulations that takes noise and other potential impacts into consideration by requiring buffers and limiting the types of industrial uses allowed to minimize land use incompatibilities. Such as allowing larger massings and wall planes on buildings near the railroad right-of-way (Section 4.7.3.5).

Chapter 7 Housing Element

GOAL H-1: PROVIDE FOR A HOUSING STOCK OF SUFFICIENT QUANTITY COMPOSED OF A VARIETY AND RANGE OF TYPES AND COSTS		
Strategy H-1.1.1	Review and revise development standards, as appropriate, to facilitate construction of a range of housing types.	Chapter 5 of the Specific Plan includes new development standards that allow for a variety of medium- and higher-density housing types, as well as mixed-use housing, that may appeal to a range of demographics.
Strategy H-1.1.2	Maximize the development potential of vacant and underutilized land.	The Specific Plan increases the development potential of vacant and underutilized land within the Plan area and allows for a variety of uses, maximizing the development potential (Section 2.3.1).

Policy		Consistency Analysis
GOAL H-3.1: RETENTION OF EXISTING HOUSING STOCK AND HOUSING OPPORTUNITIES FOR STANTON RESIDENTS.		
Strategy H-3.1.1	Ensure long term affordability of housing units.	Chapter 5 of the Specific Plan encourages the development of affordable housing. These affordable units will include long-term affordability covenants to ensure they are preserved for an extended period of time.
GOAL H-4.1: ACCESS TO DECENT AND SUITABLE HOUSING OPPORTUNITIES FOR ALL STANTON RESIDENTS.		
Strategy H-4.1.1	Promote homeownership opportunities.	Section 4.7.2.1 of the Specific Plan increases the allowed housing intensity within the Plan area and allows for a variety of housing types, including single-family homes, townhomes and condominiums, thereby promoting homeownership opportunities.
Strategy H-4.1.3	Provide opportunities for the development of housing for large families.	Section 5.5 of the Specific Plan increases the allowed housing intensity within the Plan area and allows for a variety of housing types, including single-family homes, townhomes and condominiums to accommodate large families.
Strategy H-4.1.7	Provide opportunities for the development of housing for extremely low-income households.	Chapter 5 of the Specific Plan encourages the development of affordable housing, including those for extremely low-income households. These affordable units will include long-term affordability covenants to ensure they are preserved for an extended period of time.

Policy		Consistency Analysis
GOAL H-6.1: PROMOTE ENERGY CONSERVATION, AND GREEN BUILDING TECHNIQUES FOR RESIDENTIAL CONSTRUCTION AND REHABILITATION PROJECTS		
Strategy H-6.1.1	Encourage use of energy-efficient design and appliances.	Chapter 4 Design Guidelines included in the Specific Plan encourages energy efficiency of new developments through encouraging solar panels, low-flow water fixtures, energy efficient appliances sustainable methods of construction, amongst others.

1.0 INTRODUCTION

1.1 PURPOSE OF THE SUBSEQUENT INITIAL STUDY

The purpose of this Subsequent Initial Study (IS) to the 2008 General Plan Environmental Impact Report (GP EIR) is to (1) describe the proposed Town Center Specific Plan Project (hereinafter referred to as the “Project”), which would be implemented in the City of Stanton and (2) provide an evaluation of potential environmental impacts associated with the Project’s construction and operation. The Project, consisting of approximately 156.9 acres, proposes an increase of 139 dwelling units (excluding Accessory Dwelling Units [ADUs] located on single-family properties).

This Subsequent IS has been prepared pursuant to the California Environmental Quality Act (CEQA), as amended (Section 21000 et. seq. of the *Public Resources Code*) and in accordance with the State CEQA Guidelines (Section 15000 et. seq. of the *California Code of Regulations*).

Pursuant to Section 15367 of the State CEQA Guidelines, the City of Stanton (hereinafter referred to as the “City”) is the lead agency for the Project. The lead agency is the public agency that has the principal responsibility for carrying out or approving a project that may have a significant effect on the environment. The City of Stanton, as the lead agency, has the authority for Project approval and certification of the accompanying environmental documentation.

1.2 CALIFORNIA ENVIRONMENTAL QUALITY ACT COMPLIANCE

In accordance with CEQA and the State CEQA Guidelines, a Subsequent IS has been prepared for the proposed Project and its associated discretionary approvals. The Subsequent IS indicates that the potentially significant impacts of the Project can be reduced to less than significant levels with implementation of mitigation measures, and therefore, the Project requires preparation of a Subsequent Initial Study/Mitigated Negative Declaration (IS/MND).

CEQA Guidelines Section 15162, Subsequent EIRs and Negative Declarations, states the following with respect to a Subsequent Negative Declaration:

- (a) When an EIR has been certified or a negative declaration adopted for a project, no subsequent EIR shall be prepared for that project unless the lead agency determines, on the basis of substantial evidence in the light of the whole record, one or more of the following:
 - (1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
 - (2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or Negative Declaration due to the involvement of new

significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

- (3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the Negative Declaration was adopted, shows any of the following:

- (A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;
- (B) Significant effects previously examined will be substantially more severe than shown in the previous EIR;
- (C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or
- (D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

- (b) If changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency shall prepare a subsequent EIR if required under subdivision (a). Otherwise the lead agency shall determine whether to prepare a subsequent negative declaration, an addendum, or no further documentation.

The City has determined that a Subsequent IS/MND is the appropriate CEQA document for the proposed Project, because changes outside the scope of the original project (i.e., 2008 General Plan) are proposed that were not covered in the 2008 General Plan EIR (GP EIR), which accounted for 1,399 multi-family units and associated environmental impacts within the TCSP area. As this document is focusing only on the additional 139 units, the analysis herein is tiering off from the 2008 GP EIR. The Subsequent IS indicates that the potentially significant impacts of the Project can be reduced to less than significant levels with implementation of mitigation measures, and therefore, the Project requires preparation of a Subsequent MND. This Subsequent IS/MND serves as the environmental document that presents the analysis of Project impacts on each of the environmental issue areas in the CEQA Environmental Checklist provided in Section 4.0. This document will serve to inform City decision makers, representatives of affected trustee and responsible agencies, and other interested parties of the potential environmental effects that may occur with approval and implementation of the proposed Project.

1.3 PROJECT SUMMARY

1.3.1 LOCATION

The approximate 156.9-acre Project site is in the northern portion of the City of Stanton, which is generally situated south of the cities of Anaheim and Buena Park, west of Garden Grove, and north of Westminster. The Specific Plan area is generally bounded by Cerritos Avenue to the north, Dale Avenue to the east, Katella Avenue to the south, and Rose Street to the west.

Regional access to the Specific Plan area is provided primarily by Beach Boulevard (State Route [SR] 39), which runs in a north-south direction through the Specific Plan area, and Katella Avenue, which runs in an east-west direction south of the Specific Plan area. Beach Boulevard provides direct access to SR 22 to the south and SR 91 to the north, and Katella Avenue provides direct access to Interstate 5 (I-5) to the east. See Exhibit 1-1, Regional Location and Local Vicinity.

1.3.2 PROJECT PROPONENT

City of Stanton
7800 Katella Avenue
Stanton, CA 90680
Contact: Irving Anaya
Senior Planner (714) 890-4291

1.3.3 EXISTING GENERAL PLAN AND ZONING

Land Use Designation: Town Center Mixed-Use, High-Density Residential, Medium-Density Residential, Industrial, and Public/Institutional

Zoning Classification: “Industrial General” (IG). Businesses fronting Beach Boulevard are generally zoned “Commercial Neighborhood” (CN) and “Commercial General” (CG)

1.3.4 EXISTING SETTING

Project Site

The Project area currently consists of a mix of land uses. Light and heavy industrial uses, such as vehicle storage yards and pipe manufacturing business, are generally located in the eastern portion of the Specific Plan area. Small commercial and automotive-related uses are located along Beach Boulevard. Single-family residential uses are generally west of the businesses that front Beach Boulevard and in the northern portion of the Specific Plan area between Court and Fern Avenues, though some multi-family and industrial uses are also within these neighborhoods.

The Orange County Fire Authority (OCFA) operates Fire Station No. 46 near the Specific Plan's westerly boundary. Additionally, the Project area includes a vacant triangular-shaped parcel at the southwest corner of Beach Boulevard and Pacific Street. There is no park space within the Specific Plan area.

The Specific Plan area is bisected by an active railroad spur (i.e., Stanton Industrial Lead) and a former Pacific Electric right-of-way (ROW). The spur runs through the Specific Plan area in an east-west direction, then turns south and continues to the City of Huntington Beach. The said spur connects to the Santa Ana Industrial Lead that parallels I-5. The former Pacific Electric ROW runs diagonally in a northwest-southeast direction through the Project area.

Surrounding Land Uses

Existing land uses surrounding the Specific Plan area include a mix of small commercial centers along Beach Boulevard; single-family and multi-family residential uses to the north; a Southern California Edison (SCE) substation and industrial uses to the east; industrial and commercial uses, including ORCO Block and Hardscape and a shopping center anchored by Food 4 Less, to the south; single- and multi-family residential uses to the west; and Stanton City Hall, Stanton Library, and an Orange County Sheriff Substation to the southwest. See Exhibit 1-2, Aerial Photograph.

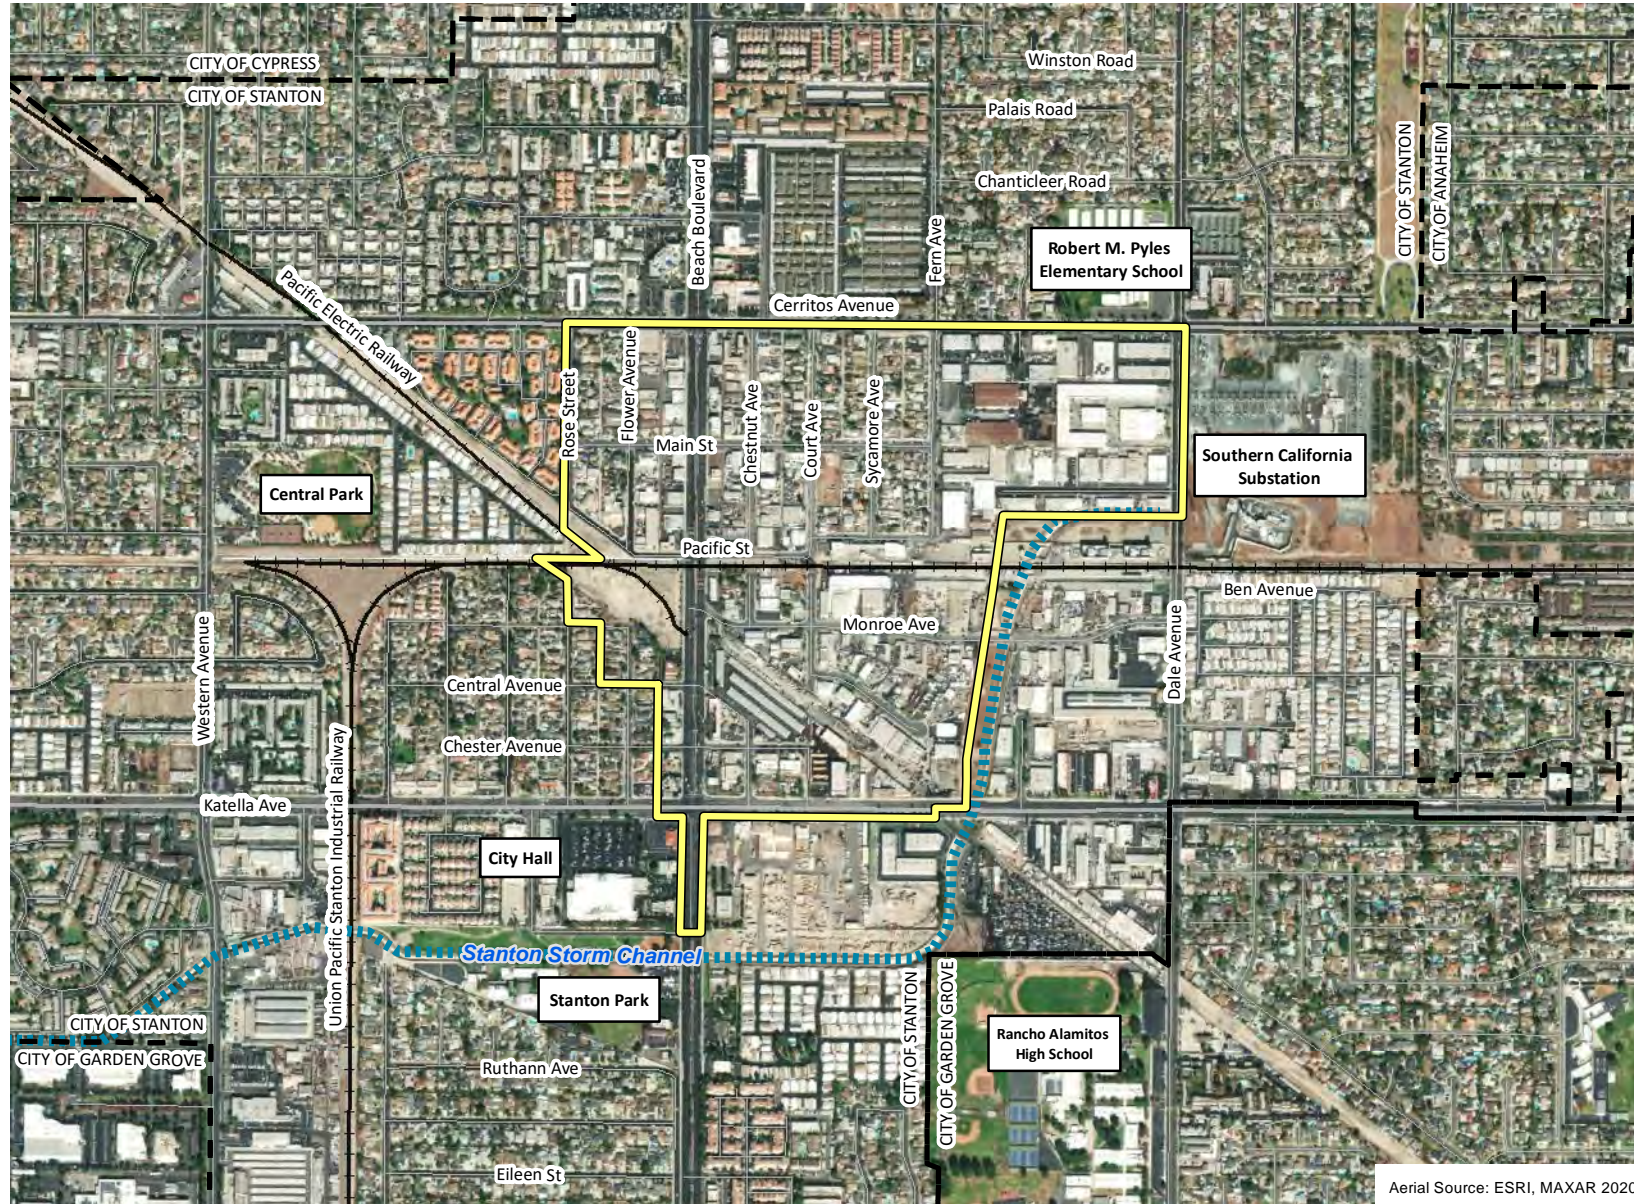

1.3.5 PROPOSED DEVELOPMENT

The proposed Town Center Specific Plan, comprised of 156.9 acres, is intended to improve, enhance, and supplement the land uses within the Specific Plan area by creating a mixed-use, pedestrian-friendly environment. The Project proposes an increase of 139 multi-family dwelling units, excluding ADUs located on single-family properties.

With the Project, the Beach Boulevard corridor would be transformed into a mixed-use and pedestrian-friendly community while protecting the existing single-family uses. New gateways are required for corner properties, and opportunities would be created along Beach Boulevard at its intersections with Cerritos Avenue and Katella Avenue to identify the arrival into the Stanton Town Center. The Specific Plan will include policies, guidelines and standards designed to sustain the vision for the Town Center Specific Plan and ensure that future projects stay consistent with the goals and objectives and maintain the intended image for the area.

While the Specific Plan area would increase residential multifamily units, retail/commercial, and light industrial uses through new development and redevelopment, it should be noted that, this Subsequent IS/MND analyzes the potential impacts of the additional 139 multi-family dwelling units only. The existing General Plan for the City of Stanton allows for a total of 1,399 multi-family units within the Town Center Specific Plan area. Since 2008, 4 units have been built, resulting in a remaining capacity of 1,395 multi-family units. The Town Center Specific Plan would allow for an additional 139 units, increasing the remaining capacity to 1,534 multi-family units. The 2008 General Plan Environmental Impact Report (EIR) analyzed the potential impacts emanating from development of 1,399 units. As such,

D:\Projects\3KTG010400\MND\ex1_aerial_20211011.mxd

- Railways
- City Boundary

Aerial Source: ESRI, MAXAR 2020

Aerial Photograph

Town Center Specific Plan Project

Exhibit 1-2

only the additional 139 units are the topic of the environmental analysis in this Subsequent IS/MND.

The anticipated build-out of the Town Center Specific Plan is expected to occur over a long period of time and could be beyond the build-out horizon identified in the 2008 General Plan. As such, a phased CEQA analysis is appropriate, allowing portions of the Specific Plan to be implemented, as they are ready to be constructed.

1.4 SUMMARY OF FINDINGS

Based on the environmental checklist form prepared for the Project and supporting environmental analysis (Section 4.0), the proposed Project would have no impact or less than significant impacts in the following environmental areas: Aesthetics, Agriculture and Forestry Resources, Air Quality, Energy, Greenhouse Gas (GHG) Emissions, Land Use and Planning, Mineral Resources, Public Services, Recreation, Transportation, and Wildfire. The Project has the potential to have significant impacts on the following topics unless the recommended mitigation measures described herein are incorporated into the Project: Biological Resources, Cultural Resources, Geology and Soils, Hazards and Hazardous Materials, Hydrology and Water Quality, Noise, Population and Housing, Transportation, Tribal Cultural Resources, and Utilities and Service Systems.

According to the State CEQA Guidelines, and as determined by the City, it is appropriate to prepare a Subsequent IS/MND for the proposed Project because changes outside the scope of the original project are proposed that were not covered in the GP EIR. Additionally, preparation of a Subsequent IS/MND, not an EIR, is appropriate, as after incorporation of the recommended mitigation measures, potentially significant environmental impacts would be reduced to a level considered less than significant.

1.5 PROJECT APPROVAL

This Subsequent IS/MND has been submitted to potentially affected agencies and individuals. The Notice of Intent (NOI) to adopt the Subsequent IS/MND, as well as the environmental documentation are also available on the City of Stanton website (https://www.stantonca.gov/departments/community_development/planning_division/stanton_town_center_specific_plan.php) for review.

A 30-day public review period, in accordance with Section 15073 of the State CEQA Guidelines, has been established for the Subsequent IS/MND beginning on November 15, 2023 and ending on December 14, 2023. During review of the Subsequent IS/MND, affected public agencies and the interested public should focus on the document's adequacy in identifying and analyzing the potential environmental impacts and the ways in which the potentially significant effects of the Project can be avoided or mitigated. Comments on the

Subsequent IS/MND and the analysis contained herein must be received by 5:00 PM on December 14, 2023, and should be addressed to:

City of Stanton
Economic and Community Development Department
Attention: Irving Anaya
Senior Planner
7800 Katella Avenue
Stanton, CA 90680
ianaya@stantonca.gov

Following receipt and evaluation of comments from agencies, organizations, and/or individuals, the City will determine whether any substantial new environmental issues have been raised. If so, further documentation such as an Environmental Impact Report (EIR) or an expanded Subsequent IS/MND may be required. If not, the Project and the environmental documentation are tentatively scheduled to be submitted to the Stanton Planning Commission and City Council for consideration.

1.6 ORGANIZATION OF THE INITIAL STUDY

The Subsequent IS/MND is organized into sections, as described below.

- **Section 1.0: Introduction.** This section provides an introduction, Project summary, and overview of the conclusions in the Subsequent IS/MND.
- **Section 2.0: Project Location and Environmental Setting.** This section provides a brief description of the Project location, and a description of the existing conditions of the Project site and vicinity.
- **Section 3.0: Project Description.** This section provides a description of the Project components, a statement of purpose and need, and necessary discretionary approvals.
- **Section 4.0: Environmental Analysis.** The completed Environmental Checklist Form from the State CEQA Guidelines provides an overview of the potential impacts that may or may not result from Project implementation. The Environmental Checklist Form also includes “mandatory findings of significance”, as required by CEQA.
- **Section 5.0: References.** This section identifies the references used to prepare the Subsequent IS/MND.

2.0 PROJECT LOCATION AND ENVIRONMENTAL SETTING

2.1 PROJECT LOCATION

The approximate 156.9-acre Project site is in the northern portion of the City of Stanton, which is generally situated south of the cities of Anaheim and Buena Park, west of Garden Grove, and north of Westminster. The Specific Plan area is generally bounded by Cerritos Avenue to the north, Dale Avenue to the east, Katella Avenue to the south, and Rose Street to the west. See Exhibit 1-1, Regional Location and Local Vicinity, in Section 1.0 of this Subsequent IS/MND.

2.2 BACKGROUND

The existing General Plan for the City of Stanton allows for a total of 1,399 multi-family units within the Town Center Specific Plan area. Since 2008, 4 units have been built, resulting in a remaining capacity of 1,395 multi-family units. The Town Center Specific Plan would allow for an additional 139 units, increasing the remaining capacity to 1,534 multi-family units. The 2008 General Plan Environmental Impact Report (GP EIR) analyzed the potential impacts emanating from development of 1,399 units. While the Specific Plan area would increase residential multifamily units, retail/commercial, and light industrial uses through new development and redevelopment, this Subsequent IS/MND analyzes the potential impacts of the additional 139 multi-family dwelling units only.

This Subsequent IS/MND has been prepared in accordance with the requirements of CEQA and its guidelines for implementation. The 2008 GP EIR is hereby incorporated by reference and supports this Subsequent IS/MND.

Where appropriate, mitigation measures and regulatory requirements are provided to reduce Project impacts to a less than significant level.

2.3 EXISTING SITE AND AREA CHARACTERISTICS

2.3.1 SITE ACCESS

Regional access to the Specific Plan area is provided primarily by Beach Boulevard or SR 39, which runs in a north-south direction through the Specific Plan area, and Katella Avenue, which runs in an east-west direction south of the Specific Plan area. Beach Boulevard provides direct access to SR 22 to the south and SR 91 to the north, and Katella Avenue provides direct access to Interstate 5 (I-5) to the east.

2.3.2 EXISTING DEVELOPMENT CONDITIONS

The Project area currently consists of a mix of land uses. Industrial uses, such as lumber supply yards, mini storage facilities, chemical supply factories, autoshops, and steel fabrication, are generally located in the eastern and southeastern portion of the Specific Plan area. These industrial buildings are concrete tilt-up structures with long, unbroken facades

and flat roofs. Commercial uses are also along Main Street. Small commercial and automotive-related uses are located along Beach Boulevard in addition to retail uses.

Existing residential uses include single-family or two-story multi-family development and are generally located west of the businesses that front Beach Boulevard and in the northeastern and northwestern portions of the Specific Plan area, along Rose Street, Flower Avenue, Chestnut Avenue, Court Avenue, Sycamore Avenue, and Fern Avenue.

The Orange County Fire Authority (OCFA) operates Fire Station No. 46 near the Specific Plan's westerly boundary. Additionally, the Project area includes a vacant triangular-shaped parcel at the southwest corner of Beach Boulevard and Pacific Street.

The Orange County Transportation Authority (OCTA) owns multiple parcels and parcel corridors within the Project area; some are used for storage facilities and a vacant parcel was recently occupied by a recreational vehicle (RV) rental and sales facility, called Share My Coach. The Specific Plan area is bisected by an active railroad spur (i.e., Stanton Industrial Lead) and a former Pacific Electric ROW. The spur runs through the Specific Plan area in an east-west direction, then turns south and continues to the City of Huntington Beach. The said spur connects to the Santa Ana Industrial Lead that parallels I-5. The former Pacific Electric ROW runs diagonally in a northwest-southeast direction through the Project area. Exhibit 1-2, in Section 1.0, depicts an aerial view of the site.

There is little to no landscaping within street rights-of-way in residential areas. Currently, there is no trails within the Specific Plan area; however, several potential future trails are identified by City documents following storm drain canals and existing rail ROWs. Additionally, the Specific Plan area does not include any park facilities park space to meet the existing demand of the residential uses.

Exhibit 2-1, Opportunities and Challenges, identifies the existing and potential opportunities and challenges to development withing the Specific Plan area.

2.3.3 SURROUNDING LAND USES AND DEVELOPMENT

Existing land uses surrounding the Specific Plan area include a mix of small commercial centers along Beach Boulevard; single-family and multi-family residential uses to the north; an Southern California Edison (SCE) substation, SCE easement, and industrial uses to the east; industrial and commercial uses, including ORCO Block and Hardscape and a shopping center anchored by Food 4 Less, to the south; single- and multi-family residential uses to the west; and Stanton City Hall, Stanton Library, and an Orange County Sheriff Substation to the southwest. See Exhibit 1-2, Aerial Photograph, in Section 1.0, of this Subsequent IS/MND.

Opportunities and Challenges

Town Center Specific Plan Project

Exhibit 2-1

PSOMAS

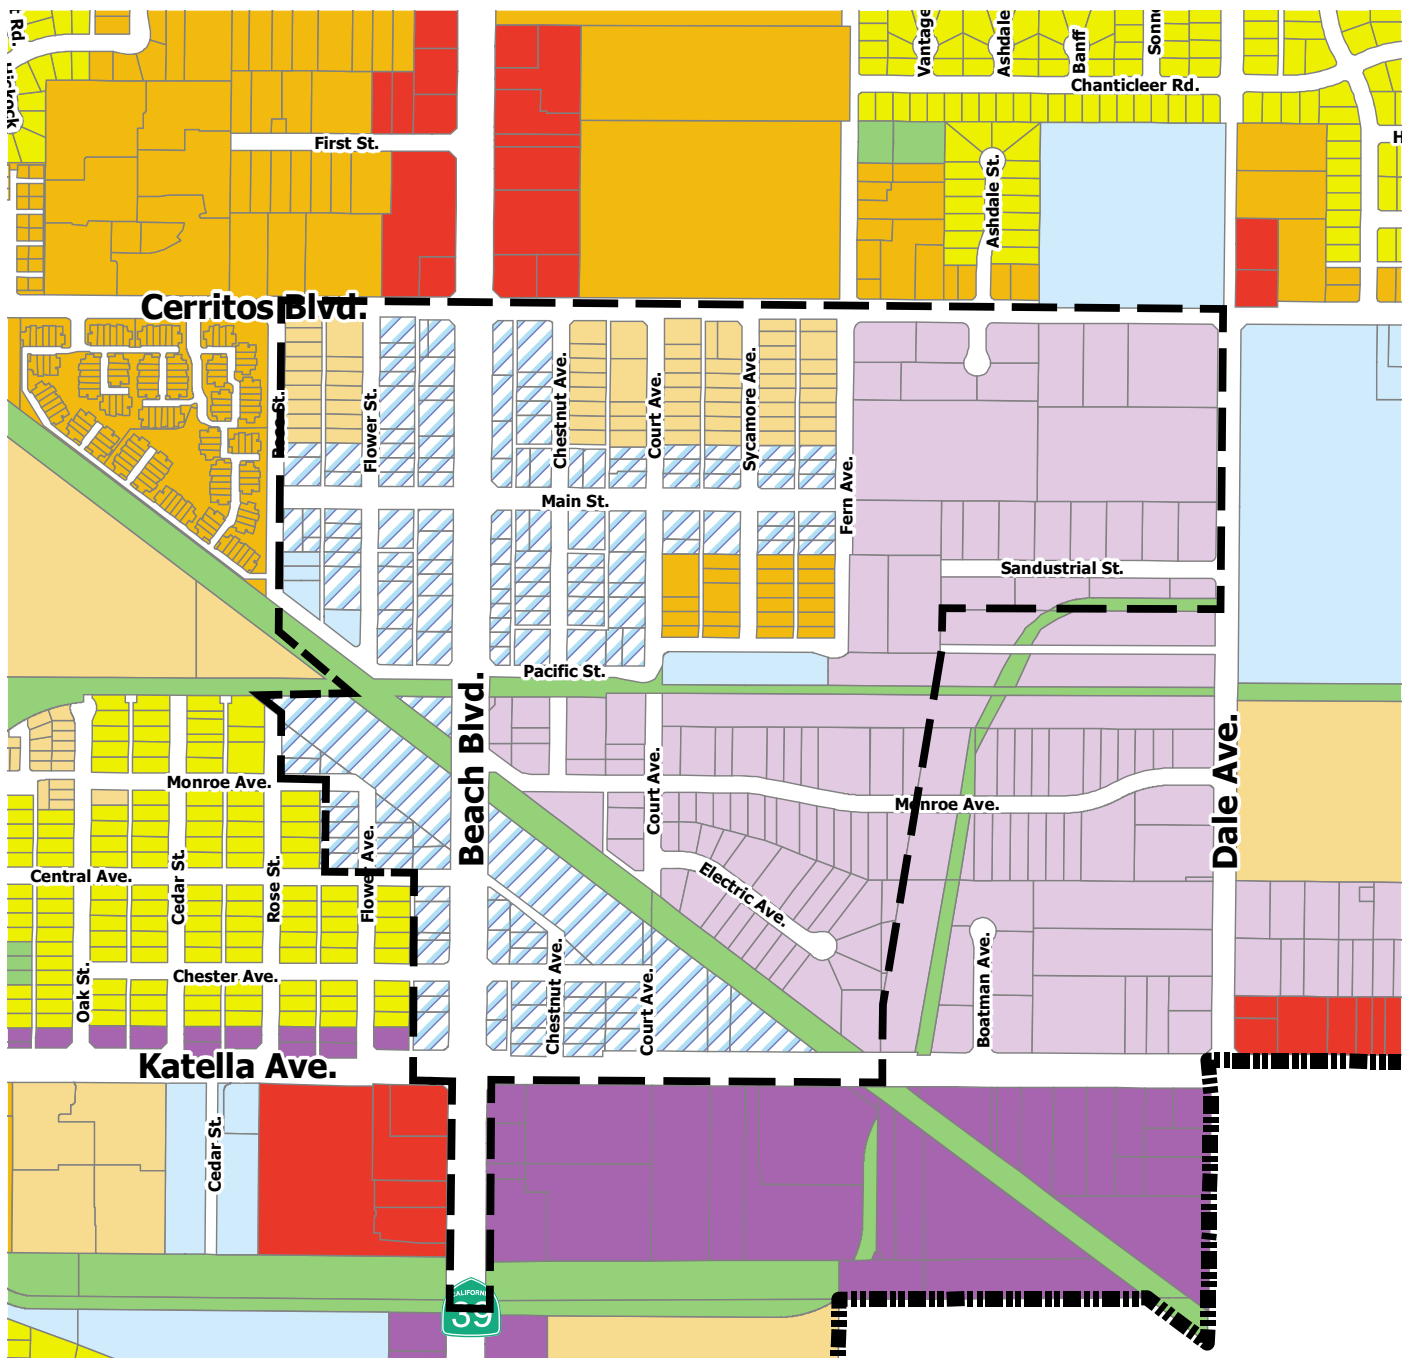

2.4 PLANNING CONTEXT

2.4.1 GENERAL PLAN DESIGNATION

The proposed Project area is currently designated in the Stanton General Plan Land Use Diagram as Town Center Mixed-Use District, High-Density Residential, Medium-Density Residential, Industrial, Public/Institutional and Open Space. These designations are shown on Exhibit 2-2, Existing General Plan Land Use Designations.

2.4.2 ZONING

The Specific Plan area currently consists of different zones. Most of the Specific Plan area is zoned “Industrial General” (IG). Businesses fronting Beach Boulevard are generally zoned “Commercial Neighborhood” (CN) and “Commercial General” (CG). Existing residential neighborhoods are zoned “Medium Density Residential” (RM). Small portions of the Specific Plan area are zoned “Open Space/Buffer” (OS), “Parks and Recreation” (PR), and Public Institutional” (PI). The existing zoning is shown on Exhibit 2-3, Existing Zoning Designations. Proposed Zoning Designation is depicted on Exhibit 2-4.

- | | | |
|----------------------------------|----------------------------------|--------------------|
| Low Density Residential | South Gateway Mixed Use District | Open Space |
| Medium Density Residential | Town Center Mixed Use District | Stanton City Limit |
| High Density Residential | General Commercial | Specific Plan Area |

3.0 PROJECT DESCRIPTION

3.1 TOWN CENTER SPECIFIC PLAN

3.1.1 VISION AND PURPOSE

The Town Center Specific Plan, comprised of 156.9 acres, is intended to improve, enhance, and supplement the land uses within the Specific Plan area by creating a mixed-use, pedestrian-friendly environment.

The Specific Plan includes a detailed description of the proposed land uses, infrastructure, and implementation requirements for future development within the Town Center Specific Plan area. The Design Guidelines of the Specific Plan assist in creating a consistent urban form and landscape character for private and public development, and the Development Standards establish permitted uses, building setbacks, and general development criteria and requirements for new development.

The Town Center Specific Plan is consistent with the applicable goals and policies of the City of Stanton General Plan. However, the provisions and regulations contained in the Specific Plan would supersede the provisions and regulations of the Stanton Municipal Code (SMC) in instances of conflict. Where the Specific Plan is silent on an issue, the goals, objectives and implementing actions contained in the SMC would apply.

The Specific Plan is designed with flexibility, considering changes in the economy may alter demand for various residential, commercial, and industrial development scenarios over time. As an implementation too, the Town Center Specific Plan:

- Implements a cohesive, long-range plan for logical growth that is compatible with existing adjacent neighborhoods.
- Establishes development standards for permitted residential, mixed-use commercial, and industrial land uses.
- Ensures adequate circulation and infrastructure networks exist within the Specific Plan area and emphasizing transit and pedestrian mobility.
- Assures appropriate financing for community facilities, including circulation and streetscape improvements, domestic water, urban runoff and drainage facilities, and sewage disposal.
- Develops a plan and identifies open space opportunities within the Specific Plan area.
- Examines economic and market conditions in the Specific Plan area and implements a plan that is economically feasible and that responds to anticipated future economic conditions.

More specifically, the Town Center Specific Plan proposes to create a district within the City of Stanton that promotes redevelopment incentivizes new mixed-uses while preserving the existing residential neighborhoods and single-family uses and enhancing the district's

industrial character. Further, the Specific Plan would include policies, guidelines and standards designed to sustain the vision for the Town Center Specific Plan and ensure that future projects are consistent with the goals and objectives and maintain the intended image for the area.

3.1.2 PROJECT OBJECTIVES

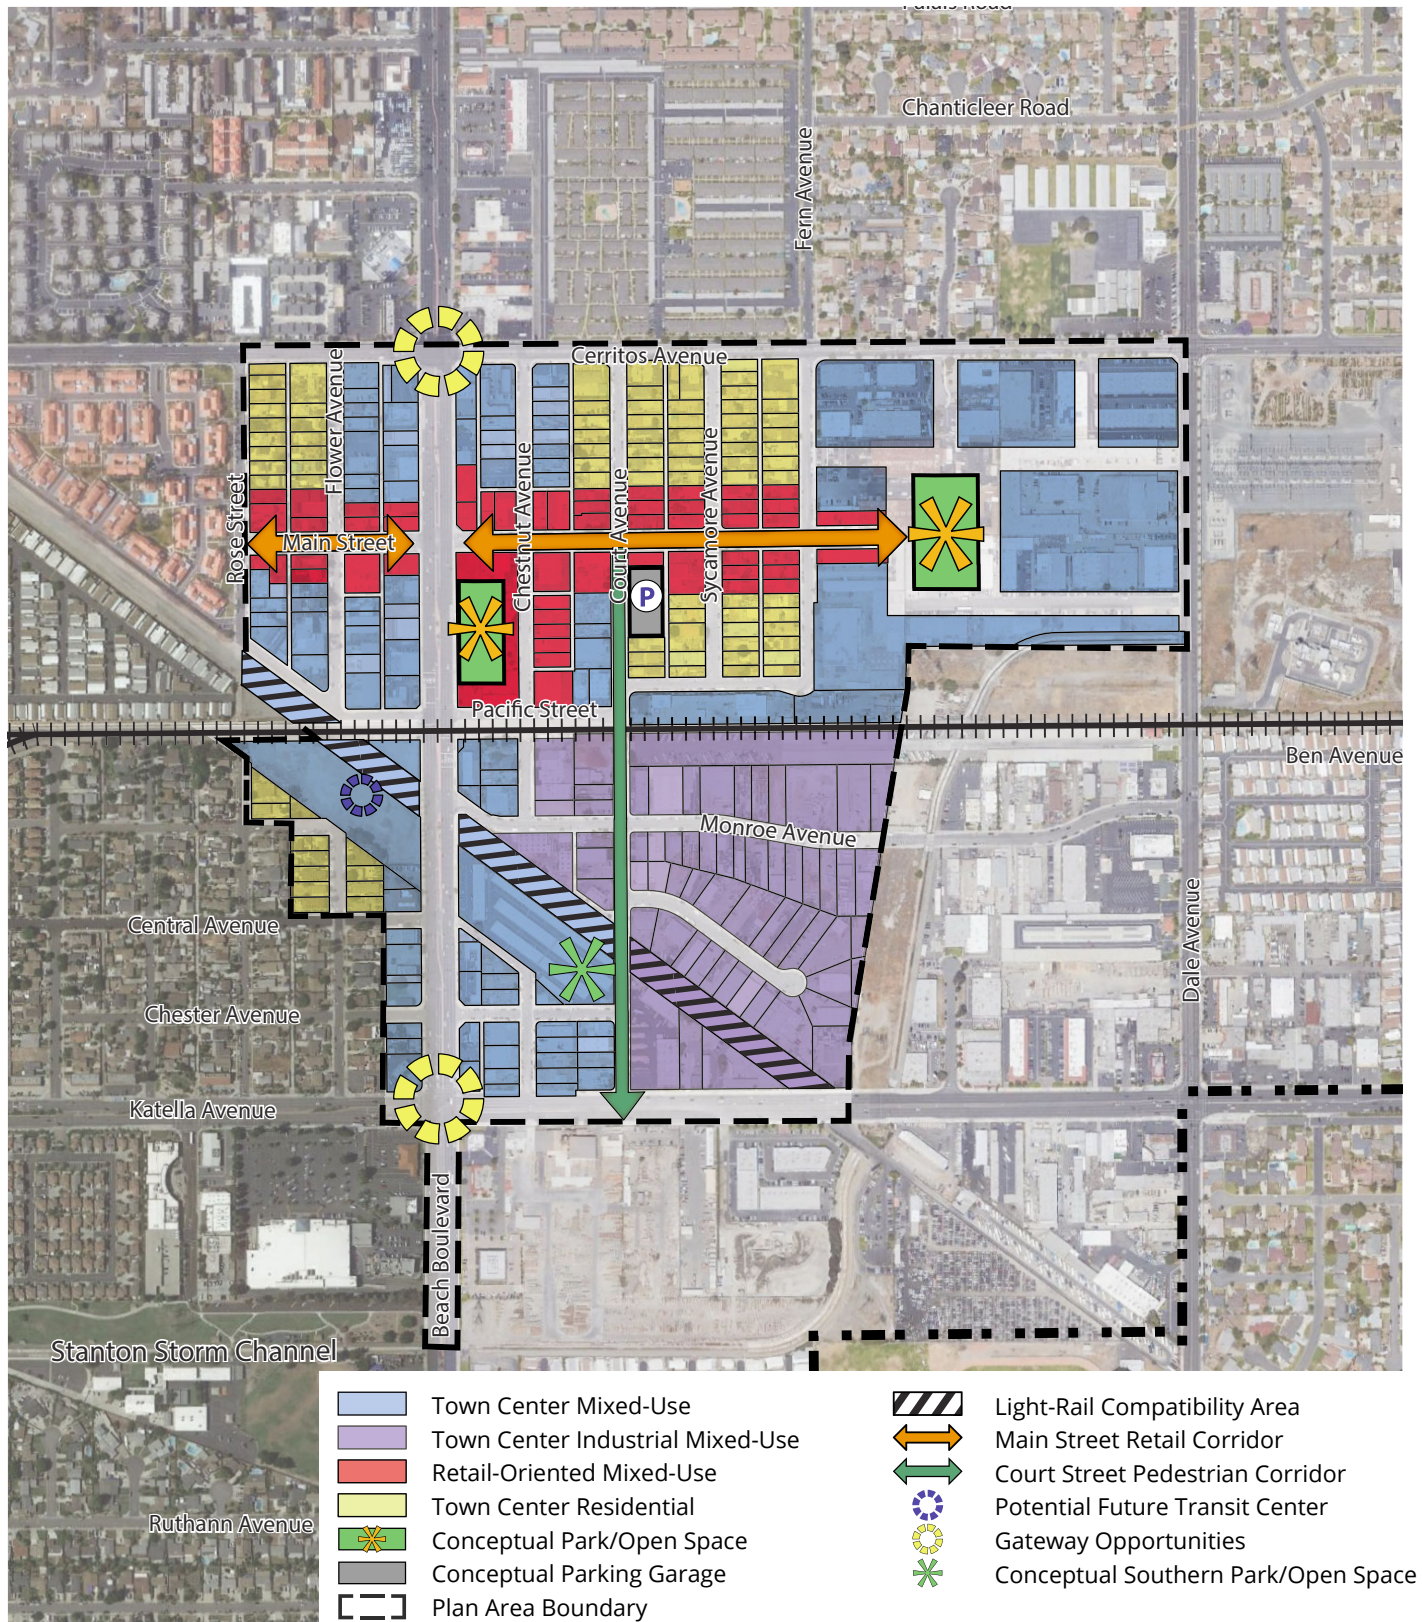

The Project is envisioned as a revitalization of the Town Center area of Stanton. The Town Center Specific Plan encourages a unique approach to planning by implementing a series of realistic and achievable objectives, that would result in a high-quality town center.

1. Preserve existing residential neighborhoods and create a vibrant, pedestrian-friendly environment.
2. Maintain existing businesses while encouraging a broader mix of uses and encouraging the revitalization of existing industrial uses.
3. Improve the streetscape and landscape.
4. Provide for more locally serving retail and commercial development.
5. Abandon alleys throughout the plan area, when feasible and larger development is proposed.
6. Create a true “Main Street”.
7. Link the Specific Plan to other districts.
8. Create district design guidelines for architecture, streetscape, and public improvements.
9. Reduce vehicle trips and trip duration by encouraging efficiency between trip origin and trip destination.
10. Ensure adequate and efficient infrastructure to support existing and future development.
11. Encourage economic development and incentivize investing in infill development.

3.1.3 PROJECT ELEMENTS/LAND USES

Exhibit 3-1, Planning Areas and Plan Elements, depicts the proposed types of land uses and Specific Plan elements such as potential gateway opportunities, potential future transit center, and a conceptual open space area.

Overall, the proposed Project encourages an environmentally conscious development approach to provide for a sustainable community. New development and redevelopment is encouraged to incorporate energy-saving materials and features to reduce energy and water consumption needs, and to minimize the impacts associated with development on the environment.

Source: City of Stanton, KTG, Google Earth, 2022

Planning Areas and Plan Elements

Exhibit 3-1

Town Center Specific Plan Project

PSOMAS

The Town Center Specific Plan area includes four land use districts, Town Center Mixed-Use, Town Center Industrial, Town Center Residential, and Retail-Oriented Mixed-Use. The vision of the Specific Plan is achieved through identifying specific development standards for each district.

Town Center Mixed-Use

The 60.7-acre Town Center Mixed-Use (TCMU) proposes to increase housing stock and land use diversity within the Specific Plan area. It encourages residential development within walking distance of retail core areas and maximizes access to multi-modal transit opportunities within the Specific Plan area. The TCMU district allows for a blend of standalone residential, commercial, and mixed-use development to occur.

The Specific Plan envisions future medium- and higher-density residential development within this district that, while not required, is encouraged to include a retail component in its design.

Town Center Industrial

The intent of the 25.5-acre Town Center Industrial (TCI) is to allow existing industrial businesses to continue, while facilitating new research and development and light-industrial uses compatible with neighboring residential uses. Residential uses are not permitted within this district. Other compatible commercial uses retaining an industrial or artistic character, such as artisanal manufacturing and sales, distilleries, breweries, commercial cannabis uses, and tasting rooms, can occur.

Retail-Oriented Mixed-Use

The 13.4-acre Retail-Oriented Mixed-Use (ROMU) land use district encourages retail and mixed-use development in areas with a high degree of exposure to vehicular and anticipated pedestrian traffic. The ROMU district would occur primarily along Beach Boulevard and Main Street within the Specific Plan area.

To encourage and facilitate the creation of a true “town center,” any future mixed-use development within the ROMU district is required to include ground floor commercial uses per requirements in the Specific Plan.

Town Center Residential

Neighborhoods within the 13.9-acre Town Center Residential land use district are designated to preserve the residential character of this district. Land uses within this area would be restricted to those uses currently allowed in the City’s residential zoning designation and development standards would preserve the residential character of the neighborhood.

Open Space Framework

As indicated above, the Specific Plan area currently does not include a dedicated public open space. The Project proposes to locate open space throughout the Specific Plan area to maximize access to outdoor recreation opportunities. The precise size and location of open spaces envisioned by the open space framework is conceptual and subject to change as redevelopment occurs over time.

Three potential open space locations are envisioned as the primary public open spaces within the Town Center Specific Plan and are depicted on Exhibit 3-1, Planning Areas and Plan Elements.

An enhanced pedestrian connection is envisioned along Court Street, which would help connect the open spaces at the northern and southern ends of the Specific Plan area. The three primary open space features are described below:

- **Beach Boulevard Plaza.** It is envisioned as a gathering place for public and private events, public gatherings, musical performances, and passive recreation. The plaza (occupying the entire lot) may include elements such as landscape features, outdoor seating and dining areas, fountains, outdoor amphitheaters, and/or small retail uses such as a coffee stand or cafe. The location of the plaza along Beach Boulevard offers a high degree of visibility and generates visual interest for the future retail-oriented mixed-use corridor along Main Street and provides an opportunity for aesthetic enhancement along Beach Boulevard. The plaza with a minimum of 7,500 square feet is intended to be located adjacent to retail uses that activate the open space by increasing pedestrian activity and incorporating activities such as outdoor dining. Alternative development requirements for individual lot development will be identified.
- **Eastern Neighborhood Park.** Located within the Town Center Mixed-Use area, east of Court Avenue and north of Pacific Street, this park is envisioned as a large landscaped open space area that provides access to outdoor amenities and active recreation opportunities within a walkable distance to residents within the Specific Plan. The eastern neighborhood park is located at the physical and visual terminus of Main Street. The park is anticipated to be approximately one acre in size and may include amenities such as public art, a playground/tot lot, open spaces for active recreation and exercise, outdoor pedestrian furniture and dining areas, small sport courts, and outdoor gathering spaces such as small plazas or amphitheaters.
- **Southern Open Space.** It is envisioned to provide amenities such as a playground/tot lot, open spaces for exercise and/or passive activities, and pedestrian furniture. This park is conceptually proposed near the intersection of Chester Avenue and Chestnut Avenue.

