Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 10-30-2018
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22,
Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to keep records of any test results, waste analyses, or other
determinations made in accordance with section 66262.11 for at least
three years from the date that the waste was last sent to on-site or
off-site treatment, storage, or disposal.
Violation Notes: Returned to compliance on 12/18/2018. OBSERVATION: Owner has stated
that Paint Booth Filters located in the paint shop have been tested
and determined to be non-hazardous but waste analysis documentation
was unavailable. CORRECTIVE ACTION: Submit documentation to the CUPA
within 30 days demonstrating that the paint booth filters have been
properly characterized to determine if it is a hazardous waste.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 11/02/2018. OBSERVATION: Owner/Operator failed to dispose of hazardous waste within 180 days of accumulation start date. One 55 gallon metal drum of waste oil was observed to be full with an accumulation start date of 5/20/2015 and one 55 gallon drum of the same material was observed full without an accumulation start date. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide copies of the hazardous waste manifest documenting that the violation has been corrected to the CUPA within 30 days.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number: T0605978528
Local Agency: Not reported
File Location: Local Agency
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: In October 2001, four underground storage tanks were removed at the site. Soil samples collected from underneath the former tanks indicated a release of gasoline had impacted the soil. OCHCA directed Mr. Hosn, the UST operator, to initiate corrective actions. In February through March 2002, the UST area was excavated to 13 feet. Confirmation sampling indicated that the extent of the affected soil was not defined and OCHCA directed Mr. Hosn to conduct a groundwater investigation. In January 2006, three groundwater monitoring wells were installed on-site. Free product was detected in the groundwater monitoring wells. In December 2006, additional site assessment was conducted by advancing seven soil borings. No corrective actions have been implemented at the site beyond the soil excavation activities in

U003433409

2002 and the free product recovery conducted in 2007 2008. OCHCA approved work plans for additional site assessment in April and November 2007, but the work plans were never implemented. OCHCA issued a Notice of Violation to Mr. Hosn on June 23, 2008 and referred the site to the Orange County District Attorney in December 2008 for non-compliance with OCHCA directives to conduct additional subsurface investigations and implement corrective actions. According to OCHCA staff, Mr. Hosn has suspended all on-site work since the second Quarter 2008. The UST Cleanup Fund rejected Mr. Hosns Cleanup Fund claim due to lack of an operating permit for the tanks from 1996 through 2001. The site is located within the Orange County groundwater basin and there are two groundwater production wells within 2000 feet of the site. The results of the subsurface investigations indicate that that affected groundwater may have migrated off-site and impacted downgradient properties. Further site assessment and corrective actions are necessary to protect the beneficial uses of the underlying groundwater resources. The high concentrations of gasoline constituents in the shallow soil pose a potential risk to human health. Groundwater has been encountered at depths ranging from 13 feet to 16.5 feet bgs and was found to flow to the southwest. The results of the investigations indicate that releases of gasoline have occurred, which impacted the underlying soil and groundwater. Given the southwestern groundwater flow direction and detection of gasoline constituents in soil borings installed west of the subject property parking, it is considered likely that the gasoline affected groundwater has migrated off-site and impacted adjacent properties. The current investigations at the Saranick site are being funded under the State Water Resources Control Board Underground Storage Tank Emergency, Abandoned and Recalcitrant Site (EAR) Account Fund. The EAR account provides funding to the Regional Water Quality Control Boards and local regulatory agencies to cleanup abandoned or recalcitrant underground storage tank release sites. The EAR funded activities include the investigation of the off-site, downgradient extent of the groundwater affected by the discharges at the Saranick site.) In April 2012, a total of three on- and off-site groundwater monitoring wells (MW-4 through MW-6) were drilled and installed under the supervision of Tetra Tech. The borings were drilled to a maximum depth of 30 feet bgs and groundwater monitoring wells were constructed each to a depth of 30 feet. Total petroleum hydrocarbons as gasoline and BTEX detections in soil were reported in wells MW-4, MW-5, and MW-6 (Tetra Tech, 2012). On May 29, 2013, Tetra Tech supervised the drilling and installation of three off-site groundwater monitoring wells (MW-7 through MW-9) each to a maximum depth of 30 feet bgs From February 22 to February 25, 2019, Stantec supervised the installation and sampling of temporary soil vapor probes VP-1 through VP-5. During drilling, the subsurface lithology encountered included interbedded poorly graded sand with silt, and silty sand to the total shallow depth explored of 5.5 feet bgs. Based on the results of the soil vapor survey activities, low concentrations of petroleum hydrocarbons were reported in shallow soil vapor across the Site. The highest petroleum hydrocarbon concentrations were primarily present in the northern half of the Site. However, the Site has a bio-attenuation zone with oxygen values above 4% and soil vapor concentrations for benzene, ethylbenzene and naphthalene were reported below the State Water Resources Control Board Low-Threat Underground Storage Tank (UST) Case Closure Policy (LTCP) soil gas criteria. It does not