3.1.4 DENSITY/INTENSITY AND HEIGHT

Land uses within the Specific Plan area are limited by maximum intensity. Residential uses are limited by overall base dwelling units per acre. Non-residential uses, such as industrial or commercial uses, are limited by floor area ratio (FAR).

Residential development may occur at a density of as low as 6 units per acre and up to 70 units per acre, depending on the development tier used. Standalone non-residential uses are allowed to occur at a floor area ratio (FAR) of up to 1.0.

Within a mixed-use development containing both residential and non-residential uses, the residential portion of development may occur at a density of up to 70 units per acre. Residential square footage in a mixed-use development does not count towards FAR maximums. Within a mixed-use development, non-residential uses may occur at a FAR of up to 1.0.

In addition to maximum allowable intensities for each land use, a building-height overlay also restricts overall building height within the Specific Plan area. Three height districts are proposed with height limitations of two and five stories. Exhibit 3-2, Building Height Overlay, depicts the permitted heights within the Specific Plan area.

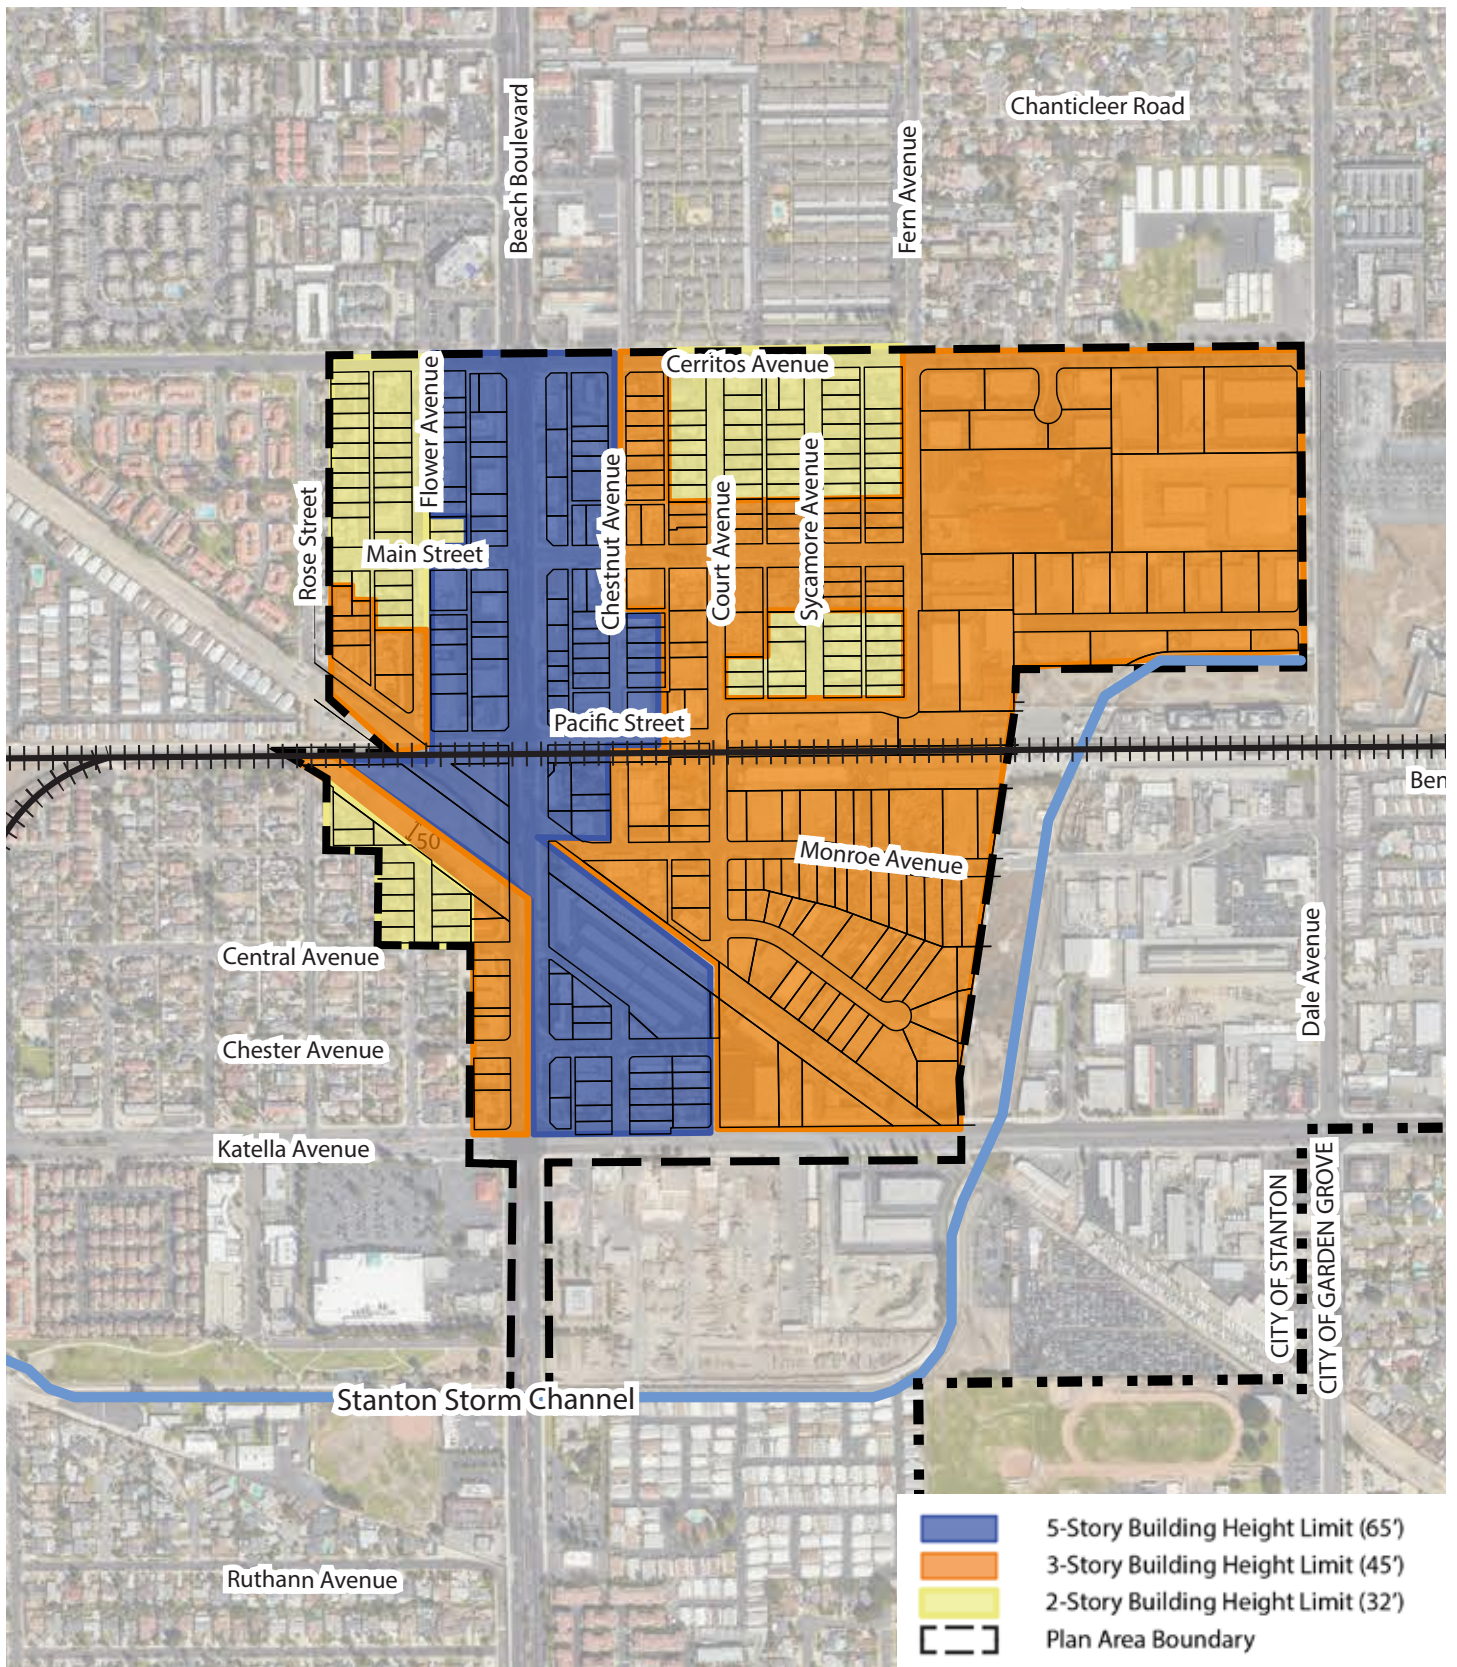

3.2 CIRCULATION AND MOBILITY PLAN

The Town Center Specific Plan is planned as a mixed-use neighborhood that blends existing uses with new mixed-use development, maximizes access to existing transit opportunities, and enhances the pedestrian and bicycle transportation network. The plan also incorporates conceptual future transit opportunities into its design, while ensuring that the success of the multi-modal network does not depend on the completion or final details of potential future transit opportunities. As identified in the Project Objectives, the Project envisions reducing vehicular trips and trip duration; reducing greenhouse gas emissions and pollution through zoning changes that would reduce reliance on vehicles and support alternative modes of travel; and ensuring adequate and efficient infrastructure to support existing and future development.

Considering the said objectives, the Specific Plan incorporates a “complete streets” approach that prioritizes creation of a true multi-modal transportation system and new connections throughout the Specific Plan area.

3.2.1 CIRCULATION ENHANCEMENTS

Circulation enhancements are proposed to facilitate multimodal connectivity and increase pedestrian safety. Exhibit 3-2, Circulation Plan, identifies the proposed enhancements. New roads are included in the northeastern portion of the Specific Plan area. These roads are conceptually located but are intended to serve implementing developments and the future park within this portion of the area. Intersection improvements are identified at four intersections: Beach Boulevard and Main Street; Beach Boulevard and Pacific Street; Cerritos Avenue and a future street; and Dale Street and a future street.

Intersection improvements and enhancements include design features such as pavement enhancements; pedestrian built-out crossings to increase pedestrian visibility; and new crossings for pedestrian and bicyclists.

Further, a potential future trail is depicted along the existing east-west rail corridor traversing the Specific Plan area. This potential future trail is proposed to connect to another potential trail along the Stanton Storm Channel, which would also provide connectivity to the northeastern portion of the project site as shown on Exhibit 3-2, Circulation Plan.

Court Avenue is envisioned to include additional pedestrian enhancements, including a future connection across the east-west rail corridor. The pedestrian-focused enhancements along Court Avenue run from Katella Avenue north to Main Street, increasing connectivity between the southern and northern portions of the Specific Plan area.

Additionally, a potential future transit station is identified on the OCTA property located along Beach Boulevard. This transit center could connect users of a potential future light-rail along the former Pacific Electric rail corridor to the multi-modal network within the Specific Plan area.

Additional components include:

- Alley Vacations. Vacation and reuse of alleys are allowed to facilitate the redevelopment of the commercial and industrial areas within the Specific Plan area. Once vacated, alleys may be built upon or repurposed for another use such as outdoor dining.
- Streetscaping Enhancements. The intent of the streetscaping enhancements is to improve the aesthetic character of the area and multi-modal transportation in addition to fostering a cohesive sense of place through the Specific Plan. Some of the streetscaping elements include improvements to Beach Boulevard and Main Street. For example, street tree will be added, and signage and light standards will be increased.
- Parking Structure. A parking structure within the Town Center, adjacent and to the east of Fern Avenue may be located on APN 126-444-11. The parking structure may be funded through the parking district or other sources.

3.3 BUILDOUT OF SPECIFIC PLAN

The Specific Plan development concept and associated infrastructure improvements are envisioned to occur over an approximate 30-year long-term period; however, the revitalization of the Town Center area, would be dependent on and responsive to prevailing market conditions. Specific timing on projects within the Specific Plan area cannot be determined at this time.

3.4 PROJECT PROCESSING / ROLE OF THE SPECIFIC PLAN

The Stanton City Council is the local decision-making body for the Project, and as such they will consider whether to approve or deny the Project. Upon adoption pursuant to Government Code Sections 65450 and 65457, the Specific Plan establishes the land use and development standards for the Town Center Specific Plan area.

The Specific Plan includes customized zoning standards for the site, comprised of site-specific permitted uses and development standards. Where such customization is not identified, the standard provisions of the City of Stanton Zoning would apply. Upon a conflict between the Specific Plan and City of Stanton Municipal Code, the provisions of the Specific Plan will take precedence.

Future minor (technical or informational) adjustments to the Specific Plan will be processed administratively and approved by the Community & Economic Development Director (Section 6.7.1, Minor Adjustments to the Specific Plan), as long as the deviations are in substantial conformance with the Specific Plan. The modifications considered minor adjustments include modifications to the maximum allowable development analyzed per CEQA, if the required CEQA review determines that the area may accommodate additional development; minor changes to the circulation plan; minor changes to the design of the roadways cross-sections; minor modifications to the architectural or landscape design guidelines; minor modifications to the water, sewer, and/or drainage plan; and addition of new information (i.e., maps and/or text) that does not change the effect or intent of any regulation.

For consistency purposes, the Specific Plan identifies the maximum density and intensity at the Specific Plan build-out that is evaluated as part of this Subsequent IS/MND. Specific Plan implementation will allow for an increase of 139 dwelling units. Any intensity or density beyond what is identified and analyzed in this Subsequent IS/MND may be subject to additional environmental analysis.

3.5 DISCRETIONARY APPROVALS

This Subsequent IS/MND is intended to serve as the primary CEQA environmental document for the new units associated with the Specific Plan. The following discretionary approvals are required for Project approval.

3.5.1 GENERAL PLAN

The Specific Plan area is currently designated in the Stanton General Plan Land Use Diagram as Town Center Mixed-Use District, High-Density Residential, Medium-Density Residential, and Industrial. For consistency with the General Plan, all parcels within the Specific Plan area not currently designated “Town Center Mixed Used District” are redesignated from their current designation to “Town Center Mixed Use District”.

3.5.2 ZONING CODE

The Project area currently consists of different zones. Existing zoning designations for parcels within the Specific Plan area includes, “CN” Commercial neighborhood Zone, “CG” Commercial General Zone, “PR” Parks and Recreation Zone, “OS” Open Space/Buffer Zone, “IG” Industrial General Zone, “RL” Single-Family Residential, “RM” Medium Density Residential, and “PI” Public Institutional Zone. A Zone Change is required to adopt the Specific Plan. As such, the zoning of the site would change from the above designations to “TCSP” Town Center Specific Plan”.

3.5.3 SPECIFIC PLAN APPROVAL

The Town Center Specific Plan has been prepared to realize the objectives of the proposed Town Center District, as defined within the Specific Plan document. The Specific Plan will be adopted by resolution by the Stanton City Council.

3.5.4 SUBSEQUENT MITIGATED NEGATIVE DECLARATION

In compliance with CEQA and the State CEQA Guidelines, the City of Stanton has prepared a Subsequent MND to analyze the potential environmental impacts of the proposed Project. The Subsequent MND serves as a finding that the Project would not have a significant effect on the environment, with the incorporation of mitigation measures, as appropriate.

3.5.5 FUTURE DISCRETIONARY ACTIONS

Future individual projects within the Specific Plan area may require discretionary design reviews, contingent upon the scope of the individual project and the procedures set forth in the Town Center Specific Plan and/or Stanton Municipal Code.

4.0 ENVIRONMENTAL CHECKLIST:

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this Project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- | | | |
|---|---|--|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Agriculture and Forestry Resources | <input type="checkbox"/> Air Quality |
| <input checked="" type="checkbox"/> Biological Resources | <input checked="" type="checkbox"/> Cultural Resources | <input type="checkbox"/> Energy |
| <input checked="" type="checkbox"/> Geology and Soils | <input type="checkbox"/> Greenhouse Gas Emissions | <input checked="" type="checkbox"/> Hazards and Hazardous Materials |
| <input checked="" type="checkbox"/> Hydrology and Water Quality | <input type="checkbox"/> Land Use and Planning | <input type="checkbox"/> Mineral Resources |
| <input checked="" type="checkbox"/> Noise | <input checked="" type="checkbox"/> Population and Housing | <input type="checkbox"/> Public Services |
| <input type="checkbox"/> Recreation | <input type="checkbox"/> Transportation | <input checked="" type="checkbox"/> Tribal Cultural Resources |
| <input checked="" type="checkbox"/> Utilities and Service Systems | <input type="checkbox"/> Wildfire | <input checked="" type="checkbox"/> Mandatory Findings of Significance |

DETERMINATION: (To be completed by the Lead Agency.)

On the basis of this initial evaluation:

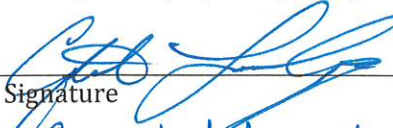

- ☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☒ I find that although the proposed Project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the Project have been made by or agreed to be the Project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- ☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- ☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- ☐ I find that although the proposed project could have a significant effect on the environment, because a) potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except “No Impact” answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A “No Impact” answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A “No Impact” answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. “Potentially Significant Impact” is appropriate if there is substantial evidence that an effect may be significant. If there are one or more “Potentially Significant Impact” entries when the determination is made, an EIR is required.
- 4) “Negative Declaration: Less Than Significant With Mitigation Incorporated” applies where the incorporation of mitigation measures has reduced an effect from “Potentially Significant Impact” to a “Less than Significant Impact.” The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from “Earlier Analysis,” as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063 (c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are “Less than Significant with Mitigation Measures Incorporated,” describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project’s environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

4.1 AESTHETICS

Except as provided in Public Resources Code Section 21099, would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis of visual quality in the GP EIR indicated that new projects under the General Plan Update could result in developments that would be out of scale or character and thus incompatible with the surrounding urban environment; could result in light and glare impacts to sensitive receptors such as residential uses; and could result in shade and shadow effects onto adjacent buildings within the City. Cumulative impacts related to visual quality, shade and shadow, and light and glare were considered less than significant.

Supplemental Analysis

a) Have a substantial adverse effect on a scenic vista?

No Impact. The Community Design Element of the City of Stanton General Plan establishes goals and policies to enhance the visual image and livability of the City. The City's identity includes the many visual images that people associate with the community, including the City's physical form, activity nodes, landmarks, street corridors, buildings, signs, and other similar physical features. However, the General Plan does not identify any designated "scenic vistas" in the City. Therefore, implementation of the proposed Project would not impact a scenic vista, and no mitigation is required.

b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

No Impact. The City's General Plan does not identify any scenic vistas or State scenic highways in the City. The nearest Officially Designated State Scenic Highway is a segment of State Route 91 (SR 90), approximately 10 miles to the east of the Specific Plan area. There are no scenic resources, including trees, rock outcroppings, and historic buildings in the

vicinity of the Specific Plan area. Therefore, implementation of the Project would not damage scenic resources within a State scenic highway. No impact would occur, and no mitigation is required.

c) In non-urbanized area, substantially degrade the existing visual character or quality of public views of the site and its surroundings? If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

Less Than Significant Impact. The Specific Plan area is located within an urbanized area of the City that is developed with commercial, industrial, and residential land uses; the Project would not conflict with zoning and other regulations governing scenic quality. In light of this and as it is not within a non-urbanized area, the Project would not substantially degrade the visual character of public views of the site and surrounding area. Therefore, impacts would be less than significant, and no mitigation is required.

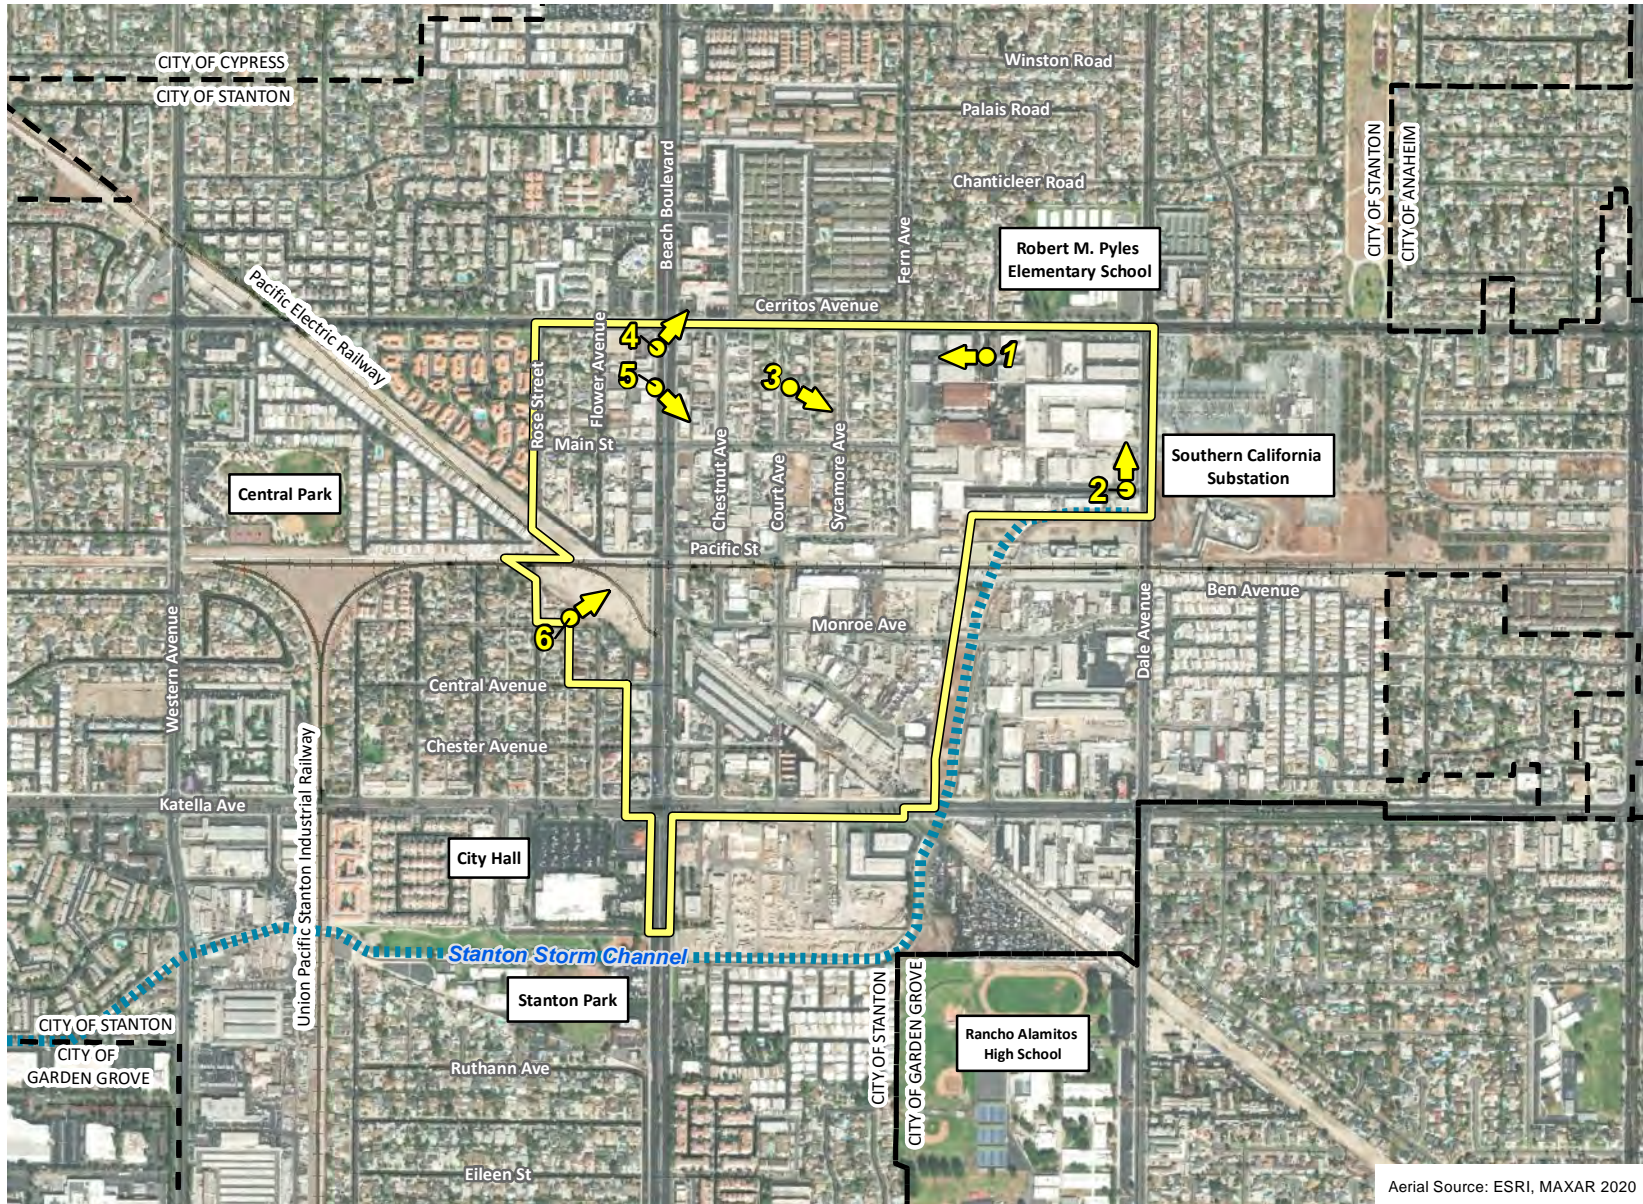

Existing Views and Visual Character

The existing physical setting of the Specific Plan area varies based on the uses in that portion of the area. Areas with an industrial character tend to feature lower-rise buildings and predominantly hardscape areas mostly devoted to surface parking lots, loading zones, and driveways. Residential areas feature one- to two-story development, sidewalks, and parallel, on-street parking. There is little to no landscaping within street rights-of-way in residential neighborhoods within the Specific Plan area. Commercial development tends to cluster around Beach Boulevard. Beach Boulevard is maintained by the California Department of Transportation (CalTrans) and travel is dominated by the automobile. No trails or park facilities currently exist within the Specific Plan area.

Although some recent commercial redevelopment has occurred along Beach Boulevard, the majority of existing buildings within the Specific Plan area have a low-intensity industrial character retained from initial development in the 1950's and 1960's. Residential neighborhoods within the Specific Plan area typically feature single-family or two-story multi-family residential development constructed in the 1950's and 1960's.

Exhibit 4-1, Photo Locations, provide the locations of the site photographs shown in Exhibits 4-2a through 4-2c, Site Photographs. These photographs depict examples of the existing visual character of the Specific Plan area.

- **View 1 – Light Industrial**, looking west from Ashdale Street, shows a view of an existing industrial use with a paved parking area and gated entry. A dumpster is visible inside the property in the middle ground view. A wrought iron fence surrounds the property. Ornamental trees in the background and the trunks of the ornamental trees are visible in the right middle ground view. A utility line pole is visible in the left middle ground view. Ashdale Street is in the foreground view.
- **View 2 – Light Industrial**, looking north from Standustrial Street shows two existing light industrial uses, associated parking space, and the alley between the two

buildings. A utility line pole is visible in the middle ground view. Minimal ornamental landscaping is shown adjacent to the left building.

- **View 3 - Residential**, looking southeast from Court Avenue shows both single story and two-story single-family homes on a residential street. A wrought iron fence and a stucco/wood fence are shown on two of the properties. The third home has a driveway with parked vehicles. Ornamental landscaping and turf is visible through the wrought iron fences, and mature trees are to the right. An overhead utility line is visible in the background.
- **View 4 - Commercial**, looking northeast from Beach Boulevard shows typical single story commercial and retail on the east side of Beach Boulevard. Several overhead utility lines along Cerritos Avenue and in the alley behind the businesses are visible. Ornamental trees are along Cerritos Avenue in the middle ground view. Beach Boulevard and its concrete median dominate the foreground view.
- **View 5 - Commercial**, looking southeast along Beach Boulevard, shows various commercial uses. The building to the right is free standing whereas the two to the left are attached. Overhead utility lines are visible on the sidewalk along Beach Boulevard and in the alley behind the business. Beach Boulevard dominate the foreground view. Ornamental landscaping including a palm tree is shown in the Beach Boulevard median.
- **View 6 - Disturbed**, looking northeast from Monroe Avenue, shows a disturbed and graded dirt lot. A series of metal bollards are shown in the foreground view. Overhead utility lines are visible in the middle ground and background views (along Beach Boulevard). A railroad spur is visible in the middle ground view. Ornamental landscaping and trees dominate the background view and surround the buildings.

Visual Changes

Short-Term

During demolition and construction activities within the Specific Plan area, there would be views of construction fencing and construction equipment; demolition and construction activities; additional construction signage and warning markers on roadways; short-term stockpiles of building materials and debris; and haul trucks to deliver building materials and to remove debris. While not all of these activities may occur simultaneously, it is possible they would occur in various stages. Depending upon the location of the site, construction activities would be visible from residential and non-residential uses within and adjacent to the Specific Plan area. However, the visual change during construction would be less than significant because of its temporary nature and because the views would be typical of construction sites in an urban environment. Additionally, views from the existing residential and commercial development are considered private and not public views, and as such they are not protected views.

Long-Term

The City is mostly built out and urbanized with various types of land uses. The Specific Plan area is developed with varying intensities of light industrial, retail/commercial, and residential land uses. New development within the Specific Plan area would occur through development of the few existing vacant lots remaining, redevelopment of existing lots, and consolidation of two or more lots. The Specific Plan also outlines specific standards for each of the above building types, which include site design, vehicle access and parking, mass and height, facades and window fenestration, projections, forms, and use specifications. In light of the overall Project objectives and specific improvement proposed, the long-term visual character and quality of the area would not be degraded but rather enhanced. It should also be noted that as the Specific Plan area is highly developed, with the exception of certain vacant parcels, there are no existing expanses of open space that would be visually degraded or impacted by development.

The Specific Plan includes four land use districts, which identifies the distribution of land uses throughout the approximately 156.9-acre Specific Plan area. The four districts proposed are: Town Center Mixed-Use, Town Center Industrial, Retail-Oriented Mixed-Use, and Town Center Residential. The Specific Plan includes design guidelines (Section 4 of Specific Plan), which provide the framework for landscape, streetscape, building architecture and overall character envisioned for the Town Center Specific Plan. The Specific Plan specifically identifies aesthetic enhancements to foster a cohesive identity within the area. The enhancements proposed include, but are not limited to, the gateway features, tree grates, landscape plantings, street trees, vehicular and pedestrian lighting, enhanced paving materials, and art features.

The four land use districts and potential visual changes are discussed below.

Town Center Mixed-Use

Within the TCMU land use areas, the proposed Specific Plan would alter existing views which currently consist of primarily one- and two-story uses, as well as the disturbed/vacant railroad parcels. These vacant and underutilized sites would be developed with a variety of building types. Mixed-use development within the Specific Plan area may include a range of residential, commercial, and mixed-use development. As part of the vision for this district, future medium and high-density residential uses may include a retail component. In light of specific design guidelines and development standards proposed for this district, existing views of this area would be visually improved.

Town Center Industrial

The intent of the Town Center Industrial (TCI) land use district is to allow existing industrial businesses to continue, while facilitating new research and development and light-industrial uses that are compatible with neighboring residential uses. In addition to industrial uses, other compatible commercial uses that may retain an industrial or artistic character, may occur. By considering compatibility with the adjacent uses, such as residential, the redevelopment and future enhancements in this district would not result in visual impacts.

Retail-Oriented Mixed-Use

The intent of the Retail-Oriented Mixed-Use (ROMU) land use district is to encourage retail and mixed-use development in areas with a high degree of exposure to vehicular and anticipated pedestrian traffic. The ROMU district occurs primarily along Beach Boulevard and Main Street within the Specific Plan area. The intent of this district is to create a true town center with mixed-uses that would cater to visitors. Thus, with implementation of design guidelines and development standards specifically envisioned for this district, no aesthetic impacts would be anticipated.

Town Center Residential

Neighborhoods within the existing residential land use district are designated to preserve the residential character of these places. Land uses within this area will be restricted to those uses currently allowed in the City's residential zoning designation and development standards will preserve the residential character of the neighborhood.

Implementation of the Specific Plan would alter existing view in the residential areas to include residential buildings that would be designed to fit into the context of neighboring development as best possible. A mix of housing types appealing to a wide variety of residents and family sizes is encouraged. Townhouses may be located to transition between high-density development and existing neighborhoods adjacent to the Specific Plan area. In light of this concept and with restrictions/limits in place, the visual quality of this area will be improved and not impacted with implementation of the proposed Project. Thus, no adverse aesthetics impacts are anticipated.

Impact Conclusion

The proposed Specific Plan would establish a vision for future development and revitalization within the area that would appear to transition from existing surrounding land uses to a variety of mixed uses within the Transit Plaza and along Main Street and Beach Boulevard. Although implementation of the proposed Specific Plan would alter the visual character of the area by redeveloping existing buildings with new construction and enhancing streetscapes, it would not degrade the existing visual character and quality of the area and its surroundings. The Specific Plan is a cohesive long-range plan for logical growth that would be compatible with existing adjacent neighborhoods. Overall, the proposed Specific Plan would establish a consistent and compatible framework for development that would improve the visual character of individual sites and the area as a whole. The addition of three future public open spaces throughout the Specific Plan area would introduce open space/recreational elements into an area that is devoid of open space. This future open space would include both passive and active landscaped open space areas for the public.

The Specific Plan contains the development specifications, regulations, and design guidelines for future development projects within the Specific Plan area. The design guidelines included in the Specific Plan assist in creating a consistent urban form and landscape character for private and public development within the Specific Plan area. The development standards establish permitted uses, building setbacks, and general development criteria and

requirements for the new residential development and redevelopment of existing uses. Additional design regulations and guidelines are identified to further define the desired character and image of development in the Specific Plan, which include landscaping, streetscapes, plazas, pedestrian walkways and courtyards, and parking.

Additionally, it should be noted that any development within the Specific Plan area would be subject to review through the development application process and would be analyzed by the City to ensure that the development is consistent with the development regulations and requirements of the Specific Plan. Therefore, in light of the requirements in place, visual changes would be considered less than significant.

Further, in the absence of scenic resources in the vicinity of the site, the Project would not conflict with applicable zoning and other regulations governing scenic quality and resources. Impacts would be less than significant, and no mitigation is required.

d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

Less Than Significant Impact. There are two primary sources of light: light emanating from building interiors that pass-through windows and light from exterior sources (e.g., street lighting, parking lot lighting, building illumination, security lighting, and landscape lighting). Depending upon the location of the light source and its proximity to adjacent light sensitive uses, light introduction can be a nuisance, affecting adjacent areas and diminishing the view of the clear night sky. Spill light, or trespass light, is light that trespasses or “spills” off the intended area and illuminates adjacent property, and it is generally considered as unwanted. An example would be light from a streetlight that enters an adjacent residential property.

The Specific Plan area is primarily developed and is already subject to various sources of lighting through streetlights; lighting from passing vehicles along these roadways; interior and exterior lighting from commercial and residential buildings, signage illumination, and security lighting. Implementation of the proposed Specific Plan would introduce new sources of light as identified in the Specific Plan document, including streetscape lighting (i.e., roadways lighting, pedestrian lighting, accent lighting, and decorative lighting), and streetscape lighting within public ROW would include, but not be limited to, street light fixtures, pedestrian-scaled light fixtures, lower-height pedestrian light fixtures such as bollards, accent lighting, and decorative lighting. Lighting within the streetscape and in public area would contribute to nighttime aesthetics, increase safety and visibility for drivers and pedestrians, and minimize light pollution and impacts on night sky. Future projects within the Specific Plan area would comply with the guidelines for streetscape lighting (RR AES-1) (Stanton 2021a).

Additionally, the Specific Plan guidelines pertaining to exterior lighting indicate that exterior lighting should be located to avoid light spillage onto adjacent property, especially when adjacent to residential or mixed-use development. Further, Section 4.7.2, Exterior Lighting, of the Specific Plan promotes consideration of sustainable lighting guidelines (i.e., use of high-efficiency solid-state LED lighting for outdoor uses and appropriate color spectral distribution to reduce glare and enhance safety and navigation) by future developers.

Implementation of the Specific Plan would occur in accordance with Section 20.300.080, Outdoor Light and Glare, of the City of Stanton Municipal Code (RR AES-1) (Stanton 2021a). Section 20.300.080 establishes outdoor lighting standards in order to reduce the impacts of glare, light trespass, over lighting, sky glow, and poorly shielded or inappropriately directed lighting fixtures, and promote safety and encourage energy conservation. Proposed lighting would be designed in accordance with Section 20.300.080 which includes outdoor lighting fixtures to be designed, shielded, aimed, located, and maintained to shield adjacent properties and to not produce glare onto adjacent properties or roadways. Proposed lighting associated with the Specific Plan would not adversely affect any existing land uses within or adjacent to the Specific Plan area with compliance with regulatory requirement (RR AES-2) (Stanton 2021a. Potential impacts would be less than significant, and no mitigation is required.

During construction activities, security lighting in the evening and nighttime hours may be used. As applicable, construction lighting would be used in compliance with RR AES-2. Because of its short-term nature, construction related lighting is considered temporary and therefore, impacts would be less than significant.

Glare is a common daytime phenomenon and is due mainly to the occurrence of a high number of days per year with direct sunlight and the presence of large reflective surfaces. Excessive glare not only restricts visibility but also increases the ambient heat reflectivity in a given area. Glare is caused by light reflections from pavement, vehicles, and building materials such as reflective glass and polished surfaces. Glare can create hazards to motorists and nuisances for pedestrians and other viewers. The Specific Plan discourages the use of large expanses of reflective materials on building facades to minimize glare. Additionally, roofing material is encouraged to not be highly reflective. Specific building materials would be identified during the application process for new development. It is anticipated that the use of glass would be confined to windows and thus would not generate substantial glare affecting surrounding uses. Therefore, with compliance with the Specific Plan guidelines potential glare impacts would be less than significant, and no mitigation is required.

Regulatory Requirements

RR AES-1 Future projects within the Specific Plan area shall comply with Streetscape Lighting and Exterior Lighting guidelines identified in the Town Center Specific Plan.

RR AES-2 Future projects within the Specific Plan area shall comply with Section 20.300.080, Outdoor Light and Glare, of the City of Stanton Municipal Code.

Mitigation Measures

Project implementation would not result in significant impacts related to Aesthetics; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no new significant impacts beyond the impacts analyzed in the GP EIR.

4.2 AGRICULTURE AND FORESTRY RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220[g]), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104[g])?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

2008 General Plan Update EIR

The analysis in the Initial Study for the GP EIR concluded that the General Plan Update would not convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance to non-agricultural use; would not conflict with existing zoning for agricultural use or a Williamson act contract; and would not involve other changes in the existing environment that could result in conversion of Farmland to non-agricultural use. Thus, this topic was focused out from further analysis in the GP EIR.

Supplemental Analysis

a) *Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?*

No Impact. Based on latest farmland mapping published by the California Department of Conservation (2016), the Project site is designated in the Farmland Mapping and Monitoring Program (FMMP) as Urban and Built-Up Land (FMMP 2021). The Town Center Specific Plan area is developed with residential, industrial, and commercial land uses and located in an urbanized area. No portion of the Specific Plan area is located on land designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance. The Specific Plan does not include agricultural uses, and Project implementation would not result in conversion of

existing farmland to non-agricultural uses. Therefore, the Project does not affect an agricultural resource area and does not impact designated Prime Farmland, Unique Farmland, or Farmland of Statewide Importance. No impact would occur, and no mitigation is required.

b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?

No Impact. The Project site consists of different zoning designations, including “CN” Commercial neighborhood Zone, “CG” Commercial General Zone, “PR” Parks and Recreation Zone, “OS” Open Space/Buffer Zone, “IG” Industrial General Zone, “RL” Single-Family Residential, “RM” Medium Density Residential, and “PI” Public Institutional Zone. The site is not being used, nor anticipated to be used or zoned for agricultural purposes. The Project site is not subject to a Williamson Act and does not contain Prime Farmland, Unique Farmland or Farmland of Statewide Importance, as discussed under Checklist Response 4.2(a), above. Therefore, implementation of the proposed Specific Plan would not result in any conflicts with existing zoning for agricultural use or a Williamson Act Contract. No impact would occur, and no mitigation is required.

c) Conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production?

No Impact. There is no forest land on the Project area and in the surrounding area, and the Specific Plan area is not zoned for forest land or timberland. The proposed Project would not conflict with existing zoning or cause rezoning of forest land, as defined pursuant to Public Resources Code Section 12220(g), timberland, as defined pursuant to Public Resources Code Section 4526, or timberland zoned Timberland Production, as defined pursuant to Government Code Section 51104(g). No impact would occur, and no mitigation is required.

d) Result in the loss of forest land or conversion of forest land to non-forest use?

No Impact. As noted in Checklist Response 5.2(c), forest land does not occur on-site or in the surrounding area. Thus, implementation of the proposed Project would not result in conversion of forest land to non-forest land. No impact would occur, and no mitigation is required.

e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?

No Impact. As has been previously noted in this section, the Project site is developed and located in an urbanized area of the City. The proposed Project does not involve converting farmland to non-agricultural use. Therefore, no impact would occur, and no mitigation is required.

Regulatory Requirements

No regulatory requirements have been identified.

Mitigation Measures

Project implementation would not result in significant impacts related to Agriculture and Forestry Resources; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no significant impacts beyond the impacts analyzed in the Initial Study for the General Plan Update.

4.3 AIR QUALITY

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Result in other emissions (such as those leading to odors adversely affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that Citywide short-term construction activities under the General Plan Update could result in a cumulatively considerable increase of criteria pollutants violating air quality standards (significant unavoidable impact); a long-term mobile and stationary emissions within the City exceeding South Coast Air Quality Management District (SCAQMD) Air Quality Standards (significant unavoidable impact); an overall increase in carbon monoxide hotspot emissions within the City exceeding SCAQMD Air Quality Standards; and potentially conflict with implementation of the SCAG's Regional Comprehensive Plan Guidelines and the SCAQMD's Air Quality Management Plan. The cumulative impact pertaining to regional air quality levels was considered significant and unavoidable.

Introduction

The South Coast Air Quality Management District (SCAQMD) has established quantitative thresholds for short-term (construction) emissions and long-term (operational) emissions for the following criteria pollutants: ozone, carbon monoxide, nitrogen oxides, sulfur dioxide, and particulate matter 10 and 2.5 microns. The characteristics and health effects of these criteria pollutants are described below:

- Ozone (O₃) is a nearly colorless gas that is formed by photochemical reaction (when nitrogen dioxide is broken down by sunlight). Ground-level O₃ exposure can cause a variety of health problems, including lung irritation, wheezing, coughing, pain when taking a deep breath, and breathing difficulties during exercise or outdoor activities; permanent lung damage; aggravated asthma; and increased susceptibility to respiratory illnesses.
- Carbon monoxide (CO) is a colorless and odorless toxic gas which, in the urban environment, is associated primarily with the incomplete combustion of fossil fuels in motor vehicles. CO combines with hemoglobin in the bloodstream and reduces the

amount of oxygen that can be circulated through the body. High CO concentrations can lead to headaches, aggravation of cardiovascular disease, and impairment of central nervous system functions.

- Nitrogen oxides (NO_x) are yellowish-brown gases, which at high levels can cause breathing difficulties. NO_x are formed when nitric oxide (a pollutant from internal combustion processes) combines with oxygen.
- Sulfur dioxide (SO₂) is a colorless, pungent gas formed primarily by the combustion of sulfur-containing fossil fuels. Health effects include acute respiratory symptoms and difficulty in breathing for children.
- Particulate Matter 10 (PM₁₀) and Particulate Matter 2.5 (PM_{2.5}) refer to particulate matter less than ten microns and two and one-half microns in diameter, respectively. Particulates of this size cause a greater health risk than larger-sized particles since fine particles can more easily cause irritation. Particulate matter includes both aerosols and solid particles. An example of particulate matter is fugitive dust. Short-term exposure to high PM_{2.5} levels is associated with premature mortality and increased hospital admissions and emergency room visits. Long-term exposure to high PM_{2.5} levels is associated with premature mortality and development of chronic respiratory disease. Short-term exposure to high PM₁₀ levels is associated with hospital admissions for cardiopulmonary diseases, increased respiratory symptoms, and possible premature mortality.

The SCAQMD regulates air quality in the Orange County and is the agency principally responsible for comprehensive air pollution control in the South Coast Air Basin (SoCAB). The SCAQMD develops rules and regulations, establishes permitting requirements for stationary sources, inspects emissions sources, and enforces such measures through educational programs or fines, when necessary. The SCAQMD is directly responsible for reducing emissions from stationary (area and point), mobile, and indirect sources. It has responded to this requirement by preparing a sequence of Air Quality Management Plans (AQMPs).

The 2022 AQMP was adopted on December 2, 2022, by the SCAQMD Governing Board. The 2022 AQMP is a regional and multi-agency effort among the SCAQMD, CARB, SCAG, and USEPA. The 2022 AQMP includes an analysis of emissions, meteorology, atmospheric chemistry, regional growth projections, and the impact of existing control measures. The purpose of the 2022 AQMP is to set forth a comprehensive program that would promote reductions in criteria pollutants, greenhouse gases, and toxic risk and efficiencies in energy use, transportation, and goods movement. The 2022 AQMP incorporates the latest scientific and technical information and planning assumptions, including SCAG's 2020-2045 RTP/SCS; updated emission inventory methods for various source categories; and SCAG's latest growth forecasts. The 2022 AQMP includes strategies and measures necessary to meet the NAAQS. The AQMP is based on projections of energy usage and vehicle trips from land uses within the SoCAB.

The 2022 AQMP evaluates integrated strategies and measures to meet the following NAAQS (SCAQMD 2022):

- 8-hour O₃ target of 80 parts per billion (ppb) by 2024, 75 ppb by 2032, 70 ppb by 2038;
- Annual PM_{2.5} (12 micrograms per cubic meter [$\mu\text{g}/\text{m}^3$]) by 2025;
- 1-hour O₃ (120 ppb) by 2023; and
- 24-hour PM_{2.5} (35 $\mu\text{g}/\text{m}^3$) by 2023.

The two principal criteria for conformance to an AQMP are:

1. Whether a project will result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay timely attainment of air quality standards or the interim emissions reductions in the AQMP.
2. Whether a project will exceed the assumptions in the AQMP based on the year of Project buildout.

To estimate if a project may adversely affect the air quality in the region, the SCAQMD has prepared the *Air Quality Analysis Guidance Handbook* (SCAQMD CEQA Handbook) to provide guidance to those who analyze the air quality impacts of projects. The SCAQMD CEQA Handbook provides significance thresholds for both construction and operation of projects within the SCAQMD's jurisdictional boundaries. The SCAQMD recommends that projects be evaluated in terms of the quantitative thresholds established to assess both the regional and localized impacts of project-related air pollutant emissions. The SCAQMD CEQA Handbook states that any project in the SoCAB with daily emissions that exceed any of the identified significance thresholds may have an individually and cumulatively significant air quality impact. The City of Stanton uses the current SCAQMD thresholds to determine whether a project would have a significant impact. These SCAQMD thresholds are identified in Table 4-1, South Coast Air Quality Management District Air Quality Significance Thresholds (SCAQMD 2019).

**TABLE 4-1
SOUTH COAST AIR QUALITY MANAGEMENT
DISTRICT AIR QUALITY SIGNIFICANCE
THRESHOLDS**

Mass Daily Thresholds (lbs./day)		
Pollutant	Construction	Operation
VOC	75	55

Existing Air Quality Conditions

The monitoring data presented in Table 4-2, Air Quality Measurements at the Anaheim Monitoring Station, were obtained from CARB. Federal and State air quality standards are presented with the number of times those standards were exceeded. The Project site is in the area represented by measurements made at the Anaheim-Pampas Lane (Anaheim) Monitoring Station, located on 1630 West Pampas Lane, Anaheim. Table 4-2 shows the pollutant levels for CO, O₃, NO₂, PM2.5, and PM10.

TABLE 4-2
AIR QUALITY MEASUREMENTS AT THE ANAHEIM MONITORING
STATION

Pollutant	California Standard	National Standard	Year	Max. Level ^a	State Standard Days Exceeded	National Standard Days Exceeded
CO (1 hour)	20 ppm	35 ppm	2018	2.3	0	0
			2019	1.3	0	0
			2020	1.7	0	0
CO (8 hour)	9 ppm	9 ppm	2018	1.9	0	0
			2019	2.4	0	0
			2020	2.3	0	0
O ₃ (1 hour)	0.09 ppm	None	2018	0.112	1	1
			2019	0.096	1	1

			2019	127	13	0
			2020	120	13	0
PM2.5 (24 Hour)	None	35 µg/m ³	2018	68.0	N/A	7
			2019	37.1	N/A	4
			2020	41.4	N/A	1
O ₃ : ozone; ppm: parts per million; PM10: respirable particulate matter with a diameter of 10 microns or less; µg/m ³ : micrograms per cubic meter; AAM: annual arithmetic mean; NO ₂ : nitrogen dioxide; CO: carbon monoxide; PM2.5: fine particulate matter with a diameter of 2.5 microns or less N/A indicates that there is no applicable standard. ^a California maximum levels were used.						

Regulatory Background

The U.S. Environmental Protection Agency (USEPA) defines seven “criteria” air pollutants, as described above. These pollutants are called criteria pollutants because the USEPA has established National Ambient Air Quality Standards (NAAQS) for the concentrations of these pollutants (USEPA 2014). The California Air Resources Board (CARB) has also established standards for the criteria pollutants, known as California Ambient Air Quality Standards (CAAQS), and the State standards are generally more restrictive than the NAAQS. When a region has air quality that fails to meet the standards, the USEPA and the CARB designate the region as “nonattainment” and the regional air quality agency must develop plans to attain the standards.

Based on monitored air pollutant concentrations, the USEPA and the CARB designate an area's status in attaining the NAAQS and the CAAQS, respectively, for selected criteria pollutants. These attainment designations are shown in Table 4-3. As identified in Table 4-3, Orange County is a nonattainment area for O₃, PM₁₀, and PM_{2.5} for the State standards and a nonattainment area for O₃, and PM_{2.5} for the federal standards.

**TABLE 4-3
ATTAINMENT STATUS OF CRITERIA POLLUTANTS
IN THE SOUTH COAST AIR BASIN**

Pollutant	State	Federal
O ₃ (1 hour)	Nonattainment	No standards
O ₃ (8 hour)	Nonattainment	Nonattainment
PM ₁₀	Nonattainment	Attainment/Maintenance
PM _{2.5}	Nonattainment	Nonattainment
CO	Attainment	Unclassified/Attainment
NO ₂	Attainment	Unclassified/Attainment
SO ₂	Attainment	Attainment
Lead	Attainment	Attainment/Nonattainment*
All others	Attainment/Unclassified	No standards
O ₃ : ozone; PM _{2.5} : respirable particulate matter 10 microns or less in diameter; PM _{2.5} : fine particulate matter 2.5 microns or less in diameter; CO: carbon monoxide; NO ₂ : nitrogen dioxide; SO ₂ : sulfur dioxide; SoCAB: South Coast Air Basin. * Los Angeles County is classified nonattainment for lead; the remainder of the SoCAB is in attainment of the State and federal standards. Source: CARB 2018		

CARB, a part of the California Environmental Protection Agency (CalEPA), is responsible for coordinating and administering both the federal and State air pollution control programs in California. In this capacity, CARB conducts research, sets the CAAQS (as shown in Table 4-4), compiles emission inventories, develops suggested control measures, oversees local programs, and prepares the State Implementation Plan (SIP). For regions that do not attain the CAAQS, CARB requires the air districts to prepare plans for attaining the standards. These plans are then integrated into the SIP. CARB establishes emissions standards for (1) motor vehicles sold in California, (2) consumer products (e.g., hair spray, aerosol paints, barbecue lighter fluid), and (3) various types of commercial equipment. It also sets fuel specifications to further reduce vehicular emissions.

Ozone (O₃) is a secondary pollutant and is created when nitrogen oxides (NO_x) and volatile organic compounds (VOCs) react in the presence of sunlight. The predominant source of air emissions generated by Project development would be from vehicle emissions. Motor vehicles primarily emit CO, NO_x, and VOCs. The NAAQS and CAAQS are designed to protect the health and welfare of the populace within a reasonable margin of safety. The NAAQS and CAAQS for O₃, CO, NO₂, SO₂, PM₁₀, PM_{2.5}, and lead are shown in Table 4-4.

**TABLE 4-4
CALIFORNIA AND FEDERAL AMBIENT AIR QUALITY STANDARDS**

Pollutant	Averaging Time	California Standards	Federal Standards	
			Primary ^a	Secondary ^b
O ₃	1 Hour	0.09 ppm (180 µg/m ³)	–	–
	8 Hour	0.070 ppm (137 µg/m ³)	0.070 ppm (137 µg/m ³)	Same as Primary

Hydrogen Sulfide	1 Hour	0.03 ppm (42 µg/m ³)		
Vinyl Chloride	24 Hour	0.01 ppm (26 µg/m ³)		
O ₃ : ozone; ppm: parts per million; µg/m ³ : micrograms per cubic meter; PM10: respirable particulate matter 10 microns or less in diameter; AAM: Annual Arithmetic Mean; –: No Standard; PM _{2.5} : fine particulate matter 2.5 microns or less in diameter; CO: carbon monoxide; mg/m ³ : milligrams per cubic meter; NO ₂ : nitrogen dioxide; SO ₂ : sulfur dioxide; km: kilometer.				
^a <i>National Primary Standards</i> : The levels of air quality necessary, within an adequate margin of safety, to protect the public health.				
^b <i>National Secondary Standards</i> : The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.				
Note: More detailed information in the data presented in this table can be found at the CARB website (www.arb.ca.gov).				

Supplemental Analysis

a) Conflict with or obstruct implementation of the applicable air quality plan?

Less Than Significant Impact. CEQA requires a discussion of any inconsistencies between a project and applicable General Plans (GPs) and regional plans (CEQA Guidelines Section 15125). The regional plan that applies to the proposed Project includes the SCAQMD's AQMP, as discussed above.

The SCAQMD CEQA Handbook states that "New or amended GP Elements (including land use zoning and density amendments), Specific Plans, and significant projects must be analyzed for consistency with the AQMP". Strict consistency with all aspects of the plan is usually not required. A project should be considered to be consistent with the AQMP if it furthers one or more policies and does not obstruct other policies. The SCAQMD CEQA Handbook identifies two key indicators of consistency, as discussed above:

1. Whether the project will result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay timely attainment of air quality standards or the interim emission reductions specified in the AQMP.
2. Whether the project will exceed the assumptions in the AQMP or increments based on the year of project buildout and phase.

Both criteria are evaluated for the Project, as shown below.

With respect to the first criterion, based on the air quality modeling analysis conducted for the proposed Project [thresholds 4.3(b) and 4.3(c), below], construction and operation of the Project would not exceed the SCAQMD's CEQA thresholds of significance and consequently would not result in an increase in the frequency or severity of existing air quality violations nor cause or contribute to new violations, or delay timely attainment of air quality standards or the interim emissions reductions in the AQMP. Therefore, the Project is consistent with the first criterion.

With respect to the second criterion, the proposed Project was assessed as to whether it would exceed the assumptions in the AQMP. The SCAQMD's current air quality planning document is the 2022 Air Quality Management Plan (2022 AQMP). The AQMP is a regional and multi-agency effort among the SCAQMD, CARB, SCAG, and USEPA. The 2022 AQMP includes an analysis of emissions, meteorology, atmospheric chemistry, regional growth projections, and the impact of existing control measures. The purpose of the 2022 AQMP is to set forth a comprehensive program that would promote reductions in criteria pollutants, greenhouse gases, and toxic risk and efficiencies in energy use, transportation, and goods movement. The 2022 AQMP incorporates the latest scientific and technical information and planning assumptions, including SCAG's 2020-2045 RTP/SCS RTP/SCS; updated emission inventory methods for various source categories; and SCAG's latest growth forecasts. The 2022 AQMP includes strategies and measures necessary to meet the NAAQS. The AQMP is based on projections of energy usage and vehicle trips from land uses within the SoCAB.

As discussed previously, the Specific Plan area currently consists of different zones. Most of the Specific Plan area is zoned “Industrial General” (IG). Businesses fronting Beach Boulevard are generally zoned “Commercial Neighborhood” (CN) and “Commercial General” (CG). Existing residential neighborhoods are zoned “Medium Density Residential” (RM). Small portions of the Specific Plan area are zoned “Open Space/Buffer” (OS), “Parks and Recreation” (PR), and Public Institutional” (PI). The entire area will be rezoned as “Town Center Specific Plan” (TCSP). The Town Center Specific Plan will become the implementing document for the Specific Plan area. Neighborhoods within the 13.9-acre Existing Residential land use district are designated to preserve the residential character of these places. Land uses within this area would be restricted to those uses currently allowed in the City’s residential zoning designation and development standards would preserve the residential character of the neighborhood. The 139 additional residential units within the Specific Plan over the course of 30 years is not substantial and would assist with the housing deficiency. The Orange County Business Council’s 2019-20 Workforce Housing Scorecard states that there is an existing housing shortfall of 58,000 units and anticipates that this shortfall will grow to 114,031 units by 2045. This housing shortfall will be met with housing outside of Orange County which will result in longer vehicle trips by employees living outside of Orange County and commuting there for employment. These longer vehicle trips will result in more air pollutant emissions. Development of residential units proposed by the Project will assist Orange County in meeting its housing demand and will reduce vehicular emissions. Section 4.14 Population and Housing of this Subsequent IS/MND also analyzes planned population growth within the City and found that the Project would not result in substantial unplanned indirect population growth.

In addition, the Specific Plan has numerous sustainability guidelines which promote energy efficiency such as installation of high R-value wall and ceiling thermal insulation, incorporation of Low-E windows or use Energy Star window, high-efficiency lighting, and inclusion of electric vehicle charging infrastructure. Other sustainability guidelines address exterior lighting, minimization of heat islands, and water conservation. As such, the proposed Project is not anticipated to exceed the AQMP assumptions for the Project site and is found to be consistent with the AQMP for the second criterion. Therefore, the Project would not result in an inconsistency with the SCAQMD’s 2022 AQMP. Less than significant impacts would occur, and no mitigation is required.

b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Less Than Significant Impact. Orange County is a nonattainment area for O₃, PM₁₀, and PM_{2.5}, as shown in Table 4-3. The Project would generate PM₁₀, PM_{2.5}, NO₂, and O₃ precursors (NO_x and VOC) during short-term construction and long-term operations. It should be noted that for purposes of analysis in this section, “Project” is inclusive of all future projects within the Specific Plan area.

Construction Impacts

Construction-Related Regional Impacts

A project may have a significant impact where project-related emissions would exceed federal, State, or regional standards or thresholds, or where project-related emissions would substantially contribute to an existing or projected air quality violation.

A project with daily emission rates below the SCAQMD's established air quality significance thresholds (shown in Table 4-1) would have a less than significant impact on regional air quality. Project emissions were estimated using the California Emissions Estimator Model (CalEEMod) version 2022.1.1.20 computer program. CalEEMod is designed to model construction and operational emissions for land development projects and allows for the input of project specific information. The CalEEMod inputs for construction emissions were based on the Project's construction assumptions and default assumptions derived from CalEEMod. All construction activities shall be conducted in compliance with South Coast Air Quality Management District's (SCAQMD's) Rule 403, Fugitive Dust, for controlling fugitive dust and avoiding nuisance (RR AQ-1) (SCAQMD 2022)

Table 4-5, Estimated Maximum Daily Construction Emissions, presents the estimated maximum daily emissions during construction of the proposed Project (all future projects) and compares the estimated emissions with the SCAQMD's daily regional emission thresholds. These estimated maximum daily emissions are based on the construction schedule of two years based on CalEEMod's default data. However, the Specific Plan is anticipated to occur over an approximate 30-year time frame and consequently emissions may be spread over a longer time frame than two years, which would reduce the intensity of construction activities and its associated emissions. To provide a conservative analysis, construction activities were assumed to occur in 2024 and 2025 because air pollution from vehicles become progressively lower in the future due to the phase-out of older more polluting engines and the phase-in of cleaner vehicles. As such, use of a two-year construction period and near-term construction vehicles within CalEEMod represents a conservative analysis of potential air quality impacts. As shown in Table 4-5, all Project-related construction emissions would be below the regional significance thresholds. As such, construction impacts would be less than significant, and no mitigation is required.

**TABLE 4-5
ESTIMATED MAXIMUM DAILY CONSTRUCTION EMISSIONS**

Year	Emissions (lbs./day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
2024	4	36	34	<1	7	4
2025	49	11	19	<1	2	1
Maximum Emissions	49	36	34	<1	7	4
SCAQMD Thresholds (Table 8-1)	75	100	550	150	150	55
Exceeds SCAQMD Thresholds?	No	No	No	No	No	No
lbs./day: pounds per day; VOC: volatile organic compound; NO _x : nitrogen oxides; CO: carbon monoxide; SO _x : sulfur oxides; PM ₁₀ : respirable particulate matter 10 microns or less in diameter; PM _{2.5} : fine particulate matter 2.5 microns or less in diameter; SCAQMD: South Coast Air Quality Management District. See Appendix A, Air Quality and Greenhouse Gas Emissions Modeling Data, for CalEEMod model outputs.						

Cumulative Construction Impacts

Construction activities associated with the proposed Project would result in less than significant construction-related regional and localized air quality impacts, as quantified above in Table 4-5, Estimated Maximum Daily Construction Emissions, and Table 4-7, Localized Significance Threshold Construction Emissions (discussed under Threshold 4.3c), respectively. Short-term cumulative impacts related to air quality could occur if construction of the future project within the Specific Plan area and other projects in the surrounding area were to occur simultaneously. In particular, with respect to local impacts, the consideration of cumulative construction particulate (PM₁₀ and PM_{2.5}) impacts is limited to cases when projects constructed simultaneously are within a few hundred yards of each other because of: (1) the combination of the short range (distance) of particulate dispersion (especially when compared to gaseous pollutants), and (2) the SCAQMD's required dust-control measures (RR AQ-1), which further limit particulate dispersion from the Project site.

SCAQMD's policy with respect to cumulative impacts associated with the above-referenced pollutants and their precursors is that impacts that would be directly less than significant on a project level would also be cumulatively less than significant. Because the Project's construction emissions are below the SCAQMD's regional and local significance thresholds, local construction emissions would not be cumulatively considerable, and the impact would be less than significant. No mitigation is required.

Operational Impacts

The following section provides an analysis of potential long-term air quality impacts to regional air quality with the long-term operation of the proposed Project (future projects within the Specific Plan area). The potential operations-related air emissions have been analyzed below for the regional and local criteria pollutant emissions and cumulative impacts.

Operations-Related Regional Impacts

Operational emissions associated with the Project are comprised of area, energy, and mobile source emissions. The principal source of VOC emissions associated with the Project would result from consumer products associated with residential uses. Area and energy source emissions are based on CalEEMod assumptions for the specific land uses and size. Mobile source emissions are based on estimated Project-related trip generation forecasts, as contained in the *Stanton Town Center Specific Plan Traffic Impact Study*. The Project would generate 937 daily trips on the weekday, 1,042 Saturday trips, and 894 Sunday trips. The peak day operational emissions for VOC, NO_x, CO, SO_x, PM₁₀, and PM_{2.5} daily emissions that would be created from the Project's long-term operation have been calculated and are summarized below in Table 4-6, Peak Daily Operational Emissions.

**TABLE 4-6
PEAK DAILY OPERATIONAL EMISSIONS**

Source	Emissions (lbs./day)*					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
Area sources	4	<1	8	<1	<1	<1
Energy sources	<1	1	<1	<1	<1	<1
Mobile sources	4	2	28	<1	5	1
Total Operational Emissions*	8	3	36	<1	5	1
<i>SCAQMD Significance Thresholds (Table 4-1)</i>	55	55	550	150	150	55
Significant Impact?	No	No	No	No	No	No
lbs./day: pounds per day; VOC: volatile organic compound; NO _x : nitrogen oxides; CO: carbon monoxide; SO _x : sulfur oxides; PM ₁₀ : respirable particulate matter 10 microns or less in diameter; PM _{2.5} : fine particulate matter 2.5 microns or less in diameter; SCAQMD: South Coast Air Quality Management District. * Some totals do not add due to rounding. See Appendix A, Air Quality and Greenhouse Gas Emissions Modeling Data, for CalEEMod model outputs.						

The emissions generated by the Project shown in Table 4-6 shows that none of the analyzed criteria pollutants would exceed the regional emissions operational thresholds. Therefore, a less than significant regional air quality impact would occur from operation of the Project, and no mitigation is required.

Cumulative Operational Impacts

As shown in Table 4-6, Peak Daily Operational Emissions, and Table 4-8, Localized Significance Thresholds Operational Emissions (under Threshold 4.3c, below) operational emissions of VOC, NO_x, CO, SO_x, PM₁₀, and PM_{2.5} would be below the SCAQMD CEQA significance thresholds. Consistent with the approach described above (under Cumulative Construction Impacts), SCAQMD's policy with respect to cumulative impacts associated with the above-referenced pollutants and their precursors is that impacts that would be directly less than significant on a project level would also be cumulatively less than significant. Therefore, because the Project's operational emissions are less than the respective SCAQMD daily operational thresholds, the Project's operations phase activities would not contribute

to a cumulatively considerable increase of a pollutant for which the SoCAB is in nonattainment. Emissions of nonattainment pollutants or their precursors would not be cumulatively considerable and would be less than significant. No mitigation is required.

Cumulative Health Impacts

The SoCAB is designated as nonattainment for O₃, PM₁₀, and PM_{2.5}, which means that the background levels of those pollutants are, at times, higher than the ambient air quality standards. The air quality standards were set to protect public health, including the health of sensitive individuals (the elderly, children, and the sick). Therefore, when the concentrations of those pollutants exceed the standard, it is likely that some sensitive individuals in the population would experience health effects. These health effects are not identified for specific individual receptors nor does the analysis identify the magnitude of health effects. The regional analysis detailed above found that the Project would not exceed the SCAQMD regional significance thresholds for VOC and NO_x (ozone precursors), PM₁₀, and PM_{2.5}. As such, the Project would result in a less than significant cumulative health impact, and no mitigation is required.

c) Expose sensitive receptors to substantial pollutant concentrations?

Less Than Significant Impact. A significant impact may occur when a project would generate pollutant concentrations to a degree that would significantly affect sensitive receptors (i.e., populations that are more susceptible to the effects of air pollution than the population at large). Exposure of sensitive receptors is addressed for emissions from construction and operation of the proposed Project. To address construction activities, the analysis below includes the following analyses: localized air quality impacts from construction and toxic air contaminants (TACs), specifically diesel particulate matter (DPM) from on-site construction. To address operational emissions exposure to sensitive receptors, the analysis below discusses local air quality impacts from on-site operations and CO hotspots. Operational, long-term TACs may be generated by some industrial land uses; commercial land uses (e.g., gas stations and dry cleaners); and diesel trucks on freeways. Residential uses do not generate substantial quantities of TACs and are therefore not addressed further in this analysis.

Construction

Localized Criteria Pollutants from On-Site Construction

In addition to the mass daily emissions thresholds established by the SCAQMD, short-term local impacts to nearby sensitive receptors from on-site emissions of NO_x, CO, PM₁₀, and PM_{2.5} are examined based on SCAQMD localized significance threshold (LST) methodology. To assess local air quality impacts for development projects without complex dispersion modeling, the SCAQMD developed screening (lookup) tables to assist lead agencies in evaluating impacts.

The LST method is recommended to be limited to projects that are five acres or less. For the purposes of an LST analysis, the SCAQMD considers receptors where it is possible that an individual could remain for 1 hour for NO₂ and CO exposure and 24 hours for PM₁₀ and PM_{2.5} exposure. The emissions limits in the lookup tables are based on the SCAQMD's Ambient Air Quality Standards. It is currently unknown where the closest receptors would be located to the Project site. As such, the emissions thresholds for receptors are set within 25 meters (82 feet) of the Project site, which is the closest available threshold. The thresholds for receptors located farther away would be higher, and the Project emissions would be a smaller fraction of the thresholds.

Table 4-7, Localized Significance Threshold Construction Emissions, shows the maximum daily on-site emissions for construction activities compared with the SCAQMD LSTs with receptors within 25 meters. The Project's maximum daily on-site emissions would occur during the grading phase in 2024. As shown in Table 4-7, the localized emissions from the Project would be below the thresholds, and no significant impacts would result to sensitive receptors. No mitigation is required.

**TABLE 4-7
LOCALIZED SIGNIFICANCE THRESHOLD CONSTRUCTION EMISSIONS**

Emissions and Thresholds	Emissions (lbs./day)			
	NO _x	CO	PM ₁₀	PM _{2.5}
Project maximum daily on-site emissions	36	33	7	4
SCAQMD Localized Significance Threshold ^a	171	1,160	12	6
Exceed threshold?	No	No	No	No
lbs./day: pounds per day; NO _x : nitrogen oxides; CO: carbon monoxide; PM ₁₀ : respirable particulate matter 10 microns or less in diameter; PM _{2.5} : fine particulate matter 2.5 microns or less in diameter. ^a Data is for SCAQMD Source Receptor Area 17, Central Orange County, 25-meter distance, 4.5 acres of daily soil disturbance. See Appendix A, Air Quality and Greenhouse Gas Emissions Modeling Data, for CalEEMod outputs.				

Toxic Air Contaminant Emissions from On-Site Construction

Construction activities would result in short-term, project-generated emissions of DPM from the exhaust of off-road, heavy-duty diesel equipment used for site preparation (e.g., demolition, excavation, and grading); paving; building construction; and other miscellaneous activities. CARB identified DPM as a TAC in 1998. The dose to which receptors are exposed is the primary factor used to determine health risk. Dose is a function of the concentration of a substance or substances in the environment and the duration of exposure to the substance. Thus, the risks estimated for a maximally exposed individual (MEI) are higher if a fixed exposure occurs over a longer time period. According to the Office of Environmental Health Hazard Assessment (OEHHA), health risk assessments—which determine the exposure of sensitive receptors to TAC emissions—should be based on a 40-year exposure period; however, such assessments should be limited to the period/duration of activities associated with the project.

There would be relatively few pieces of off-road, heavy-duty diesel equipment in operation, and the total construction period would be relatively short to construct 139 dwelling units when compared to a 40-year exposure period. In addition, the 139 dwelling units may be constructed in different locations, which would further dilute the intensity of emissions by a reduced construction period and less equipment exhaust exposure because the activities are distributed in different geographic locations. Combined with the highly dispersive properties of DPM over a large project area and additional reductions in particulate emissions from newer construction equipment, as required by USEPA and CARB regulations, construction emissions of TACs would not expose sensitive receptors to substantial emissions of TACs. The impact would be less than significant, and no mitigation is required.

Operation

Localized Criteria Pollutants from On-site Operations

Project-related air emissions may have the potential to exceed the State and federal air quality standards in the vicinity of the Project even though these pollutant emissions may not be significant enough to create a regional impact to the SoCAB. Project-related air emissions from on-site sources such as architectural coatings, landscaping equipment, and on-site usage of natural gas appliances may have the potential to generate emissions that exceed the State and federal air quality standards in the vicinity of the Project even though these pollutant emissions may not be significant enough to create a regional impact to the SoCAB.

The local air quality emissions from on-site operations were analyzed using the SCAQMD's Mass Rate LST Look-up Tables and the LST Methodology. Table 4-8, Localized Significance Threshold Operational Emissions, shows the on-site operational emissions from area sources, energy usage, vehicles operating on-site, and the calculated emissions thresholds.

**TABLE 4-8
LOCALIZED SIGNIFICANCE THRESHOLD OPERATIONAL
EMISSIONS**

On-Site Emission Source	Pollutant Emissions (pounds/day)			
	NO _x	CO	PM ₁₀	PM _{2.5}
Area Sources	<1	8	<1	<1
Energy Sources	<1	<1	<1	<1
Mobile Sources ^a	<1	2	<1	<1
Project's total maximum daily on-site emissions	1	10	<1	<1
SCAQMD Localized Significance Threshold ^b	98	60	1	1
Exceeds Threshold?	No	No	No	No
lbs./day: pounds per day; NO _x : nitrogen oxides; CO: carbon monoxide; PM ₁₀ : respirable particulate matter 10 microns or less in diameter; PM _{2.5} : fine particulate matter 2.5 microns or less in diameter.				
^a Onsite vehicle emissions based on 5% of the gross vehicular emissions, which is the estimated portion of vehicle emissions occurring within a quarter mile of the Project site.				
^b Data is for SCAQMD Source Receptor Area 17, Central Orange County, with a source receptor distance of 25-meters, 4.5 acres.				
See Appendix A, Air Quality and Greenhouse Gas Emissions Modeling Data, for CalEEMod outputs.				

The data provided in Table 4-8 shows that the operations of the Project would not exceed the local NO_x, CO, PM₁₀, and PM_{2.5} thresholds of significance. Therefore, operation of the Project would create a less than significant impact to sensitive receptors, and no mitigation is required.

Carbon Monoxide Hotspot

In an urban setting, vehicle exhaust is the primary source of CO. Consequently, the highest CO concentrations generally are found close to congested intersections. Under typical meteorological conditions, CO concentrations tend to decrease as the distance from the emissions source (e.g., congested intersection) increases. Therefore, for purposes of providing a conservative worst-case impact analysis, CO concentrations typically are analyzed at congested intersection locations. If impacts are less than significant close to congested intersections, impacts would also be less than significant at more distant sensitive-receptor and other locations. Per the Traffic Study prepared for the proposed Project, implementation of the Project would result in 56 trips in the AM peak hour and 71 trips in the PM peak hour with a total of 937 trips per day. The 2003 AQMP and the 1992 Federal Attainment Plan for Carbon Monoxide evaluated numerous intersections for the potential to result in CO hotspots and found that the 1-hour CO standard (20.0 ppm) would likely not be exceeded until the daily traffic at the intersection exceeded more than 400,000 vehicles per day. Because the roadways proximate to the Project site have substantially less traffic than 400,000 trips per day, CO concentrations at nearby roadway intersections are anticipated to be substantially less than the CO ambient air quality standards. Moreover, vehicle standards have become increasingly more stringent since 1992 and background CO concentrations are less than in 1992. As such, existing CO concentrations would be less than the ambient air quality concentration standards, and the small contribution of Project-

related traffic would likewise not result in CO concentrations that would exceed either the State or federal ambient air quality standards. The Project would result in less than significant impacts related to CO hotspots, and no mitigation is required.

d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Less Than Significant Impact. Project construction would use equipment and activities that could result in other emissions (such as those leading to odors). However, these odors would be typical during construction and not significantly objectionable. Potential construction odors include on-site construction equipment's diesel exhaust emissions as well as roofing, painting, and paving operations. There may be situations where construction activity odors could be noticed; however, these odors would be temporary and would dissipate rapidly from the source with an increase in distance. These odors would not be of such magnitude to cause a public nuisance. Therefore, the impacts would be short-term; would not affect a substantial number of people; and would be less than significant, and no mitigation is required.

According to the SCAQMD CEQA Handbook, land uses associated with odor complaints typically include agricultural uses, sewer treatment plants, food processing plants, chemical plants, composting, refineries, landfills, dairies, and fiberglass molding. The Project does not include any uses identified by the SCAQMD as being associated with odors, and therefore, would not produce objectionable odors. In addition, the Project uses are regulated from nuisance odors or other objectionable emissions by SCAQMD Rule 402, Nuisance (RR AQ-2). Rule 402 prohibits discharge from any source of air contaminants or other material, which would cause injury, detriment, nuisance, or annoyance to people or the public. Overall, there would be a less than significant impact, and no mitigation is required (SCAQMD 2022).

Regulatory Requirements

RR AQ-1 All construction activities shall be conducted in compliance with South Coast Air Quality Management District's Rule 403, Fugitive Dust, for controlling fugitive dust and avoiding nuisance. Contractor compliance with Rule 403 requirements shall be mandated in the contractor's specifications (SCAQMD 2022).

RR AQ-2 All construction activities shall be conducted in compliance with South Coast Air Quality Management District Rule 402, Nuisance, which states that a project shall not "discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health, or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property" (SCAQMD 2022).

Mitigation Measures

Project implementation would not result in significant impacts related to Air Quality; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no new significant impacts beyond the impacts analyzed in the GP EIR.

4.4 BIOLOGICAL RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

2008 General Plan Update EIR

The analysis in the Initial Study for the GP EIR concluded that the General Plan Update would not have an impact, directly or through habitat modifications, on any candidate, sensitive, or special status species; would not have an effect on any riparian habitat or other sensitive natural community; would not affect federally protected wetlands; would not interfere with the movement of any native resident or migratory fish or wildlife species; would not conflict with any local policies or ordinances protecting biological resources such as a tree preservation policy; and would not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved, regional, or state habitat conservation plan. Thus, this topic was focused out from further analysis in the GP EIR.

Supplemental Analysis

- a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?***

No Impact. The Specific Plan area is located within an urbanized area and currently consists of a mix of land uses including industrial uses, commercial, single- and multi- family residential, and railroad right of way. As a result of urbanization, the entire Project area and immediate surrounding areas are fully developed and no longer support naturally vegetated areas or stands of native vegetation. The vegetation in the Project area consists of ornamental landscaping including mature trees, shrubs, and open turf, which provide minimal foraging habitat for common animal species that are typically found in urban areas. Thus, the site does not contain any habitat suitable for special status plant and animal species, and as such none occurs in the Project area. Further, review of the U.S. Fish and Wildlife Service's (USFWS') Critical Habitat for Threatened and Endangered Species shows that there are no designated critical habitat areas in or near the City or the Specific Plan area. The nearest critical habitats are located approximately 6.5 miles to the northeast in West Coyote Hills (east of Route 39/Beach Boulevard, South of Route 9/Imperial Boulevard, north of Rosecrans Avenue, and west of Euclid Street) and approximately 7.5 miles to the south in Huntington Beach State Park in the City of Huntington Beach adjacent to the Santa Ana River (USFWS 2021).

The proposed Project would not impact any candidate, sensitive, or special status species, as identified in the local or regional plans, policies, or regulations by the California Department of Fish and Wildlife (CDFW) or USFWS, and no mitigation is required.

- b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or US Fish and Wildlife Service?***

No Impact. The Project area is developed with the exception of a few vacant disturbed parcels and does not contain any riparian habitat or other sensitive natural community. No natural sensitive communities have been identified in local or regional plans or by the CDFW or by the USFWS occur within the Specific Plan area. The existing Project area is generally comprised of impervious surfaces from infill development with scattered ornamental landscaping including mature trees, shrubs, and open turf. There would be no impact to riparian habitats or sensitive natural vegetation communities, and no mitigation is required.

- c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?***

No Impact. As previously described in Checklist Response 4.4(a), the Project site is developed and within an urbanized area. The Project area is devoid of any wetlands, including marsh, vernal pool and is not in proximity to the coast. As such, it would not impact

any wetlands through direct removal, filling, and other means. Thus, no impacts would occur, and no mitigation is required.

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites?

Less Than Significant Impact with Mitigation Incorporated. The Project area is within and surrounded by urban infill development as discussed in Checklist Response 4.4(a). The City currently has eight public parks, four of which are near the Project area (Martha Wesihaup Linear Park, Stanton Central Park, Veterans Memorial Park, and Zuniga Park); however, no parks and/or open space exists in the Specific Plan area. Additionally, the Specific Plan area lacks connectivity to natural open space areas and is not within any regionally or locally recognized wildlife movement corridors. The Project site is isolated from regional wildlife corridors and linkages, and there are no riparian corridors, creeks, or useful patches of steppingstone habitat (natural areas) within or connecting the Project site to any identified wildlife corridors or linkages. Additionally, there are no native wildlife nursery sites on or adjacent to the site. Therefore, implementation of the proposed Project would not disrupt or have any adverse effect on any migratory corridors or linkages in the surrounding area. The Project would not affect the movement of any native resident or migratory fish or wildlife species or the established native resident or migratory wildlife corridors.

Due to the presence of trees and vegetation within the Project area, there is potential for birds protected by the Federal Migratory Bird Treaty Act (MBTA) and Sections 3503, 3503.5, and 3513 of the *California Fish and Game Code* to nest at the site. The MBTA protects common and special status migratory birds and their nests and eggs. Bird species protected under the provisions of the MBTA are identified by the List of Migratory Birds (50 *Code of Federal Regulations* [CFR] Section 10.13, as amended). Since the 1970s, the MBTA has been interpreted to prohibit the accidental or “incidental” take of migratory birds.

Multiple sections of *California Fish and Game Code* provide protection for nesting birds and raptors. Section 3503 makes it unlawful to take, possess, or needlessly destroy the nest or eggs of any bird. Section 3503.5 specifically addresses raptors (i.e., birds of prey) and makes it unlawful to take, possess, or destroy these birds or their nest or eggs. Section 3513 prohibits the take or possession of migratory non-game birds or any part of such bird, as designated by the MBTA.

If demolition and site clearing activities occur during the nesting season, active bird nests on the site may be disturbed or destroyed, resulting in a significant impact. Therefore, MM BIO-1 is recommended to avoid potential impacts to nesting birds and their fledglings. Therefore, while impacts to migratory birds may occur during the construction phase, they would be mitigated to less than significant level with implementation of MM BIO-1.

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Less Than Significant Impact. The proposed Project would potentially involve the removal of ornamental trees and replacing the existing landscaping with a variety of drought tolerant trees and vegetation. The City's Municipal Code Ordinance 271 (Chapter 12.20, Street Tree Plan) is the City's Master Plan of Street Trees. According to Chapter 12.20, no person, firm or corporation shall plant, remove, replace or cause to be planted, removed or replaced any tree within a dedicated ROW without having first obtained a permit in writing from the City Engineer to do so. Additionally, any trees planted shall be of the kind specified in the Master Plan of Street Trees and all work in planting, removing, or replacing a street tree shall be done to the satisfaction of the Director of Community Development. All future development with the Specific Plan area would be required to comply with RR BIO-1, which includes compliance with Chapter 12.20. Proposed projects would comply with the most current adopted City Municipal Codes regarding landscaping standards and requirements. Additionally, future projects would comply with the Town Center Specific Plan Landscape Design Guidelines (RR BIO-2) Therefore, with compliance with RR BIO-1 and RR BIO-2, impacts would be less than significant, and no mitigation is required.

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

No Impact. The proposed Project site is not located in any adopted Habitat Conservation Plan (HCP), Natural Community Conservation Plan (NCCP), or other approved local, regional, or State habitat conservation plan. No impact would occur, and no mitigation is required.

Regulatory Requirement

RR BIO-1 All future projects within the Town Center Specific Plan area shall comply with the most current adopted City of Stanton Municipal Codes regarding landscaping standards and requirements, including but not limited to, City of Stanton Municipal Code Chapter 12.20, Street Tree Plan.

RR BIO-2 All future projects within the Town Center Specific Plan area shall comply with the Design Guidelines and Development Standards pertaining to landscaping.

Mitigation Measures

MM BIO-1 Prior to the issuance of any grading permits, the Community & Economic Development Director or designee shall verify that the following requirements for nesting birds and preconstruction survey are completed:

- The start of site-preparation activities and subsequent construction activity initiation shall be scheduled outside of the bird nesting and breeding season (typically February 15 through August 30). If site-preparation activities start during the nesting season, a qualified

Biologist shall conduct a nesting bird survey in potential bird nesting areas within 200 feet of any proposed disturbance. The survey shall be conducted no more than three days prior to the start of any ground disturbance activities.

- If active nests of bird species protected by the Migratory Bird Treaty Act (MBTA) and/or California Fish and Game Code are present in the impact area or within 200 feet of the impact area, a no-entry buffer shall be established around the nest site to minimize potential impacts to the nest occupants. The size and duration of this temporary buffer shall be determined by the qualified Biologist who will account for the bird species and type of disturbance proposed.
- Clearing and/or construction activities within buffer areas shall be postponed or halted until the nest is complete (e.g., juveniles have fledged from the nest and there is no evidence of a second nesting attempt) as determined by a qualified Biologist.

Conclusion

The additional 139 units have no significant impacts beyond the impacts analyzed in the Initial Study for the General Plan Update.

4.5 CULTURAL RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Disturb any human remains, including those interred outside of formal cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis in the Initial Study for the GP EIR concluded that the General Plan Update would not cause an adverse change in the significance of historic and archaeological resources; would not destroy, directly or indirectly, a unique paleontological resource or site or unique geologic features; and would not disturb any human remains. Thus, this topic was focused out from further analysis in the GP EIR.

Introduction

This analysis used the results of a historic and archaeological record search conducted on March 22, 2021, at the South-Central Coastal Information Center (SCCIC), located on the campus of California State University, Fullerton. The SCCIC houses records of the California Historical Resources Information System (CHRIS) for Los Angeles, Orange, and Ventura counties. The records search included a 1.0-mile radius around the Project site.

Existing Setting

The approximate 156.9-acre Project site is located within the northern portion of the City of Stanton, which is generally situated south of the cities of Anaheim and Buena Park, west of Garden Grove, and north of Westminster.

On March 22, 2021, the SCCIC completed a record search for the Project site, which included a one-mile radius around the site. The purpose of the literature search was to identify prehistoric or historic archaeological sites or historic buildings and structures, previously recorded within and around the Project site. The SCCIC record search identified 22 prior cultural resources studies within the one-mile search, one of which was identified within the Project site (Table 4-9).

The one study located within the project area, OR-03337, included an *Archaeological and Paleontological Assessment of the Proposed Peaker Project Location at Bare Substation*.

The records search did not identify any previously recorded cultural resource within the one-mile search radius of the Project site.

Supplemental Analysis

a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?

Less Than Significant Impact. As stated previously, the SCCIC record search identified 22 prior cultural resources studies within the one-mile search, one of which was identified within the Project area. Additionally, the SCCIC did not identify any previously recorded cultural resource within the one-mile search radius of the Project site. Also, no historical resources were identified on the Project site. Therefore, the Project's impacts on historical resources are considered less than significant, and no mitigation is required.

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?

Less Than Significant With Mitigation Incorporated. Based on the searches conducted, one study within the Project area, OR-03337, included an *Archaeological and Paleontological Assessment of the Proposed Peaker Project Location at Bare Substation*. No archaeological resources were discovered on the Project site. However, there is a possibility that buried historical and/or archaeological materials would be uncovered during necessary subsurface excavations for the construction of the Project. To make sure no significant impacts would result, MM CUL-1 is proposed and calls for a qualified archaeologist to monitor earth-moving activities during construction and sets procedures to follow in the event of the discovery of archaeological resources. Implementation of MM CUL-1 would reduce the potential for the destruction of any significant archaeological resources. Therefore, potential impacts pertaining to adverse change in the significance of an archaeological resource would be less than significant with implementation of mitigation.

c) Disturb any human remains, including those interred outside of formal cemeteries?

Less Than Significant Impact. There is no indication that human remains are present within the Project site, and the SCCIC records search does not indicate evidence of human remains within the one-mile search radius of the site. However, construction activities may unearth previously undiscovered human remains.

In compliance with State and federal regulations, if human remains are encountered during excavation activities, all work shall halt at the site and or any nearby areas reasonably suspected to overlie adjacent remains, and the County Coroner shall be notified (RR CUL-1). The Coroner shall determine whether the remains are of forensic interest within two working days of receiving notification. If the Coroner, with the aid of the qualified archaeologist, determines that the remains are prehistoric, the Coroner shall contact the NAHC within 24 hours of the determination. The NAHC shall be responsible for designating the Most Likely Descendant (MLD), who will be responsible for the ultimate disposition of the remains, as required by Section 5097.98 of the California Public Resources Code. Compliance with RR CUL-1 would ensure that impacts on human remains would be less than significant. No mitigation is required.

Regulatory Requirements

- RR CUL-1** If human remains are encountered during any Project-related ground-disturbing activities, Section 7050.5 of the *California Health and Safety Code* states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition of the materials pursuant to Section 5097.98 of the *California Public Resources Code*. The provisions of Section 15064.5 of the California Environmental Quality Act (CEQA) Guidelines shall also be followed. The County Coroner must be notified of the find immediately. If the remains are determined to be prehistoric, the Coroner shall notify the Native American Heritage Commission (NAHC). The NAHC will determine and notify a Most Likely Descendent (MLD). With the permission of the landowner or his/her authorized representative, the MLD may inspect the site of the discovery. The MLD must complete the inspection within 24 hours of notification by the NAHC. The MLD may recommend scientific removal and nondestructive analysis of human remains and items associated with Native American burials. These requirements shall be included as notes on the contractor specification and verified by the Community Development Department, prior to issuance of grading permits. This measure shall be implemented to the satisfaction of the City in consultation with the County Coroner.

Mitigation Measures

- MM CUL-1** A qualified archaeologist (the “Project Archaeologist”) that meets the Secretary of Interior Standards (SOI) shall be retained prior to the start of grading for Project-related construction. The Project Archaeologist shall monitor all ground-disturbing activities within the areas of native soil (i.e., below existing areas of artificial fill from previous construction). If archaeological or historical resources are encountered during implementation of any phase of the Project, the Project Archaeologist will be allowed to temporarily divert or redirect grading or excavation activities in the vicinity of the find in order to make an evaluation of the find.

Conclusion

The additional 139 units have no significant impacts beyond the impacts analyzed in the Initial Study for the General Plan Update.

4.6 ENERGY

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

2008 General Plan Update EIR

Energy was not included as a topical issue in Appendix G of Environmental Checklist Form at the time the GP EIR was prepared, and thus was not included as a section in the EIR. However, the discussion in Section 10.0, Significant Irreversible Environmental Changes which would be Involved if the Proposed Project were Implemented, of the GP EIR, identified that implementation of the project would commit energy resources in the form of petroleum products (diesel fuel and gasoline), natural gas, and electricity and considered this an irreversible environmental change.

Supplemental Analysis

a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Construction

Less Than Significant Impact. Project construction would require the use of construction equipment for excavation, building, and paving activities. Construction also includes the vehicles of construction workers and vendors traveling to and from the Project site. Off-road construction equipment use was calculated from the equipment data (i.e., mix, hours per day, horsepower, load factor, days per phase) provided in the CalEEMod version 2022.1.1.20 construction output files included in Appendix A of this Subsequent IS/MND. The total horsepower hours for the Project was then multiplied by fuel usage estimates per hours of construction activities included in the OFFROAD Model. Fuel consumption from construction worker, vendor, and delivery/haul trucks was calculated using the trip rates and distances provided in the CalEEMod construction output files. Total vehicle miles traveled (VMT) was calculated for each type of construction-related trip and divided by the corresponding miles per gallon factor using CARB's Emissions FAcT 2021 (EMFAC 2021) model. EMFAC 2021 provides the total annual VMT and fuel consumed for each vehicle type. Construction vendor trucks were assumed to be heavy-duty diesel trucks. Total fuel consumption for Project related construction activities are shown in Table 4-10.

**TABLE 4-10
ENERGY USE DURING CONSTRUCTION**

Source	Gasoline Fuel (gallons)	Diesel Fuel (gallons)
Off-road Construction Equipment	12,380	13,842
Worker commute trips	24,856	59
Vendor trips	2,355	24
Haul Trucks	6	5,157
Total	39,598	19,082
Total may not add due to rounding. See Appendix A for Energy data. Data based on CalEEMod 2022.1.1.20 (Appendix A), OFFROAD, and EMFAC2021 programs.		

Fuel energy consumed during construction would be temporary in nature and would not occur after completion of construction activities. Furthermore, there are no unusual Project characteristics that would necessitate the use of construction equipment that would be less energy-efficient than at comparable construction sites in other parts of the State. Therefore, the proposed construction activities would not result in inefficient, wasteful, or unnecessary fuel consumption.

Operation

Project operations would result in energy consumption related to electricity, natural gas, water, solid waste, and transportation. In addition, potential energy impacts of the Project are evaluated with emphasis on avoiding or reducing inefficient, wasteful, and unnecessary consumption of energy. The regulations, plans, and policies adopted for the purpose of maximizing energy efficiency that are directly applicable to the Project include (1) California's Title 24 Building Energy Efficiency Standards for Residential Buildings, (2) the CALGreen Code, and (3) the City of Stanton Energy Resources section of the General Plan. Development of the Project site would comply with the applicable energy efficiency standards at the time of application. The City of Stanton Energy Resources section of the General Plan establishes goals of conserving energy in homes and businesses as well as expanding renewable energy generation sources. These codes are enforced by the City, and adherence to standard requirements for construction and operations would ensure that the Project would comply with these regulations.

Transportation energy use would be associated with daily trips associated with the Project. Based on data obtained from CalEEMod (refer to Appendix A), the Project would generate 3.2 million annual VMT. The gasoline and diesel consumption rates were calculated using estimated miles per gallon factors based on data from EMFAC 2021 that provides average vehicle emissions rates for the SoCAB in California. It is estimated that Project-generated operational traffic would consume 73,776 gallons of gasoline fuel and 1,065 gallons of diesel fuel per year (Table 4-11, Energy Use During Operations). Transportation fuels consumption would steadily decline with increases to the Corporate Average Fuel Efficiency Standards and phase-out of older, more fuel-consumptive vehicles with energy-efficient electric vehicles and vehicles with greater fuel efficiency. As discussed in Section 4.3, Air Quality, the

Project would assist Orange County in addressing the housing deficiency, which would lead to shorter vehicle trip lengths from employees living in the Town Center Specific area. Because the Project would incorporate the latest energy efficiency standards for residential buildings, assist in meeting housing demands locally, and have no unusual characteristics that would cause greater energy consumption than a comparable project elsewhere in the State, impacts would thus be less than significant, and no mitigation is required.