appear that there is significant off-gassing of vapors from groundwater at the locations sampled (Stantec 2019b). Chlorinated solvents, including tetrachloroethene and methylene chloride were reported in some of the samples analyzed. Although there are no regulatory closure criteria for chlorinated solvents per the LTCP, the residual presence may be an issue for SVE. Stantec will take into consideration the presence of chlorinated solvents during the proposed pilot test and future remediation system design. The soil vapor sampling data is included in this report as Tables 1 through 3. On April 9, 2019, Stantec conducted the Quarter 2, 2019 Quarterly Groundwater Monitoring Event. Nine groundwater monitoring wells (MW-1 through MW-9) were gauged and seven wells (MW-2, MW-4 through MW-9) were sampled since MW-1 was dry and MW-3 reported 0.06 feet of liquid phase hydrocarbons (LPH). Depth to groundwater ranged from 16.20 (MW-2) to 18.12 (MW-3) feet bgs. Groundwater table was observed to be relatively flat across the Site, flowing towards the south- REMEDIAL ACTION PILOT TEST WORK PLAN SITE INFORMATION August 19, 2019 2.3 southwest, at a gradient of approximately 0.006 feet per foot. Current groundwater monitoring analytical results show an overall slight decrease of concentrations in wells MW-2, MW-4, and off-site (Stantec 2019a)

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 03-13-2014
Citation: 19 CCR 4.5 2745.10(b) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2745.10(b)
Violation Description: Failure to revise, update, and submit the Risk Management Plan to the Administering Agency as follows: 1. At least once every five years from the date of its initial submission or most recent update required by section 2745.10(b)(2) through (7); 2. No later than three years after a newly regulated substance is first listed by the California Emergency Management Agency; 3. No later than the date on which on which a new regulated substance is first present in an already covered process above a threshold quantity; 4. No later than the date on which a regulated substance is first present above a threshold quantity in a new process; 5. Within six months of a change that requires a revised process hazard analysis or hazard Review. 6. Within six months of a change that requires a revised offsite consequence analysis as provided in section 2750.7; 7. Within six months of a change that alters the program level that applied to any covered process.
Violation Notes: Returned to compliance on 05/27/2015. Please add the solid (powder) potassium cyanide to the RMP.

Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 08/14/2013. The facility Failed to prevent a release of sulfuric acid from the treatment system on 8-13-13. The Leak was was not contained by the spill containment and was released to the street. The spill was cleaned up the night of 8-13-13 and the site was reinspected at 6:00 AM 8-14-13 by Mark Sutphin of OCHCA and verified cleaned up.

Violation Description:	Failure of the owners or operators treating cyanide waste solutions to implement best management practices (BMP) to reduce waste generation, and minimize or eliminate releases to work areas and the environment.
Violation Notes:	Returned to compliance on 08/27/2019. OBSERVATION: Owner/Operator failed to meet the requirements while adding spent cyanide-containing process solutions to the aqueous waste for the purpose of reducing cyanide processing hazards. Counter-current rinsing is not occurring in TCD-24, which is a split tank with two rinses; post TCD-21 (sodium cyanide/cadmium oxide). CORRECTIVE ACTION: Ensure that compliance with the requirements have been met when adding spent cyanide-containing process solutions to the aqueous waste for the purpose of reducing cyanide processing hazards. Submit documentation showing countercurrent rinsing has been implemented for TCD-24 to the CUPA within 30 days.