TABLE 4-11
ENERGY USE DURING OPERATIONS

Gasoline (Gallons/yr)	Diesel (Gallons/yr)	Natural Gas (kBtu/yr)	Electricity (kWh/yr)
73,776	1,065	2,294,260	671,692
yr: year; kBtu: kilo-British thermal unit; kWh: kilowatt hour.			

b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

No Impact. The State's Energy Efficiency Standards for Residential and Nonresidential Buildings (Title 24, Part 6 of the CCR) were established in 1978 in response to a legislative mandate to reduce California's energy consumption. The current 2022 Title 24 Standards, effective January 1, 2022 (RR GHG-1). The 2022 California Green Building Standards Code (24 CCR, Part 11), also known as the CALGreen code, contains mandatory requirements and voluntary measures for new residential and nonresidential buildings (including buildings for retail, office, public schools and hospitals) throughout California (RR GHG-2). The development of the CALGreen Code is intended to improve public health, safety, and general welfare by enhancing the design and construction of buildings through the following construction practices: (1) planning and design; (2) energy efficiency; (3) water efficiency and conservation; (4) material conservation and resource efficiency; and (5) environmental quality. In short, the code is established to reduce construction waste; make buildings more efficient in the use of materials and energy; and reduce environmental impact during and after construction.

The CALGreen Code contains requirements for construction site selection, storm water control during construction, construction waste reduction, indoor water use reduction, material selection, natural resource conservation, site irrigation conservation, and more. The code provides for design options allowing the designer to determine how best to achieve compliance for a given site or building condition. The code also requires building commissioning, which is a process for verification that all building systems (e.g., heating and cooling equipment and lighting systems) are functioning at their maximum efficiency.

The CALGreen Code provides standards for light and glare reduction, grading and paving, energy efficient appliances, renewable energy, graywater systems, water efficient plumbing fixtures, recycling and recycled materials, pollutant controls (including moisture control and indoor air quality), acoustical controls, storm water management, building design,

insulation, flooring, and framing, among others. The Project would comply with the 2022 Building Energy Efficiency Standards and the 2022 CALGreen Code.

The Project would achieve the City's goals of energy conservation and expansion of renewable energy generation as required under 2022 Title 24 Building Energy Efficiency Standards and 2022 CALGreen. The Building Energy Efficiency Standards and CALGreen are updated on three-year cycles. Each triennial edition of the Building Energy Efficiency Standards improves on the energy efficiency of the previous edition. The CALGreen likewise improves in energy efficiency between each successive edition. Project development would comply with the latest State of California energy efficiency standards related to building energy use and the provision of electric vehicle charging stations. Compliance with City and State requirements would result in consistency with State and local plans related to energy conservation and energy efficiency. The 2022 Title 24 Building Energy Efficiency Standards and CALGreen requirements adopted by the Project would also be consistent with the City's goal of energy conservation and renewable energy generation. The Project would be built over an extended time frame. During this time, updated Title 24 and CALGreen requirements can be expected that would lead to greater energy efficiency for the future projects as they develop. As discussed previously in Section 4.3 Air Quality, the Specific Plan has numerous sustainability guidelines, which seek to promote energy efficiency, minimize heat islands, and conserve water resulting in reduced GHG emissions. Because the Project is required to comply with the State of California's Title 24 and CALGreen requirements, as well as follow the Specific Plan's Sustainability Guidelines, there would be no impact associated with conflicting or obstructing local or State energy plans. No impacts would occur, and no mitigation is required.

Regulatory Requirements

RR GHG-1 and RR GHG-2, presented in Section 5.8, Greenhouse Gas Emissions, would be applicable.

Mitigation Measures

Project implementation would not result in significant impacts related to Energy; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no significant impacts beyond the discussion in Section 10.0, Significant Irreversible Environmental Changes which would be Involved if the Proposed Project were Implemented, of the GP EIR.

4.7 GEOLOGY AND SOILS

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ii) Strong seismic groundshaking?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iii) Seismic-related ground failure, including liquefaction?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
iv) Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that the City would experience high levels of ground shaking during a seismic event, which would result in substantial damage to some buildings; soils could become unstable during intense ground shaking resulting in potential liquefaction; future development could result in impacts related to soil erosion or loss of topsoil and expansive soils. Cumulative impacts related to geologic, soils, and seismic condition were considered potentially significant.

Introduction

Analysis for this section was prepared using Chapter 6, Community Health and Safety of the *City of Stanton General Plan* (Stanton 2008) and information derived from the State of California Geological Survey.

Supplemental Analysis

a) *Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:*

i) *Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?*

Less Than Significant Impact. Ground rupture occurs when movement on a fault break through the surface. The State of California has established Earthquake Fault Zones for the purpose of mitigating the hazard of fault rupture by prohibiting the location of most human occupancy structures across the traces of active faults. According to the Stanton General Plan, Chapter 6 Community Health and Safety, and the California Geological Survey (CGS), there are several potentially active faults within proximity to the City, such as the Newport-Inglewood Fault Zone; the Elsinore Fault Zone-Whittier Section; the Norwalk Fault, the Elysian Park Fault, and the San Andreas Fault; however, there are no Alquist Priolo Earthquake Fault Zones or known faults located within the City (Stanton 2008a; CGS 2015b). Therefore, implementation of the proposed Project would not expose people or structures to potential substantial adverse effects involving ground rupture. Impacts would be less than significant, and no mitigation is required.

ii) *Strong seismic ground shaking?*

Less than Significant Impact. The City of Stanton and the rest of California are located within a seismically active region. Moderate to strong earthquakes can occur on numerous local faults. Some of the major active nearby faults to the City include the Newport-Inglewood Fault Zone; the Elsinore Fault Zone-Whittier Section; the Norwalk Fault, the Elysian Park Fault, and the San Andreas Fault (CGS 2015b). The proximity of active faults indicates potential ground shaking during the life of the Project. These impacts depend on which fault the earthquake occurred, fault location, distance from the development area, and magnitude of the earthquake.

As discussed above in Checklist Response 4.7(a)(i), there are no known active or potentially active faults within the City and the Project area. However, in order to reduce the effects of ground shaking, geotechnical design considerations for construction in the City of Stanton, including the Project area, are governed by the *Stanton Building Code*, as set forth in Title 16, Division 1, Chapter 16.04 (Building Code) of the City's Municipal Code, which incorporates by reference the *California Building Code* (CBC) (RR GEO-1). All buildings and other structures constructed as part of the proposed Project would be designed in accordance with applicable requirements of the CBC in effect at the time of grading plan submittal, the *Stanton Municipal Code*, and any applicable building and seismic codes in effect at the time the grading plans are submitted. Therefore, compliance with RR GEO-1 would ensure a less than significant impact from strong seismic ground shaking. No mitigation is required.

iii) Seismic-related ground failure, including liquefaction?

Less Than Significant with Mitigation Incorporated. Liquefaction is a seismic phenomenon in which loose, saturated, granular soils behave similarly to a fluid when subject to high-intensity ground shaking. Liquefaction occurs when three general conditions coexist: (1) shallow groundwater; (2) low density non-cohesive (granular) soils; and (3) high-intensity ground motion. Studies indicate that saturated, loose near surface cohesionless soils exhibit the highest liquefaction potential, while dry, dense, cohesionless soils and cohesive soils exhibit low to negligible liquefaction potential. In general, cohesive soils are not considered susceptible to liquefaction, depending on their plasticity and moisture content. Effects of liquefaction on level ground include settlement, sand boils, and bearing capacity failures below structures. Dynamic settlement of dry loose sands can occur as the sand particles tend to settle and densify as a result of a seismic event.

According to the General Plan and based on review of the State of California Seismic Hazard Zone for liquefaction potential, the proposed Specific Plan area is located entirely within a liquefaction hazard zone (Stanton 2008a; CGS 2021). Therefore, the potential for seismic-related ground failure, including liquefaction, represents a significant impact. The Seismic Hazards Mapping Act (SHMA) requires site-specific geotechnical investigations be conducted identifying the hazard and formulating mitigation measures prior to permitting most developments designed for human occupancy within the Zones of Required Investigation. Before a development permit can be issued or a subdivision approved, cities and counties must require a site-specific investigation to determine whether a significant hazard exists at the site and, if so, recommend measures to reduce the risk to an acceptable level. The investigation must be performed by State-licensed engineering geologists and/or civil engineers (DOC 2021).

Implementation of RR GEO-1 requires that Seismic Design Considerations, are fully incorporated in the design and construction of all development, and MM GEO-1 requires site-specific geotechnical investigations on all proposed Project sites within the Specific Plan area. Therefore, with compliance with RR GEO-1 and implementation of MM GEO-1, impacts related to seismic-related ground failure, including liquefaction, would be less than significant.

iv) Landslides?

No Impact. According to the General Plan, the City does not have the potential for landslides (Stanton 2008a). Further, the City and surrounding area are located in a generally flat, urbanized portion of Southern California. Therefore, landslides are not anticipated in the Project area. The Project would not result in a substantial adverse effect, including the risk of loss, injury, or death, due to landslides. No impact would occur, and no mitigation is required.

b) Result in substantial soil erosion or loss of topsoil?

Less Than Significant Impact. The proposed Specific Plan area has a relatively flat topography and is primarily developed with residential, industrial, and commercial land

uses. The proposed Specific Plan includes development and redevelopment opportunities mostly located at infill sites primarily covered by disturbed vegetation or impermeable surfaces. Therefore, implementation of the proposed Specific Plan is anticipated to result in minimal soil erosion or loss of topsoil. However, the City is characterized as gently sloping to the west and southwest. Alluvial sediments, deposited by an ancestral Santa Ana River, underlie the City. Alluvium sediments are typically comprised of a variety of materials including fine particles of silt and clay and larger particles of sand and gravel (Stanton 2008a).

During demolition and construction activities, temporary soil erosion may occur due to soil disturbance and the removal of buildings and paved surfaces. In addition, soil erosion due to rainfall and wind may occur if unprotected soils are exposed during construction. When applicable, future development in the Specific Plan area would be required to obtain a National Pollutant Discharge Elimination System (NPDES) permit for construction activities or coverage under the NPDES Construction General Permit. The Construction General Permit requires preparation of a Stormwater Pollution Prevention Plan (SWPPP) and implementation of erosion control, sediment control, tracking, waste management, and construction site maintenance best management practices (BMPs) to reduce the potential for soil and wind erosion during construction activities (see RR HWQ-1, in Section 4.10). Further, all Specific Plan development must comply with the City's grading ordinance, which requires preparation of an erosion control plan for City approval prior to issuance of a grading permit (see RR HWQ-4 in Section 4.10). With compliance with these regulations, potential impact pertaining to construction-related soil erosion would be less than significant, and no mitigation is required.

Additionally, Specific Plan development would implement site improvements and landscaping to prevent long-term erosion (RR HWQ-2). Therefore, operation-related soil erosion would also be less than significant, and no mitigation is required.

c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

Less Than Significant With Mitigation Incorporated. As discussed in Checklist Response 4.7(a)(iv), above, the Project site is not located in a potential landslide area. Potential landslide impacts would be less than significant, and no mitigation is required.

As indicated in Checklist Response 4.7(a)(iii), the City, including the Project area, is in a liquefaction zone. As discussed previously, RR GEO-1 and MM GEO-1 which require Seismic Design Considerations, would be incorporated into the design and construction of all development and a site-specific geotechnical investigation by a State-licensed geologist and/or civil engineer would be conducted on all proposed Project sites within the Specific Plan area. Therefore, compliance with RR GEO-1 and implementation of MM GEO-1 would ensure impacts related to liquefaction would be less than significant.

Lateral spreading is the downslope movement of surface sediment due to liquefaction in a subsurface layer during an earthquake. As discussed above, liquefaction is a potential risk in

the City; however, there are no Alquist Priolo Earthquake Fault Zones located in the City. Due to the generally low potential for a major earthquake damage and the City's flat topography and lack of significant slopes, the City is not subject to lateral spreading conditions. Therefore, impacts related to lateral spreading would be less than significant, and no mitigation is required.

The City is comprised of extensive alluvial deposits resulting from erosion of sediments from the Santa Ana River. Alluvium sediments are typically comprised of a variety of materials including fine particles of silt and clay and larger particles of sand and gravel (Stanton 2008). Subsidence involves a sudden sinking or gradual settling and compaction of soil and other surface material with little or no horizontal motion. Alluvial regions, such as the City, are particularly susceptible to subsidence. Expansive soils have a significant amount of clay particles that can give up water (shrink) or take on water (swell). The major cause of ground subsidence is the excessive withdrawal of groundwater, gas, oil, or hydrocompaction, and underground mining, among others. The change in volume exerts stress on buildings and other loads placed on these soils. There are no known ongoing or planned large-scale extractions of groundwater, gas, oil, or geothermal energy that would cause subsidence within the Specific Plan area.

The proposed Specific Plan Project would adhere to all applicable standards, regulations, and codes. Impacts would be less than significant for onsite or offsite landslides and lateral spreading, and no mitigation is required. Compliance with RR GEO-1 and implementation of MM GEO-1 would ensure impacts related to subsidence and liquefaction, and therefore potential collapse, would be less than significant.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?

Less Than Significant With Mitigation Incorporated. Expansive soils are characterized by their ability to undergo significant volume changes (shrink or swell) due to variations in moisture content. Changes in soil moisture content can result from rainfall, landscape irrigation, utility leakage, roof drainage, perched groundwater, drought, or other factors, and may cause settlement or heave of structures, concrete slabs supported on-grade, or pavements supported over these materials. Depending on the extent and location below finished subgrade, these soils could have a detrimental effect on construction.

All Project construction within the Specific Plan area would be required to comply with the current CBC (RR GEO-1). Additionally, MM GEO-1 requires a site-specific geotechnical investigation by a State-licensed geologist and/or civil engineer for all proposed developments within the Specific Plan area. With adherence to RR GEO-1 and implementation of MM GEO-1, Project impacts related to expansive soils would be less than significant.

e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of wastewater?

No Impact. The City of Stanton is currently served by a municipal sewer system. Future development within the Specific Plan area would be served by the existing municipal sewer system. The proposed Project would not involve the use of septic tanks or alternative wastewater disposal systems. No impacts would occur, and no mitigation is required.

f) Directly or indirectly destroy a unique paleontological resource or site or unique geological feature?

Less Than Significant With Mitigation Incorporated. The Project site is generally located within the Peninsular Ranges Geomorphic Province of California and roughly 8 miles northeast of Los Alamitos Bay and about 11 miles from the coast of the Pacific Ocean. Several nearby river systems consisting of Anaheim Creek, Coyote Creek, 19th and 20th century alignments of the San Gabriel and Los Angeles River, and the Santa Ana River have resulted in the accumulation of sediments for this region of Orange County. More specifically, the City of Stanton is comprised of extensive alluvial deposits resulting from erosion of sediments from the Santa Ana River. Alluvium sediments are typically comprised of a variety of materials including fine particles of silt and clay and larger particles of sand and gravel (Stanton 2008a).

Based on a review of available geologic maps and from the results of the literature review and records check conducted on October 31, 2021, through the Natural History Museum (NHM) of Los Angeles County, the primary geologic unit underlying the site is Quaternary young alluvial to Pleistocene deposits that occur at depth below the artificial fill. These materials are defined as Holocene to late Pleistocene deposits consisting of silt, sand, and gravels in general.

The record search also included a thorough search of the NHM paleontology collection records for the locality and specimen data for the Project site and surrounding area. The record search did not identify any fossil localities within the site. However, five localities were located nearby from the same sedimentary deposits that occur in the Project site, either at the surface or at depth. The Project site is underlain by Alluvium to late Pleistocene deposits, which could contain unknown fossils. Therefore, if grading and/or ground disturbing activities encounter unknown paleontological resources, implementation of MM GEO-2 would reduce this potential impact to a less than significant level. Therefore, this impact would be less than significant with mitigation.

Regulatory Requirements

RR GEO-1 The proposed Project shall be constructed in accordance with the *Stanton Building Code*, Title 16, Division 1, Chapter 16.04 (Building Code) of the City's Municipal Code and any other applicable building standards.

Mitigation Measures

- MM GEO-1** Site specific geotechnical investigations by a State-licensed geologist and/or civil engineer shall be required for all future projects within the Town Center Specific Plan.
- MM GEO-2** In the event paleontological resources are encountered during construction, ground-disturbing activity shall cease. A Qualified Paleontologist that meets the Society for Vertebrate Paleontology (SVP) shall be retained by the Applicant to examine the materials encountered, assess the nature and extent of the find, and recommend a course of action to further investigate and protect or recover and salvage those resources that have been encountered. Criteria for discard of specific fossil specimens shall be made explicit. If a Qualified Paleontologist determines that impacts to a sample containing significant paleontological resources cannot be avoided by project planning, then recovery may be applied. Actions may include recovering a sample of the fossiliferous material prior to construction; monitoring work and halting construction if an important fossil needs to be recovered; and/or cleaning, identifying, and cataloging specimens for curation and research purposes. The cost associated with recovery, salvage, and treatment shall be borne by the Applicant. All recovered and salvaged resources shall be prepared to the point of identification and permanent preservation by the Qualified Paleontologist. Resources shall be identified and curated into an established accredited professional repository. The Qualified Paleontologist shall have a repository agreement in hand prior to initiating recovery of the resource.

Conclusion

The additional 139 units would result in new significant impacts beyond the impacts analyzed in the GP EIR. Implementation of mitigation measures would reduce the impacts to less than significant level.

4.8 GREENHOUSE GAS EMISSIONS

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

Greenhouse Gas (GHG) Emissions was not included as a topical issue in Appendix G of Environmental Checklist Form at the time the GP EIR was prepared, and thus was not included as a section in the EIR.

Introduction

Climate change refers to any significant change in measures of climate (e.g., average temperature, precipitation, or wind patterns) over a period of time. Climate change may result from natural factors, natural processes, and human activities that change the composition of the atmosphere and alter the surface and features of the land. Significant changes in global climate patterns have recently been associated with global warming, which is an average increase in the temperature of the atmosphere near the Earth's surface; this is attributed to an accumulation of greenhouse gas (GHG) emissions in the atmosphere. GHGs trap heat in the atmosphere which, in turn, increases the Earth's surface temperature. Some GHGs occur naturally and are emitted to the atmosphere through natural processes, while others are created and emitted solely through human activities. The emission of GHGs through fossil fuel combustion in conjunction with other human activities are associated with global warming.

GHGs, as defined under California's Assembly Bill (AB) 32, include carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF₆). General discussions on climate change often include water vapor, atmospheric ozone, and aerosols in the GHG category. Water vapor and atmospheric ozone are not gases that are formed directly in the construction or operation of development projects, nor can they be controlled in these projects. Aerosols are not gases. While these elements have a role in climate change, they are not considered by either regulatory bodies, such as CARB, or climate change groups, such as the California Climate Action Registry, as gases to be reported or analyzed for control. Therefore, no further discussion of water vapor, atmospheric ozone, or aerosols is provided.

Regulatory Background

On June 1, 2005, Governor Arnold Schwarzenegger signed Executive Order (EO) S-3-05, which calls for a reduction in GHG emissions to the year 2000 level by 2010, to year 1990 levels by 2020, and to 80 percent below 1990 levels by 2050.

The principal overall State plan and policy adopted for the purpose of reducing GHG emissions is Assembly Bill (AB) 32 (California Global Warming Solutions Act of 2006). AB 32 establishes regulatory, reporting, and market mechanisms to achieve quantifiable reductions in GHG emissions and establishes a cap on statewide GHG emissions. AB 32 recognizes that California is the source of substantial amounts of GHG emissions. The statute states the following:

Global warming poses a serious threat to the economic well-being, public health, natural resources, and the environment of California. The potential adverse impacts of global warming include the exacerbation of air quality problems, a reduction in the quality and supply of water to the state from the Sierra snowpack, a rise in sea levels resulting in the displacement of thousands of coastal businesses and residences, damage to marine ecosystems and the natural environment, and an increase in the incidences of infectious diseases, asthma, and other human health-related problems. In order to avert these consequences, AB 32 establishes a State goal of reducing GHG emissions to 1990 levels by the year 2020, codifying the goal of EO S-3-05.

CARB approved a Climate Change Scoping Plan as required by AB 32 in 2008; this plan is required to be updated every five years. The Climate Change Scoping Plan proposes a “comprehensive set of actions designed to reduce overall carbon GHG emissions in California, improve our environment, reduce our dependence on oil, diversify our energy sources, save energy, create new jobs, and enhance public health”. The Climate Change Scoping Plan has a range of GHG-reduction actions which include direct regulations, alternative compliance mechanisms, monetary and non-monetary incentives, voluntary actions, market-based mechanisms such as a cap-and-trade system, and an AB 32 implementation regulation to fund the program. The 2022 Scoping Plan is the latest update and implements the reduction target adopted under SB 32 and seeks to reduce GHG emissions through a number of measures. The measures applicable to the proposed Project from the 2022 Scoping Plan include energy efficiency measures, water conservation and efficiency measures, and transportation and motor vehicle measures, as discussed below. Energy efficiency measures are intended to maximize energy efficiency building and appliance standards, pursue additional efficiency efforts including new technologies and new policy and implementation mechanisms, and pursue comparable investment in energy efficiency from all retail providers of electricity in California. In addition, these measures are designed to expand the use of green building practices to reduce the carbon footprint of California’s new and existing inventory of buildings.

The Sustainable Communities and Climate Protection Act of 2008, Senate Bill (SB) 375, established a process to coordinate land use planning, regional transportation plans, and funding priorities in order to help California meet the GHG reduction goals established in AB 32. SB 375 required SCAG to incorporate a “sustainable communities strategy” (SCS) into its regional transportation plans (RTPs) that will achieve GHG emission reduction targets

though several measures, including land use decisions. SCAG's SCS is included in the SCAG 2020–2045 RTP/SCS. The goals and policies of the RTP/SCS that reduce vehicle miles traveled (VMT) focus on transportation and land use planning that include building infill projects; locating residents closer to where they work and play; and designing communities so there is access to high quality transit service.

On April 29, 2015, Governor Brown signed EO B-30-15, which ordered an interim statewide GHG emission reduction target to reduce GHG emissions to 40 percent below 1990 levels by 2030 to ensure California meets its target of reducing GHG emissions to 80 percent below 1990 levels by 2050. Five key goals for reducing GHG emissions through 2030 include (1) increasing renewable electricity to 50 percent; (2) doubling the energy efficiency savings achieved in existing buildings and making heating fuels cleaner; (3) reducing petroleum use in cars and trucks by up to 50 percent; (4) reducing emissions of short-lived climate pollutants; and (5) managing farms, rangelands, forests and wetlands to increasingly store carbon. EO B-30-15 also directs CARB to update the Climate Change Scoping Plan to express the 2030 target in terms of million metric tons of carbon dioxide equivalent.

On September 8, 2016, the Governor signed Senate Bill 32 (SB 32) to codify the GHG reduction goals of EO B-30-15, requiring the State to reduce GHG emissions by 40 percent below 1990 levels by 2030 (Health and Safety Code Section 38566). As stated above, this goal is expected to keep the State on track to meeting the goal set by EO S-3-05 of reducing GHG emissions by 80 percent below 1990 levels by 2050.

AB 197 was signed at the same time to ensure that the SB 32 goals are met by requiring CARB to provide annual reports of GHGs, criteria pollutants, and TACs by facility, City and sub-county level, and sector for stationary sources and at the County level for mobile sources. It also requires the CARB to prioritize specified emission reduction rules and regulations and to identify specified information for emission reduction measures (e.g., alternative compliance mechanism, market-based compliance mechanism, and potential monetary and nonmonetary incentive) when updating the Scoping Plan.

SB 350, signed on October 7, 2015, is the Clean Energy and Pollution Reduction Act of 2015. SB 350 is the implementation of some of the goals of EO B-30-15. The objectives of SB 350 are as follows:

1. To increase from 33 percent to 50 percent, the procurement of our electricity from renewable sources
2. To double the energy efficiency savings in electricity and natural gas final end uses of retail customers through energy efficiency and conservation

The text of SB 350 sets a December 31, 2030, target for 50 percent of electricity to be generated from renewable sources. SB 350 also requires the State to double statewide energy efficiency savings in electricity and natural gas end uses by 2030. Additionally, SB 350 sets requirements for large utilities to develop and submit integrated resources plans (IRPs), which detail how utilities would meet their customers' resource needs, reduce GHG emissions, and integrate clean energy resources.

On September 10, 2018, Governor Brown signed SB 100, the 100 Percent Clean Energy Act of 2018. SB 100 requires renewable energy and zero-carbon resources to supply 100 percent of electric retail sales to end-use customers and 100 percent of electricity procured to serve state agencies by December 31, 2045. This policy requires the transition to zero-carbon electric systems that do not cause contributions to increase of GHG emissions elsewhere in the western electricity grid. SB 100 also creates new standards for the Renewable Portfolio Standard (RPS) goals established by SB 350 in 2015. Specifically, the bill increases required energy from renewable sources for both investor-owned utilities and publicly owned utilities from 50 percent to 60 percent by 2030.

Further, on September 10, 2018, Governor Brown also signed California EO B-55-18, which sets a new statewide goal of carbon neutrality as soon as possible, and no later than 2045 and achieve net negative emissions thereafter. EO B-55-18 was added to the existing Statewide targets of reducing GHG emissions, including the targets previously established by Governor Brown of reducing emissions to 40 percent below 1990 levels by 2030 (EO B-30-15 and SB 32), and by Governor Schwarzenegger of reducing emissions to 80 percent below 1990 levels by 2040 (EO S-3-05).

The City of Stanton addresses GHGs through the Regional Coordination Element of the City's General Plan. This Element provides a discussion of how coordination with the City's planning, the County, regional and state bodies is essential for fostering a positive economic and political environment. The three components of this Element is comprised of housing, growth management, and air quality. The housing component recognizes that Stanton is a built-out City and "As such, the reuse and redevelopment of underutilized properties provide the greatest opportunity for housing within the city." (Stanton 2008a). The Growth Management component of the Element addresses the redevelopment of existing parcels as well as transportation networks within the City to reduce traffic congestion. "The majority of recent development in the city has therefore involved the recycling of older uses into new more efficient uses. For Stanton, growth management involves the efficient and productive reuse of these parcels in an orderly manner, benefiting current and future residents." (ibid). The last component of the Element involves City coordination with State and federal regulations and governmental agencies to reduce air pollutants and greenhouse gas emissions.

SCAQMD Significance Criteria

On December 5, 2008, the SCAQMD Governing Board presented the staff proposal for a tiered threshold approach wherein Tier 1 determines if a project qualifies for an applicable CEQA exemption, Tier 2 determines consistency with GHG reduction plans, and Tier 3 proposes a numerical screening value as a threshold. At their September 28, 2010, meeting, the Working Group suggested a Tier 3 threshold of 3,000 metric tons of carbon dioxide equivalent (MTCO_{2e}) per year for all land use types. Tier 4 determines if the project meets performance standards. Tier 4 has three options: Option 1—percent emission reduction target; Option 2—early implementation of applicable measures, and Option 3—sector-based standard. Tier 5 determines mitigation for CEQA offsets.

In the absence of adopted thresholds, the Tier 3 standard is used for this analysis. The development of project-level thresholds in accordance with CEQA is an ongoing effort at the State, Regional, and County levels, and significance thresholds may differ for future projects based on new or additional data and information that may be available at that time for consideration. Neither the SCAQMD, the City of Stanton, nor Orange County has adopted a significance threshold for GHG emissions from non-industrial development projects. Consequently, pursuant to the discretion afforded by Sections 15064.4(a) and 15064.4(b) of the State CEQA Guidelines, the impact of the Project's GHG emissions are assessed based on the methodologies proposed by SCAQMD's GHG CEQA Significance Threshold Working Group, as described above. The City defers to assessment methods and significance thresholds developed by the SCAQMD. This impact analysis evaluates consistency with regulatory programs designed to reduce GHG emissions and that contribute to the achievement of AB 32's and SB 32's goals as the primary significance criterion. In addition, this impact analysis also evaluates the Project's estimated emissions compared to the Tier 3 threshold (as discussed above) for impacts related to GHG emissions proposed by staff of the SCAQMD, but not adopted by the SCAQMD Board.

Supplemental Analysis

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Less Than Significant Impact. In developing methods for GHG impact analyses, there have been suggestions from local air pollution control districts of quantitative thresholds, often referred to as screening levels, which define an emissions level below which it may be presumed that climate change impacts would be less than significant.

Based on the proposed construction activities, the principal source of construction-related GHG emissions would be from internal combustion engines of construction equipment, on-road construction vehicles, and workers' commuting vehicles. GHG emissions from construction activities were obtained from the CalEEMod model, described above. The estimated construction GHG emissions for the proposed Project would be 805 MTCO_{2e}, over a period of 2 years, as shown in Table 8-12, Estimated Greenhouse Gas Emissions from Construction.

**TABLE 4-12
ESTIMATED GREENHOUSE GAS EMISSIONS
FROM CONSTRUCTION**

Year	Emissions (MTCO₂e)
2024	591
2025	214
Total	805
MTCO ₂ e: metric tons of carbon dioxide equivalent Notes: <ul style="list-style-type: none"> Totals may not add due to rounding variances. Detailed calculations in Appendix A, Air Quality and Greenhouse Gas Emissions Modeling Data. 	

Operational GHG emissions would come primarily from vehicle trips; other sources include electricity and water consumption; natural gas for space and water heating; and gasoline-powered landscaping and maintenance equipment. Table 4-13, Estimated Annual Greenhouse Gas Emissions from Project Operation, shows the annual GHG emissions from proposed Project's operations.

**TABLE 4-13
ESTIMATED ANNUAL GREENHOUSE GAS
EMISSIONS FROM PROJECT OPERATION**

Source	Emissions (MTCO₂e/yr)
Area	2
Energy	308
Mobile	814
Waste	32
Water	13
Total Operational Emissions	1,169
MTCO ₂ e/yr: metric tons of carbon dioxide equivalent per year Notes: <ul style="list-style-type: none"> Totals may not add due to rounding variances. Detailed calculations in Appendix A, Air Quality and Greenhouse Gas Emissions Modeling Data. 	

Because impacts from construction activities occur over a relatively short period of time, they contribute a relatively small portion of the overall lifetime project GHG emissions. In addition, GHG emission reduction measures for construction equipment are relatively limited. The SCAQMD recommends that construction emissions be amortized over a 30-year project lifetime so that GHG reduction measures address construction GHG emissions as part of the operational GHG reduction strategies. Therefore, construction and operational emissions are combined by amortizing the construction and operations over an assumed 30-year project lifetime. This combination is shown in Table 4-14, Estimated Total Project

Annual Greenhouse Gas Emissions, using the proposed Project's amortized construction and operational emissions.

**TABLE 4-14
ESTIMATED TOTAL PROJECT ANNUAL
GREENHOUSE GAS EMISSIONS**

Source	Emissions (MTCO ₂ e/yr ^a)
Construction (Amortized)	27 ^a
Operations (Table 8-13)	1,169
Total ^b	1,196
SCAQMD-Recommended Threshold (Tier 3)	3,000
Exceeds Threshold?	No
MTCO ₂ e/yr: metric tons of carbon dioxide equivalent per year	
^a Total derived by dividing construction emissions (see Table 4-14) by 30.	
^b Total annual emissions are the sum of amortized construction emissions and operational emissions.	

It is noted that there are no established applicable quantitative federal, State, regional, or local CEQA significance criteria for GHG emissions for non-industrial projects in the SoCAB. The SCAQMD has proposed, but not adopted, a threshold of 3,000 MTCO₂e per year for non-industrial land use projects. As shown, the estimated GHG emissions from the Project would be less than this suggested threshold. The impact would be less than significant, and no mitigation is required.

b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Less Than Significant Impact. State policy and standards adopted for the purpose of reducing GHG emissions that are applicable to the proposed Project are EO S-3-05, AB 32, the California Global Warming Solutions Act of 2006, and SB 32. The quantitative goal of these regulations is to reduce GHG emissions to 1990 levels by 2020 to 80 percent below 1990 levels by 2050, and for SB 32, to 40 percent below 1990 levels by 2030. Statewide plans and regulations (such as GHG emissions standards for vehicles, the Low Carbon Fuel Standard, Cap-and-Trade, and renewable energy) are being implemented at the Statewide level, and compliance at a project level is not addressed.

The regulations, plans, and policies adopted for the purpose of reducing GHG emissions that are directly applicable to the Project include the latest Title 24 Energy Efficiency Standards for Residential and Nonresidential Buildings (RR GHG-1) and the Title 24 California Green Building Standards Code (CALGreen) (RR GHG-2). The Project would be required to comply with the latest Title 24 Standards at the time of building permit issuance. The 2022 Title 24 Building Energy Efficiency Standards for residential buildings is currently in effect and includes requirements for updated thermal envelope standards (preventing heat transfer from the interior to exterior and vice versa); ventilation requirements; and lighting requirements. CALGreen requirements include reductions in indoor and outdoor water use,

diversion of construction and demolition waste, inclusion of electric vehicle charging spaces or designated spaces capable of supporting future charging stations. These codes are enforced by the City, and adherence to standard requirements for construction and operations would ensure that the Project would comply with both regulations. As discussed previously in Section 4.3 Air Quality, the Specific Plan has Sustainability Guidelines, which seek to promote energy efficiency, minimize heat islands, and conserve water, which will reduce GHG emissions. Lastly, the Project is an infill development project. The Project would provide housing consistent with its surrounding uses; help address the severe housing shortage; and reduce GHG emissions associated with longer vehicle trips related to lack of local housing options. As such, the proposed Project would not conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing GHG emissions. The impact would be less than significant, and no mitigation is required.

Regulatory Requirements

- RR GHG-1** The Project shall be designed in accordance with the applicable Title 24 Energy Efficiency Standards for Residential and Nonresidential Buildings (*California Code of Regulations* [CCR], Title 24, Part 6). These standards are updated, nominally every three years, to incorporate improved energy efficiency technologies and methods. The Building Manager, or designee shall ensure compliance prior to the issuance of each building permit.
- RR GHG-2** Projects shall be designed in accordance with the applicable California Green Building Standards (CALGreen) Code (24 CCR 11). The Building Manager, or designee shall ensure compliance prior to the issuance of each building permit.

Mitigation Measures

Project implementation would not result in significant impacts related to GHG Emissions; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no significant impacts.

4.9 HAZARDS AND HAZARDOUS MATERIALS

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that the General Plan Update could result in increased risk of upset associated with the routine use, generation, and transport of hazardous materials, which may pose a health or safety hazard; could result in accidental release of hazardous materials causing public health risk; and could result in a safety hazard for people residing or working within the area. Cumulative impacts related to public health and safety were considered potentially significant.

The topic of hazards and hazardous materials was covered under Public Health and Safety in the GP EIR.

Supplemental Analysis

The information in this section is derived from *The EDR Radius Map™ Report with GeoCheck®: City of Stanton Town Center Specific Plan Project, Katella/Cerritos Avenue, Stanton, CA 90680 (Inquiry Number 6680025.2s)*, prepared for the proposed Project by Environmental Data Resources (EDR) (2021). The EDR is included in Appendix B.

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Less Than Significant Impact. Currently, there are a variety of existing business operations in the Specific Plan area that use, store, or transport hazardous substances, as well as generate hazardous waste. In light of this, the nature of potential hazards would also be varied. Such substances can range from common automobile oil and household pesticides to chlorine, dry-cleaning solutions, ammonia, or substances used in commercial and industrial operations. Therefore, any non-residential development that occurs within the Specific Plan area may result in an increase in hazardous materials use, transport, or generation of hazardous waste.

It is anticipated that the proposed Specific Plan would maintain existing permitted industrial uses within the proposed Industrial District. However, this district is proposed to allow revitalized industrial uses that are compatible with future residential uses. Although this intended revitalized industrial area would be considered “light” industrial, nonetheless, this additional non-residential development in the Specific Plan area may result in an increase in the use and transport of hazardous materials and an increase in the generation of hazardous waste.

Demolition and construction activities for the proposed Project would involve the use of chemical substances such as solvents, paints, fuel for equipment, and other potentially hazardous materials. Hazards to the environment or the public would typically occur with the transport, use, storage, or disposal of hazardous materials. As with any new development in the City, the applicants for future projects would be required to comply with existing regulations for the transport, use, storage, and disposal of hazardous materials to prevent public safety hazards. These regulations include the Hazardous Materials Transportation Act, Resource Conservation and Recovery Act (RCRA), California Hazardous Waste Control Act (HWCA), and California Accidental Release Prevention Program (CalARPP), among others. In addition, Regulatory Requirement (RR) PS-1 from Section 4.15, Public Services, requires compliance with all applicable Orange County Fire Authority (OCFA) codes, ordinances and standard conditions, including those related to hazardous materials usage and storage. With compliance of existing regulations for hazardous waste transport, use and disposal, as well as RR PS-1, impacts would be less than significant, and no mitigation is required.

b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Less Than Significant Impact. The Specific Plan area is developed with varying intensities of light industrial, retail/commercial, and residential uses. This Subsequent IS/MND analyzes the potential impacts of the additional 139 multi-family dwellings units only. The existing General Plan for the City of Stanton allows for a total of 1,399 multi-family units within the Town Center Specific Plan area. Since 2008, 4 units have been built, resulting in a remaining capacity of 1,395 multi-family units. The Town Center Specific Plan would allow for an additional 139 units, increasing the remaining capacity to 1,534 multi-family units.

Any demolition, construction and grading activities within the Specific Plan area have the potential to result in the use and transport of hazardous materials, which would include fuel, oils, and other chemicals and liquids used during construction. As noted above, implementation of the Specific Plan has the potential to result in an increase in the use and transport of hazardous materials in the Specific Plan area. The increased use and transport of hazardous materials in the City increases the potential for accidental releases of hazardous materials, which poses a threat to the health and safety of residents. Storage and use of these materials would comply with all applicable federal, State, and local laws and regulations related to the use, handling, transport and storage of hazardous materials on site.

The Hazardous Materials Release Response Plans and Inventory Law of 1985 (or the Business Plan Act) requires that a business that uses, handles, or stores hazardous materials above a certain quantity prepare a plan, which must include an inventory of hazardous substances on the premises. A Risk Management and Prevention Plan (RMPP) may be required for businesses that use acutely hazardous substances and are located in proximity to sensitive land uses. As a part of the Risk Management and Prevention Plan, businesses that handle acutely hazardous materials must include a hazard and operability study (HAZOP), which analyzes potential hazards to sensitive populations in the vicinity. The OCFA oversees the submittal of Business Emergency Plans, which are intended to mitigate potential release of hazardous substances and minimize potential harm or damage. Compliance with regulations established by federal, State and local regulatory agencies would reduce effects related to the reasonably foreseeable upset and accident conditions involving the release of hazardous materials within the Specific Plan area. Additionally, future projects would comply with RR PS-1. Thus, the potential impacts pertaining to accidental release of hazardous materials would be less than significant, and no mitigation is required.

c) Emit hazardous emissions or handle hazardous or acutely hazardous material, substances, or waste within one-quarter mile of an existing or proposed school?

Less Than Significant Impact. No schools are located within the Specific Plan area; however, there are four schools within 0.25 mile of the Specific Plan area. Three schools are located in Stanton and the fourth is located in Garden Grove. The names and addresses of the schools are as follows:

- Pyles Elementary School (10411 Dale Avenue in Stanton)
- Carver Elementary School (11150 Santa Rosalia Street in Stanton)
- New Hope University (10660 Western Avenue in Stanton)
- Rancho Alamitos High School (11351 Dale Street in Garden Grove)

Future projects within 0.25-mile of the above school may expose them to greater risk of exposure to hazardous materials, wastes, or emissions. There is a potential to expose children at these nearby schools to hazardous substances through accidental releases during demolition and construction activities. However, during demolition, existing hazardous materials and wastes would be removed and disposed in accordance with pertinent regulations, as identified in RR HAZ-1 through RR HAZ-3, discussed below. During

construction, a potential exists for the accidental release or spill of hazardous substances such as gasoline, oil, hydraulic fluid, diesel fuel, or other liquids associated with construction equipment operation and maintenance. However, use of these materials would be in limited quantities as typical during the operation and maintenance of construction equipment and would be conducted in compliance with applicable federal, State, and local regulations. Additionally, the contractor would be required to use standard construction controls and safety procedures, which would avoid and minimize the potential for accidental release or spill of such substances into the environment. With compliance with pertinent regulations (RR HAZ-1 through RR HAZ-3), the level of risk associated with the accidental release of hazardous substances during demolition and construction would be less than significant, and no mitigation is required.

Residential activities associated with occupancy of the proposed dwelling units would be similar to other residential uses within the Specific Plan area and would not generate hazardous emissions or handle hazardous or acutely hazardous materials, substances or waste in quantities that may impact students at schools within ¼-mile of the site. There would be a less than significant impact, and no mitigation is required.

d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Less Than Significant With Mitigation Incorporated. Presented in Appendix B, *The EDR Radius Map™ Report with GeoCheck* (2021) was prepared for the proposed Project. Search parameters were based on a one-mile radius of the Project site and consisted of a search of federal, State, local, tribal, and other databases. The complete list of databases and additional information regarding the identified site can be found in Appendix C.

Eight Envirostor listings were reported within one mile of the Specific Plan, three of which are within the Specific Plan area and listed below:

- *All Metals Processing Co. of Orange County, 8401 Sandustrial Avenue.* Status is active. Last reported activities listed in the EDR Report include a Supplemental Site Investigation Workplan on November 3, 2020, and a Monitoring Report on March 8, 2021. The EDR Report also indicates that a Corrective Measures Study Report, Remedial Action Completion Plan, and a Remedy Selection and Statement of Basis are due in 2023. Additionally, the EDR Report identifies that a Land Use Restriction document is due in 2024.
- *Dichem Dresser/Calla Chemical, 8100 Electric Avenue.* Status is unknown and references “Other Agency”.
- *Quicksand, 8358 Sandustrial Street.* Status is active. Last reported activity in the EDR report is a Remedial Investigation/Feasibility Study on March 29, 2021. A Site Characterization Report was due in 2021, but no additional information about this characterization report is provided in EDR Report.

The Leaking Underground Storage Tank (LUST) database, as provided by EDR, has revealed that there are 56 LUST sites within approximately 0.5 mile of the Specific Plan area, 6 of which are located within the Specific Plan area. These six sites are listed below.

- *Santa Ana Regional W, 10632 Beach Blvd.* Status is Open – Site Assessment. Facility Status is Preliminary Site Assessment Underway
- *California Shipping, 8151 Electric Avenue.* Status is Complete- Case Closed. Facility Status is Pollution Characterization
- *California Comfort V, 8130 Electric Avenue.* Status is Complete- Case Closed. Facility Status is Pollution Characterization
- *Abel Concrete, 8251 Katella Avenue.* Status is Complete – Case Closed. Facility Status is Preliminary Site Assessment Underway
- *G&M Oil Co #50; 10961 Beach Blvd.* Status is Open- Site Assessment.
- *G&M Oil #50, 10961 Beach Blvd.* Facility Status is Pollution Characterization.

Development within the Specific Plan area may include redevelopment of one of these reported Envirostor and LUST regulatory properties in the future. Implementation of Mitigation Measure (MM) HAZ-1 would ensure that all new development on properties involving hazardous materials or waste, prepare a Phase I Environmental Site Assessment (ESA) prior to future actions for land acquisition, demolition, and/or construction. With implementation of MM HAZ-1, potential impacts resulting from regulatory properties located within the Specific Plan would be reduced to less than significant levels.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

No Impact. The Joint Forces Training Base (JFTB) Los Alamitos is located in the City of Los Alamitos, approximately two miles to the west of the Specific Plan area. The Airport Environs Land Use Plan (AELUP) is a land use compatibility plan that is intended to protect the public from adverse effects of aircraft noise; to ensure the people and facilities are not concentrated in areas susceptible to aircraft accidents; and to ensure that no structures or activities adversely affect navigable space. The AELUP identifies standards for development in the airport's planning area based on noise contours, accident potential zones, and building heights. The City of Stanton, which includes the Specific Plan area, is not located within the accident potential zone or the (AELUP) height restriction zone for JFTB (Stanton 2008b).

Thus, the Project would not result in a safety hazard or excessive noise for people residing on the site, as it relates to exposure to airport or aircraft hazards in areas within an airport land use plan or within two miles of a public airport. No impact would occur, and no mitigation is required.

f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Less Than Significant Impact. The City of Stanton has an emergency plan, called “Emergency Operations Plan,” which establishes policies and procedures to guide the City during emergency situations (Stanton 2008a). The plan provides for coordination of planning efforts of various members of the emergency staff and service elements using the Standardized Emergency Management System (SEMS). SEMS is the system required for managing response to multi-agency and multi-jurisdiction emergencies in California. The purpose of SEMS is to improve the mobilization, deployment, utilization, tracking, and demobilization of needed mutual aid resources.

Emergency evacuations are coordinated by the Orange County Sheriff’s Department (OCSD). The OCSD coordinates all law enforcement and traffic control operations during a disaster. Regarding designated evacuation or emergency routes in the City, the unpredictable nature of any disaster on existing roadways makes evacuation route designation difficult (Stanton 2008a). The routes to be used for an evacuation would depend on the location of the incident, assuming major streets and freeways are functional, generally the routes would include major arterials and regional routes, which may include roadways within the Specific Plan boundaries such as Beach Boulevard, Katella Avenue, and Cerritos Avenue.

Specific Plan implementation would maintain the existing emergency vehicle access within the Specific Plan area. Any construction related lane closures resulting from projects within the Specific Plan buildout would be short term and would likely not involve full closure of any public roadway during construction. However, any development within the Specific Plan area would be required to coordinate with the City and OCFA regarding emergency access. Applicable OCFA regulations, evacuation plans, and procedures would be considered in the building and site design. With compliance of applicable OCFA requirements, the Project’s impacts to emergency access would be less than significant, and no mitigation is required.

g) Expose people or structures, directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires?

No Impact. The Project site is located in a highly urbanized area of the City, and there are no large, undeveloped areas and/or steep slopes on or near the site that may pose wildfire hazards. The site and the surrounding areas are not located in designated Very High Fire Hazard Severity Zones (VHFHSZ), as identified by the California Department of Forestry and Fire Prevention (CalFire). Rather, the site is within a Non-VHFHSZ area. Implementation of the proposed Project would not expose people or structures directly or indirectly to a significant risk of loss or death associated with wildland fires. No impact would occur, and no mitigation is required.

Mitigation Measures

MM HAZ-1 A formal Phase I Environmental Site Assessment (ESA) shall be prepared for a future project on any of the six Leaking Underground Storage Tank (LUST) sites within the Stanton Town Center Specific Plan area. The Phase I ESA shall

be prepared in accordance with American Society for Testing and Materials (ASTM) Standard Practice E 1527-05 or the Standards and Practices for All Appropriate Inquiry (AAI), prior to any land acquisition and/or construction activities. The Phase I ESA shall identify specific Recognized Environmental Conditions (RECs), which may require further sampling/remedial activities by a qualified hazardous materials consultant with Phase II/site characterization and remedial experience prior to land acquisition, demolition, and/or construction.

Conclusion

The additional 139 units would result in new significant impacts beyond the impacts analyzed in the GP EIR. Implementation of a mitigation measure would reduce the impacts to less than significant level.

4.10 HYDROLOGY AND WATER QUALITY

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that the General Plan Update could contribute to runoff water, exceeding the capacity of existing or planned storm water drainage system or providing additional sources of polluted runoff; could deplete groundwater resources; could result in impacts related to a 100-year flood event; could result in urban uses being located in dam inundation areas of the City; could impact water quality due to sheet erosion resulting from exposed soils and subsequent depositing of particles and pollutants in drainage areas; and could result in long-term impacts to quality of storm water and urban runoff impacting water quality. Cumulative impacts related to hydrology and water quality were considered potentially significant.

Introduction

This section is prepared based on findings of the Preliminary Hydrology and Water Quality Technical Report (Hydrology Report), prepared by Psomas in October 2021. The findings of the Hydrology Report is summarized herein, and the report is included in Appendix D.

Supplemental Analysis

- a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?*

Less Than Significant Impact.

Short-Term Water Quality Impacts

The Project has the potential to result in short-term construction impacts to surface water quality from demolition, grading, and construction-related activities of future development. Storm water runoff from the construction activities would contain loose soils, organic matter, pesticides/herbicides, and sediments. Spills or leaks from heavy equipment and machinery, such as fuel, oil and grease, and heavy metals, could also enter the runoff. Building construction would involve the use of hazardous materials (e.g., paints, solvents, cleansers) that, if not properly handled, may enter the stormwater runoff.

The Clean Water Act (CWA) establishes a framework for regulating potential water quality impacts from construction activities, as well as new development and major redevelopment, through the National Pollutant Discharge Elimination System (NPDES) program. Construction activities that disturb one acre or more of land are required to obtain an NPDES permit or coverage under the NPDES Construction General Permit. This is accomplished by completing and filing Permit Registration Documents (PRD) (including a Notice of Intent, risk assessment, site map, a Storm Water Pollution Prevention Plan [SWPPP], an annual fee, and a signed certification) with the State Water Resources Control Board (SWRCB), prior to start of construction activities. The Best Management Practices (BMPs) in the SWPPP would be implemented during construction to reduce storm water pollutants to the maximum extent practicable. Coverage under the NPDES Construction General Permit and implementation of the Project's SWPPP (RR HWQ-1); compliance with the Santa Ana RWQCB's dewatering regulations (RR HWQ-2); construction and implementation of the BMPs in the approved Water Quality Management Plan (WQMP) (RR HWQ-3); implementation of erosion control measures per the City's Erosion Control and Water Quality Code (RR HWQ-4) would reduce pollutants in the runoff and prevent violation of water quality standards, waste discharge requirements, and degradation of surface and groundwater quality. Compliance with these requirements would ensure that short term, construction related impacts would be less than significant. Also, water quality standards or waste discharge requirements would not be violated, and surface and ground water quality would not be substantially degraded. Impacts would be less than significant, and no mitigation is required.

Long-Term Water Quality Impacts

Stormwater pollutants that would be generated by future projects in the long-term include sediment, trash and debris, oil and grease, bacterial indicators, nutrients, and pesticides that would come from landscaped areas, drive aisles, parking areas, and outdoor residential, industrial, and commercial activities.

According to Section 20.300.110, Water Quality, of the Stanton Municipal Code, projects are required to comply with: (1) Municipal Code Chapter 6.20 [Stormwater Discharge and Water Quality]; (2) Municipal Code Chapter 6.28 [Fats, Oils, Grease, Discharges into Sanitary Sewer System]; (3) Municipal Code Chapter 16.62 [Erosion Control and Water Quality]; and (4) Section 20.500.090 [Water Quality Management Plan (WQMP) Required] of the City's Zoning Code (Ord. 1017, 2013). Chapter 6.20 requires all new development and significant redevelopment be in compliance with the Drainage Area Management Plan (DAMP) and any conditions and requirements established by the Planning Department, which are related to the reduction or elimination of pollutants in stormwater runoff from a project site. Therefore, consistency with the DAMP, would include preparation of a Water Quality Management Plan (WQMP) and implementation of BMPs on premises exposed to storm water, when applicable. Compliance with the DAMP would reduce the discharge of pollutants within the Specific Plan area to the maximum extent practicable. The WQMP BMPs may include the removal and disposal of solid waste and other pollutants such as fuels, waste fuels, and chemicals from exposure to storm water. Compliance with RR HWQ-3 (Water Quality Management Plan) would ensure future projects adhere to regional and local regulations. The WQMP would include low impact development (LID), structural and non-structural BMPs and source control BMPs. Compliance with RR HWQ-1 (SWPPP) and RR HWQ-2 (General Waste Discharge Requirements) would reduce the risk of water degradation from soil erosion and other pollutants related to short-term construction and long-term operations activities, and potential violations of water quality standards would be minimized through required BMPs. Therefore, future projects would not violate water quality standards or waste discharge requirements. Impacts would be less than significant, and no mitigation is required.

b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Less Than Significant Impact. The Coastal Plain of Orange County Groundwater Basin, which is managed by the Orange County Water District (OCWD), underlies the northern and central sections of Orange County within the lower Santa Ana River watershed, which includes the Specific Plan area. The Orange County Water District (OCWD) manages this Groundwater Basin to prevent overdraft conditions, seawater intrusion, land subsidence, and groundwater quality degradation. OCWD recharge basins are located in and adjacent to the Santa Ana River, Carbon Creek, and Santiago Creek, in the cities of Anaheim and Orange. No recharge basins or wells are located within the City of Stanton or near the Project site. (OCWD 2018, CalGEM 2021).

Domestic water service for the City of Stanton, as described in Section 4.19 Utilities and Service Systems, would be provided by Golden State Water Company (GSWC) with water derived from groundwater, surface water, and imported water supplies (GSWC 2021). GSWC West Orange Service Area *Urban Water Management Plan* (UWMP) reports that the single and multi-family residential land uses have a current water demand of 6,601 acre-feet per year (AFY) and 2,614 AFY, respectively using a population estimate of 114,235 (GSWC West Orange 2021) and would not substantially deplete groundwater supplies or interfere substantially with groundwater recharge.

Excavation activities may extend into the underlying groundwater. Because a large portion of the Town Center Specific Plan (primarily to the north and east) is within a shallow groundwater zone between depths of 5 to 10 feet, feasibility analyses as part of preparation of the WQMP may be performed to determine which infiltration BMPs, if any, would be used for the future site development projects (Psomas 2021a). Additionally, dewatering may be required as part of future construction and would occur in compliance with the Santa Ana RWQCB's General Waste Discharge Requirements (WDR) under Order No. R8-2015-0004 (RR HWQ-2).

Groundwater resources would be managed by OCWD to maintain withdrawals within a safe basin operating range to protect the basin's long-term sustainability. With OCWD incentives to limit groundwater pumping by the City and other water suppliers and with the water conservation measures required for new developments, the proposed Project would not substantially deplete groundwater supplies, interfere with groundwater recharge, or impede sustainable groundwater management of the Groundwater Basin. Impacts would be less than significant with compliance with regulatory requirement as identified above, and no mitigation is required.

c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

i) Result in substantial erosion or siltation on or off-site?

Less Than Significant Impact. As indicated in Section 4.7, Geology and Soils (Checklist Response 4.7b), future projects would be required to obtain a NPDES permit for construction activities or coverage under the NPDES Construction General Permit. The Construction General Permit requires preparation of a SWPPP and implementation of erosion control, sediment control, tracking, waste management, and construction site maintenance BMPs to reduce the potential for soil and wind erosion during construction activities (RR HWQ-1). Further, the proposed Project must comply with the City's grading ordinance, which requires preparation of an erosion and sediment control plan for City approval prior to issuance of a grading permit (RR HWQ-4). With compliance with these regulations, potential impacts pertaining to construction-related erosion would be less than significant, and no mitigation is required.

The Project area is located in an urbanized setting with a high percent of impervious surfaces in the existing condition. The majority of the new development in the Specific Plan area would be redevelopment rather than on undeveloped land. Additionally, future project-specific development would be required to incorporate landscaping in accordance with the City's Municipal Code Section 20.315.040 Landscape Standards, to prevent potential erosion. There would be minimal areas of exposed soils following completion of future projects where erosion could occur. Site improvements and landscaping would also prevent long-term erosion. With increased pervious surfaces on the site, the runoff volume and rate are expected to decrease, resulting in less potential for downstream erosion. Therefore, operation-related erosion would be less than significant, and no mitigation is required.

Regarding erosion, as discussed, the future projects would be required to obtain a NPDES permit for construction activities or coverage under the NPDES Construction General Permit. The Construction General Permit requires preparation of a SWPPP and implementation of erosion control, sediment control, tracking, waste management, and construction site maintenance BMPs to reduce the potential for soil and wind erosion during construction activities (RR HWQ-1). Further, future projects would comply with the City's grading ordinance, which requires preparation of an erosion and sediment control plan for City approval prior to issuance of a grading permit (RR HWQ-4).

Based on the hydromodification analysis for the proposed Project, the site is located in an area of the Santa Ana River watershed that is susceptible to hydromodification and therefore, the Project would have the potential to create hydrologic conditions of concern (HCOC) that may result in downstream flooding or the erosion of downstream natural channels. Therefore, compliance with RR HWQ-5 would ensure steps and requirements outlined in the Orange County Model WQMP mitigate potential runoff for future projects. Therefore, construction- and operation-related erosion would be less than significant with compliance with existing regulatory requirements RR HWQ-1, RR HWQ-4, and RR HWQ-5. No mitigation is required.

ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite?

iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?

Less Than Significant with Mitigation Incorporated. The Project area is located in an urbanized setting with a high percent of impervious surfaces in its existing condition. The drainage pattern for the Project area is generally to the southwest (Psomas 2021a). All City storm drain facilities are tributary to the existing Orange County Facility Stanton Storm Channel shown previously on Exhibit 1-2, Aerial Photograph.

A proposed Project hydrology analysis, (based on assumed flow paths and storm drain locations) was completed to determine the impacts that the Specific Plan would have on storm runoff. Hydrologic calculations to evaluate surface runoff associated with the 10-year, 25-year, and 100-year storm frequencies from the tributary drainage areas were performed using the AES Rational Method. The watershed subarea boundaries were delineated using proposed Project maps and were assumed to be equivalent to the existing condition watersheds. While future development is dependent on market conditions, it is anticipated that there would be changes in overall pervious and impervious conditions at various times during buildout of the Specific Plan. This was taken into consideration while land uses were simplified for hydrologic calculations when compared to the General Plan. The results of the proposed 10-year, 25-year, and 100-year peak flow rates are presented in Table 4-15, Proposed Conditions Peak Flow Rates, below.

**TABLE 4-15
PROPOSED CONDITIONS PEAK FLOW RATES**

Watershed	Total Area¹	10-Year Peak Q (cfs)	25-Year Peak Q (cfs)	100-Year Peak Q (cfs)
A	71.8	66.0	83.1	116.5
B & C	9.4	16.1	19.7	25.8
D	1.5	2.9	3.6	5.0
E	1.4	2.4	3.4	4.8
F	32.	47.0	58.6	77.8
G	13.7	26.6	32.4	42.0
H	21.0	26.0	32.2	41.9
¹ It should be noted that some areas along the periphery streets of the Specific Plan area were not included in the drainage analysis because the drainage flowed away from the Specific Plan area. This drainage was generally comingled with off-site drainage, outside of the Project boundary. <i>Psomas 2021 (Hydrology and Water Quality Technical report) 2021.</i>				

Implementation of the Specific Plan may result in an increase in the amount of impervious area, which would increase the proposed condition runoff. The Stanton Storm Channel was designed and constructed to handle the 25-Year storm event; however, based on current County standards the Stanton Storm Channel is deficient because all regional facilities are to be designed for the 100-year storm event. This deficiency could potentially cause significant flooding around the channel and in the local storm drain systems. As shown below in Table 4-16, 100-year Storm Event Comparison, the discharge is generally matched or decreased in the project conditions, thus decreasing the overall flow exiting the Specific Plan area. No diversions to the tributary areas were considered when comparing existing and proposed conditions.

**TABLE 4-16
100-YEAR STORM EVENT COMPARISON**

Watershed	Total Area¹	Existing Discharge Condition (cfs)	100-Year Peak Q (cfs)	100-Year Peak Discharge Comparison
A	71.8	123.0	116.5	-5.3%
B & C	9.4	22.3	25.8	15.7%
D	1.5	5.0	5.0	0.0%
E	1.4	4.8	4.8	0.0%
F	32.	84.8	77.8	-8.3%
G	13.7	46.6	42.0	-9.9%
H	21.0	45.4	41.9	-7.7%
¹ It should be noted that some areas along the periphery streets of the Specific Plan area were not included in the drainage analysis because the drainage flowed away from the Specific Plan area. This drainage was generally comingled with off-site drainage, outside of the Project boundary. <i>Psomas 2021 (Hydrology and Water Quality Technical report) 2021.</i>				

The potential for hydraulic impacts to existing facilities would require mitigation of site runoff. The impacts to Stanton Storm Channel would need to be thoroughly analyzed due to the fact that the channel was designed and constructed to handle the 25-year storm event. Based on current County standards the Stanton Storm Channel is deficient because all regional facilities are to be designed for the 100-year storm event. This deficiency could potentially cause significant flooding around the channel and in the local storm drain systems. Flood control mitigation would be handled by each individual site on a project-by-project basis within the Specific Plan area, as required under MM HWQ-1. Until downstream facilities are constructed, development sites must contain proposed runoff or mitigate flow rates to equivalent or less than existing conditions for all storm events. It is noted that facility upgrades at Court Street, north and south of the Pacific Electric Railway easement are already part of the City of Stanton's Capital Improvement Plan. Therefore, with implementation of MM HWQ-1, impacts associated with the rate or amount of surface runoff which would result in flooding on- or off-site would be less than significant.

Therefore, the proposed Project would include storage volume infrastructure that would provide the required storage volume and ensure that 25-year frequency storm event is not exceeded. Further, the storm drain system would be designed to accommodate 100-year flood flows, in accordance with the City's Municipal Code, the Orange County Hydrology Manual, and other City specifications (RR HWQ-4). The proposed changes resulting from the Project area would not substantially increase the rate or amount of surface runoff in a manner, which would result in flooding on- or offsite. Impacts would be less than significant, and no mitigation is required.

iv) Impede or redirect flood flows?

Less Than Significant Impact. The Specific Plan area is located within a Federal Emergency Management Agency (FEMA) Flood Zone X, which is an area subject to flooding from the 500-year flood (0.2 percent annual chance of flooding) and the 100-year flood (with a reduced flood risk due to the protection of a levee) with average depths of less than one foot or drainage areas less than one square mile. Based on this classification, a flood hazard is not present in the Project area (Psomas 2021a). Impacts would be less than significant, and no mitigation is required.

d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

No Impact. A seiche is the resonant oscillation of a body of water, such as a lake, reservoir, pool, bay, or harbor. Seiche hazards exist where ground shaking causes water to splash out of the body of water and inundate nearby areas and structures. Seiches are caused by strong winds and rapid changes in atmospheric pressure. Earthquake, tsunamis, and severe storm fronts may also cause seiches. The City is located inland over 7.0 miles from the Pacific Ocean. Additionally, there is no large body of water near the City that may be subject to seiche and that could result in potential flooding within the Project area.

Tsunamis are seismic sea waves generated by undersea earthquakes or landslides. As noted above, the City and the Project area is over 7.0 miles from the Pacific Ocean and based on the

California Geological Society Tsunami Hazard Area Map, the site is located outside the hazard area (CGS 2015c). Therefore, the proposed Project would not influence the likelihood or severity of a seiche nor contribute significantly to inundation by tsunami. As a result, no impacts related to seiche or tsunami would occur, and no mitigation is required.

e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Less Than Significant Impact. There are no groundwater wells within the City or the Project area, and no wells are proposed as part of the Project based on a review of the California Geologic Energy Management Division (CalGem 2021). As discussed above, the proposed Project would not involve direct withdrawals of groundwater, nor would it interfere with groundwater recharge such that it would result in a net deficit in aquifer volume or lowering of the local groundwater table levels. As discussed previously in Checklist Response 4.10b, excavation activities for future projects may extend into the underlying groundwater. Compliance with RR HWQ-5, would ensure feasibility analyses to determine infiltration BMPs, if required, would be conducted for all future project-specific development.

Therefore, the Project would not conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. Impacts are less than significant, and no mitigation is required.

Regulatory Requirements

RR HWQ-1 Storm Water Pollution Prevention Plan. Prior to the issuance of any grading or building permits, the Project Applicant shall demonstrate compliance with California's General Permit for Stormwater Discharges Associated with Construction Activity by providing a copy of the Notice of Intent (NOI) submitted to the State Water Resources Control Board and a copy of the subsequent notification of the issuance of a Waste Discharge Identification (WDID) Number or other proof of filing in a manner meeting the satisfaction of the City's Department of Public Works. Projects subject to this requirement shall prepare and implement a Storm Water Pollution Prevention Plan (SWPPP) during all phases of construction. A copy of the current SWPPP shall be kept at the construction site and be available for State and City review on request.

RR HWQ-2 General Waste Discharge Requirements. Prior to the issuance of any grading or building permits, if construction dewatering or discharges from other specific activities (e.g., dewatering from subterranean seepage, potable water system maintenance discharges, fire hydrant flushing, etc.) are required, the Project Applicant shall notify the Santa Ana RWQCB and any discharges into surface waters shall be conducted in compliance with the Santa Ana RWQCB's Order No. R8-2015-0004 (NPDES No. CAG998001), which includes General Waste Discharge Requirements (WDRs) for discharges to surface water that pose an insignificant (de minimis) threat to water quality.

The General WDRs include provisions mandating notification, testing, and reporting of dewatering and testing-related discharges, and contain numeric and performance-based effluent limits depending upon the type of discharge.

- RR HWQ-3 Water Quality Management Plan.** Prior to the issuance of any grading or building permits, the Project Applicant shall submit for review and approval by the City's Public Works Department, a Project Water Quality Management Plan (WQMP) specifically identifying Best Management Practices (BMPs) that address Pollutants of Concern. The WQMP shall comply with the requirements of the Orange County MS4 Permit, the Orange County Drainage Area Management Plan (DAMP), Model WQMP, and Technical Guidance Manual, and the City's Local Implementation Plan (LIP), Citywide Urban Runoff Management Plan (CURMP), Project WQMP Preparation Guidance Manual, and pertinent regulations in the Municipal Code.
- RR HWQ-4 Grading and Erosion Control Plans.** Prior to the issuance of any grading permit, the Project Applicant shall submit for review and approval by the City's Public Works Department, the grading and erosion control plans for the Project in compliance with pertinent requirements of the City's Grading and Excavation Code, Title 16, Division II, Grading and Excavation Code of the Stanton Municipal Code.
- RR HWQ-5 Hydromodification Plan.** Prior to the issuance of any grading permit on future project-specific development, the Project Applicant shall conduct a feasibility analysis to determine if the proposed Project-specific development would have the potential to create hydrologic conditions of concern (HCOC) and determine exact impacts. The Applicant shall submit a grading and construction plan that would adhere to the steps and requirements outlined in the Orange County Model WQMP and TGD in order to mitigate potential runoff on downstream natural channels. The plan shall be submitted and approved by the City's Public Works Department

Mitigation Measures

- MM HWQ-1** Prior to approval of Project tract maps, the Project developer(s) shall coordinate with the City of Stanton Director of Public Works to determine requirements necessary to mitigate impacts to drainage improvements to accommodate storage volumes and flood protection for existing and future runoff. Measures shall be included to contain runoff or mitigate flow rates to equivalent or less than existing conditions for all storm events until such time that downstream facilities are upgraded to maintain a 100-year storm event. Proposed projects shall implement mitigation measures, if required, to the satisfaction of the Director of Public Works.

Conclusion

The additional 139 units would result in a new significant impact beyond the impacts analyzed in the GP EIR. Implementation of a mitigation measure would reduce the impacts to less than significant level.

4.11 LAND USE AND PLANNING

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that implementation of the General Plan Update could result in potential inconsistency impacts with Federal and State plans and policies in addition to policies in SCAG's Regional Comprehensive Plan and Guide; could result in inconsistencies with the principles and strategies of SCAG's Southern California Compass Growth Visioning Program as well as local plans and policies; and could result in direct impacts regarding land use incompatibilities. Cumulative impacts related to increase in intensity of land uses in the area was considered less than significant.

Supplemental Analysis

a) Physically divide an established community?

No Impact. The Specific Plan area includes varying intensities of industrial, retail/commercial, and residential uses. This Subsequent IS/MND analyzes the potential impacts of the additional 139 multi-family residential unit only. The existing General Plan for the City of Stanton allows for a total of 1,399 multi-family units within the Town Center Specific Plan area. Since 2008, 4 units have been built, resulting in a remaining capacity of 1,395 multi-family units. The Town Center Specific Plan would allow for an additional 139 units, increasing the remaining capacity to 1,534 multi-family units.

New development within the Specific Plan area would occur through infill development of underutilized parcels, existing vacant parcels, or through redevelopment of currently developed land. Due to the built out nature of the surrounding area, implementation of the Specific Plan would not physically divide an established community. Thus, no impact would occur on an established community, and no mitigation is required.

b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Less Than Significant Impact. With respect to regional planning, the Southern California Association of Governments (SCAG) is the metropolitan planning organization (MPO) for Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial counties. As the

designated MPO, the federal government mandates SCAG to prepare plans for growth management, transportation, air quality, and hazardous waste management. In addition, SCAG reviews projects of regional significance for consistency with the existing regional plans. The Project would contribute to new housing development in the City of Stanton, and thus would contribute to the City's RHNA housing goal of 313 new dwelling units between 2014 and 2021. Plans and programs relevant to the Project and the consistency of the proposed Project with these plans and programs are discussed below.

Southern California Association of Governments

The fundamental goals of SCAG's Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) are to make the SCAG region a better place to live, work, and play for all residents regardless of race, ethnicity, or income class. Table 4-17, below, presents the proposed Project consistency with the relevant adopted 2020-2045 RTP/SCS goals. The adopted 2020-2045 RTP/SCS seeks to link the goal of sustaining mobility with the goals of fostering economic development; enhancing the environment; reducing energy consumption; promoting transportation-friendly development patterns; and encouraging fair and equitable access to residents impacted by socioeconomic, geographic, and commercial conditions. Implementation of the proposed Project would be consistent with the goals of the 2020-2045 RTP/SCS.

The proposed Project would result in an additional 139 multi-family housing units and the associated direct population of 481 people within the City of Stanton, as discussed in detail in Section 4.11, Population and Housing.

Additionally, the proposed Project functions as an infill project and would not substantially extend infrastructure and other improvements that would encourage development levels beyond what is already planned elsewhere in the City. Therefore, substantial direct and indirect growth related to the proposed Project is not anticipated, and impacts would be less than significant.

TABLE 4-17
CONSISTENCY WITH 2020-2045 REGIONAL TRANSPORTATION
PLAN/SUSTAINABLE COMMUNITIES STRATEGY (RTP/SCS) GOALS

RTP/SCS Goal	Consistency Analysis
RTP/SCS G1: Encourage regional economic prosperity and global competitiveness.	<p>Proposed Project Would Not Conflict</p> <p>The Town Center Specific Plan is a mixed-use area. The Project proposes to enhance and improve the existing area and develop additional 139 multi-family units. Design Guidelines and Development Standards encourage high-quality development and enhanced quality of life. The Project would contribute to attracting skilled workers and encouraging regional economic prosperity.</p>
RTP/SCS G2: Improve mobility, accessibility, reliability, and travel safety for people and goods.	<p>Proposed Project Would Not Conflict</p> <p>The Specific Plan includes improvements to the circulation system and streetscape that increase overall access, safety, and encourage multi-transit throughout the Specific Plan area. The circulation system that is outlined in</p>

TABLE 4-17
CONSISTENCY WITH 2020-2045 REGIONAL TRANSPORTATION
PLAN/SUSTAINABLE COMMUNITIES STRATEGY (RTP/SCS) GOALS

RTP/SCS Goal	Consistency Analysis
	<p>the Specific Plan and described in Section 3.0, Project Description, and Section 4.17, Traffic and Circulation, of the Subsequent IS/MND.</p> <p>The proposed Project includes mixed-use development areas that would provide on-site residents with easier access to goods, services, and employment opportunities. This would promote walking and biking as alternatives to automobile use.</p>
RTP/SCS G3: Enhance the preservation, security, and resilience of the regional transportation system.	<p>Proposed Project Would Not Conflict</p> <p>While not a transportation project, the Specific Plan includes improvements to the circulation system and streetscape that increase overall access, safety, and encourage multi-modal transit throughout the Specific Plan area. Therefore, the Project would not preclude the preservation, security and resilience of the regional transportation system.</p>
RTP/SCS G4: Increase person and goods movement and travel choices within the transportation system.	<p>Proposed Project Would Not Conflict</p> <p>The Town Center Specific Plan is a mixed-use area that would be enhanced and improved with an additional 139 multi-family units. The Project includes improvements to the City's circulation system and streetscape that would increase overall access and safety. These benefits would contribute to a more sustainable regional transportation system that would allow for the increase of person and goods movement within the transportation system.</p>
RTP/SCS G5: Reduce greenhouse gas emissions and improve air quality.	<p>Proposed Project Would Not Conflict</p> <p>The proposed Project is an in-fill development that does not require the extension of the regional transportation system to previously undeveloped areas. The Specific Plan includes improvements to the City's circulation system and streetscape that would increase overall access, safety, and encourage multi-modal transit throughout the Specific Plan area. A few the Specific Plan vision objectives relate to circulation and mobility, including:</p> <ul style="list-style-type: none"> • Reduce vehicle trips and trip duration by encouraging efficiency between trip origin and trip destination. • Reduce greenhouse gas (GHG) emissions and pollution through zoning changes that reduce reliance on motorized vehicles and supporting active transportation modes. <p>Per the Air Quality and Greenhouse Gas Emissions analyses conducted, the Project would result in less than significant impact without mitigation.</p>
RTP/SCS G6: Support healthy and equitable communities.	<p>Proposed Project Would Not Conflict</p> <p>The Specific Plan supports healthy and equitable communities by providing streetscape improvements that support the pedestrian and bicycle transportation network. Sidewalk and bicycle infrastructure improvements would encourage walkability and non-motorized movement. Project area is in close proximity to a variety of public transit options, as previously described above. The Specific Plan includes open space areas that would provide for active and passive recreation. The proposed pedestrian and bicycle network, and sidewalk enhancements would better connect the Specific Plan area to encourage more movement and subsequently promoting a healthy community.</p>
RTP/SCS G7: Adapt to a changing climate and support an integrated regional development pattern and transportation network.	<p>Proposed Project Would Not Conflict</p> <p>The proposed Project includes streetscape improvements, and the pedestrian and bicycle transportation network that that connect to the existing roadways in the Project vicinity. Thus, the Project would integrate into the existing transportation network.</p>

TABLE 4-17
CONSISTENCY WITH 2020-2045 REGIONAL TRANSPORTATION
PLAN/SUSTAINABLE COMMUNITIES STRATEGY (RTP/SCS) GOALS

RTP/SCS Goal	Consistency Analysis
RTP/SCS G8: Leveraging new transportation technologies and data-driven solutions that result in more efficient travel.	<p>Proposed Project Would Not Conflict</p> <p>The proposed Project would facilitate non-vehicular circulation through the provision of streetscape improvements such as pedestrian and bicycle facilities within the Project area. The Specific Plan incorporates a “complete streets” approach that prioritizes creation of a true multi-modal transportation system and that creates new connections throughout the Specific Plan area. This is achieved by using the existing circulation infrastructure to facilitate multi-modal movement throughout the area. Circulation enhancements are proposed to facilitate multi-modal connectivity and increase pedestrian safety. While not new transportation technology, the proposed approach uses a multimodal approach to provide more efficient and safe travel throughout the Specific Plan area.</p>
RTP/SCS G9: Encourage development of diverse housing types in areas that are supported by multiple transportation options.	<p>Proposed Project Would Not Conflict</p> <p>The Project would blend the proposed additional residential units within the existing uses and proposes a pedestrian and bicycle transportation network. The Specific Plan also incorporates conceptual future transit opportunities into its design, while ensuring that the success of the multi-modal network does not depend on the completion or final details of potential future transit opportunities.</p>
RTP/SCS G10: Promote conservation of natural and agricultural lands and restoration of habitats.	<p>Proposed Project Would Conflict</p> <p>The Specific Plan is a mixed-use area within a fully urbanized portion of the City, and no natural or agricultural lands exist within or in the vicinity of the Specific Plan area. The Project would introduce an open space concept that would create separate open space areas with landscaping and active and passive recreational opportunities. While the Project would not conflict with conservation of natural and agricultural lands and restoration of habitat, there is none within the Specific Plan area that can be conserved or restored.</p>
Source (policies): SCAG 2020.	

City of Stanton General Plan

The *City of Stanton General Plan*, adopted on September 23, 2008, is the primary planning and policy document of the City of Stanton. It is a policy document designed to guide the City of Stanton in achieving its economic and community development goals. It outlines specific steps to be taken to direct Stanton’s land use planning, economic development, image, and overall quality of life. The General Plan is Stanton’s fundamental policy document regarding community and economic development of the City. The General Plan describes Stanton’s goals and strategies regarding land use, economic development, transportation, housing, open space/conservation, safety, public facilities, infrastructure, and community design. Along with the goals and strategies is an action guide geared toward implementing the goals and strategies.

The City’s General Plan consists of seven chapters to most accurately reflect the issues and needs of Stanton. These chapters are: Community Development; Community Design; Economic Development; Infrastructure & Community Services; Community Health & Safety; Housing; and Regional Coordination. An evaluation of the Project’s consistency with

applicable goals and policies is provided in Table 4-18, Proposed Project General Plan Consistency Analysis.

**TABLE 4-18
PROPOSED PROJECT GENERAL PLAN CONSISTENCY ANALYSIS**

Policy	Compliance with Policy
Chapter 2 – Community Development	
Goal LU-1.1: Create an economic and fiscal balance of residential, commercial and industrial uses.	
Strategy LU-1.1.1: Encourage land uses which maximize economic development and enhance the quality of life.	Proposed Project Would Not Conflict The Specific Plan is designed to encourage a desirable mix of commercial, residential, mixed-use, and industrial uses. Design Guidelines and Development Regulations encourage high-quality development and enhanced quality of life within Stanton. Objective 12 of the Specific Plan encourages economic development and incentivizes investing in infill development.
Strategy LU-1.1.2: Ensure adjacent land uses are compatible with one another.	Proposed Project Would Not Conflict The Town Center Specific Plan includes a Land Use Plan (Exhibit 3.1) where sensitive uses such as single-family residential uses are buffered from the impacts of industrial and commercial development by limiting uses and intensity surrounding the single-family residential areas.
Goal LU-2.1: Encourage land uses which provide employment opportunities for Stanton residents.	
Strategy LU-2.1.1: Encourage revitalization and intensification of underutilized commercial uses within the city through the redevelopment process.	Proposed Project Would Not Conflict The Specific Plan includes a series of land use policies that encourage revitalization and mixed-use redevelopment and encourages intensification of underutilized commercial development that intensifies existing uses and better responds to changing economic market conditions. The Specific Plan's Objective 2 is to maintain existing businesses while encouraging a broader mix of uses and encouraging the revitalization of existing industrial uses.
Strategy LU-2.2.1: Develop an incentive program and other measures to encourage "business park" environments and improve project design.	Proposed Project Would Not Conflict Section 4.7.2.3 of the Specific Plan includes design guidelines for future industrial development within the Specific Plan area to be of high-quality designs and the development regulations included allow for only light-industrial uses that have fewer impacts on surrounding uses.
Goal LU-3.1: A range and balance of residential densities which are supported by adequate city services.	
Strategy LU-3.1.1: Preserve single-family residential neighborhoods.	Proposed Project Would Not Conflict The Specific Plan maintains the existing single-family residential land uses and preserves the low-density character of these neighborhoods. The Specific Plan also includes buffers from neighboring commercial and industrial uses by limiting uses and intensity surrounding the single-family residential areas. Objective 1 of the Specific Plan aims to preserve existing residential neighborhoods and create a vibrant, pedestrian friendly environment.
Strategy LU-3.1.2: Encourage infill and mixed-use development within feasible development sites.	Proposed Project Would Not Conflict Mixed-use development is encouraged by the Specific Plan. The Retail Oriented Mixed-Use (ROMU), Town Center Mixed-Use (TCMU), and Industrial land uses encourage mixed uses, with the ROMU and TCMU zones including residential uses. Also, Objective 12 of the Specific Plan encourages economic development and incentivizes investing in infill development.

TABLE 4-18
PROPOSED PROJECT GENERAL PLAN CONSISTENCY ANALYSIS

Policy	Compliance with Policy
Goal LU-5.1: Encourage the consolidation of existing non-conforming lots in commercial, industrial, and medium and high-density residential areas.	
Strategy LU-5.1.1: Increase the non-financial incentives for lot consolidation in selected industrial, commercial, and medium and high-density residential areas.	Proposed Project Would Not Conflict Section 2.2.2 of the Specific Plan includes new regulations that encourages private development to consolidate lots for industrial, commercial, high-density residential, and mixed-use development. Lot consolidation aligns with the Specific Plan Objective 7 of creating a true “main street” through focusing on developing in a centralized area.
Goal LU-7.1: Provide infrastructure to create foundation for future development.	
Strategy LU-7.1.2: Ensure adequate funding for the financing of public facilities and capital improvements related to new development.	Proposed Project Would Not Conflict Chapter 6 of the Specific Plan identifies various funding mechanisms that may be utilized to ensure adequate funding for public facilities, capital improvement, and expansion of future services. Objective 11 of the Specific Plan aims to ensure adequate and efficient infrastructure to support existing and future development.
Chapter 3 – Community Design	
Goal CD-1.1: Promote quality development and design that preserves and enhances a positive and unique image of Stanton, and fosters a sense of community pride.	
Strategy CD-1.1.1: Identify a desired image and vision for the city of Stanton that can provide the basis for the design of new development, redevelopment, and all other facets of the city’s physical environment.	Proposed Project Would Not Conflict Preliminary phases of the Specific Plan included extensive outreach and visioning efforts, ensuring the identity of the Specific Plan area and future development patterns reflect the desires of residents and stakeholders within Stanton, as detailed in the project vision and objectives in Section 1.1.1.
Strategy CD-1.1.2: Ensure that new development within the city contributes to the image of Stanton in a positive way and places a high standard of architecture and site design.	Proposed Project Would Not Conflict Chapter 4 of the Specific Plan includes Design Guidelines and Development Regulations that require future projects to include high-quality architecture, site design, and orientation.
Goal CD-1.2: Promote an attractive streetscape and public right-of-way, especially along major primary and secondary corridors, that is consistent with the desired version and image of Stanton.	
Strategy CD-1.2.1: Create a unified and consistent streetscape.	Proposed Project Would Not Conflict Section 4.3, Streetscape Design Guidelines, of the Specific Plan includes guidelines for streetscape within the public rights-of way, and includes recommendations for streetscaping enhancements along major arterials, such as Beach Boulevard, as well as other streets within the Specific Plan area.
Goal CD-1.3: Promote compatibility between land uses, including existing, redeveloped, and new uses, to further cohesiveness along the City’s primary and secondary corridors.	
Strategy CD-1.3.1: Discourage placement of incompatible land uses next to each other.	Proposed Project Would Not Conflict The Town Center Specific Plan includes varying land uses and development regulations that eliminate incompatible uses being located next to each other and minimizes the effects of commercial and industrial development upon residential uses (Specific Plan Table 5.1, Permitted Land Uses). Industrial uses are envisioned to be those compatible with residential uses.

TABLE 4-18
PROPOSED PROJECT GENERAL PLAN CONSISTENCY ANALYSIS

Policy	Compliance with Policy
Strategy CD-1.3.2: Support redevelopment of existing commercial, industrial, and residential structures and site improvements.	Proposed Project Would Not Conflict By increasing the allowed intensity within the Specific Plan area, the Specific Plan supports the redevelopment of existing commercial, industrial, and residential parcels. In an effort to facilitate the redevelopment of the commercial and industrial areas within the Specific Plan area, section 3.5.3, Alley Vacations, of the Specific Plan encourages vacating and reusing alleys within the area.
Goal CD-2.1: Increase the number of public spaces within the City, as well as the quality of existing and new public spaces.	
Strategy CD-2.1.1: Encourage the provision of public spaces as part of private development and redevelopment projects.	Proposed Project Would Not Conflict The Specific Plan includes requirements for additional public open space. Sections 3.4, Open Space Framework, and 4.4, Open Space Framework Concept, of the Specific Plan include an open space framework that requires the future dedication of new open spaces within the Specific Plan area. Properties outside of these locations would be encouraged to include new open spaces.
Goal CD-4.1: Create a well-connected, multi-modal urban environment that increases mobility for all Stanton residents, whether they choose or are required to travel through the City by car, bicycle, foot, or public transportation modes.	
Strategy CD-4.1.1: Promote a pedestrian friendly environment with attractive, walkable neighborhoods and commercial areas.	Proposed Project Would Not Conflict The Specific Plan includes improvements to the City's circulation system and streetscape that increase overall access, safety, and encourage multi-modal transit throughout the Specific Plan area. Through encouraging efficiency between trip origin and trip destination in the Specific Plan area, the number of vehicle trips and durations will reduce (Objective 10 of the Specific Plan).
Strategy CD-4.1.2: Promote a pedestrian friendly environment with attractive, walkable neighborhoods and commercial areas.	Proposed Project Would Not Conflict The Specific Plan encourages a mix of uses that increases walkability and promotes a pedestrian-friendly environment by providing guidelines and standards related to future development, particularly pedestrian safety. Streetscaping improvements proposed within the Specific Plan area encourage walkability by providing an aesthetically appealing pedestrian experience (Section 3.5.4).
Strategy CD-4.1.3: Provide for points of connection between various modes of transportation, including pedestrian, bicycle, and public transportation connections.	Proposed Project Would Not Conflict Section 3.5 of the Specific Plan includes improvements to the circulation network and streetscape that will facilitate multi-modal transportation throughout the Specific Plan area. The Specific Plan also includes additional connections between existing circulation facilities to increase access (e.g., Court Street crossing).
Chapter 4 – Economic Development	
Goal ED-1.2: Prevent retail leakage – encourage Stanton residents to shop within the City by providing a retail and service market that can compete with new commercial developments in surrounding cities.	
Strategy ED-1.2.1: Improve the competitiveness of shopping centers within Stanton through the provision of a greater mix of available retailers and more attractive retail centers.	Proposed Project Would Not Conflict The Specific Plan includes providing a new set of development regulations and design guidelines to existing retail areas, as well as updating uses to allow for a greater mix of businesses. This will create opportunities for new commercial development to better respond to changing demands in the retail space, as well as encourage more attractive retail centers. Additionally, this will provide for more locally serving retail and commercial developments (Objective 4).

TABLE 4-18
PROPOSED PROJECT GENERAL PLAN CONSISTENCY ANALYSIS

Policy	Compliance with Policy
Goal ED-1.3: Improve the quality of industrial uses located within the City.	
Strategy ED-1.3.1: Direct industrial business attraction efforts at light manufacturing and flex tech industrial uses.	Proposed Project Would Not Conflict Chapter 4 of the Specific Plan includes Design Guidelines and Development Regulations for the existing industrial area that prohibit incompatible development with neighboring residential neighborhoods. The provisions within the Specific Plan allows for light-industrial and tech-oriented industrial uses that are appropriate for anticipated mixed-use developments within the Specific Plan area.
Goal ED-2.2: Promote economic revitalization at key locations within the City, specifically the major arterials Beach Boulevard and Katella Avenue, which carry commuters and other travelers through Stanton.	
Strategy ED-2.2.1: Encourage mixed-use development along major corridors, specifically Beach Boulevard and Katella Avenue, as well as at major city intersections and activity nodes.	Proposed Project Would Not Conflict The Specific Plan includes mixed-use zones for the portions of the Specific Plan along Beach Boulevard, Katella Avenue, and Main Street, as seen in Exhibit 3.1 of the Specific Plan.
Strategy ED-2.2.2: Improve the look and character of commercial developments located along Beach Boulevard and Katella Avenue, or at other major arterials, corridors and intersections.	Proposed Project Would Not Conflict Chapter 4 of the Specific Plan includes Design Guidelines and Development Regulations that require high-quality architecture for future developments and improvements to existing businesses. Special treatments are required at major gateway intersections.
Goal ED-3.2: Avoid further over-saturation of convenience uses and strip commercial centers.	
Strategy ED-3.2.1: Strengthen Stanton's mix of retailers to improve shopping and employment opportunities for residents.	Proposed Project Would Not Conflict Chapter 5 of the Specific Plan includes providing a new set of development regulations and design guidelines to existing retail areas, as well as updating uses to allow for a greater mix of businesses. This will create opportunities for new commercial development to better respond to changing demands in the retail space, as well as encourage more attractive retail centers.
Chapter 5 - Infrastructure and Community Services	
Goal ICS-1.1: Provide an efficient, coherent, and well-maintained transportation network that adequately supports the General Plan land use concept.	
Strategy ICS-1.1.2: Improve efficiency of the city's existing transportation network.	Proposed Project Would Not Conflict The Specific Plan includes the potential for the creation of a parking district within the Specific Plan area. Additionally, Section 2.2.2 of the Specific Plan includes new connections to increase multi-modal accessibility, via active and inactive rail corridors traversing the Specific Plan area.
Goal ICS-1.2: Encourage alternatives to the private automobile by increasing access and opportunities to public transit, as well as to other alternative modes of transportation, such as biking and walking.	
Strategy ICS-1.2.2: Proactively plan for the reuse of the Pacific Electric and Union Pacific Corridors as a light rail facilities, or other alternative transportation use, such as a regional bikeway and linear park.	Proposed Project Would Not Conflict As described in Section 2.3.3 of the Specific Plan incorporates the Pacific Electric and Union Pacific rail corridors into a light rail network or part of the open space networks. The Specific Plan also allows for the potential rail station at the vacant parcel along Beach Boulevard.
Chapter 6 - Community Health and Safety	
Goal CHS-3.3: Establish land uses which are compatible with noise levels within the community.	
Strategy CHS-3.3.1: Land use planning decisions directly relate to potential noise impacts. Therefore, careful consideration of noise impacts should be a part of all land use decisions.	Proposed Project Would Not Conflict The Specific Plan includes new land uses and development regulations that takes noise and other potential impacts into consideration by requiring buffers and limiting the types of industrial uses allowed to minimize land use incompatibilities. As indicated in Section 4.7.3.5 of

TABLE 4-18
PROPOSED PROJECT GENERAL PLAN CONSISTENCY ANALYSIS

Policy	Compliance with Policy
	the Specific Plan, larger massings and wall planes on buildings near the railroad right-of-way are allowed.
Chapter 7 – Housing Element	
Goal H-1: Provide for a housing stock of sufficient quantity composed of a variety and range of types and costs.	
Strategy H-1.1.1: Review and revise development standards, as appropriate, to facilitate construction of a range of housing types.	Proposed Project Would Not Conflict Chapter 5 of the Specific Plan includes new development standards that allow for a variety of medium- and higher-density housing types, as well as mixed-use housing, that may appeal to a range of demographics.
Strategy H-1.1.2: Maximize the development potential of vacant and underutilized land.	Proposed Project Would Not Conflict The Specific Plan increases the development potential of vacant and underutilized land within the Specific Plan area and allows for a variety of uses, maximizing the development potential (Section 2.3.1 of the Specific Plan).
Goal H-3.1: Retention of existing housing stock and housing opportunities for Stanton residents.	
Strategy 3-1.1: Ensure long term affordability of housing units.	Proposed Project Would Not Conflict Chapter 5 of the Specific Plan encourages the development of affordable housing. These affordable units will include long-term affordability covenants to ensure they are preserved for an extended period of time.
Goal H-4.1: Access to decent and suitable housing opportunities for all Stanton residents.	
Strategy H-4.1.1: Promote homeownership opportunities.	Proposed Project Would Not Conflict Section 4.7.2.1 of the Specific Plan increases the allowed housing intensity within the Specific Plan area and allows for a variety of housing types, including single-family homes, townhomes and condominiums, thereby promoting homeownership opportunities.
Strategy H-4.1.3: Provide opportunities for the development of housing for large families.	Proposed Project Would Not Conflict Section 5.5 of the Specific Plan increases the allowed housing intensity within the Specific Plan area and allows for a variety of housing types, including single-family homes, townhomes and condominiums to accommodate large families.
Strategy H-4.1.7: Provide opportunities for the development of housing for extremely low-income households.	Proposed Project Would Not Conflict Chapter 5 of the Specific Plan encourages the development of affordable housing, including those for extremely low-income households. These affordable units will include long-term affordability covenants to ensure they are preserved for an extended period of time.
Goal H-6.1: Promote energy conservation, and green building techniques for residential construction and rehabilitation projects.	
Strategy H-6.1.1: Encourage use of energy-efficient design and appliances.	Proposed Project Would Not Conflict Chapter 4, Design Guidelines, of the Specific Plan encourages energy efficiency of new developments through encouraging solar panels, low-flow water fixtures, energy efficient appliances sustainable methods of construction, amongst others.
<i>Source: Stanton 2008a.</i>	

As demonstrated in Table 4-18, the Project would be consistent with the General Plan's applicable goals and strategies. The Specific Plan area is designated as "Medium Density Residential," "High Density Residential," "Town Center Mixed Use District" and "Industrial." In order to be consistent with the General Plan, all parcels within the Specific Plan not

currently designated “Town Center Mixed Use District” are redesignated from their current designation to “Town Center Mixed Use District”. Therefore, in light of the above, there would be no conflict with the goals and policies of the General Plan or the land use designation for the site.

City of Stanton Zoning Code

Existing zoning for parcels within the Specific Plan includes the following zoning designations: “CN” Commercial neighborhood Zone, “CG” Commercial General Zone, “PR” Parks and Recreation Zone, “OS” Open Space/Buffer Zone, “IG” Industrial General Zone, “RL” Single-Family Residential, “RM” Medium Density Residential, and “PI” Public Institutional Zone. A Zone Change is required to adopt the Specific Plan. As such, the zoning of the site would change from the above designations to “‘TCSP’ Town Center Specific Plan”.

In light of the above analysis, the Project would not cause a significant environmental impact, as the Project would not conflict with any land use plan, policy, or regulation, including the City’s General Plan and Zoning. Impacts would be less than significant, and no mitigation is required.

Regulatory Requirements

No regulatory requirements have been identified.

Mitigation Measures

Project implementation would not result in significant impacts related to Land Use and Planning; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no new significant impacts beyond the impacts analyzed in the GP EIR.

4.12 MINERAL RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

2008 General Plan Update EIR

The analysis in the Initial Study for the GP EIR concluded that the General Plan Update would not result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the State and would not result in the loss of availability of a locally-important mineral resource recovery site delineated on a local plan, specific plan, or other land use plan. Thus, this topic was focused out from further analysis in the GP EIR.

Supplemental Analysis

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?