Violation Description: Failure to develop and implement written operating procedures that address safety systems and their functions.

Violation Notes: Returned to compliance on 03/24/2017. Two items were observed during this inspection that need to be corrected and investigated: 1. The darin plugs that are used to prevent an unauthorized release into the street are to be kept sealed. The plugs were observed loose. Please seal the plugs tight immediately and send this agency verification that this has been completed. 2. The secondary containment that separates the tank using Cyanide (TCD-19) and the tank using acids (TCD-28) appears to be cracked in several locations. If so, the secondary containment would not prevent the inadvertent mixing of acids with cyanides. This situation could be catastrophic. You must investigate and test the secondary containment to prove its integrity. You have 60 days to address this issue.

Eval Notes: On site to conduct a routine Hazardous Waste inspection, accompanied by James Hendron, Supervising Hazardous Materials Specialist. Consent to inspect and take any necessary photos was given by John Crowell, General Manager. The facility is a RCRA Large Quantity Generator of hazardous waste. Walked throughout the facility and observed hazardous waste and satellite accumulation storage areas. Hazardous waste storage containers were observed closed and properly labeled. The facility's federal EPA ID number is active. There appeared to be no signs of illegal disposal along the perimeter of the facility. The facility's environmental contact, Aksiniya Dimitrova, was not available for this inspection. A follow-up inspection will be conducted to review documentation. No hazardous waste violations were observed at this time.

Eval Notes: Mark Sutphin at site with Darwin Cheng to perform annual LQG hazardous waste inspection and PBR treatment facility inspection .Permission to enter, inspect, and take photographs granted by Steve Rowe. The facility has four (4) PBR units on-site: 1) Batch treatment (AMP-B) 2) Continuous rinse (AMP-A) 3) Drum rinsing (AMP-C) 4) Cyanide treatment (AMP-D) All the units are marked with the name of the owner, facility identification number (EPA ID Number) and an individual serial number. Inspection schedules and logs being kept. Also reviewed the batch treatment log that tracks the amount of waste treated in AMP-B. The secondary containment is being inspected on a daily basis along with the tanks. SB-14 documents have been completed and submitted (08/27/11). The Phase I Environmental checklist is dated 01/02/97. The OCSO Discharge Permit (3-1-110) is valid until 09/30/14. PE Certification was completed in February 2012. The report has been reviewed by [Truncated]

Eval Notes: On site for a Hazardous Waste reinspection. Consent to inspect and take any necessary photos was given by John Crowell, General Manager. The facility's baghouse waste is now being managed on a 90 day cycle. The satellite accumulation waste label was removed and the container is now labeled as hazardous waste. The facility has designed a satellite accumulation waste storage area within the 90 day waste storage area by outlining the area with paint. The satellite accumulation waste, used oil and used cyanide filters, were stored in this area with proper labeling. The waste paint can boxes were observed without satellite accumulation waste labels. One box is clearly labeled as "Empty Cans", which are being managed properly. The other box is properly labeled as hazardous waste for waste paint, which is being managed properly every 90 days. The facility has no outstanding violations. A copy of this inspection report was emailed to John Crowell.

Violations:

Site ID: 90922
Site Name: ALL METALS PROCESSING OF ORANGE COUNTY, LLC
Violation Date: 03-13-2014
Citation: 19 CCR 4.5 2745.10(b) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2745.10(b)
Violation Description: Failure to revise, update, and submit the Risk Management Plan to the Administering Agency as follows: 1. At least once every five years from the date of its initial submission or most recent update required by section 2745.10(b)(2) through (7); 2. No later than three years after a newly regulated substance is first listed by the California Emergency Management Agency; 3. No later than the date on which on which a new regulated substance is first present in an already covered process above a threshold quantity; 4. No later than the date on which a regulated substance is first present above a threshold quantity in a new process; 5. Within six months of a change that requires a revised process hazard analysis or hazard Review. 6. Within six months of a change that requires a revised offsite consequence analysis as provided in section 2750.7; 7. Within six months of a change that alters the program level that applied to any covered process.
Violation Notes: Returned to compliance on 05/27/2015. Please add the solid (powder) potassium cyanide to the RMP.