No Impact. The California Department of Conservation (DOC), California Geological Survey (CGS) designates Mineral Resources Zones (MRZs) according to the presence of or potential for underlying mineral resources. MRZ-1 is an area with no significant mineral deposits; MRZ-2 is an area with significant mineral deposits; and MRZ-3 is an area containing known mineral resources of undetermined significance. The Project site is designated as a MRZ-3 zone according to the CGS Mineral Resources Zones (CGS 2015a). There are no areas within the City of Stanton containing known mineral resources appropriate for mineral extraction.

There are no past or ongoing oil or gas drilling activities within the Specific Plan boundaries. Review of the California Geologic Energy Management Division (CalGEM) Well Finder shows no oil or gas wells are located within the Project boundaries. The nearest wells are dry, plugged holes located near the corners of Katella Avenue/Western Avenue and David Land/Mission Way. These wells are located in the City but outside of the Project area boundaries (CalGEM 2021). Additionally, there is no mining activities or mines located within or near the Project area boundaries as shown by the DOC, Division of Mine Reclamation map (DOC 2016).

Thus, the Project would not result in the loss of availability of locally important mineral resources. No impacts would occur, and no mitigation is required.

Regulatory Requirements

No regulatory requirements have been identified.

Mitigation Measures

Project implementation would not result in significant impacts related to Mineral Resources; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no significant impacts beyond the impacts analyzed in the Initial Study for the General Plan Update.

4.13 NOISE

Would the project result in:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that implementation of the General Plan Update could generate short-term construction noise levels in excess of established standards and could contribute to an exceedance of the City's long-term operational noise standards resulting in potential noise impacts to sensitive receptors (significant unavoidable impact). Cumulative impacts related to short-term construction was considered less than significant, and long-term operational noise were considered significant and unavoidable.

Introduction

Noise and Vibration Concepts

Several rating scales (or noise "metrics") are used to analyze the effects of noise on a community. These scales include the equivalent noise level (L_{eq}) and the community noise equivalent level (CNEL). Average noise levels over a period of minutes or hours are usually expressed as A-weighted decibels (dBA) L_{eq} , which is the equivalent noise level for that period of time. The period of time averaging may be specified where $L_{eq}(3)$ would be a 3-hour average. When no period is specified, a 1-hour average is assumed. Noise of short duration (i.e., substantially less than the averaging period) is averaged into ambient noise during the period of interest. Thus, a loud noise lasting several seconds, or a few minutes may have minimal effect on the measured sound level averaged over a one-hour period.

To evaluate community noise impacts, CNEL was developed to account for human sensitivity to evening and nighttime noise. CNEL separates a 24-hour day into three periods: daytime (7:00 AM to 7:00 PM), evening (7:00 PM to 10:00 PM), and nighttime (10:00 PM to 7:00 AM). The evening sound levels are assigned a 5-dBA penalty, and the nighttime sound levels are assigned a 10-dBA penalty prior to averaging them with daytime hourly sound levels. Other

statistical descriptors often used to describe noise, are L_{\max} and L_{\min} , which are the highest and lowest A-weighted sound levels that occur during a noise event, respectively.

Vibration amplitudes are commonly expressed in peak particle velocity (ppv) or root-mean square (RMS) vibration velocity. Ppv is defined as the maximum instantaneous positive or negative peak of a vibration signal. Ppv and RMS vibration velocity are normally described in inches per second. Similar to airborne sound, vibration velocity can be expressed in decibel notation as vibration decibels (VdB).

Existing Conditions

Existing ambient noise levels are comprised of local noise sources. The primary noise sources associated with developed areas are generally vehicle traffic along transportation corridors. To evaluate the existing noise environment, noise modeling of existing traffic volumes was conducted, as shown in Table 4-19, below. The complete noise modeling results are included in Appendix E, Noise Calculations.

**TABLE 4-19
EXISTING TRAFFIC NOISE LEVELS**

Roadway Segments	Existing Traffic Volumes	Existing Traffic Noise Levels (dBA L_{eq} at 50 feet from roadway centerline)
Cerritos, West of Rose	13,100	72
Cerritos, East of Dale	12,600	71
Katella, West of Beach	21,500	74
Katella, East of Court	21,600	74
Beach, North of Cerritos	44,100	78
Beach, South of Katella	46,200	78
dBA: A-weighted decibels; L_{eq} : equivalent noise level		

Sensitive Receptors

The State of California defines noise-sensitive receptors as those land uses that require serenity or are otherwise adversely affected by noise events or conditions. The land use categories requiring the lowest noise thresholds are schools, libraries, churches, hospitals, and residences. These uses proximate to the Project site are referred to as the Project's "noise sensitive receptors" due to sensitivity of these uses to noise exposure.

City of Stanton General Plan

The City of Stanton is affected by several different sources of noise, including vehicle traffic, commercial and industrial activity, and periodic nuisances such as construction, loud parties, and other events. The Noise Element of the City of Stanton General Plan (adopted September 23, 2008) is intended to identify these sources and provide objectives and policies that ensure that noise from these sources does not create an unacceptable noise environment.

The Noise Element addresses protecting noise-sensitive land uses, ensuring land use/noise compatibility, reducing noise from mobile sources and mitigating noise from construction, maintenance, and other sources.

The Noise Element has adopted a local Noise Control Ordinance (Municipal Code 9.28.050 Exterior Noise Standards) in order to control unnecessary, excessive, and annoying sounds emanating from incorporated areas of the City. The Ordinance is designed to control unnecessary, excessive, and annoying sounds in residential neighborhoods by the following noise standards:

- Exterior and interior noise of 55 dBA during the hours of 7:00 a.m. to 10:00 p.m.;
- Exterior noise of 50 dBA during the hours of 10:00 p.m. to 7:00 a.m.; and,
- Interior noise of 45 dBA during the hours of 10:00 p.m. to 7:00 a.m.

The Ordinance prohibits exterior noise sources to exceed the following:

- The noise standard for a cumulative period of more than thirty minutes in any hour; or
- The noise standard plus 5 dB(A) for a cumulative period of more than fifteen minutes in any hour; or
- The noise standard plus 10 dB(A) for a cumulative period of more than five minutes in any hour; or
- The noise standard plus 15 dB(A) for a cumulative period of more than one minute in any hour; or
- The noise standard plus 20 dB(A) for any period of time.

Interior noise sources cannot exceed the following:

- The interior noise standard for a cumulative period of more than five minutes in any hour; or
- The interior noise standard plus 5 dB(A) for a cumulative period of more than one minute in any hour; or
- The interior noise standard plus 10 dB(A) for any period of time.

The City's land use noise compatibility standards are provided for reference in Table 4-20 Land Use Noise Compatibility Guidelines – California.

TABLE 4-20
LAND USE-NOISE COMPATIBILITY GUIDELINES - CALIFORNIA

General Plan Land Use Designation	Normally Acceptable (dBA CNEL)	Conditionally Acceptable (dBA CNEL)	Normally Unacceptable (dBA CNEL)	Clearly Unacceptable (dBA CNEL)
Residential - Low Density, Single-Family, Duplex, Mobile Homes	50 - 60	55 - 70	70-75	75-85
Residential - Multiple Family	50 - 65	60 - 70	70 - 75	70 - 85
Transient Lodging - Motels, and Hotels	50 - 65	60 - 70	70 - 80	80 - 85
Schools, Libraries, Churches, Hospitals, Nursing Homes	50 - 65	60 - 70	70 - 80	80 - 85
Auditoriums, Concert Halls, Amphitheaters	NA	50 - 70	NA	65 - 85
Sports Arenas, Outdoor Spectator Sports	NA	50 - 75	NA	70 - 85
Playgrounds, Neighborhood Parks	50 - 70	NA	67.5 - 75	72.5 - 85
Golf Courses, Riding Stables, Water Recreation, Cemeteries	50 - 70	NA	70 - 80	80 - 85
Office Buildings, Business Commercial and Professional	50 - 70	67.5 - 77.5	75 - 85	NA
Industrial, Manufacturing, Utilities, Agriculture	50 - 75	70 - 80	75 - 85	NA
<p>NA: Not Applicable</p> <p>Source: General Plan Guidelines, Office of Planning and Research, California, October 2003.</p> <p>Normally Acceptable – Specified land use is satisfactory, based upon the assumption that any buildings involved are of normal conventional construction, without any special noise insulation requirements.</p> <p>Conditionally Acceptable – New construction or development should be undertaken only after a detailed analysis of the noise reduction requirements is made and needed noise insulation features included in the design. Conventional construction, but with closed windows and fresh air supply systems or air conditioning, will normally suffice.</p> <p>Normally Unacceptable – New construction or development should be discouraged. If new construction or development does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design.</p> <p>Clearly Unacceptable – New construction or development should generally not be undertaken.</p>				

City of Stanton Municipal Code

Relevant sections of the City Municipal Code (Chapter 9.28, Noise Control) to the proposed residential uses of the Specific Plan are discussed further below.

9.28.090 Air conditioning and refrigeration—Special provisions

Until January 19, 1979, the noise standards enumerated in Sections 9.28.050 and 9.28.060 shall be increased eight dB(A) where the alleged offensive noise source is an air conditioning or refrigeration system or associated equipment which was installed prior to the effective date of the ordinance codified in this chapter. (Prior code Section 9.44.090)

9.28.095 Special noise sources—Radios, television sets and similar devices

- A. Use Restricted. It is unlawful and a misdemeanor, subject to punishment in accordance with Chapter 1.10 of this code, for any person within the city of Stanton to use or operate any radio receiving set, musical instrument, phonograph, television set, or other machine or device for the producing or reproducing of sound at any time in such a manner as to produce noise levels on residential land which would disturb the peace, quiet, and comfort of neighboring residents or any reasonable person of normal sensitivity residing in the area.
- B. Prima Facie Violation. Any noise exceeding the ambient noise level at the property line of any residential area (or if a condominium or apartment house, within any adjoining apartment) by more than five decibels shall be deemed to be prima facie evidence of a violation of the provisions of this section. (Ord. 838 Section 2, 2000)

9.28.096 Same—Machinery, fans and other mechanical devices

Any noise level from the use or operation of any machinery, equipment, pump, fan, air conditioning apparatus, refrigerating equipment, or other mechanical or electrical device, or in repairing or rebuilding any motor vehicle, which exceeds the noise limits as set forth in this title at any property line, or, if a condominium or rental unit, within any condominium unit or rental unit within the complex, shall be a violation of this chapter. (Ord. 838 Section 3, 2000)

9.28.070 Special provisions

- E. Noise sources associated with construction, repair, remodeling, or grading of any real property provided said activities do not take place between the hours of eight p.m. and seven a.m. on weekdays, including Saturday, or at any time on Sunday or a federal holiday;
- I. Noise sources associated with the maintenance of real property provided said activities take place between the hours of seven a.m. and eight p.m. on any day except Sunday or federal holiday, or between the hours of nine a.m. and eight p.m. on Sunday or federal holiday;

20.300.100 Vibration

Existing and proposed uses shall not generate vibrations that can or may be considered a nuisance or hazard on any adjacent property or shall be cushioned or isolated to prevent generation of vibrations. (Ord. 1017, 2013).

Supplemental Analysis

- a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?*

Project Related Temporary Noise Increases

Less Than Significant Impact. Construction activities of proposed residential uses would occur within the Specific Plan area. The specific locations of these activities within this Area are currently unknown. These construction activities are likely to involve demolition of existing structures, grading and excavation for utilities and building foundations, building construction, paving, and architectural coatings. Construction activities are anticipated to occur over a period of 30 years (Specific Plan buildout); however, due to a relatively small number of proposed units, construction is not anticipated to occur throughout that timeframe. It is assumed that there would be approximately 5 dwelling units developed annually if the development of the Proposed Project were averaged over the 30-year time period. It is expected that development of the proposed residential units would not follow this annual average and would be based on market demand, but this estimate provides an idea of the relatively small magnitude of development averaged over the full buildout of the Specific Plan. Even if the actual development's magnitude is higher, the amount of haul truck and worker commute trips is low due to the relatively small amount of develop that is proposed. In addition, all construction activities would occur within the hours specified by the City's Noise Ordinance. Local intersections analyzed in the traffic analysis have approximately 12,000 to 46,000 existing vehicle trips per day. Based on these vehicle trips, the addition of Project related construction trips from the development of the Specific Plan would not result in an audible change in the average traffic noise along the roadways. A doubling of traffic is generally required for a 3-decibel change in noise levels and 3-decibels is the minimum change in noise levels that is needed to be perceptible for human hearing in outdoor environments. As such, construction traffic would not result in an audible change in noise levels and would not result in a significant impact to receptors along local roadways.

In typical construction projects, such as the proposed Project, demolition and grading activities generate the highest noise levels, since they involve the use of the largest equipment. During demolition and grading, persons in the immediate vicinity of the construction site would experience short-term noise impacts related to the operation of heavy construction equipment such as bulldozers, hoe-rams, excavators, and dump trucks. Noise levels would fluctuate depending on equipment type, duration of use, and distance between noise source and receiver.

Local residents and other receptors would be subject to elevated noise levels due to the operation of Project-related construction equipment. Construction activities are carried out in discrete steps, each of which has its own mix of equipment and, consequently, its own noise characteristics. These various sequential phases would change the character of the noise levels surrounding the construction site as work progresses. Construction noise levels reported in the USEPA's *Noise from Construction Equipment and Operations, Building Equipment, and Home Appliances* were used to estimate future construction noise levels for

future projects. Typically, the estimated construction noise levels are governed primarily by equipment that produces the highest noise levels. Construction noise levels for each generalized construction phase (ground-clearing/demolition, excavation, foundation construction, building construction, paving, and site cleanup) are based on a typical construction equipment mix for an industrial project and do not include use of atypical, very loud, and vibration-intensive equipment (e.g., pile drivers).

The degree to which noise-sensitive receptors are affected by construction activities depends heavily on their proximity. The distance of future construction sites to nearby noise sensitive uses is currently unknown. For informational purposes, estimated noise levels attributable to the development of the future projects at various distances are shown in Table 4-21, Construction Noise Levels at Noise-Sensitive Uses. Activities located closer to receivers would be louder and those that are located further than 50 feet would be lower depending on the separation distance. Calculations are included in Appendix E, Noise Calculations.

**TABLE 4-21
CONSTRUCTION NOISE LEVELS AT NOISE-SENSITIVE USES**

Construction Phase	Noise Levels (Leq dBA)			
	Construction at 25 feet	Construction at 50 feet	Construction at 100 feet	Construction at 200 feet
Ground Clearing/Demolition	90	84	78	72
Excavation	95	89	83	77
Foundation Construction	84	78	72	66
Building Construction	93	87	81	75
Paving and Site Cleanup	95	89	83	77
Leq dBA: Average noise energy level; Max: maximum; avg: average; ft: feet, NA: Not Applicable Note: Noise levels from construction activities do not take into account attenuation provided by intervening structures.				

Construction activities would comply with the City's Municipal Code Section 9.28.070, which exempts construction noise from quantitative limits during specified hours. Because the Project would limit construction noise to the least noise sensitive portions of the day and would not involve especially loud pieces of construction equipment such as pile drivers, impacts would be less than significant, and no mitigation is required.

Permanent Project-Related Noise Increases

Permanent sources of noise associated with the Project involves vehicle trips traveling to and from the Project site, property maintenance activities (landscaping), parking lot activities, recreational activities within residential courtyards, and mechanical sources of noise.

Noise Generated by Project Traffic

Operation of the proposed Project would generate traffic along roadways in the Project vicinity. The Project is anticipated to generate an additional 937 trips per day with 56 AM peak-hour trips and 71 PM peak-hour trips. Project related traffic volumes would be distributed across roadways local to the Project. As shown in Table 4-22, below, the Project would result in minimal increases in traffic volumes. This increase in traffic volumes would result in noise levels increases of less than 1 decibel. A doubling of traffic volumes would result in traffic noise increases of 3 decibels. A 3-decibel increase is the minimum change in noise levels that is perceptible to human hearing in outdoor environments. Because traffic noise increases are below the limits of human hearing to detect an audible change in noise levels, traffic noise increases from the Project would not be perceptible or substantial. The impact pertaining to traffic noise levels would therefore be less than significant, and no mitigation is required.

**TABLE 4-22
PROJECT-RELATED OFFSITE TRAFFIC NOISE INCREASES**

Roadway	Build-Out No Project Traffic Volumes	Build-Out Project Traffic Volumes	Project Only Traffic Volume Increase	Project Only Traffic Noise Increase (dBA CNEL)
Cerritos, West of Rose	14,900	14,900	0	0.00
Cerritos, East of Dale	14,000	14,100	100	0.03
Katella, West of Beach	24,600	24,600	0	0.00
Katella, East of Court	24,400	24,500	100	0.02
Beach, North of Cerritos	49,800	50,100	300	0.03
Beach, South of Katella	52,200	52,500	300	0.02

Noise Generated by On-Site Sources

The primary noise sources generated by operation of the proposed Project would be heating, ventilation, and air conditioning (HVAC) equipment, landscape maintenance, parking lot activities, recreational activities within residential courtyards, and trash collection. Noise generated by trash collection is not regulated by the Municipal Code. This source of noise is common with land use development. Noise generated by landscaping activities is regulated by Section 9.28.070.I. Special Provisions, which restricts maintenance of property to the least noise sensitive hours of the day. Noise generated by recreational activities in residential courtyards are regulated under the City's exterior and interior noise standards as well as Section 9.28.095 that addresses disturbances in residential areas from music. Parking lots generate noise from vehicle ingress/egress, door slams, car alarms, and engine starts. Noise generated by parking lot activities are generally of low magnitude and would not result in a public nuisance. Noise associated with car alarms are of high magnitude to attract public attention and deter theft, but the duration of these events are short and generally infrequent. In addition, the California vehicle Code Section 22651.5 allows a peace officer to remove a vehicle with a car alarm after 20 minutes of activation.

These sources of noise are typical of developed land uses and because they are regulated by the City, they would not result in noise levels of sufficient magnitude and frequency of occurrence to result in a significant noise impact. Impacts to noise generated by on-site sources would be less than significant, and no mitigation is required.

Therefore, the Project would have less than significant impacts related to generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project, and no mitigation is required.

b) Generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant With Mitigation Incorporated. There are no applicable City standards for structural damage from vibration. The California Department of Transportation (Caltrans) vibration damage potential guideline thresholds are shown in Table 4-23.

**TABLE 4-23
VIBRATION DAMAGE THRESHOLD CRITERIA**

Structure and Condition	Maximum ppv (in/sec)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Extremely fragile historic buildings, ruins, ancient monuments	0.12	0.08
Fragile buildings	0.20	0.10
Historic and some old buildings	0.50	0.25
Older residential structures	0.50	0.30
New residential structures	1.00	0.50
Modern industrial/commercial buildings	2.00	0.50
ppv: peak particle velocity; in/sec: inch(es) per second. Note: Transient sources create a single isolated vibration event, such as blasting or drop balls. Continuous/frequent intermittent sources include impact pile drivers, pogo-stick compactors, crack-and-seat equipment, vibratory pile drivers, and vibratory compaction equipment. Source: Caltrans 2020.		

The Caltrans vibration annoyance potential guideline thresholds are shown in Table 4-24. Based on the guidance in Table 4-24, the “strongly perceptible” vibration level of 0.9 ppv in/sec is used in this analysis as the threshold for a potentially significant vibration impact for human annoyance.

**TABLE 4-24
VIBRATION ANNOYANCE CRITERIA**

Average Human Response	Maximum ppv (in/sec)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Barely perceptible	0.04	0.01
Distinctly perceptible	0.25	0.04
Strongly perceptible	0.90	0.10
Severe	2.0	0.4
ppv: peak particle velocity; in/sec: inch(es) per second. Source: Caltrans 2020.		

Table 4-25 summarizes typical vibration levels measured during construction activities for various vibration-inducing equipment at a distance of 25 feet.

**TABLE 4-25
VIBRATION LEVELS FOR CONSTRUCTION
EQUIPMENT**

Equipment	ppv at 25 ft (in/sec)
Impact pile driver	1.518
Vibratory roller	0.210
Large bulldozer	0.089
Caisson drilling	0.089
Loaded trucks	0.076
Jackhammer	0.035
Small bulldozer	0.003
ppv: peak particle velocity; in/sec: inches per second. Source: Federal Transit Administration 2018.	

The exact location of the nearest structures to the Project construction sites are currently unknown. It is also unknown which equipment would be used or the resiliency of the existing structures that would be proximate to the Project site. Table 4-26, Project Vibration Impacts, shows the vibration exposure levels for various distances of construction equipment from offsite buildings.

**TABLE 4-26
PROJECT VIBRATION IMPACTS**

Equipment	Vibration Levels at Different Distances				
	(ppv @ 10 ft)	(ppv @ 20 ft)	(ppv @ 30 ft)	(ppv @ 40 ft)	(ppv @ 50 ft)
Impact pile driver	6.000	2.121	1.155	0.104	0.537
Vibratory roller	0.830	0.293	0.160	0.044	0.074
Caisson Drill	0.352	0.124	0.068	0.044	0.031
Large bulldozer	0.352	0.124	0.068	0.001	0.031
Loaded trucks	0.300	0.106	0.058	0.104	0.027
Jackhammer	0.138	0.049	0.027	0.038	0.012
Small bulldozer	0.012	0.004	0.002	0.017	0.001
Annoyance Criteria	0.1	0.1	0.1	0.1	0.1
Building Damage Criteria:					
Extremely Fragile Historic Buildings	0.08	0.08	0.08	0.08	0.08
Fragile Buildings	0.10	0.10	0.10	0.10	0.10
Historic and Some Old Buildings	0.25	0.25	0.25	0.25	0.25
Older Residential Structures	0.30	0.30	0.30	0.30	0.30
New Residential Structures	0.50	0.50	0.50	0.50	0.50
Modern Industrial/Commercial Buildings	0.50	0.50	0.50	0.50	0.50
ppv: peak particle velocity; ft: feet					
Note: Calculations can be found in Appendix E.					

As shown in Table 4-26, vibration levels would potentially exceed the annoyance and building damage thresholds depending on the distances between the construction equipment and offsite structures. Because vibration levels could be above the significance thresholds, the future projects' construction activities may result in annoyance and cosmetic building damage at the nearest offsite structures to the site without the implementation of mitigation. As such, MM NOI-1 is proposed to establish buffer distances so that vibration annoyance is minimized and building damage does not occur.

MM NOI-1 would avoid potential vibration induced cosmetic building damage to offsite buildings. MM NOI-1 provides flexibility in establishing setback distances based on the construction equipment that would be used and the types of structures that may be affected. With the implementation of MM NOI-1, vibration levels produced by project related construction equipment would be below both the annoyance and building damage criteria and result in less than significant construction related vibration impacts.

- c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?***

No Impact. The Joint Forces Training Base (JFTB) Los Alamitos is located in the City of Los Alamitos, approximately two and half miles to the west of the Specific Plan area. The Airport Environs Land Use Plan (AELUP) is a land use compatibility plan that is intended to protect the public from adverse effects of aircraft noise; ensure the people and facilities are not concentrated in areas susceptible to aircraft accidents; and ensure that no structures or activities adversely affect navigable space. The AELUP identifies standards for development in the airport's planning area based on noise contours, accident potential zones, and building heights. The City of Stanton, which includes the Specific Plan area is not located within the accident potential zone or the (AELUP) height restriction zone for JFTB (Stanton 2008b) nor within the 65 and 60 dBA CNEL noise contours (JFTB Los Alamitos 2016).

Thus, the Project would not result in excessive noise for people residing on the site, as it relates to exposure to airport or aircraft hazards in areas within an airport land use plan or within two miles of a public airport. No impact would occur, and no mitigation is required.

Regulatory Requirements

RR NOI-1 The future projects shall comply with the City of Stanton Municipal Code Chapter 9.28, Noise Control.

Mitigation Measures

MM NOI-1 During active construction phases, the Applicant shall require that all construction contractors for a future project restrict the operation of construction equipment to distances where vibration levels would be less than the vibration "annoyance" and "building damage" criteria shown in Table 4-26.

Conclusion

The additional 139 units would result in new significant impact beyond the impacts analyzed in the GP EIR. Implementation of a mitigation measure would reduce the impacts to less than significant level.

4.14 POPULATION AND HOUSING

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that implementation of the General Plan Update could increase the residential population by 20,416 persons resulting in a population of approximately 59,397 persons in 2020; would result in the addition of 5,751 housing units to the City's housing stock during the planning horizon of 2020; could result in the reduction of approximately 3,662 jobs for a total of 11,399 jobs within the City in the planning horizon year of 2020. Cumulative impacts related to inducing housing, population, and employment growth was considered less than significant.

Supplemental Analysis

This section is based on data available through the State of California Department of Finance, Southern California Associated Governments (SCAG), City of Stanton General Plan Housing Element Draft (October 2021), and City of Stanton General Plan EIR. Based on the General Plan EIR, buildout of the General Plan would meet housing demands projected for the City, induce population growth, and affect the jobs/housing balance.

a) Induce substantial unplanned population growth in an area, either directly (e.g., by proposing new homes and businesses) or indirectly (e.g., through extensions of roads or other infrastructure)?

Less Than Significant Impact. According to the State Department of Finance (DOF), the City of Stanton had a 2021 population of 39,573 persons and a housing stock of 11,448 dwelling units. The City had an average household size of 3.5 persons per household and a vacancy rate of 3.1 percent (DOF 2021).

Table 4-27, Population Projection, shows population growth for Stanton and Orange County in the region from 2000 through 2020. According to the California DOF, the population of Stanton in 2020 was 39,150 persons, an increase of approximately 2.5 percent from a population of 38,186 in 2010. During the previous decade (2000 to 2010), the City's population increased 2.1 percent to total 38,186 in 2010. Comparatively, Stanton's growth has been lower than Countywide growth, with Orange County experiencing population

growth rates during both the 2000 to 2010 and 2010 to 2020 periods higher than that experienced in Stanton. This is largely due to Stanton's built-out nature and the availability of developable land in the County versus in the City. Based on the General Plan, the City's population is anticipated to increase to approximately 59,397 persons upon buildout of lands within the City limits (Stanton2008a).

**TABLE 4-27
POPULATION PROJECTIONS**

Jurisdiction	2000	2010	2020	Change 2000-2020	% Change 2000-2020
Stanton	37,403	38,186	39,150	1,774	4.4%
Orange County	2,846,289	3,010,232	3,194,332	348,043	12.2%
<i>Source: DOF 2010, DOF 2021</i>					

Using SCAG data, the City's 2016 population was 39,300 and is anticipated to increase to 44,200 by 2045. For the same time frame, County population was 125,900 in 2016 and 181,000 by 2045 (SCAG 2020b). As such, the County would have a population growth of approximately 43.8 percent from 2016 to 2045 (or 1.5 percent annually). The City would experience a population increase of approximately 12.5 percent from 2016 to 2045 (or 0.4 percent annually). Buildout of the General Plan would result in a population of 59,397 persons, which represents 14,601 more persons than projected by SCAG. However, it should be noted that population projections typically use Census data as a baseline; therefore, current projections are based on 2000 Census data, which are no longer current.

The General Plan allows for the construction of approximately 5,751 additional dwelling units within the City, resulting in a total of approximately 18,537 dwelling units at buildout. Additionally, buildout of the General Plan results in a net reduction of 1,433,635 square feet of non-residential development within the City, resulting in a maximum of 6,144,748 square feet of non-residential development at buildout. Implementation of the General Plan is anticipated to increase the City's population by 20,416 persons, resulting in a total population of approximately 59,896 persons (based on 3.55 persons per household and the maximum allowable land uses permitted in the *General Plan*).

Using the City's population generation factor of 3.46 persons per unit (DOF 2021), the Project with the proposed 139 multi-family residential units would generate approximately 481 residents. Using the Orange County Population (OCP), this would increase the City's 2020 resident population of 40,030 persons by 1.2 percent to 40,511 residents (OCP 2018). It would increase the City's 2021 housing stock of 11,537 by 1.2 percent to 11,676 units (OCP 2018). It is anticipated that short-term construction jobs would be created over time. Jobs that would be created during construction would be short-term and would not increase the City's job base permanently. However, the temporary construction crew and long-term residents of the Project would not create a significant change in demand for goods and services that may induce business investment, growth, or development in the area.

While the Project would result in direct population growth by generating a total of 481 residents, it would not result in indirect population growth. The Specific Plan area is

currently developed with the existing infrastructure and circulation system in place. Additionally, the area surrounding the Specific Plan is also developed. As such, the Project would not result in extending infrastructure such that would induce growth in the area. Major infrastructure, serving the area already exists. Thus, the Project would not result in substantial unplanned population growth indirectly. The impacts would be less than significant, and no mitigation is required.

b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

Less Than Significant with Mitigation Incorporated. The Specific Plan area is developed with varying intensities of light industrial, retail/commercial, and residential uses. This Subsequent IS/MND analyzes the potential impacts of the additional 139 multi-family dwelling units only. The existing General Plan for the City of Stanton allows for a total of 1,399 multi-family units within the Town Center Specific Plan area. Since 2008, 4 units have been built, resulting in a remaining capacity of 1,395 multi-family units. The Town Center Specific Plan would allow for an additional 139 units, increasing the remaining capacity to 1,534 multi-family units. Future development associated with implementation of the Specific Plan, would require demolition of both existing residential and non-residential land uses. There is the potential for existing onsite residential uses to be displaced temporarily, as sites are redeveloped, or permanently if the specific residential product type needs to be completely relocated. However, under either a temporary or permanent relocation scenario, qualifying residents would receive relocation assistance in compliance with State Redevelopment Law (MM PH-1). Therefore, implementation of the proposed Specific Plan would result in less than significant impacts with implementation of MM PH-1.

Regulatory Requirements

No regulatory requirements have been identified.

Mitigation Measures

MM PH-1 Qualifying residents subject to displacement shall receive relocation assistance in compliance with California Community Redevelopment Law, State Relocation law (Government Code Sections 7260 through 7277), and the California Relocation Assistance and Real Property Acquisition Guidelines (California Code of Regulations, Title 25, Chapter 6).¹

Conclusion

The additional 139 units would result in new significant impact beyond the impacts analyzed in the GP EIR. Implementation of a mitigation measure would reduce the impacts to less than significant level.

¹ Relocation assistance is applicable to projects where real property is acquired by the Stanton Community and Economic Development Department or by a private party pursuant to an agreement with the Stanton Community and Economic Development Department.

4.15 PUBLIC SERVICES

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
i) Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ii) Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iii) Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iv) Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
v) Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that implementation of the General Plan Update could result in the need for additional fire and police facilities or personnel and could result in adverse physical impacts to Stanton Unified School District facilities. Cumulative impacts related to fire and schools were considered potentially significant, except for demand for police services, which was considered less than significant.

The topic of parks was covered under Parks, Recreational Facilities, and Trails in the GP EIR.

Supplemental Analysis

a) Fire protection?

Less Than Significant Impact. Fire protection services in the City, including the Project site, are provided by the Orange County Fire Authority (OCFA) Division 7, which maintains and operates five stations that serve the City. Locations of the OCFA stations, apparatus and staffing are provided in Table 4-28, below.

**TABLE 4-28
ORANGE COUNTY FIRE AUTHORITY FIRE DEPARTMENTS**

Fire Stations and Locations	Distance to the Project Area (miles)²	Current Apparatus	Current Daily Staffing
Fire Station 46 7871 Pacific St., Stanton	0.5	Paramedic Assessment Unit, Medic Van	1 Captain, 1 Engineer, 3 Firefighter/Paramedics
Fire Station 82 11805 Gilbert St., Garden Grove	1.75	Paramedic Engine	1 Captain/Paramedic, 1 Engineer, 1 Firefighter, 1 Firefighter/Paramedic
Fire Station 85 12751 Western Ave., Garden Grove	2.0	Paramedic Truck	1 Captain, 1 Engineer, 2 Firefighter/Paramedics
Fire Station 84 12191 Valley View St., Garden Grove	2.5	Paramedic Engine, Type 3 Engine (cross staffed)	1 Captain/Paramedic, 1 Engineer, 1 Firefighter, 1 Firefighter/Paramedic
Fire Station 63 9120 Holder St. Buena Park	3.0	Paramedic Engine	1 Captain, 1 Engineer/Paramedic, 1 Firefighter, 1 Firefighter/Paramedic
<i>Source: OCFA. 2021b.</i>			

OCFA provides response to fire protection, medical emergencies, hazardous materials incidents, natural and man-made disasters and related emergencies in an effort to reduce life and property loss (OCFA 2021a). OCFA also provides automatic and mutual aid assistance to adjacent counties and city fire departments within Orange County. OCFA's Standard of Cover for fire/rescue/medical emergency response arrival times is listed below (OCFA 2021b).

- First-in engines should arrive on-scene to medical aids and/or fires within 7 minutes and 20 seconds 80 percent of the time.
- First-in truck companies should arrive on-scene to fires within 12 minutes 80 percent of the time.
- First-in paramedic companies should arrive on-scene at all medical aids within 10 minutes 80 percent of the time.

Fire Station 46 located at 7871 Pacific Street is west of Beach Boulevard within the Specific Plan area. It is the closest station and would provide the first line of response to the Project area; however, the other four locations listed in Table 4-28 would also provide fire/rescue/medical emergency services as needed for specific emergency needs. In 2020, OCFA dispatched units to 3,665 incidents in Stanton, arriving under their Standard of Cover response times listed above (OCFA 2021a).

² Mileage is an estimate of distance within the Specific Plan Project area.

At this time, there are no planned or ongoing construction or expansion projects for emergency services in the City. As shown in Checklist Response 4.14(a) in Section 4.14, Population and Housing, implementation of the proposed Project would generate 481 residents, which may have the potential to impact OCFA's resources to maintain acceptable emergency response times. However, the City is a Cash Contract City with OCFA; therefore, the City takes responsibility to ensure funding is available to maintain emergency infrastructure (OCFA 2021b). In the event there is future demand for additional personnel, equipment, apparatus or facilities, this would be determined through the continued implementation of strategic planning that meets the population growth for emergency services funding by the City. Through this process, fire department needs are assessed, and budget allocations are revised accordingly to ensure that adequate levels of service are maintained throughout the City.

Compliance with regulatory requirements RR PS-1, which requires standard conditions and procedures according to current regulations and codes for fire prevention and emergency services; RR PS-2, which requires payment of development impact fees for fire suppression facilities; and RR PS-3 regarding fire/emergency access during construction would ensure that impacts to fire protection services would be less than significant, and no mitigation is required.

b) Police Protection?

Less Than Significant Impact. Police protection services for the City, including the Project site, are provided by the Orange County Sheriff's Department (OCSD). OCSD is headquartered in Santa Ana at 550 North Flower Street and consists of seven commands: Office of the Sheriff, Administrative Services Commands, Corrections and Court Operations Command, Custody and Inmate Services Operations Command, Investigations and Special Operations Command, Patrol Operations Command, and Professional Services Command. The Patrol Operations Command is split into four divisions: North Operations, Southeast Operations, Southwest Operations, and Transit Operations. The North Operations, based at the Sheriff's Headquarters in Santa Ana, is responsible for patrol services in the north Orange County unincorporated areas and contract police services for the cities of Yorba Linda, Stanton, and Villa Park (OCSD 2021a; OCSD 2021c).

Since 1988, the City has contracted with the OCSD to provide police services. OCSD, as Stanton Police Services, operates out of a City-owned building located at 11100 Cedar Street. The Stanton Police Services Branch (Branch) includes 31 sworn staff and 5 professional staff. The Branch is open to the public Monday through Friday from 10 AM to 2 PM. However, police patrol services operate 24 hours a day, 7 days a week. In addition to emergency calls, police assistance after hours is available through a non-emergency dispatch service and general police services phone as well as a physical intercom system outside of the Branch location (OCSD 2021a, OCSD 2021b).

The proposed Project would generate a demand for police protection services during construction and operation of future projects and during operation (once the proposed residential units are occupied). OCSD is the largest agency in the Orange County, with a wide range of capabilities at their disposal during natural disasters, protest, or any major event

where they may need additional resources. However, at any given time surrounding agencies may respond to any mutual aid request to the City (OCSD 2021a).

The build-out of the proposed Project would increase the overall population (full-time residential and daily visitor-related) to the Project area. This would increase the level of police services required through daily service calls, case volume, and increase response times. With the net increase of 481 residents, the demand for police protection services would increase over the existing condition; however, the demand is not substantial and may not require additional staffing for the police services to offset the increased population (OCSD 2021a).

OCSD, as mentioned previously, is contracted by the City, therefore, the City would anticipate and increase the level of police service as needed by the phased development of the proposed Project. At this time there are no plans for expansion of police facilities (OCSD 2021a), nor would the proposed Project require construction of new or physically altered police protection facilities to maintain an adequate level of service to the Project area. Compliance with regulatory requirement RR PS-4, which requires payment of development impact fees for police facilities (Stanton Municipal Code 19.18.030), would ensure that adequate police protection services are provided and impacts to police protection services would be less than significant. No mitigation is required.

c) Schools?

Less Than Significant Impact. The proposed Project includes a maximum of 139 new residential units, which would generate new residents and potential school-aged children who would require future school services. The City of Stanton is supported by the following three school districts:

- Anaheim Union High School District
501 N. Crescent Way, Anaheim, CA 92803
Grades: Junior and High Schools
- Magnolia School District
2705 W. Orange Avenue, Anaheim, CA 92804
Grades: Pre-school; TK-K to 6th
- Savanna School District
1330 S. Knott Avenue, Anaheim, CA 92804
Grades: K-8

While Garden Grove Unified School District serves the City, the school district does not serve the proposed Project area (GGUSD 2021). Anaheim Union High School District, Magnolia School District, and Savanna School District serve the City including the Project area (AUHSD 2021, MSD 2021, SSD 2021).

The Project area is served by two elementary schools, one junior high school, and one high school. The number of students generated by the proposed Project are identified in Table 4-29 below. Using student generation rates from the City of Stanton General Plan EIR (Stanton

2008), the proposed Project would generate a total of 121 students across three school districts: Anaheim Union High School District, Magnolia School District, and Savanna School District.

TABLE 4-29
STUDENTS GENERATED BY THE PROPOSED PROJECT

School District	Proposed Dwelling Units	K-6	7-8	9-12	Total
Anaheim Union High School District	139	--	0.283		39
Magnolia School District	139	0.297	--	--	41
Savannah School District	139	0.297		--	41
Total students generated by the proposed Project					121
Source: Stanton 2008a.					

As stated in Checklist Response 4.14(a), the proposed Project would result in a population increase of approximately 481 residents in the City over a 30 year build out. This population increase over time would generate new students to the schools that serve the Project area. Table 4-30, below, identifies the available capacity of the schools that would serve the students generated by the proposed Project.

TABLE 4-30
ENROLLMENT AND CAPACITY OF SCHOOLS SERVING THE PROJECT
AREA

School Name/Address	Enrollment Capacity	Current Enrollment	Available Capacity	Current Permanent/ Portable Classrooms	Distance to the Project Area Boundary (miles)

Magnolia High School 2450 West Ball Road, Anaheim Grades 9-12	2852	1630	1222	59 permanent 12 portable	1.0
<i>Source: AUHSD 2021, MSD 2021, SSD 2021.</i>					

The location of future residential development within the Specific Plan area would determine which school(s) would receive new students as the Specific Plan builds out. It is unknown which schools would be immediately affected; however, as shown in Table 4-30 above, all schools that serve Project area currently have capacity to serve the Project in the near term.

Future project development would be required to pay school development fees to the City and the relevant school district(s) for the improvement of school facilities that would be needed to serve the Project's demand for school services and facilities (RR PS-5). As provided under Section 17620 of the *California Education Code* and Section 65970 of the *California Government Code*, the payment of statutory school development fees would fully mitigate a Project's impacts on schools. Thus, impacts would be less than significant, and no mitigation is required.

d) Parks?

Less Than Significant Impact. The proposed Project is a Specific Plan development that would result in 139 new multi-family units in the City. The future projects' applicants would comply with Stanton Municipal Code 19.42.090 and be required to pay the park in lieu fees to provide funds for improvement of City parks (see RR PS-5). Therefore, the proposed Project would not result in a substantial increased demand for recreational facilities, requiring the construction of new parks that would adversely affect the environment. Therefore, impacts would be less than significant, and no mitigation is required. In addition, future project applicants would be required to pay in-lieu fees for improvements to existing City parks (RR PS-5). Given the phased increase in population and payment of park fees (RR PS-5), the potential impact would be less than significant, and no mitigation is required. Please refer to Section 4.16, Recreation, below for additional discussion.

e) Other public facilities or governmental services?

Less Than Significant Impact. Increased demands for library services are primarily driven by increases in permanent population, which is associated with development of residential land uses only. Therefore, the following analysis addresses the potential impacts associated with library facilities based a maximum of 139 new residential units for the proposed Project.

The Orange Public Libraries (OCPL) provides library services to the City. Residents of Stanton can use any of the 32 branches, within the OCPL system, including those within neighboring cities of Anaheim, Cypress, and Garden Grove. However, future residents of the proposed Project are anticipated to be primarily served by the Stanton Library Branch located at 7850 Katella Avenue, approximately 0.1 mile west of the proposed Project area boundary. Additional library services are available through OCPL's Mobile Library, which visits the City's Central Park every third Thursday for two hours (OCPL 2021). It should be noted that library services have changed in recent years with an expansion into incorporating electronic materials (e-materials). OCPL's online services continue to expand e-materials in the form of e-books, audiobooks, magazines, movies, and other resources for the public uses (OCPL 2021). Use of e-materials facilitates the trend for accessing information online and reduces the size of "brick and mortar" facilities needed to serve the population.

However, it should be noted that the proposed Project would not, in and of itself, trigger the need for construction of new or expanded library facilities. In compliance with the Stanton Municipal Code Section 19.18.030 Development Impact Fee Program, the future proposed development would contribute its fair share through payment of library development impact fees (see RR PS-6), which would ensure that adequate library services are provided. Therefore, with compliance with RR PS-6, the proposed Project would not result in impacts associated with the need for new or physically altered facilities. Thus, impacts would be less than significant, and no mitigation is required.

Regulatory Requirements

Fire Protection

- RR PS-1** Prior to the issuance of the first building permit for a future project, the Project Applicant shall comply with all applicable Orange County Fire Authority (OCFA) codes, ordinances, and standard conditions including, but not limited to fire prevention and suppression measures, water improvement plans, fire hydrants, automatic fire extinguishing systems, fire access, access gates, combustible construction, water availability, and fire sprinkler systems. Compliance with this regulatory requirement shall be verified by the Chief Building Official.
- RR PS-2** Prior to the issuance of certificate of occupancy or final building permit approval for a future project, the Project Applicant shall pay the required development impact fees for fire suppression facilities, as required by Stanton Municipal Code Section 19.18.030.

Police Protection

- RR PS-3** Prior to the issuance of certificate of occupancy or final building permit approval for a future project, the Project Applicant shall pay required development impact fees for police facilities as required by Stanton Municipal Code Chapter 19.18.030.

Schools

- RR PS-4** The Project Applicant shall pay all applicable development impact fees in effect at the time of building permit issuance for a future project, to the City of Stanton and the relevant school district(s) to cover additional school services required by the new development. The applicable development impact fees would be consistent with Senate Bill (SB) 50.

Parks

- RR PS-5** The Project Applicant/Developer shall comply with the Stanton Municipal Code 19.42.090 requirement of payment of in-lieu fees for park and recreation purposes to the satisfaction of the Community Services Department, prior to the issuance of certificates of occupancy or final building permit approval for a future project.

Libraries

- RR PS-6** Prior to the issuance of certificate of occupancy or final building permit approval for a future project, the Project Applicant/Developer shall pay required library development impact fees as required by Stanton Municipal Code 19.18.03.

Mitigation Measures

Project implementation would not result in significant impacts related to Public Services; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no new significant impacts beyond the impacts analyzed in the GP EIR.

4.16 RECREATION

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that implementation of the General Plan Update could result in significant and unavoidable impacts to the adequate availability of parkland and recreational facilities within the City of Stanton. Cumulative impacts related to parkland were also considered significant and unavoidable.

Supplemental Analysis

a) Would the project increase the use of existing neighborhood, community and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Less Than Significant Impact. According to the City's Community Services Department, the City currently has ten community development resources of which seven are public parks; two are public recreational facilities; and one is the City's Veterans Memorial facility. The parks and public recreation facilities total 32.4 acres. Table 4-31 City of Stanton Community Development Resources, provided below, lists the parks and public recreational facilities with amenities located within one mile of the boundaries of the Project area. The Specific Plan area currently does not include any dedicated public open space.

**TABLE 4-31
CITY OF STANTON PARKS AND FACILITIES**

Name	Location	Distance from Site Boundary (mile)	Size (acres)	Amenities
Stanton Civic Center	7800 Katella Avenue	0.02	0.72	Community services department front counter, staff offices, banquet hall, and various other recreational facilities
Veterans Memorial Park	10970 Cedar Street	0.10	0.28	Central Memorial Monument, Wall of Inspiration, and various park benches
Stanton Park	1111 Cedar Street	0.10	5.50	Playground structure, picnic shelters and tables, open green space, exercise equipment
Zuniga Park	10902 Date Street	0.20	0.61	Playground structure, full court basketball court, hand ball court
Martha Wesihaupt Linear Park	10961 Date Street	0.25	0.19	Passive green space
Stanton Central Park	10660 Western Avenue	0.25	12.0	Water play area 12-5pm daily, playground, tennis courts, skate park, reservable picnic shelters, sports fields (baseball, soccer), exercise loop trail, two half-basketball court
Harry M. Dotson Park	10350 Fern Avenue	0.30	1.30	Two playground structures covered picnic shelter and tables, ½ court basketball area, open green space, walking/exercise path, water play area, restrooms
Hollenback Park	North side of Cerritos, between Magnolia and Dale	0.40	10.75	Two playground structures exercise training course, open green space, walking path,
Stanton Community Service Center (also known as Stanton Family Resource Center)	11822 Santa Paula Street	0.65	0.30	Playground structure, provides recreation, educational, social, and human service programs
Premier Park	8340 Briarwood Street	0.85	0.75	Playground structure, ½ court basketball area
Stanton Civic Center	7800 Katella Avenue	0.02	0.72	Community services department front counter, staff offices, banquet hall, and various other recreational facilities
Veterans Memorial Park	10970 Cedar Street	0.10	0.28	Central Memorial Monument, Wall of Inspiration, and various park benches

Source: Google Earth 2021; Stanton 2021b				

The Stanton Parks and Recreation Master Plan, adopted in November 2005, states the City has an established citywide parkland level of service goal of 0.94 or more acres of parkland per 1,000 residents, which is lower than the Subdivision Map Act and Quimby Act (Section 66477 of the Government Code) criteria of three acres per 1,000 people (Stanton 2008a). This would require a total of approximately 39.58 acres of local parkland to serve the current population of 39,573 residents (DOF 2021). However, as discussed previously, the City currently has 32.4 acres of parks and public recreation facilities, and therefore, the City has a parkland deficiency of approximately 7.18 acres.