67450.11(d)(4)(A),67450.11(d)(4)(B)(C)

Violation Description: Failure of the owners or operators treating cyanide waste solutions to
implement best management practices (BMP) to reduce waste generation,
and minimize or eliminate releases to work areas and the environment.

Violation Notes: Returned to compliance on 08/27/2019. OBSERVATION: Owner/Operator
failed to meet the requirements while adding spent cyanide-containing
process solutions to the aqueous waste for the purpose of reducing
cyanide processing hazards. Counter-current rinsing is not occurring
in TCD-24, which is a split tank with two rinses; post TCD-21 (sodium
cyanide/cadmium oxide). CORRECTIVE ACTION: Ensure that compliance with
the requirements have been met when adding spent cyanide-containing
process solutions to the aqueous waste for the purpose of reducing
cyanide processing hazards. Submit documentation showing
countercurrent rinsing has been implemented for TCD-24 to the CUPA
within 30 days.

Citation: 19 CCR 4.5 2760.3(a)(4) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.3(a)(4)
Violation Description: Failure to develop and implement written operating procedures that address safety systems and their functions.
Violation Notes: Returned to compliance on 03/24/2017. Two items were observed during this inspection that need to be corrected and investigated: 1. The darin plugs that are used to prevent an unauthorized release into the street are to be kept sealed. The plugs were observed loose. Please seal the plugs tight immediately and send this agency verification that this has been completed. 2. The secondary containment that separates the tank using Cyanide (TCD-19) and the tank using acids (TCD-28) appears to be cracked in several locations. If so, the secondary containment would not prevent the inadvertent mixing of acids with cyanides. This situation could be catastrophic. You must investigate and test the secondary containment to prove its integrity. You have 60 days to address this issue.

Site Name: ALL METALS PROCESSING OF ORANGE COUNTY, LLC
Violation Date: 03-27-2019
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, and tank systems authorized under Permit-by-Rule, Conditional Authorization, and Conditional Exemption or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.
Violation Notes: Returned to compliance on 06/12/2019. OBSERVATION: TThe findings in the PE Assessment stated the anchors for WT-6 (batch treatment for metal wastewater) was not certified as adequate. CORRECTIVE ACTION: Facility must immediately make the repairs and have the tank certified as adequate by the PE and submit the certified assessment to this

Violation Date: 03-27-2019
Citation: 22 CCR 45 67450.3(c)(8)(A)(c)(9)(A) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)(A)(c)(9)(A)
Violation Description: Failure of an owner or operator to obtain a detailed chemical and physical analysis of a representative sample of the waste, which includes all information necessary to manage waste in accordance with the requirements, and to meet LDR requirements; Failure to analyze wastes according to the frequency specified in the plan and to retain waste analysis documentation for three years.
Violation Notes: Returned to compliance on 03/11/2020. OBSERVATION: Owner/Operator has an incomplete waste analysis plan. The waste analysis plan does not contain a detailed chemical and physical analysis of a representative sample of the batch treatment wastes before treatment of the hazardous waste. CORRECTIVE ACTION: Immediately complete or revise waste analysis plan to comply with the requirements of CCR 66265.13, and/or implement waste analysis plan and properly maintain records to document that you are implementing the waste analysis plan. Submit the updated copy to this Agency within 30 days.

Eval Notes:	On site to conduct a routine Hazardous Waste inspection, accompanied by James Hendron, Supervising Hazardous Materials Specialist. Consent to inspect and take any necessary photos was given by John Crowell, General Manager. The facility is a RCRA Large Quantity Generator of hazardous waste. Walked throughout the facility and observed hazardous waste and satellite accumulation storage areas. Hazardous waste storage containers were observed closed and properly labeled. The facility's federal EPA ID number is active. There appeared to be no signs of illegal disposal along the perimeter of the facility. The facility's environmental contact, Aksiniya Dimitrova, was not available for this inspection. A follow-up inspection will be conducted to review documentation. No hazardous waste violations were observed at this time.