The proposed Project would generate new population in the City, as indicated in Checklist Response 4.14a., which would increase demand for parks and recreational facilities. Given

the City's population generation factor of 3.46 persons per unit (DOF 2021), the Project would generate approximately 481 residents. Using the City's current parkland requirement of 0.94 acres of parkland for every 1,000 residents, the Project would be required to provide 0.45 acre of parkland. However, the Subdivision Map Act and Quimby Act require a parkland requirement of 3.0 acres of parkland for every 1,000 residents. Using the Quimby requirement, the Project would be required to provide 1.4 acres of parkland. However, it is noted that for new residential development, parkland dedication requirements would comply with Chapter 19.42 of the Stanton Municipal Code.

While not contributing directly towards a parkland requirement, the Specific Plan development standards include provisions for 200 square feet private open space per unit. This open space may be either private, common, or include both. Common open space would also be provided with shared access for all building tenants. These common open spaces may include courtyards, gardens, plazas, dog runs, pool decks, rooftop amenity areas, and playground areas. Additionally, while the Specific Plan area currently does not include dedicated public open space, the vision for the open space framework is to locate open space throughout the Specific Plan area. More specifically, the Specific Plan area would include a pocket park of minimum 10,000-square-feet for APN 126-562-08. Additionally, a plaza (occupying an entire lot) will be provided within the Retail-Oriented Mixed-Use (minimum of 7,500 square feet). Alternative development requirements for individual lot developments will be identified. Exhibit 3-1, Planning Areas and Plan Elements, depicts three potential open space locations within the Specific Plan area that are anticipated to function as the primary public open spaces within the Project area.

Regardless of the amount of open space provided, future projects' applicants would be responsible for paying park in lieu fees (RR PS-5 in Section 4.15, Public Services) for future project-specific parkland requirements. Therefore, compliance with RR PS-5 would ensure substantial physical deterioration of park facilities would not be accelerated. Impacts would be less than significant, and no mitigation is required.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

Less Than Significant. The proposed Project is a Specific Plan development that currently is devoid of dedicated public open space. The Specific Plan proposes an open space concept that includes three public accessible parks/open spaces, as discussed in Section 3.0, Project Description. These three parks/open spaces (i.e., Beach Boulevard Plaza, the Eastern Neighborhood Park, and the Southern Pocket Park) are conceptual in nature and their locations may change but would be in the same general location. The Beach Boulevard Plaza with a minimum of 7,500 square feet and occupying the entire lot, will be located within the Retail-Oriented Mixed-Use. The vision is for retail uses to activate the open space by increasing pedestrian activity. While the Plaza is for more general passive recreation, the Eastern Neighborhood Park will include outdoor amenities and opportunities for active recreation and exercise, playground/tot lot, and small sport courts. The Southern Pocket Park, of minimum 10,000 square feet is required for APN 126-562-08, would also provide areas for exercise and/or passive activities and playground/tot lot. The applicants for future

projects would pay the park in lieu fees to provide funds for improvement of City parks on future projects (RR PS-5). In addition to payment of the necessary park in lieu fees, future development projects would be designed to accommodate park facilities if warranted to the satisfaction of the City's Planning Division. Therefore, the proposed Project would not result in a substantial increased demand for recreational facilities, requiring the construction of new parks that would adversely affect the environment. Therefore, impacts would be less than significant, and no mitigation is required.

Regulatory Requirements

RR PS-5 in Section 4.15, Public Services applies.

Mitigation Measures

Project implementation would not result in significant impacts related to Recreation; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no new significant impacts beyond the impacts analyzed in the GP EIR.

4.17 TRANSPORTATION

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that implementation of the General Plan Update could cause a substantial increase in traffic volumes in relation to the capacity of the street system; could exceed standards established by the Orange County Congestion Management Program; could result in inadequate design features or incompatible uses; could result in inadequate emergency access; could result in inadequate parking; and could result in demand for transit service enhancing policies supporting alternative transportation. Cumulative impacts related to inducing traffic growth resulting in significant traffic and circulation was considered less than significant.

Introduction

A Traffic Impact Study (TIS) was prepared by Psomas for the Town Center Specific Plan Project, in July 2020. The findings of the TIS are incorporated in the following analyses, and the TIS is included as Appendix F in this Subsequent IS/MND.

Existing Conditions

Study Area

The Town Center Specific Plan includes a 156.9-acre area in the northern portion of the City of Stanton. The Specific Plan area is surrounded by Cerritos Avenue to the north, Dale Avenue to the east, Katella Avenue to the south, and Rose Street to the west. The study intersections listed below were selected in coordination with the City engineer.

1. Cerritos Avenue and Beach Boulevard
2. Main Street and Beach Boulevard
3. Pacific Street and Beach Boulevard
4. Central Avenue and Beach Boulevard

5. Katella Avenue and Beach Boulevard
6. Cerritos Avenue and Rose Street
7. Cerritos Avenue and Court Avenue
8. Cerritos Avenue and Fern Avenue
9. Cerritos Avenue and Ashdale Street
10. Cerritos Avenue and Dale Avenue
11. Standustrial Street and Dale Avenue
12. Katella Avenue and Court Avenue

Exhibit 4-3 shows the study intersections and Exhibit 4-4 shows the existing lane geometry at each study intersection.

Roadway Network

There are several existing roadways in the Project study area, as discussed, below:

Rose Street is a discontinuous two-lane undivided roadway oriented in the north-south direction. The roadway terminates northerly at **Cerritos Avenue** and southerly at **Katella Avenue** and is halved by the Union Pacific Railroad. On-street parking is permitted.

Beach Boulevard is an eight-lane divided roadway, which serves as a State Route (SR-39). The roadway is classified as an 8-lane Smart Street in the *2022 Master Plan of Arterial Highways* by Orange County, California and has a posted speed limit of 45 mph. On street parking is prohibited in the study area.

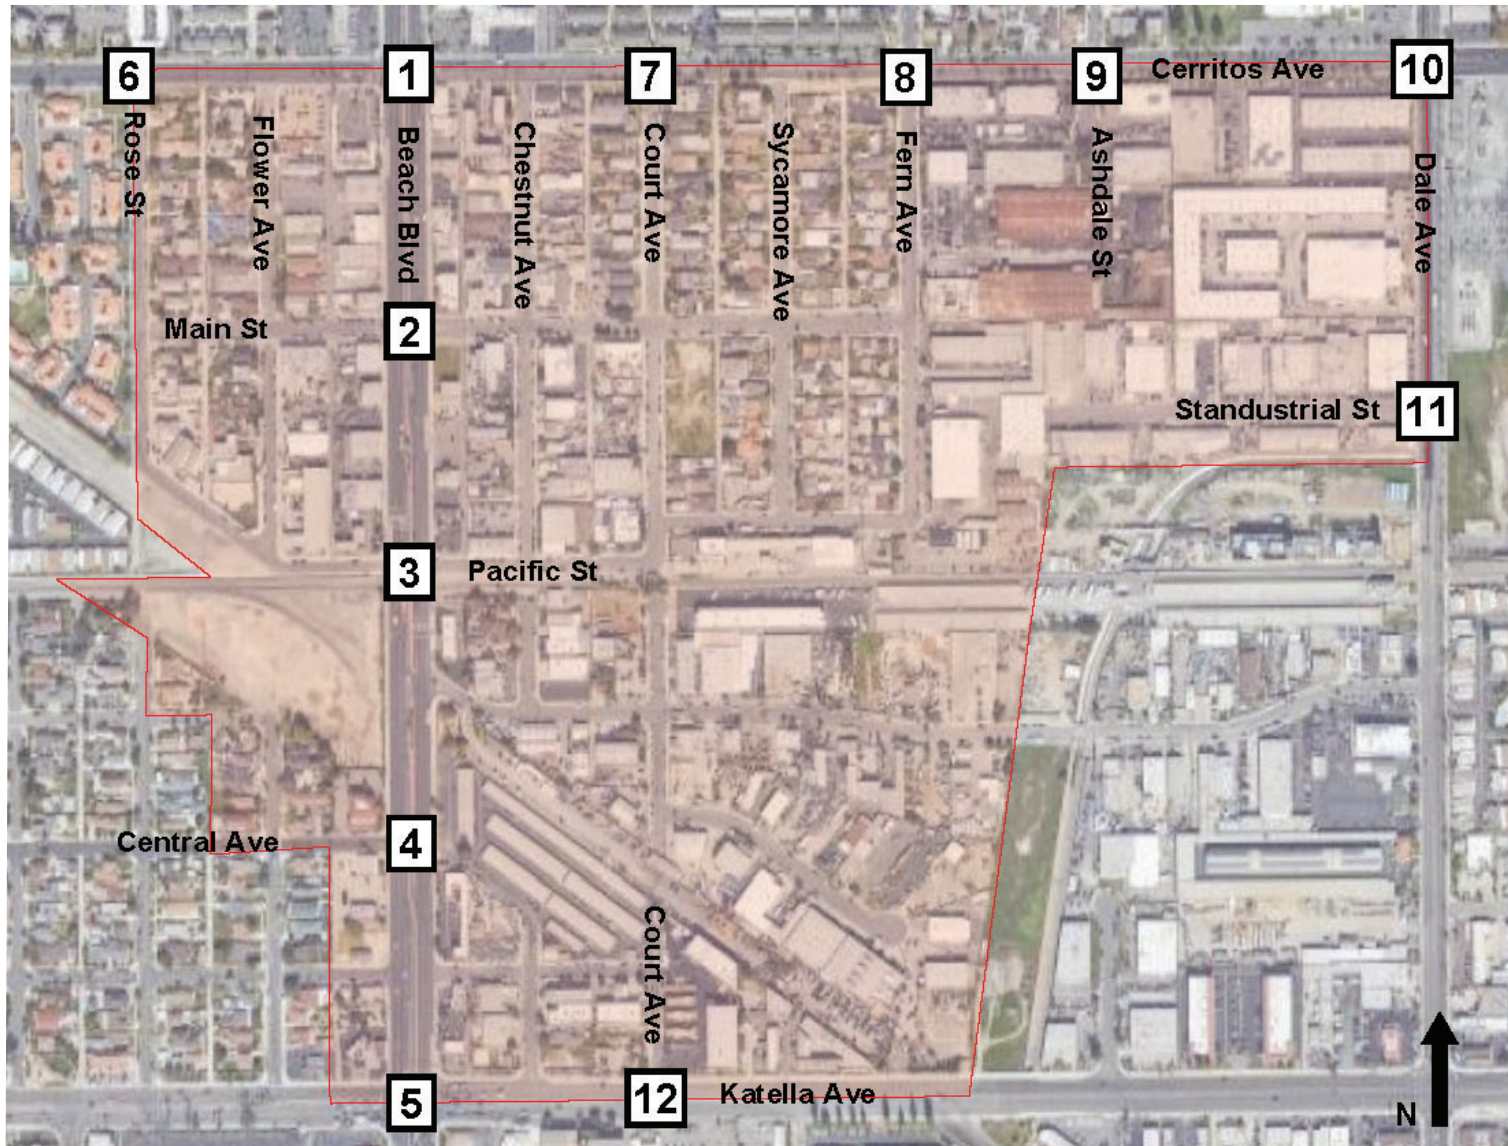

Court Avenue is a two lane, undivided roadway. Court Avenue terminates northerly at Cerritos Avenue and southerly at Katella Avenue and is discontinuous at the Union Pacific Railroad and Union Pacific Corridors. On-street parking is permitted.

Fern Avenue is a two lane, undivided roadway with a posted speed limit of 25 mph in the Specific Plan area. On-street parking is permitted.

Ashdale Street is a two lane, undivided roadway in a residential area which ends in a cul-de-sac approximately 500 feet north of Cerritos Avenue and 150 feet south of Cerritos Avenue. On-street parking is permitted.

Dale Avenue is a four-lane roadway with a two-way left turn lane in the study area. The roadway in the study area is classified as a secondary arterial by Orange County. The posted speed limit is 40 mph and on-street parking is prohibited between Cerritos Avenue and Katella Avenue.

Cerritos Road is a four lane, undivided roadway west of Beach Boulevard and becomes a four-lane divided roadway with segments of raised medians east of Beach Boulevard. The roadway in the study area is classified as a secondary arterial by Orange County. The posted speed limit is generally 40 mph in the study area. On-street parking is prohibited.

Lane Geometry

Town Center Specific Plan Project

Exhibit 4-4

Main Street is a two lane, undivided roadway oriented in the east-west direction. Main Street terminates on the west at Rose Street and on the east at Fern Avenue. On-street parking is permitted.

Pacific Street is also a two lane, undivided roadway. The roadway terminates on the west at Rose Street and on the east at Fern Avenue, trending in an east-west direction generally along the Pacific Union Pacific Railroad. On-street parking is permitted.

Central Avenue is a two lane, undivided roadway trending in an east-west direction. The roadway becomes Grand Avenue east of Beach Boulevard. On-street parking is permitted.

Standustrial Street is a two lane, undivided roadway in an industrial area. The roadway is approximately 950 feet long west of Dale Avenue and serves a number of businesses along both sides of its frontage. Although on-street parking is not specifically permitted, portions of the roadway are sometimes used for parking.

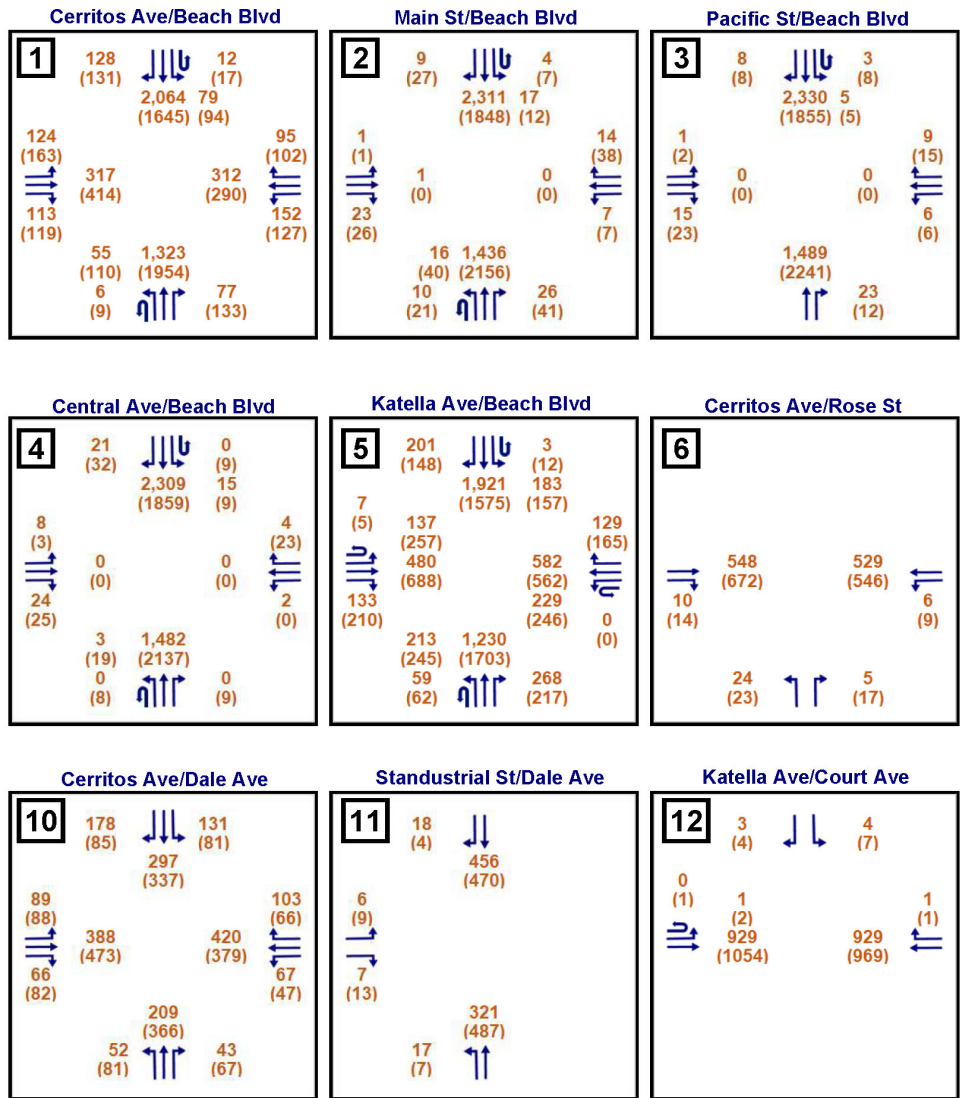

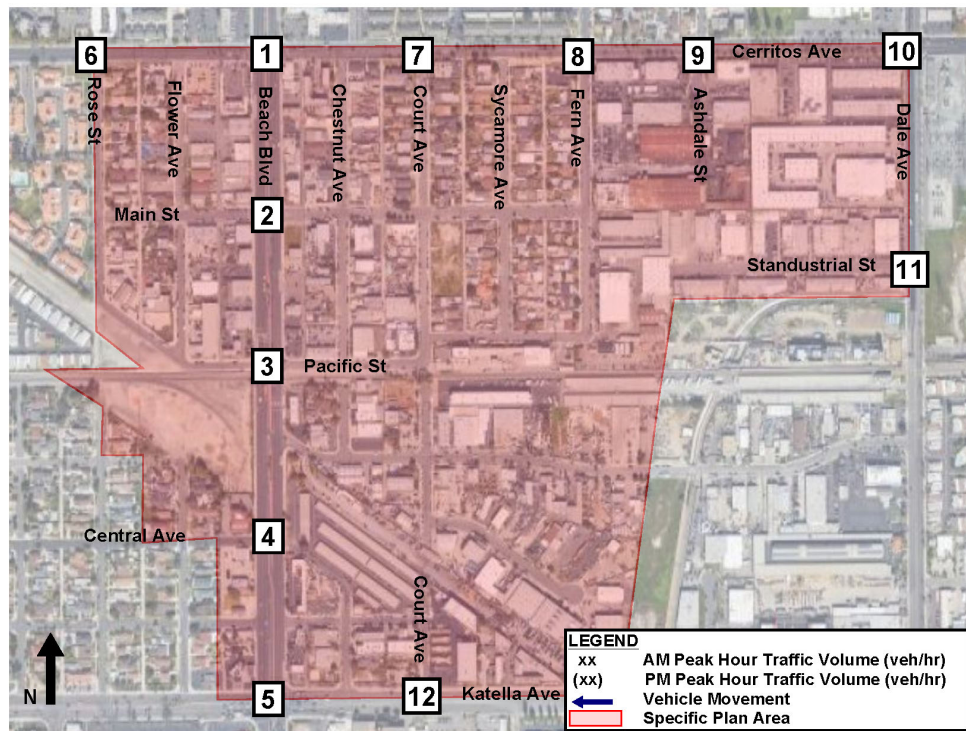

Katella Road is a six lane, divided roadway with a posted speed limit of 40 mph west of Beach Boulevard in the study area. East of Beach Boulevard through Dale Avenue, the roadway becomes a six-lane roadway with a two-way left turn lane with a posted speed limit of 45 mph. The roadway is classified as a 6-lane Smart Street by Orange County. On-street parking is prohibited.

Traffic Volumes

Traffic volume data was collected at the 12 study intersections in February 2022 from 7:00 AM to 9:00 AM and from 4:00 PM to 6:00 PM. The overall peak hours for the study area were found to be from 7:30 AM to 8:30 AM and from 4:45 PM to 5:45 PM. Exhibit 4-5 shows the existing traffic volumes. All collected traffic volume data is included in Appendix A of the TIA (Appendix F of the Subsequent IS/MND).

Analysis Methodology

Because the Subsequent IS/MND is tiering off the General Plan EIR, the discussion contained in this section includes an analysis of Level of Service (LOS) for the Specific Plan area intersections to determine if the additional units exacerbate the previously disclosed LOS impacts. LOS is the typical measure used to characterize the quality of traffic operations at an intersection or roadway segment. LOS A represents relatively free operating conditions, whereas LOS F has unstable flow and congestion with volumes at or near the capacity of the facility. Excessive delays and queues can occur when the LOS is not acceptable. Table 4-32 provides descriptions and thresholds for LOS A through LOS F for each intersection evaluation methodology used in this report.

Existing Peak Hour Traffic Volumes

Town Center Specific Plan Project

Exhibit 4-5

PSOMAS

**TABLE 4-32
INTERSECTION LEVEL OF SERVICE DEFINITIONS**

Level of Service (LOS)	Description	Intersection Volume to Capacity (V/C) Ratio / ICU Value	Signalized Intersection Delay (sec/veh)	Unsignalized Intersection Delay (sec/veh)
A	Primarily free-flow operation	0.000 - 0.600	≤10	≤10
B	Reasonably unimpeded operation	>0.600 - 0.700	>10 and ≤20	>10 and ≤15
C	Stable operation	>0.700 - 0.800	>20 and ≤35	>15 and ≤25
D	Less than stable conditions - small increases in flow may cause substantial increases in delay	>0.700 - 0.800	>35 and ≤55	>25 and ≤35
E	Unstable operation and significant delay	>0.900 - 1.000	>55 and ≤80	>35 and ≤50
F	Congested conditions, including flow at extremely low speed	> 1.000	>80	>50

The traffic generated by the Project or by the Project in combination with other projects in the area could worsen the LOS of a facility. To assess the potential traffic impacts due to the background traffic growth and completion of existing and future projects, the following scenarios were evaluated:

- Existing Conditions
- Existing Plus Project Conditions
- 2050 Cumulative Developments Conditions
- 2050 Cumulative Developments Plus Project Conditions

The City of Stanton does not have published guidelines for analyzing the impacts to intersections. Therefore, this TIS follows the 2021 Orange County Transportation Authority (OCTA) Congestion Management Program Report (CMP), which applies the Intersection Capacity Utilization (ICU) methodology at signalized intersections and the Highway Capacity Manual (HCM) methodology at unsignalized intersections. The methodologies and significance thresholds are discussed further in the following sections.

Intersection Capacity Utilization (ICU)

The ICU methodology is used to determine the operating LOS of signalized intersections. This methodology requires the calculation of the intersection volume/capacity (V/C) ratio, which is the summation of critical lane group flow ratios with a yellow clearance adjustment. The LOS estimated by the ICU methodology is directly related to the intersection V/C ratio. A lost time factor of 0.05 should be included in the calculations.

To determine whether the addition of Project-generated trips at a signalized study intersection results in a significant impact, the City of Stanton has established the following threshold of significance consistent with the CMP: A significant impact occurs when a proposed project increases traffic demand at a signalized study intersection operating at a deficient LOS (LOS F) by one percent or more of capacity ($V/C \geq 0.01$), worsening LOS F ($V/C > 1.00$).

Highway Capacity Manual (HCM)

This study applies the HCM methodology to evaluate unsignalized intersections, which defines LOS based on delay. The analyses for the unsignalized intersections were conducted using the software Synchro and SimTraffic. The City of Stanton has not established thresholds of significant impacts for unsignalized intersections.

Vehicle Miles Traveled

The proposed Project is also subject to VMT evaluation to comply with Senate Bill 743. The County of Orange methodology is used, starting with the County's screening tool to determine if the Project can be screened out and assumed to have a less than significant impact.

Supplemental Analysis

a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadways, bicycle and pedestrian facilities?

Construction Traffic

Less Than Significant Impact. Even though detailed information about future projects may not be known at this time, it is reasonable to assume that construction related trips associated with trucks and employees traveling to and from the site in the morning and afternoon would result in some minor traffic delays. Potential traffic interference caused by construction vehicles may create a short-term impact. However, it should be noted that the potential construction related impacts would be temporary and would not result in long-term increase in VMT.

To minimize the potential disruptions on the local circulation system and to facilitate the movement of construction traffic, it is assumed that the City would require implementation of a construction management plan, which is provided as regulatory requirement RR TRAN-1. With compliance with City requirements, the future projects would not conflict with applicable plans, ordinance, or policy, and construction impact would be less than significant, and no mitigation is required.

Projected Traffic Area Volumes

Existing Project Trip Generation

The existing project trip generation for the proposed Project was estimated using the *ITE Trip Generation Manual, 11th Edition*. Trip generation rates of the retail and industrial land uses were using the average of multiple retail and industrial land uses, respectively, which represent the mix of existing uses in the Project area, as shown in Table 2. Based on the assumptions, the 156.9-acre Specific Plan area generates approximately 9,113 daily trips in the existing year due to the Project, including 692 trips in the AM peak hour and 1,031 trips in the PM peak hour.

Project Traffic Distribution

Based on the location of the Stanton Town Center Specific Plan area and distribution of regional access to the area, it is estimated that approximately 5 percent of traffic would access the site to/from the west and 15 percent of traffic to/from the east via Cerritos Avenue; 5 percent to/from the west and 15 percent to/from the east via Katella Avenue; and 30 percent to/from the north and 30 percent to/from the south via Beach Boulevard. Exhibit 4-6 shows the assumed external trip distribution for the Stanton Town Center Specific Plan area.

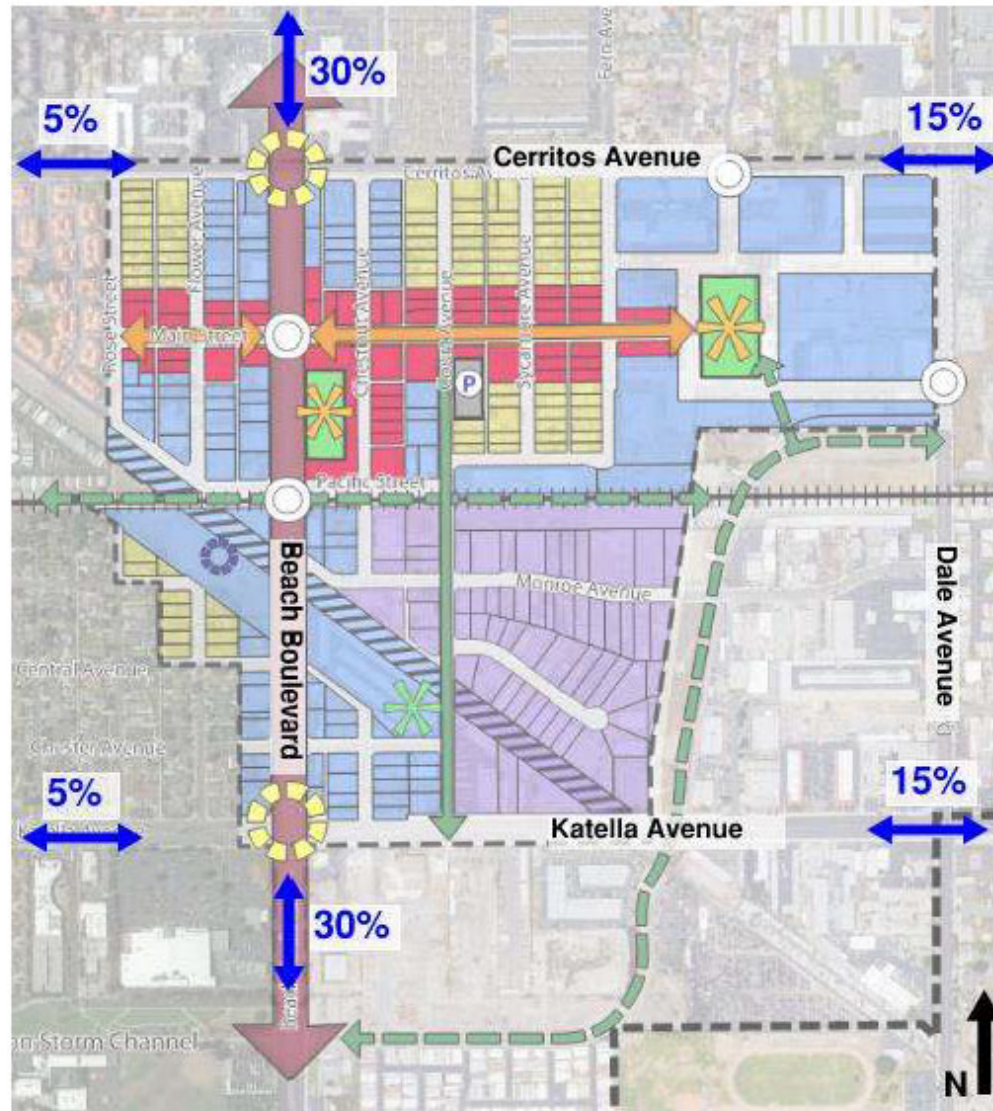

Proposed Project Trip Generation

The proposed project trip generation for the Project was also based on the ITE Trip Generation Manual, 11th Edition. A similar variety of retail and industrial uses were used to estimate the trip generation for the Project area, but the breakdown was updated to better represent anticipated future conditions. Table 4-34 shows that the proposed Project is expected to generate 23,705 daily trips in the buildout year, including 1,845 trips in the AM peak hour and 2,278 trips in the PM peak hour.

While the Specific Plan area would increase in residential multifamily units, retail/commercial, and light industrial uses through new development and redevelopment, it should be noted that, this Subsequent IS/MND analyzes the potential impacts of the additional 139 multi-family dwelling units only. The existing General Plan for the City of Stanton allows for a total of 1,399 multi-family units within the Town Center Specific Plan area. Since 2008, 4 units have been built, resulting in a remaining capacity of 1,395 multi-family units. The Town Center Specific Plan would allow for an additional 139 units, increasing the remaining capacity to 1,534 multi-family units.

Project Traffic Volumes

Using the project trip generation and trip distribution, the estimated existing and future Project traffic volumes at each of the study intersections were calculated and are shown on Exhibit 4-7 and Exhibit 4-8, respectively.

Existing Year (2022)

Existing Plus Project Traffic Volumes

The Existing Plus Project traffic volumes were estimated by first removing the estimated existing Project traffic volumes from the existing peak hour traffic volumes then adding the total proposed Project traffic volumes, as shown on Exhibit 4-9. The Existing Plus Project analysis is included in this report because the Project is long-term and does not include a set opening year.

Buildout Year (2050)

Background Growth

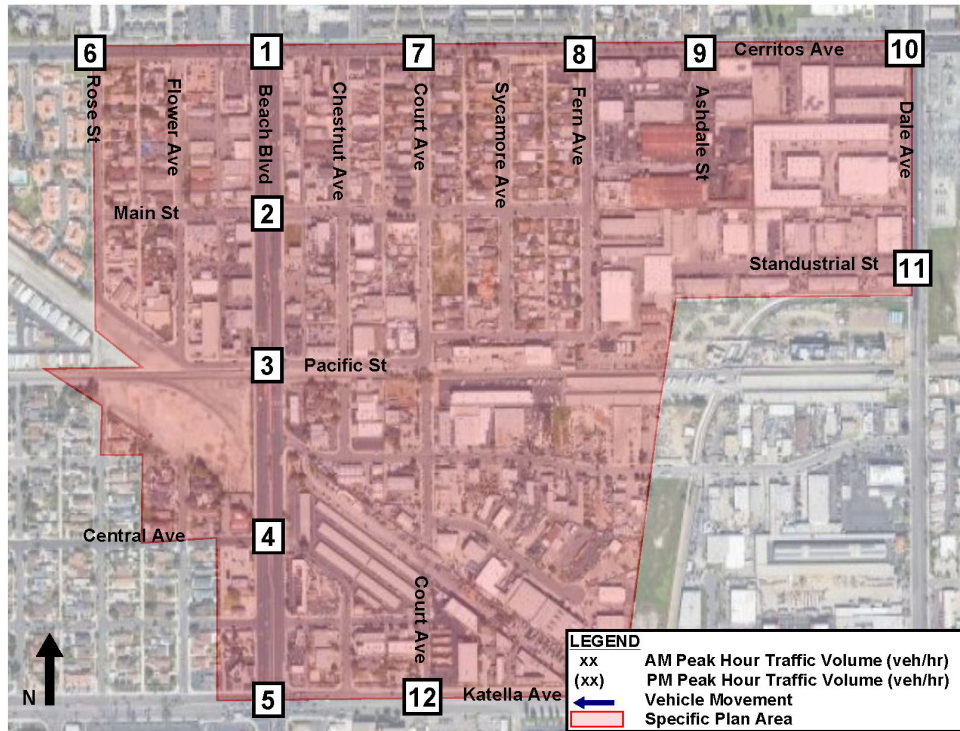

The Traffic and Circulation section of the 2008 General Plan Update Environmental Impact Report indicates that there would be little to no growth in the Project area. Therefore, to be conservative, a 0.5 percent per year growth was assumed to calculate background growth for all the study intersections.

Buildout Year Traffic Volumes

The buildout year traffic volumes are the anticipated traffic volumes in 2050 without the Project, which include the existing Project area traffic volumes. The 0.5 percent annual growth rate was applied to the existing traffic volumes to estimate buildout year volumes without the Project. Exhibit 4-10 shows the 2050 cumulative traffic volumes.

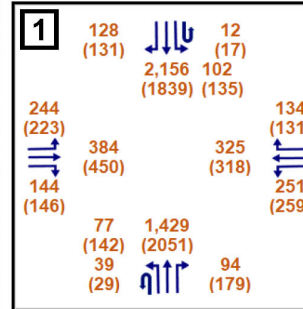

Buildout Year Plus Project Traffic Volumes

Exhibit 4-11 depicts the cumulative plus Project traffic volumes in 2050 at each of the study intersections.

Operational Analysis – Existing Year (2022)

Existing Conditions

As previously discussed, the signalized intersections were evaluated using the ICU methodology. Most of the unsignalized intersections were analyzed using the HCM methodology in Synchro, but the unsignalized intersections on Beach Boulevard were evaluated via SimTraffic, as the HCM methodology cannot be applied to intersections with more than three through lanes on the major approach. For existing conditions, the ICU spreadsheets and HCM reports are included in Appendix B of the TIA (Appendix F of the Subsequent IS/MND). Table 4-35 shows the resulting LOS for each of the study intersections under existing conditions. As seen in the table, the three signalized intersections currently operate at LOS B or better in both peak hours.

In addition, the worst minor street (stop controlled) movement would operate at LOS F in both peak hours at the intersections of Main Street and Beach Boulevard (#2), Pacific Street and Beach Boulevard (#3), and Central Street and Beach Boulevard (#4). However, in SimTraffic simulations, vehicles are not able to make two-stage left turns at unsignalized divided highway intersections. Therefore, the delays may be lower in reality if drivers make two-stage left-turns at unsignalized intersections on Beach Boulevard.

Existing Plus Project Conditions

The same approach was used to evaluate existing conditions plus the Project; the full buildout (2050) version of the Project was assumed in this analysis. It is noted that this analysis is serving as the opening year in the TIS. The ICU and HCM reports for existing conditions plus Project are included in Appendix C of the TIA (Appendix F of the Subsequent IS/MND). The resulting level of service for each of the study intersections for existing plus Project conditions is also shown in Table 4-35.

As shown in the table, the signalized intersections would continue to operate at LOS D or better with the Project. The worst minor street movement would operate at LOS F at four intersections, including the three which would operate at LOS F under existing conditions and the intersection of Cerritos Avenue and Fern Avenue, which would deteriorate from LOS C to LOS F in the PM peak hour with the Project. In addition, the intersection of Cerritos Avenue and Ashdale Street would operate at LOS E in the PM peak hour with the Project.

Existing Plus Project Impact Evaluation

Table 4-35 shows the LOS for existing and existing plus Project conditions for all study intersections as well as the increase in V/C for the signalized intersections. As indicated above, a significant impact occurs when a proposed Project increases traffic demand at a signalized study intersection operating at a deficient LOS (LOS F) by one percent or more of capacity ($V/C \geq 0.01$), worsening LOS F ($V/C > 1.00$). As shown in the Table 4-35, none of the signalized intersections would have a significant impact for the existing plus Project condition. In addition, because there are no operational thresholds for unsignalized intersections, no improvements are needed at those locations.

Operational Analysis – Buildout Year (2050)

2050 Cumulative Conditions

As previously discussed, the signalized intersections were evaluated using the ICU methodology, and the unsignalized intersections were evaluated using the HCM methodology. The ICU and HCM reports for 2050 cumulative conditions are included in Appendix D of the TIA (Appendix F of the Subsequent IS/MND), and the level of service for each of the study intersections for the 2050 cumulative conditions is shown in Table 4-36.

As seen in the table, the signalized intersections are expected to operate at LOS D or better for 2050 cumulative conditions without the Project in both peak hours. The worst minor street (stop controlled) movement would operate at LOS F in both peak hours, at the intersections of Main Street and Beach Boulevard (#2), Pacific Street and Beach Boulevard (#3), and Central Street and Beach Boulevard (#4). In addition, the intersection of Cerritos Avenue and Fern Street is expected to operate at LOS E in the PM peak hour.

2050 Cumulative Plus Project Conditions

For 2050 cumulative plus Project conditions, the same approach was used to evaluate the study intersections, assuming full buildout of the Project. The ICU and HCM reports for 2050 cumulative plus Project conditions are included in Appendix E of the TIA (Appendix F of the Subsequent IS/MND). Table 4-36 shows the resulting level of service for each of the study intersections for 2050 cumulative plus Project conditions.

The signalized intersections are expected to operate at LOS E or better in both peak hours with the Project. In addition, the three minor street movements expected to operate at LOS F without the Project would continue to operate at LOS F. The Cerritos Avenue/Fern Avenue minor street movement would deteriorate to LOS E in the AM peak hour and LOS F in the PM peak hour, and the Cerritos Avenue/Ashdale Street intersection would deteriorate to LOS E in the PM peak hour.

2050 Cumulative Plus Project Significant Impact Evaluation

The increase in ICU due to the Project traffic is shown in Table 4-36. A significant impact occurs when a proposed project increases traffic demand at a signalized study intersection operating at a deficient LOS (LOS F) by one percent or more of capacity ($V/C \geq 0.01$), worsening LOS F ($V/C > 1.00$). As the signalized intersections are expected to operate at LOS E or better with the Project, the Project is not anticipated to have an impact on operations. In addition, as there are no operational thresholds for unsignalized intersections, no improvements are needed at those locations.

Circulation System

The Town Center Specific Plan is planned as a mixed-use neighborhood that blends existing uses with new development, maximizes access to existing transit opportunities, and includes a pedestrian and bicycle transportation network. The Specific Plan also incorporates conceptual future transit opportunities into its design, while ensuring that the success of the multi-modal network does not depend on the completion or final details of potential future transit opportunities.

The Town Center Specific Plan incorporates a “complete streets” approach that prioritizes creation of a true multi-modal transportation system and that creates new connections throughout the Specific Plan area.

Pedestrian

Circulation enhancements are envisioned throughout the Specific Plan area to facilitate multi-modal connectivity increase pedestrian safety. Design features planned as part of intersection enhancement include but are not limited to: pavement enhancements such as textured and/or colored concrete or pavers; pedestrian bult-out crossings to increase pedestrian visibility; and new crossings for pedestrians and bicyclists.

Additionally, as part of future enhancements, a potential future trail is proposed along the existing east-west rail corridor traversing the Specific Plan area. This potential future trail is to connect to another potential trail along the Stanton Storm Channel, which would also provide connectivity to the northeastern portion of the Project site.

Court Avenue is also envisioned to include additional pedestrian enhancements, including a future connection across the east-west rail corridor. The pedestrian-focused enhancements along Court Avenue run from Katella Avenue north to Main Street, increasing connectivity between the southern and northern portions of the Plan Area.

Thus, the Project would not result in a conflict with, nor would it impact the existing public sidewalks or pedestrian travel.

Transit

The Specific Plan area is served by OCTA Routes 29 and 50, as depicted on Exhibit 2-1, Opportunities and Challenges. A potential future transit station is identified on the OCTA property located along Beach Boulevard. This transit center could connect users of a potential future light-rail along the former Pacific Electric rail corridor to the multi-modal network within the Specific Plan Area.

With the vision of facilitating multi-model connectivity, the proposed Project would not result in a conflict with, nor would it impact the existing transit circulation in the area.

Bicycle

The Town Center Specific Plan promotes bicycling as a means of mobility. As indicated above, as part of intersection improvements, new crossings are planned for pedestrian and bicyclists. The Specific Plan recognizes the needs of bicycle users and aims to create a safe bicycle network. Thus, in light of the proposed enhancements and design guidelines promoting multi-modal circulation, the Project would not result in a conflict with, nor would it impact the existing bicycle circulation and bike lanes in the area.

b) Conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?

Less Than Significant Impact

Senate Bill (SB) 743 Compliance

On December 28, 2018, the California Natural Resources Agency adopted revised CEQA Guidelines. Among the changes to the guidelines was the removal of vehicle delay and LOS from consideration for transportation impacts under CEQA. With the adopted guidelines, transportation impacts are to be evaluated based on a project's effect on vehicle miles traveled (VMT). Lead agencies are allowed to continue using their current impact criteria, or to opt into the revised transportation guidelines. However, the new guidelines were to be used starting July 1, 2020, as required in CEQA section 15064.3.

Using the County of Orange screening tool, the entire Project area is shown to be located in a transit priority area (TPA). A TPA is defined as "an area within one-half mile of a major transit stop that is existing or planned, if the planned stop is scheduled to be completed within the planning horizon included in a Transportation Improvement Program." A major transit stop is defined as "a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service of 15 minutes or less during the morning and afternoon peak commute periods." A TPA corridor is one with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.

If a project is in a TPA, it is assumed to have a less than significant transportation impact unless the project is inconsistent with the RTP for the area; has a floor area ratio (FAR) of less than 0.75; provides an excessive amount of parking; or reduces the number of affordable units.

The City indicated that although the bus lines on Katella Avenue and Beach Boulevard are considered high quality transit corridors, but the current bus schedules do not meet the thresholds. However, because this is a long-term project, future plans for transit should be considered when determining whether a project is located in a TPA. Therefore, the County of Orange screening tool was determined to be appropriate for evaluation, and the preliminary screening indicates that the Project would be exempt from a VMT analysis.

At this stage of development, the FAR and parking are not determined. However, it is estimated that the FAR would be approximately 0.75 for the Project area, which meets the requirement for VMT exemption in a TPA. Therefore, it is assumed at this time that the Project would result in a less than significant impact on transportation. Future individual development projects within the study area would not necessarily be exempt if they conduct separate VMT screening, but that can be determined at the time of implementation.

c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses?

Less Than Significant Impact. The Town Center Specific Plan is within an urban setting and can be accessed from multiple roadways in the area. There is already a circulation infrastructure in place, and the Specific Plan proposes further enhancement and improvements. Currently there are no hazardous situations or incompatibility of uses in place that would further get exacerbated by the proposed Project. Therefore, based on the above analyses, the proposed Project would not substantially increase hazards due to a geometric design feature such as sharp curves or dangerous intersections. Additionally, the proposed Project would not result in incompatibility of land uses, as discussed in Section 4.11, Land Use and Planning. Therefore, impacts would be less than significant, and no mitigation is required.

d) Result in inadequate emergency access?

Less Than Significant Impact. The Town Center Specific Plan is within an urban setting and can be accessed from multiple roadways in the area. A hierarchy of roadways facilitate circulation and reaching destination within the Project area. The Town Center Specific Plan proposes a number of circulation enhancement and improvements that would further access and connectivity. In addition to improvements specifically proposed for Beach Boulevard and Main Street, improvements are also proposed to four intersections, including Cerritos Avenue and a future street; and Dale Street and a future street.

With the existing infrastructure in place and the improvements/enhancements proposed, no potential impacts pertaining to inadequate emergency access are anticipated. The improvements would occur in compliance with City standards and would not impede access during an emergency. Additionally, during demolition and construction activities of future projects, provisions would be in place, including but not limited to, staging construction equipment on the site; avoiding blocking the roadways surrounding the Project site; and maintain fire/emergency access to the site in compliance with California Fire Code Chapter 33, Fire Safety as well as City of Stanton Fire Code (Chapter 17.08). Therefore, potential impacts pertaining to inadequate emergency access would be less than significant, and no mitigation is required.

Regulatory Requirements

RR TRAN-1 To ensure impacts to the surrounding street system are kept at a minimum, a Construction Management Plan shall be developed for a future project, in coordination with the City of Stanton, prior to commencement of construction.

The Construction Management Plan shall meet standards established in the current California Manual on Uniform Traffic Control Device (MUTCD) as well as City of Stanton requirements.

Mitigation Measures

Project implementation would not result in significant impacts related to Transportation; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no new significant impacts beyond the impacts analyzed in the GP EIR.

4.18 TRIBAL CULTURAL RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
1. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k), or	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The 2008 GP EIR did not include a Tribal Cultural Resources section.

Introduction

This section evaluates the Specific Plan Project's potential to have adverse effects on Tribal Cultural Resources. The analysis in this section is based on the results of the archaeological record searches conducted by the SCCIC and requests for consultation with California Native American Tribes, conducted by the City of Stanton for the Project, as required by CEQA per Assembly Bill 52 (AB 52) and Senate Bill 18 (SB 18).

Additionally, an inquiry was made to the Native American Heritage Commission (NAHC) by Psomas to request a review of the Sacred Lands File (SLF) database regarding the possibility of Native American cultural resources and/or sacred places in the Project vicinity that are not documented on other databases. The NAHC completed its SLF search on April 6, 2021. The results of the SLF check conducted through the NAHC was negative for Native American cultural resources and/or sacred places in the Project vicinity.

The City of Stanton initiated consultation on August 23, 2021, by notifying the City's consultation list of the Town Center Specific Plan Project as required by AB 52 and SB 18. The City received two responses from interested tribal representatives:

- **September 9, 2021, Shasta C. Gaughen, Tribal Historic Preservation Officer, Pala Band of Mission Indians:** A response was sent on behalf of Robert Smith, Tribal Chairman, which determined that the Project area is not within the boundaries of the recognized Pala Indian Reservation. The Project is also beyond the boundaries of the territory that the Tribe considers its Traditional Use Area (TUA). Therefore, the Tribe has declined AB 52 consultation at this time but does not waive their right to request consultation under other applicable laws in the future. At this time, the Tribe defers to the wishes of Tribes in closer proximity to the Project area.
- **September 27, 2021, Jamie LaBrake, Director of Sycuan Cultural Department, Sycuan Band of Kumeyaay Nation:** A response was sent on behalf of Cody Martinez, Tribal Chairman, which determined that the Project is not within the boundaries of the recognized Sycuan Indian Reservation. However, it is within the boundaries of the territory that the Tribe considers its TUA. The Orange County area is home to the other Native American Tribes, including but not limited to the Tongva, Juaneno, Gabrieleno and Luiseno. The Kumeyaay also have ancestral ties to this area as well as a historical, cultural, and religious interest. The Tribe urges the City to contact the respective Tribes of this area.

AB 52 allows 30 days and SB 18 allows 90 days to request consultation. As of November 3, 2021, no tribes have requested consultation for either AB 52 or SB 18. Therefore, after a good faith effort on the part of the City, consultation between California Native American tribes and the City has concluded for the Project.

- a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:*
- i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or*
 - ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.*

Less Than Significant With Mitigation Incorporated. As discussed in Section 4.5, Cultural Resources, the SCCIC record search identified 22 prior cultural resources studies within the one-mile search radius, one of which was identified within the Project area. The one study, OR-03337, included an *Archaeological and Paleontological Assessment of the Proposed Peaker*

Project Location at Bare Substation. Additionally, the SCCIC did not identify any previously recorded cultural resource within the one-mile search radius of the Project site. Furthermore, the results of the SLF check conducted through the NAHC was negative for sacred sites important to Native Americans.

However, as noted above, the Specific Plan area does not contain any known resources determined by the Lead Agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. Nevertheless, due to known prehistoric archaeological resources within the vicinity of the Project site, the City's assessment recognizes the potential for intact tribal cultural resources below the surface.

As stated previously, the City of Stanton is comprised of extensive alluvial deposits resulting from erosion of sediments from the Santa Ana River. Alluvium sediments are typically comprised of a variety of materials including fine particles of silt and clay and larger particles of sand and gravel (Stanton 2008a). Although the native sediment has been disturbed, the Project may encounter cultural or tribal cultural resources during earth moving activities. To mitigate this potential effect, the Project would implement MM TCR-1 during construction, grading, and earthwork activities. Thus, impacts to tribal cultural resources that may be eligible for listing in the California Register of Historical Resources, or in a local register of historical resources, as defined in Public Resources Code Section 5020.1(k), are considered less than significant with mitigation.

Compliance with RR CUL-1 (Section 4.5, Cultural Resources) and implementation of MM TCR-1 would ensure the Project would not have a substantial adverse change in the significance of a tribal cultural resource determined by the Lead Agency or a California Native American tribe, in its discretion and supported by substantial evidence, as defined in Public Resources Code Section 21074 and 5024.1. Thus, impacts are considered less than significant with mitigation.

Mitigation Measures

MM TCR-1 In the event that tribal cultural resources are discovered at the Town Center Specific Plan area, the handling of the discovered resources shall occur, as described below. However, it is understood that all artifacts, with the exception of human remains and related grave goods or sacred/ceremonial objects, belong to the property owner. All resources discovered shall be inventoried and analyzed by the professional Archaeologist retained for the Project. If any resources of Native American origin are discovered, all activities in the immediate vicinity of the find (within a 50-foot radius) shall stop, and the project Archaeologist shall notify the property owner and tribes identified by the NAHC as being affiliated with the area. A designated Native American observer from one of the tribes identified by the NAHC as being affiliated with the area shall be retained to help analyze the Native American resources for identification as everyday life and/or religious or sacred items, cultural affiliation, temporal placement, and function, as deemed possible. The significance of Native American resources shall be evaluated in accordance

with the provisions of the California Environmental Quality Act (CEQA) and shall consider the religious beliefs, customs, and practices of the affiliated tribes. All items found in association with Native American human remains shall be considered grave goods or sacred in origin and subject to special handling.

Native American resources that are relocated/reburied at the Specific Plan area would be subject to a fully executed relocation/reburial agreement with the assisting Native American tribes or bands. This shall include measures and provisions to protect the reburial area from any future impacts. Relocation/reburial shall not occur until all cataloging and basic recordation have been completed. Native American resources that cannot be avoided or relocated at the Project site shall be prepared in a manner for curation at an accredited curation facility in Orange County that meets federal standards per 36 CFR Part 79 and makes the resources available to other archaeologists/researchers/tribes for further study. The Archaeologist shall deliver the Native American resources, including title, to the accredited curation facility within a reasonable amount of time, along with the fees necessary for permanent curation.

Conclusion

The additional 139 units have no significant impacts.

4.19 UTILITIES AND SERVICE SYSTEMS

Would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Comply with federal, state, and local statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

2008 General Plan Update EIR

The analysis in the GP EIR indicated that implementation of the General Plan Update could result in increased demand for water supplies and infrastructure within the City; could result in increased demand for sewer services within the City; and could result in increased demand for solid waste services, electricity, and natural gas provided to the City. Cumulative impacts related to water, solid waste, electricity, and natural gas were considered less than significant, except for sewer services demand, which was considered potentially significant.

Supplemental Analysis

Water information in this section is based on the *Water and Wastewater Infrastructure Analysis*, and the West Orange Service Area 2020 Urban Water Management Plan (UWMP). Wastewater information is based on information derived from the City's December 2013 Sewer Master Plan. The section also contains information received from Golden State Water Company (GSWC) West Orange County and Orange County Sanitation District (OCSD).

- a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunication facilities, the construction of which could cause significant environmental effects?***

Water

Less Than Significant with Mitigation Incorporated. Water service to the Specific Plan area is provided by the GSWC, a private water purveyor. GSWC owns and operates the system, which serves cities within west Orange County. In order to meet demand, GSWC supplies its customers with imported water from the Metropolitan Water District of Southern California (MWD) and groundwater from the Orange County basin. The City's existing water distribution system serving the Specific Plan area is composed of different sized pipelines including 4-, 6-, 8-, 10-, 12-, and 16-inch diameter pipelines. Much of the area within the Specific Plan is served by looping 6- and 8-inch pipelines that may not be capable of providing the required fire flow, which in the previous study was assumed to be 2,500 gallons per minute (gpm) at 20 pounds per square inch (psi) residual pressure and may even be higher with products up to 5 stories.

As specific projects are proposed, coordination with the OCFA and GSWC would be required to ensure infrastructure would provide adequate capacity for conveyance of fire flow and water to serve the development. Hydraulic modeling would be required to ensure that recommended improvements are consistent with build-out of the Specific Plan using ultimate maximum day demands plus specific fire flow requirements placed throughout the Specific Plan area. Implementation of MM UTL-1 would ensure that adequate water infrastructure would be available to serve future development and potential impacts would be mitigated to a less than significant level.

Wastewater Treatment

Less Than Significant with Mitigation Incorporated. The City of Stanton Public Works' Sewer Maintenance Division maintains and operates the local public sanitary sewer collection system. The City's wastewater collection system ultimately connects into Orange County Sanitation District (OC San) sewer system. OC San is a public agency that provides wastewater collection, treatment, and reuse/disposal services for approximately 2.6 million people in central and northwest Orange County. OC San has two operating facilities that treat wastewater from residential, commercial, and industrial sources. According to OC San, the 2021 estimated average daily flow of wastewater received from Wastewater Treatment Plant No. 1 (WWTP1) located in Fountain Valley was 117 million gallons per day (mgd) and 66 mgd from Wastewater Treatment Plant 2 (WWTP2) located in Huntington Beach, for a total of 183 mgd (OC San 2021). WWTP1 has a maximum permitted capacity of 208 mgd and treats an average flow of 117 mgd leaving a remaining available capacity of 91 mgd. WWTP 2 has a capacity of 168 mgd and treats an average flow of 66 mgd, which leaves an available capacity of 102 mgd. The proposed Project would result in a wastewater generation of approximately 0.598 mgd (Psomas 2021b). Given the existing capacities at WWTP 1 and WWTP 2, both facilities would be able to serve the future projects within the Specific Plan area.

The City's Sewer Master Plan's (Master Plan) key findings and recommendations are generally applicable to the proposed Project. The Master Plan used the 2008 General Plan, which included the Town Center Mixed Use District and the buildout envisioned in the Specific Plan area and analyzed in the 2008 General Plan and associated EIR. However, the Project area and maximum densities allowed for the current Specific Plan buildout have increased, as defined in Section 3.0 Project Description. Therefore, identified capital improvements to address capacity deficiencies for the elimination of wastewater in the Master Plan could become more pronounced and additional pipeline segments with deficiencies not previously identified could arise within the Project area. The *Water and Wastewater Infrastructure Analysis* provides details as to locations within the Specific Plan that have been identified where required improvements may need to be upsized to handle the increased flows and other segments could become capacity constrained as well, requiring additional capital improvements. The intensity wastewater flow projections generating a total of 0.598 mgd for average dry weather flow should be utilized in the Project area, using appropriate peaking relationships (Psomas 2021b). As specific projects within the Specific Plan are proposed, the downstream sewer system should be analyzed, using the City's sewer model, to determine impacts of not only the specific project proposed but if improvements are required, they should be analyzed to ensure improvements are sized consistent with build-out flows.

Future projects would be required to pay applicable sewerage connection fees and ensure that sufficient capacity or planned expansions of wastewater infrastructure would accommodate anticipated wastewater generation. Therefore, new development would not be permitted to exceed the capacity of wastewater conveyance systems or treatment facilities, since adequate capacity must be demonstrated in order to contribute flows to the system. Implementation of MM UTL-2 through MM UTL-4 would ensure that adequate wastewater infrastructure and treatment capacity would be available to serve future projects and impacts would be mitigated to less than significant level.

Natural Gas

Less Than Significant Impact. The Southern California Gas Company (SoCalGas) currently provides natural gas service to the City of Stanton, including the Specific Plan area (SoCalGas 2021). The service would be provided in accordance with SoCalGas' policies and extension rules on file with the CPUC. Therefore, a significant impact related to the need for new systems or supplies or substantial alterations related to natural gas would not occur. Additionally, the applicants/developers would coordinate with SoCalGas on future projects in the Specific Plan area to ensure avoidance of any notable service disruptions during the extension of, relocation of, upgrade of, or connection to services. Impacts are considered less than significant, and no mitigation is required.

Telecommunications

Less Than Significant Impact. Spectrum, AT&T, and Frontier Communications provide telecommunications service to City with Spectrum and AT&T currently providing service to the Specific Plan area (Stanton 2021a). The service would be provided in accordance with the provider's policies and extension rules on file with the CPUC. Therefore, a significant impact related to the need for new systems or supplies or substantial alterations related to telecommunications would not occur. Additionally, the applicants/developers would coordinate with the Spectrum and/or AT&T, as applicable, on future projects in the Specific Plan area to ensure avoidance of any notable service disruptions during the extension of, relocation of, upgrade of, or connection to services. Impacts are considered less than significant, and mitigation is not required.

The Project would not require the construction or expansion of water or wastewater infrastructure and treatment facilities, storm water drainage, electric power, natural gas, or telecommunications facilities. Impacts would be less than significant, and no mitigation is required.

b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Less Than Significant Impact. GSWC West Orange County is located in the northwestern part of Orange County and provides domestic water service to the City, including the Specific Plan area. GSWC West Orange's three primary water supplies are from groundwater sources derived from (1) the Central Plain of Orange County Groundwater Basin (Basin or Orange County Groundwater Basin) managed by the Orange County Water District (OCWD); (2) imported supplies from MWD through the Municipal Water District of Orange County (MWDOC); and (3) recycled water from the City of Cerritos. GSWD has an extensive water infrastructure system that includes active wells, pipelines, pumps, reservoirs, and pump stations. Additionally, the *West Orange Service Area 2020 Urban Water Management Plan* (UWMP) adopted on July 15, 2021, reports GSWD has four emergency connections with Artesia, Garden Grove, Buena Park, and Seal Beach in order to assist with outages that may be due to factors beyond hydrology or regulatory constraints. Reliable water supplies are available to meet GSWC's customer demands in normal, single dry years, and five consecutive dry year conditions through 2045 (GSWC West Orange 2021).

The UWMP used the 2008 General Plan, which included the Town Center Mixed-Use district and the buildout envisioned for the Specific Plan area and analyzed in the 2008 General Plan and associated EIR. The proposed Project is estimated to create a water demand of approximately 703,339 gallons per day (gpd) or 788 acre-feet per year (afy). According to the UWMP, the GSWD service area water demand is projected to be 15,759 afy by 2045. Assuming full build-out of the Specific Plan area would not occur for approximately 25 years, this demand would account for an increase of approximately 5.0 percent of the projected 2045 demand. The projected increase in demand from the proposed Project at this maximum intensity level would account for approximately 50 percent increase of the projected estimated demand in the UWMP over the 25-year span.

The 2020 UWMP reported projected supply would equal demand through 2045 but did indicate GSWD has the ability to increase the water supply from the Orange County Groundwater Basin by 15 percent from its current pumping levels estimated at 70 percent of their supply to up to 85 percent. The projected increase from OCWD would provide added reliability to GSWD's water supply. Therefore, only an estimated 15 percent of water supplies would be needed from other sources, primarily MWD through MWD OC. Additional operational flexibility and reliability is provided by the ability of GSWC to share its water supply with other GSWC Service Areas in the region.

The proposed Project would comply with Sections 4.303 and 4.304 of the CALGreen Code, which require indoor and outdoor water conservation measures such as low flush toilets, aerators on sinks and showerheads, other water-efficient appliances, and water-efficient automatic irrigation system controllers. Compliance with these regulations and programs is provided as RR UTL-1. With compliance with RR UTL-1 and all requirements in place, the potential impact pertaining to water supply for future projects during normal, dry, and multiple dry years would be less than significant, and no mitigation is required.

c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Less Than Significant Impact. As discussed above in Checklist Response 4.19(b), wastewater flows from the Project site would go to OC San Wastewater Treatment Plant 1 (WWTP1) located in Fountain Valley, which has a capacity of 208 mgd, and in 2021 received estimated flows of 117 mgd. The sewer capacity calculated a total of 0.598 mgd for the proposed Project. Therefore, in light of the sewer capacity verified in the *Water and Wastewater Infrastructure Analysis* and existing available capacity at WWTP1, OC San would be able to accommodate all wastewater discharges to satisfy OC San's estimated demands for wastewater treatment service. Impacts related to wastewater treatment capacity would be less than significant, and no mitigation is required.

d) Generate solid waste in excess of State and local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Less Than Significant Impact. With implementation of proposed Project, there would be solid waste generated during construction in addition to an overall increase in daily solid waste generation.

Orange County Waste & Recycling is the government agency that owns and operates the local Orange County landfills. OC Waste & Recycling operates three landfills in Orange County, which are listed below in Table 4-37, along with the actual average daily rate of disposal, the maximum daily permitted capacity, the remaining capacity, and the estimated closure date of each landfill.

**TABLE 4-37
ORANGE COUNTY WASTE & RECYCLING LANDFILLS**

Landfill	Address/City	Disposal Rate (tons per day)		Remaining Capacity (million cubic yards)	Estimated Closure Date
		Maximum Permitted	Annual Average Disposal		
Frank R. Bowerman	11002 Bee Canyon Access Road, Irvine	11,500	7,896	164.68	2053

<i>Source: Halligan 2021, OC Waste and Recycling 2020</i>					

Solid Waste Generated During Construction

With implementation of the proposed Project, there would be solid waste generated during construction and an increase in daily solid waste generation during operation. Construction- and demolition activities associated with new development would generate solid waste. Based on the U.S. Environmental Protection Agency's (USEPA's) new construction and demolition waste generation rate of 4.38 lbs/sf for residential uses (USEPA 1998), construction of the proposed 139 residential units would generate 608.8 lbs/sf of solid waste over the construction period. Projects requiring any building, construction, or demolition permits would be required to comply with the California Integrated Waste Management Act (AB 939), SB 1016, and the CALGreen Code. Diversion through reuse, recycling, and/or composting of construction and demolition materials at County-approved facilities or by a Franchised Waste Hauler can achieve compliance.

To meet these demands, the Stanton Municipal Code Section 6.04.100 requires applicants/developers to submit a Construction and Demolition Materials Management Plan (C&DMMP) for City approval (Stanton 2021a). The C&DMMP requires the construction/demolition projects comply with the California Green Building Standards Code (CALGreen), which states all construction projects shall divert at least 65 percent of the nonhazardous construction and demolition wastes generated during project construction for recycle and/or salvage for reuse (RR UTL-2). In compliance with the City's Municipal Code, construction and demolition waste would be made available for deconstruction, salvage, and recovery, whereby a diversion rate of 65 percent of the total estimated debris must be recycled using a County-approved facility or franchise waste hauler. The Frank R. Bowerman Landfill is permitted for a maximum of 11,500 tons per day (tpd) and has an annual disposal rate of 7,896 tpd. The landfill has enough projected capacity to serve residences and businesses until approximately 2053. Therefore, the landfill could accommodate the short-term disposal of construction and demolition wastes from the proposed Project. Impacts would be temporary and less than significant, and no mitigation is required.

Electricity

Less Than Significant Impact. Southern California Edison (SCE) currently provides electricity to the City of Stanton, including the Specific Plan area (SCE 2021). Electrical service to the Project area would be provided in accordance with SCE's policies and extension rules on file with the California Public Utilities Commission (CPUC). Therefore, no significant impacts related to the need for new systems or supplies or substantial alterations related to electricity would occur. Additionally, the applicants/developers for future projects would coordinate with SCE to ensure avoidance of any notable service disruptions during the extension, relocation, upgrade, or connection to services for future projects in the Specific Plan area. Impacts are considered less than significant, and no mitigation is required.

Solid Waste Generated During Operation

According to the General Plan EIR, buildout of the General Plan would generate a total of approximately 31,200 tons/year or 2,600 tons per month. The General Plan EIR concluded that CR&R anticipated no impacts to solid waste services would result from buildout of the General Plan.

This Subsequent IS/MND analyzes the potential impacts of the additional 139 multi-family dwelling units only. The existing General Plan for the City of Stanton allows for a total of 1,399 multi-family units within the Town Center Specific Plan area. Since 2008, 4 units have been built, resulting in a remaining capacity of 1,395 multi-family units. The Town Center Specific Plan would allow for an additional 139 units, increasing the remaining capacity to 1,534 multi-family units. The estimated long-term solid waste generation associated with the said growth is presented in Table 4-38 below.

**TABLE 4-38
ESTIMATED SOLID WASTE GENERATION**

Land Use	Size	Waste Generation Factor¹	Proposed Project Waste Generation (lbs/day)
Residential	139 units	12.23 lbs/household/day	1,700
lbs: pounds; sf: square feet; CalRecycle: California Department of Resources Recycling and Recovery			
¹ Based on estimated waste generation factors from CalRecycle 2022.			

As shown in Table 4-38 above, the proposed Project at the maximum buildout is estimated to generate approximately 1,700 pounds of solid waste per day prior to required waste diversion requirements as discussed below under Threshold 4.19(e). Maximum buildout is estimated to occur over 30 years. Based on correspondence with OCWR, the Orange County solid waste landfill system would have the ability to serve the proposed Project with solid waste landfill capacity (OCWR 2022). The County of Orange maintains 15-years of countywide solid waste landfill capacity, as required by AB 939. Therefore, the proposed Project would be served by a landfill with available capacity to accept the anticipated solid waste volume, and impacts would be less than significant. In addition, compliance with the

City's requirements for waste diversion, as discussed below under Threshold 4.19(e), would reduce the amount of solid waste diverted to the receiving landfill. No mitigation is required.

e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

No Impact. State, County, and local agencies with regulatory authority related to solid waste for the Project include CalRecycle, OC Waste & Recycling (County of Orange), and the City of Stanton. Regulations specifically applicable to the proposed Project include the California Integrated Waste Management Act of 1989 (AB 939), Section 4.408 of the CALGreen Code, and Senate Bill (SB) 1383.

AB 939, which requires every County and City in the State to prepare a Source Reduction and Recycling Element to its Solid Waste Management Plan, identifies how each jurisdiction will meet the State's mandatory waste diversion goal of 50 percent by and after the year 2000. According to CalRecycle, the City of Stanton has disposal rate targets of 6.7 pounds/person/day. In 2019, the City had disposal rates of 6.6 pounds/person/day (CalRecycle 2021). Consistent with State requirements, the City of Stanton is consistently diverting more than 50 percent of its waste stream.

The California Solid Waste Re-use and Recycling Access Act of 1991 (California Public Resources Code, Sections 42900–42911) directs the California Integrated Waste Management Board to draft a “model ordinance” for the disposal of construction waste associated with development projects. Section 4.408 of the current 2019 CALGreen Code requires preparation of a construction waste management plan that outlines ways in which the contractor would recycle and/or salvage for reuse a minimum of 65 percent of the non-hazardous construction and demolition debris (DGS 2021). During the construction phase, the proposed Project would comply with the current CALGreen Code through the recycling and reuse of at least 65 percent of the non-hazardous construction and demolition debris from the Project site (RR UTL-2). On October 6, 2011, Governor Brown signed AB 341, establishing a State policy goal that no less than 75 percent of solid waste generated to be source reduced, recycled, or composted by 2020. The bill also mandates local jurisdictions to implement commercial recycling by July 1, 2012, for businesses and public entities generating four cubic yards or more of trash and multi-family residential dwellings with five or more units. Solid waste storage and collection for the future Projects would comply with Section 20.305.090 Solid Waste/Recyclable Materials Storage and Section 6.04.05 Collection of the Municipal Code. The proposed residences would have regular waste collection services; be provided with recycling bins for residential solid waste, recyclables, and organics recycling to promote residential recycling; and be encouraged to participate in the City's solid waste diversion programs. Additionally, SB 1383 sets methane reduction targets for California. The bill seeks to reduce emissions of short-lived climate pollutants (SLCP) by reducing organic waste disposal to 50 percent by 2020 and 75 percent by 2025. Recognizing that organic waste in landfills emits 20 percent of the State's methane, which is 84 times more potent than carbon dioxide, this bill simply requires placing organic waste into an organics recycling cart instead of a trash cart. This act helps divert organic waste from the landfills and reduce the emissions. Per this bill, many California residents and businesses have already begun recycling organic waste beginning January 1, 2022.

As discussed in Section 4.9, Hazards and Hazardous Materials, of this Subsequent IS/MND, hazardous wastes generated during demolition and construction activities would be disposed of in accordance with existing regulations. Similarly, hazardous material use during construction and occupancy of the future projects, including maintenance activities, would be conducted in compliance with applicable regulations. No conflict with statutes and regulations related to solid waste is anticipated, thus no impacts would occur, and no mitigation is required.

Regulatory Requirements

- RR UTL-1** The future projects shall be designed and constructed with water-efficient fixtures and systems, as required by the CALGreen Code.
- RR UTL-2** The future projects contractors shall recycle, reuse, and/or salvage at least 65 percent of demolition and construction debris, in accordance with Section 4.408 of the CALGreen Code.

Mitigation Measures

- MM UTL-1** Prior to issuance of a building permit for any future development project, the Project Applicant shall prepare a hydraulic analysis to ensure that proposed improvements are consistent with build-out of the Specific Plan using ultimate maximum day demands plus specific fire flow requirements placed throughout the Project area. The hydraulic analysis shall be submitted to the City Public Works Department for review and approval.
- MM UTL-2** Prior to issuance of a wastewater permit for any future development project, the Project Applicant shall pay applicable connection and/or user fees to City of Stanton Public Works Department.
- MM UTL-3** Prior to issuance of a building permit for any future development project, the Project Applicant shall prepare a sewer study to determine the adequacy of the sewer systems for review and approval by the City Public Works Department.
- MM UTL-4** Prior to issuance of a building permit for any future development project, the Project Applicant shall provide evidence that the Orange County Sanitation District has sufficient wastewater transmission and treatment plant capacity to accept sewage flows from buildings for which building permits are being requested.

Conclusion

The significant impacts pertaining to water and wastewater treatment are less than significant with mitigation.

The additional 139 units have no new significant impacts related to dry utilities beyond the impacts analyzed in the GP EIR.

4.20 WILDFIRE

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

2008 General Plan Update EIR

The 2008 GP EIR did not include a Wildfire section.

Supplemental Analysis

a) Substantially impair an adopted emergency response plan or emergency evacuation plan?

No Impact. The proposed Project is not within a designated Very High Fire Hazard Severity Zones (VHFHSZ) as defined by the California Department of Forestry and Fire Prevention (CalFire 2022). As stated in Checklist Response 4.9(f), Hazards and Hazardous Materials, the City has an emergency plan, termed an “Emergency Operations Plan,” prepared in accordance with the State Office of Emergency Services guidelines for multi-hazard functional planning (Stanton 2012). However, the City does not have designated emergency evacuation corridors, but has identified routes to be used for an evacuation, depending on the location of the incident. These routes may include roadways within the Specific Plan boundaries such as Beach Boulevard, Katella Avenue, and Cerritos Avenue.

As indicated in Checklist Response 4.9(f), any development within the Specific Plan area would be required to coordinate with the City and OCFA regarding emergency access. Applicable OCFA regulations, evacuation plans and procedures would be required to be incorporated into building and site design. With compliance with applicable OCFA regulations, the future projects’ impacts pertaining to emergency access would be less than significant, and no mitigation is required. Additionally, because Checklist Response thresholds 4.20(a) through 4.20(d) apply only to those projects that are “located in or near

state responsibility areas or lands classified as very high fire hazard severity zones”, no impacts related to these thresholds would occur, and no mitigation is required.

b) Due to the slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

No Impact. As indicated in Checklist Response 4.9(g), Hazards and Hazardous Materials, the Project site is in a highly urbanized area of the City, and there are no large, undeveloped areas and/or steep slopes within the Specific Plan area that would exacerbate fire risks such that would expose the Project and its occupants to wildfire related hazards. Additionally, as indicated above, the site and the surrounding areas are not located in designated VHFHSZ, as identified by CALFIRE. Rather, the site is within a Non-VHFHSZ area. Therefore, the Project is not expected to exacerbate wildfire risks and create pollutants associated with wildfire or uncontrolled spread of wildfire. Additionally, because Checklist Response thresholds 4.20(a) through 4.20(d) apply only to those projects that are “located in or near state responsibility areas or lands classified as very high fire hazard severity zones”, no impacts related to these thresholds would occur, and no mitigation is required.

c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines, or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

No Impact. As previously discussed in Checklist Response 4.20(a), above, the proposed Project is not within a designated VHFHSZ as defined by CALFIRE. As discussed previously, the site is located in a highly urbanized area. All proposed structures would be constructed to meet current building and fire codes in coordination with the City and OCFA. Additionally, installation and maintenance of infrastructure, including roads, fuel breaks, emergency water sources, power lines, and other utilities would not exacerbate fire risk, as they would be conducted in compliance with City requirements and specification. Therefore, implementation of the proposed Project would not exacerbate fire risk or result in temporary or ongoing environmental impacts. Additionally, because Checklist Response thresholds 4.20(a) through 4.20(d) apply only to those projects that are “located in or near state responsibility areas or lands classified as very high fire hazard severity zones”, no impacts related to these thresholds would occur, and no mitigation is required.

d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

No Impact. As previously discussed in Checklist Response 4.20(a), the proposed Project is not within a designated VHFHSZ, as defined by CALFIRE. Further, as discussed in Checklist Response 4.7(a), Geology and Soils, the Project is in a highly urbanized area that is in a generally flat topographical area away from downslope or landslide areas. Additionally, as discussed in Checklist Response 4.10c (ii-iii), Hydrology and Water Quality, the future projects would not substantially increase the rate or amount of surface runoff in a manner,

which would result in flooding on- or offsite. Therefore, implementation of the Project would not expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes. Additionally, because Checklist Response thresholds 4.20(a) through 4.20(d) apply only to those projects that are “located in or near state responsibility areas or lands classified as very high fire hazard severity zones”, no impacts related to these thresholds would occur, and no mitigation is required.

Regulatory Requirements

No regulatory requirements have been identified.

Mitigation Measures

Project implementation would not result in significant impacts related to Wildfire; therefore, no mitigation measures are required.

Conclusion

The additional 139 units have no significant impacts.

4.21 MANDATORY FINDINGS OF SIGNIFICANCE

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Does the project have impacts that are individually limited, but cumulatively considerable? ('Cumulatively considerable' means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

2008 General Plan Update EIR

The issues identified in the above threshold questions were analyzed in various sections of the GP EIR. The summaries of the findings are included in Section 4.1 through 4.20 of this IS/MND.

Supplemental Analysis

a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Potentially Significant with Mitigation Incorporated. There are no sensitive biological resources, habitats, or species on the Project site that would be affected by the Project. As indicated in Section 8.4, Biological Resources, of this Subsequent IS/MND, given the current developed condition and the presence of trees and vegetation within the Specific Plan area, migratory birds may nest on the trees on-site. However, MM BIO-1 would avoid impacts to active bird nests during possible demolition, site clearing, and construction activities that may occur during the nesting season. Therefore, while impacts to migratory birds may occur during the construction phase, they would be mitigated to less than significant with implementation of MM BIO-1.

There are no historic resources on the Project site that would be impacted by the proposed Project. Additionally, implementation of MM CUL-1 would prevent or reduce impacts on buried archaeological resources and tribal cultural resources during necessary subsurface excavations activities for construction of the future projects. Implementation of MM GEO-2 would also mitigate potential impacts on paleontological resources if grading and/or ground disturbing activities encounter unknown paleontological resources. Implementation of MM TCR-1 would ensure the Project would not have a substantial adverse change in the significance of a tribal cultural resource, and it would reduce the potential impacts to less than significant level. With implementation of these mitigation measures, the Project's potential impacts on cultural resources and tribal cultural resources would be less than significant.

Therefore, the Project would not substantially degrade the quality of the environment; substantially reduce the habitat of a fish or wildlife species; cause a fish or wildlife population to drop below self-sustaining levels; threaten to eliminate a plant or animal community; reduce the number or restrict the range of a rare or endangered plant or animal; or eliminate important examples of the major periods of California history or prehistory. Potential impacts would be less than significant with mitigation.

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)

Less Than Significant Impact. As identified in the preceding analyses, all Project-level impacts have been determined to be less than significant with or without compliance with regulatory requirements or mitigated to a level considered less than significant with incorporation of mitigation measures. While the Project would contribute to potential environmental effects related to Biological Resources, Cultural Resources, Geology and Soils, Hazards and Hazardous Materials, Hydrology and Water Quality, Noise, Population and Housing, Tribal Cultural Resources, and Utilities and Service Systems, these impacts would not be cumulatively considerable, since mitigation measures would be implemented to avoid or reduce potential Project-specific impacts associated with these environmental issues. As discussed in Section 8.3, Air Quality, and Section 8.8, Greenhouse Gas Emissions, of this Subsequent IS/MND, the Project's Air Quality and GHG Emissions impacts would be less than significant, and the impacts would not be considered cumulatively considerable.

No new development or redevelopment is planned adjacent to the site that would occur concurrently with Project construction. Development projects would be subject to environmental review by the City, pursuant to CEQA, the State CEQA Guidelines, and the City's requirements, to determine if they would lead to cumulative environmental effects as part of the appropriate CEQA analysis for each project. Since the proposed Project would not have significant impacts after mitigation, the impacts of the Project are not expected to result in cumulatively considerable impacts when added to the impacts of other projects planned or proposed in the vicinity of the site. Cumulative impacts would be less than significant, and no mitigation is required.

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

Potentially Significant with Mitigation Incorporated. Based on the environmental analyses above, with compliance with applicable regulatory requirements and/or the implementation of mitigation measures, the Project would have less than significant impacts on humans, as it relates to the following environmental issue areas: Aesthetics, Agriculture and Forestry Resources, Air Quality, Energy, GHG Emissions, Land Use and Planning, Mineral Resources, Public Services, Recreation, Transportation, and Wildfire.

The proposed Project's impacts on the following issue areas would be significant and would require the implementation of mitigation measures: Biological Resources, Cultural Resources, Geology and Soils, Hazards and Hazardous Materials, Hydrology and Water Quality, Noise, Population and Housing, Tribal Cultural Resources, and Utilities and Service Systems. All impacts would be avoided or reduced to less than significant levels after mitigation.

Therefore, the proposed Project would not result in environmental effects that would cause substantial adverse effects on human beings, either directly or indirectly, with the implementation of mitigation measures. All impacts would be less than significant after mitigation.

Conclusion

The potentially significant impacts, as identified in this Subsequent IS/MND, are less than significant with mitigation.

1. Basic Project Information

1.1. Basic Project Information

Data Field	Value
Project Name	Town Center Specific Plan v2
Construction Start Date	1/2/2024
Operational Year	2024
Lead Agency	—
Land Use Scale	Plan/community
Analysis Level for Defaults	County
Windspeed (m/s)	1.80
Precipitation (days)	6.20
Location	33.810976189975065, -117.98933825611476
County	Orange
City	Stanton
Air District	South Coast AQMD
Air Basin	South Coast
TAZ	5822
EDFZ	7
Electric Utility	Southern California Edison
Gas Utility	Southern California Gas
App Version	2022.1.1.20

1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description
------------------	------	------	-------------	-----------------------	------------------------	--------------------------------	------------	-------------

Condo/Townhouse	139	Dwelling Unit	8.69	147,340	18,921	—	414	—
Parking Lot	521	Space	4.69	0.00	0.00	—	—	—

1.3. User-Selected Emission Reduction Measures by Emissions Sector

No measures selected

2. Emissions Summary

2.1. Construction Emissions Compared Against Thresholds

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Un/Mit.	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	CO2e

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	8.94	annual days of extreme heat
Extreme Precipitation	3.65	annual days with precipitation above 20 mm
Sea Level Rise	—	meters of inundation depth
Wildfire	0.00	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about $\frac{3}{4}$ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events.

Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters

Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	0	0	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A

Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	0	0	0	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.

The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	1	1	2
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	1	1	1	2

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.

The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	40.0
AQ-PM	70.1
AQ-DPM	87.4
Drinking Water	66.5
Lead Risk Housing	77.1
Pesticides	47.7
Toxic Releases	90.5
Traffic	80.9
Effect Indicators	—
CleanUp Sites	58.2
Groundwater	56.1
Haz Waste Facilities/Generators	95.4
Impaired Water Bodies	0.00
Solid Waste	63.7
Sensitive Population	—
Asthma	46.7
Cardio-vascular	46.9
Low Birth Weights	51.8
Socioeconomic Factor Indicators	—
Education	88.5
Housing	90.2

Linguistic	84.2
Poverty	86.9
Unemployment	68.4

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	13.38380598
Employed	55.33170794
Median HI	14.32054408
Education	—
Bachelor's or higher	19.73566021
High school enrollment	6.313358142
Preschool enrollment	39.79212113
Transportation	—
Auto Access	22.93083537
Active commuting	69.98588477
Social	—
2-parent households	43.56473759
Voting	4.362889773
Neighborhood	—
Alcohol availability	13.15282946
Park access	22.85384319
Retail density	76.50455537
Supermarket access	83.69049147
Tree canopy	14.47452842

Housing	—
Homeownership	7.737713332
Housing habitability	5.684588733
Low-inc homeowner severe housing cost burden	26.34415501
Low-inc renter severe housing cost burden	21.75028872
Uncrowded housing	2.155780829
Health Outcomes	—
Insured adults	5.068651354
Arthritis	85.3
Asthma ER Admissions	57.7
High Blood Pressure	79.0
Cancer (excluding skin)	96.0
Asthma	10.9
Coronary Heart Disease	74.7
Chronic Obstructive Pulmonary Disease	29.1
Diagnosed Diabetes	41.8
Life Expectancy at Birth	52.6
Cognitively Disabled	29.3
Physically Disabled	85.5
Heart Attack ER Admissions	70.0
Mental Health Not Good	8.9
Chronic Kidney Disease	55.3
Obesity	30.3
Pedestrian Injuries	93.5
Physical Health Not Good	17.6
Stroke	51.7
Health Risk Behaviors	—

Binge Drinking	47.1
Current Smoker	7.2
No Leisure Time for Physical Activity	10.8
Climate Change Exposures	—
Wildfire Risk	0.0
SLR Inundation Area	0.0
Children	11.1
Elderly	64.7
English Speaking	3.3
Foreign-born	95.8
Outdoor Workers	7.7
Climate Change Adaptive Capacity	—
Impervious Surface Cover	11.2
Traffic Density	76.7
Traffic Access	87.4
Other Indices	—
Hardship	97.4
Other Decision Support	—
2016 Voting	23.2

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	92.0
Healthy Places Index Score for Project Location (b)	12.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	Yes
Project Located in a Low-Income Community (Assembly Bill 1550)	Yes
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Operations: Fleet Mix	Adjusted for residential uses.
Operations: Hearths	No fireplaces or wood stoves.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/29/2021 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

EXECUTIVE SUMMARY

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 7 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 36 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 8 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 3 SWF/LF sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 47 UST sites within approximately 0.25 miles of the target property.

US CDL: A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

A review of the US CDL list, as provided by EDR, and dated 05/18/2021 has revealed that there is 1 US CDL site within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 17 SWEEPS UST sites within approximately 0.25 miles of the target property.

Records of Emergency Release Reports

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 04/04/2021 has revealed that there are 8 CHMIRS sites within approximately 0.001 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 100 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2018 has revealed that there is 1 TRIS site within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

TRIS ID: 90680LLMTL8401S

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

A review of the SSTS list, as provided by EDR, and dated 04/19/2021 has revealed that there are 2 SSTS sites within approximately 0.001 miles of the target property.

RAATS: The RCRA Administration Action Tracking System contains records based on enforcement actions issued under RCRA and pertaining to major violators. It includes administrative and civil actions brought by the United States Environmental Protection Agency. The source of this database is the U.S. EPA.

A review of the RAATS list, as provided by EDR, and dated 04/17/1995 has revealed that there is 1 RAATS site within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 05/05/2021 has revealed that there are 108 FINDS sites within approximately 0.001 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 5 DRYCLEANERS sites within approximately 0.25 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 186 HAZNET sites within approximately 0.001 miles of the target property.

HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the HWT list, as provided by EDR, and dated 07/01/2021 has revealed that there are 2 HWT sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Facility Id: 8 30I011100

WIP: Well Investigation Program case in the San Gabriel and San Fernando Valley area.

A review of the WIP list, as provided by EDR, and dated 07/03/2009 has revealed that there is 1 WIP site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PARTS UNLIMITED Facility Status: Historical	10731 CHESTNUT	0 - 1/8 (0.000 mi.)	R436	1829

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 05/19/2021 has revealed that there are 19 CIWQS sites within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 04/19/2021 has revealed that there are 67

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Resources Recycling and Recovery in California.

A review of the RGA LF list, as provided by EDR, has revealed that there is 1 RGA LF site within approximately 0.001 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID: 361602
Site Name: GARDNER TRACTOR SERVICE
Violation Date: 10-23-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 11/13/2018. OBSERVATION: Annual training documentation for all applicable employees was not available. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan within 30 days.

Violation Date: 05-24-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 01/22/2020. OBSERVATION: One 55-gallon drum of waste coolant and one 110 gallon container of waste oil located in the shop was observed without the following information on the label: accumulation start date, contents composition, physical state, and hazardous properties. CORRECTIVE ACTION: Immediately label the containers with the appropriate information listed above. A follow-up inspection will be conducted within 30 days.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: OBSERVATION: The business failed to electronically submit and certify that the business plan is complete and accurate on or before the annual due date of March 1st of every calendar year. Business was notified on 5/24/2019 of failure to annually review and electronically submit the hazardous business plan. Violation has been elevated to Class II. CORRECTIVE ACTION: Immediately electronically submit and certify that the business plan is complete and accurate within 15 days via the California Environmental Reporting System (CERS) at cers.calepa.ca.gov. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date of March 1st of every year.

Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan (HMBP) inspection. The facility has the following hazardous materials on site in quantities that meet disclosure thresholds: - Waste coolant, 55 gallons - Waste oil, 110 gallons The facility has submitted an HMBP to California Environmental Reporting System under CERS ID 10585285. The submittal was declined due to inadequacy. Worked with Nohemi on correcting all submittal elements and recreating the hazardous materials inventory and emergency response plan. The facility's HMBP was submitted this date and will be reviewed and accepted. No violations were observed during this inspection. A copy of the inspection report was sent to Nohemi Gamero at ocmobilemotorsport@gmail.com.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-12-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct hazardous materials chemical inventory and business emergency plan inspection this date, consent to enter, inspect and take photographs was given by Isrel castrejon. Facility moved in to building July 2015. Facility manufactures hair gel. The HMBEP has not been submitted. Facility is required and has been notified on this inspection report date to electronically submit Hazardous Materials Business Emergency Plans and Chemical Inventory Form within 30 days. Facility can submit forms electronically by going to www.esubmit.ocgov.com or www.cersbusiness.calepa.ca.gov and requesting a username and password. User guides and tutorials are located on the home page to help you get started. The facility has the following hazardous materials that exceed the required disclosure quantities but not limited to : -- Alcohol -- Trietanolamine -- Propylene Glycol -- Glycerin. -- Sorbitol -- Glycolic Acid -- Propane Note: Please review the [Truncated]

Eval General Type: Other/Unknown
Eval Date: 01-12-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site for a routine inspection facility has moved new facility in Sanjtor Corporation and was told that this facility dose not have andy hazardous waste. Recommend to remove from program.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-17-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: The facility has undergone a change of ownership as of June, 2015. The previous business at this facility, K&J Wire Products had submitted their Hazardous Materials Disclosure & Business Emergency Plan (HMBP) to California Environmental Reporting System (CERS). The new business, Sanitor Corporation, had submitted their HMBP to ESubmit when they moved to the location. However, it appears after data was transferred from ESubmit to CERS, Sanitor Corp's HMBP was lost. I worked with Jon Robinson, President, on creating an account on CERS. Together we edited the Facility Information. I worked with Jon on going over the hazmat inventory, site map, and emergency response/contingency plan. You will need to create a new site map that includes the following: north orientation, loading areas and internal roads if applicable, adjacent streets, storm drains and sewers, access and exit points, emergency gas/water/electric shutoffs, evacuation staging areas, hazardous material storage [Truncated]

Eval Notes: The facility has resubmitted their HMBEP to CERS. The hazmat inventory and ER plan have been submitted with required corrections and were accepted. Violation I208 is corrected. The facility has no outstanding violations.

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 10-16-2014
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Eval Notes:

Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

OSHA ESTABLISHMENT

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-09-2010
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Site has 2 discharge points: one to south edge of property draining rooftop runoff, other to street via a sump pump that drains an inlet in the center of the yard. Inlet is currently fitted with a filter but is prone to by-pass and flooding. Representatives explained that they had submitted plans to City of Stanton on 2/17/2010 to install a clarifier unit after the filter. Reviewed SWPPP: generally lacking inspection logs, training documentation, sampling results, and other 'living' elements. Reviewed sampling results from 2/9/2010; indicates they exceeded Guideline for Zinc. Reviewed annual reports in file; indicates that they regularly test pH one or more days after pulling sample. Observed open waste bin and several pieces of uncovered machinery in yard.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a compliance inspection of the facility
on March 21, 2001. Monte no longer works at the facility. SWPPP needs
to be updated to include quarterly and monthly observations and
training logs. Need to submit a change of information for their NOI.
Facility boundaries have changed as well as the owner info. Trash bin
noted w/o cover. General housekeeping needed to keep area clear of
metal shavings. Absorbent noted throughout the facility which needs to
be swept up. Water based black paint overspray on the ground. Need a
BMP to prevent contact with sw. Open bucket of yellow/orange liquid
noted. Compressor at end of property leaking oil into a bucket which
has overflowed and spilled onto the ground. The threading machine area
has absorbent everywhere to collect the oil but looks like it has been
there for a while. Oily equipment in junkyard is collecting rain water
and mixing with the residual oils.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: Sunny and warm. SWPPP is not dated; has a "review date" of 8/8/2008. Ground surface is stained to varying degrees with cutting oil. Plans for a new storm water clarifier/filter are reportedly still with the City. SWPPP mentions "hydrocarbon filter booms" to be placed around inlets during rain events; Contact reports that this is done. Found fully used granular absorbent at base of the press shed; Contact reports that this is replaced with fresh absorbent when used up. SWPPP shows building 10564 under their control; building is actually leased to others. Food waste litter found along the fence at west-side of finished goods area. Various machinery is stored outside; these are in process of being surplused out. Found caked layers of paint/dirt on ground at SE portion of site; this is reportedly cleaned daily.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-09-2010
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Site has 2 discharge points: one to south edge of property draining rooftop runoff, other to street via a sump pump that drains an inlet in the center of the yard. Inlet is currently fitted with a filter but is prone to by-pass and flooding. Representatives explained that they had submitted plans to City of Stanton on 2/17/2010 to install a clarifier unit after the filter. Reviewed SWPPP: generally lacking inspection logs, training documentation, sampling results, and other 'living' elements. Reviewed sampling results from 2/9/2010; indicates they exceeded Guideline for Zinc. Reviewed annual reports in file; indicates that they regularly test pH one or more days after pulling sample. Observed open waste bin and several pieces of uncovered machinery in yard.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a compliance inspection of the facility on March 21, 2001. Monte no longer works at the facility. SWPPP needs to be updated to include quarterly and monthly observations and training logs. Need to submit a change of information for their NOI. Facility boundaries have changed as well as the owner info. Trash bin noted w/o cover. General housekeeping needed to keep area clear of metal shavings. Absorbent noted throughout the facility which needs to be swept up. Water based black paint overspray on the ground. Need a BMP to prevent contact with sw. Open bucket of yellow/orange liquid noted. Compressor at end of property leaking oil into a bucket which has overflowed and spilled onto the ground. The threading machine area has absorbent everywhere to collect the oil but looks like it has been there for a while. Oily equipment in junkyard is collecting rain water and mixing with the residual oils.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: Sunny and warm. SWPPP is not dated; has a "review date" of 8/8/2008. Ground surface is stained to varying degrees with cutting oil. Plans for a new storm water clarifier/filter are reportedly still with the City. SWPPP mentions "hydrocarbon filter booms" to be placed around inlets during rain events; Contact reports that this is done. Found fully used granular absorbent at base of the press shed; Contact reports that this is replaced with fresh absorbent when used up. SWPPP shows building 10564 under their control; building is actually leased to others. Food waste litter found along the fence at west-side of finished goods area. Various machinery is stored outside; these are in process of being surplusd out. Found caked layers of paint/dirt on ground at SE portion of site; this is reportedly cleaned daily.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 446641
Site Name: USS CAL BUILDERS
Violation Date: 05-11-2018
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 12/12/2018.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 446641
Site Name: USS CAL BUILDERS
Violation Date: 06-24-2015
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 07/24/2015. While on site facility could not locate manifest/bill of lading for the used oil or filters. To abate this violation send a copy to this agency within 30 days.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 06-29-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Received the manifest for the pick up of 500 gallons of waste oil on 4/17/15 by Swift oil and Vacuum INC. Violation I474 has been corrected. Thank you .

Eval Notes:	This is an in office inspection report to followup on an outstanding violation. The facility was cited violation I208 on 5/11/18 for not submitting a Hazardous Materials Disclosure & Business Emergency Plan (HMBEP) to California Environmental Reporting System (CERS). As of this date there is no HMBEP submitted to CERS, violation I208 remains outstanding. Go to cers.calepa.ca.gov , click on G Business Portal Sign InG , and create an account. Once you are able to access your account after verifying by email, click "add new facility", enter your facility details, and once done click "start" to being working on your HMBEP. The HMBEP is composed of three different sections: 1) Facility Information, 2) Hazardous Materials Inventory, 3) Emergency Response and Training Plans. Complete each section and submit within 30 days. Here is some additional information to help. For Section 1) Facility Info, for your Business Activities, check yes for Hazardous Materials and yes for [Truncated]

clear an outstanding violation. The following documentation submitted to CERS on 12/12/2018 has been reviewed and ACCEPTED: - Business Activities - Business Owner/Operator Identification - Hazardous Materials Inventory - Site Map - Emergency Contingency Plan/Training Records Violation I208 cited on 5/11/2018 has been corrected. There are no remaining outstanding violations for this facility. REMINDER: Please re-submit your 2020 HMBEP between January 1st G March 1st, 2020 at <http://cers.calepa.ca.gov/>.

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-11-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On site to conduct a routine hazardous waste inspection. Consent to inspect and take any necessary photographs was given by Arleen Vargas, Office Manager. The business is a general contractor operating out of office buildings. The facility no longer generates hazardous waste. In the past, used oil and used oil filters were generated from their backup diesel generator, which is now serviced by Duthie Power Services. Duthie transports the waste with them off site. The facility is being inactivated from the hazardous waste program.

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.