Eval Notes: INSPECTOR COMMENT: On-site for a routine RCRA large quantity generator (LQG) hazardous waste inspection, accompanied by Susan Berg, Supervising Hazardous Materials Specialist, and Sarah Orndorff, Hazardous Materials Specialist. Facility is regulated as a RCRA LQG. The inspection included a walk of the production areas, hazardous waste generation areas, hazardous waste storage areas, perimeter check, and trash storage areas. Federal EPA ID Number is current and active. Observed hazardous waste generation areas and hazardous waste storage areas. Containers were closed and properly labeled, except for the following: 90 days storage area: - Two paint waste in 55-gallon drums were not labeled with the required hazardous waste information and was not stored close when not in use. This was corrected during the routine inspection. - One cubic yard plastic tote containing electornickel was missing the hazard properties on the hazardous waste label. This was [Truncated]

Eval Notes:	On site for a Hazardous Waste reinspection. Consent to inspect and take any necessary photos was given by John Crowell, General Manager. The facility's baghouse waste is now being managed on a 90 day cycle. The satellite accumulation waste label was removed and the container is now labeled as hazardous waste. The facility has designed a satellite accumulation waste storage area within the 90 day waste storage area by outlining the area with paint. The satellite accumulation waste, used oil and used cyanide filters, were stored in this area with proper labeling. The waste paint can boxes were observed without satellite accumulation waste labels. One box is clearly labeled as "Empty Cans", which are being managed properly. The other box is properly labeled as hazardous waste for waste paint, which is being managed properly every 90 days. The facility has no outstanding violations. A copy of this inspection report was emailed to John Crowell.

Violation Date: 03-13-2014
Citation: 19 CCR 4.5 2745.10(b) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2745.10(b)
Violation Description: Failure to revise, update, and submit the Risk Management Plan to the Administering Agency as follows: 1. At least once every five years from the date of its initial submission or most recent update required by section 2745.10(b)(2) through (7); 2. No later than three years after a newly regulated substance is first listed by the California Emergency Management Agency; 3. No later than the date on which on which a new regulated substance is first present in an already covered process above a threshold quantity; 4. No later than the date on which a regulated substance is first present above a threshold quantity in a new process; 5. Within six months of a change that requires a revised process hazard analysis or hazard Review. 6. Within six months of a change that requires a revised offsite consequence analysis as provided in section 2750.7; 7. Within six months of a change that alters the program level that applied to any covered process.
Violation Notes: Returned to compliance on 05/27/2015. Please add the solid (powder) potassium cyanide to the RMP.

Citation: 22 CCR 45 67450.11(d)(4)(A),67450.11(d)(4)(B)(C) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(4)(A),67450.11(d)(4)(B)(C)
Violation Description: Failure of the owners or operators treating cyanide waste solutions to implement best management practices (BMP) to reduce waste generation, and minimize or eliminate releases to work areas and the environment.
Violation Notes: Returned to compliance on 08/27/2019. OBSERVATION: Owner/Operator failed to meet the requirements while adding spent cyanide-containing process solutions to the aqueous waste for the purpose of reducing cyanide processing hazards. Counter-current rinsing is not occurring in TCD-24, which is a split tank with two rinses; post TCD-21 (sodium cyanide/cadmium oxide). CORRECTIVE ACTION: Ensure that compliance with the requirements have been met when adding spent cyanide-containing process solutions to the aqueous waste for the purpose of reducing cyanide processing hazards. Submit documentation showing countercurrent rinsing has been implemented for TCD-24 to the CUPA within 30 days.

Violation Date: 04-14-2016

Citation: 22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)

Violation Description: Failure to maintain, reproduce, and provide the following documents at the facility where the FTU is operating: 1) The waste analysis plan for the treatment operation; 2) The written inspection schedule; 3) All training documents; 4) The contingency plan; 5) A copy of the most recent treatment notification and a copy of the most recent acknowledgement received from the Department, CUPA or authorized agency; 6) A copy of any local Air District permit and other permits required for the operation of the FTU; 7) A copy of the closure plan; 8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the operation of the facility within the last three years, as the documents would be available under the California Public Records Act.

Violation Notes: Returned to compliance on 03/13/2017. Waste Analysis plan Must cover 1) Description of the facility-specific processes, wastes, activities, and waste management units 2) Identification of the waste constituents and other parameters to be evaluated for the waste streams, both before and after treatment and the rationale for the selection of these parameters 3) Identification of how the generator will obtain a representative sample of the waste both before and after treatment 4) analytical methods to be used to evaluate the waste streams 5) testing frequency for the waste both before and after treatment The Treatment Log for the Drum Rinsing (AMP-C) is was not located during inspection. Your waste analysis plan needs to be updated. To abate this violation send a copy of an updated plan and Treatment log to this agency within 60 days.

Violation Date: 03-27-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 04/09/2019. OBSERVATION: The following hazardous waste containers were missing required hazardous waste labeling information: - Two 55-gallon drums of paint related waste materials - One cubic yard box of paint related waste materials - One cubic yard plastic tote of electronic nickel solution - One 55-gallon drum of used oil CORRECTIVE ACTION: All hazardous wastes must have the following information on the container or tank when being accumulated on site: Name and address of the generator, accumulation start date, contents composition, physical state, hazardous properties. All containers were labeled during the inspection except for the cubic yard box of paint cans. Please properly label the cubic yard box and email a picture to this Agency to abate the violation.

Violation Date: 03-08-2017
Citation: 19 CCR 4.5 2760.3(a)(4) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.3(a)(4)
Violation Description: Failure to develop and implement written operating procedures that address safety systems and their functions.
Violation Notes: Returned to compliance on 03/24/2017. Two items were observed during this inspection that need to be corrected and investigated: 1. The darin plugs that are used to prevent an unauthorized release into the street are to be kept sealed. The plugs were observed loose. Please seal the plugs tight immediately and send this agency verification that this has been completed. 2. The secondary containment that separates the tank using Cyanide (TCD-19) and the tank using acids (TCD-28) appears to be cracked in several locations. If so, the secondary containment would not prevent the inadvertent mixing of acids with cyanides. This situation could be catastrophic. You must investigate and test the secondary containment to prove its integrity. You have 60 days to address this issue.

Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, and tank systems authorized under Permit-by-Rule, Conditional Authorization, and Conditional Exemption or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.
Violation Notes: Returned to compliance on 06/12/2019. OBSERVATION: TThe findings in the PE Assessment stated the anchors for WT-6 (batch treatment for metal wastewater) was not certified as adequate. CORRECTIVE ACTION: Facility must immediately make the repairs and have the tank certified as adequate by the PE and submit the certified assessment to this Agency within 30 days.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	Received the annual tiered permitting renewal documents that include the signed waste minimization statement. Reviewed documents this date. The On-site Hazardous waste Treatment Notification Facility page lists four (4) PBR units. The four units are: AMP-A: Continuous waste water treatment (pH and metals) AMP-B: Batch Treatment (pH and metals) AMP-C: Container rinsing AMP-D: Cyanide Treatment The financial assurance documents are being reviewed by this agency. On-site for routine inspection. Met with Geoff Blake and obtained consent to perform the inspection. This is a RCRA Large Quantity Generator. Reviewed the hazardous waste manifests for 2012 and 2013. There is a new waste stream at the facility. Ground water with Chrome. This is from a monitoring well that is now on-site. The last biennial report is signed 02/27/12. The Summary Progress Report was submitted on 08/28/11. The SB-14 Waste Reduction Plan was observed this [Truncated]

Eval Notes: Email; Good morning Jennifer, I would like to update you on the progress of the Waste analysis plan. I have received all the results for the points of generation we were missing and I am going to generate a spread sheet with all the results and proceed with the evaluation. IG m currently working on our OCSD permit renewal and going in depth with the process lines and the waste treatment which is going to help me with the proper evaluation of the points of generation and the treatment process in general. I hope IG II be able to complete everything by sometime mid September since IG II be taking some time off too to visit my father who has some serious health issues. Aksiniya Dimitrova Director Environmental, Lab and Safety All Metals Processing of Orange County, Inc. 8401 Standustrial Ave. Stanton, CA 90680 Phone: (714) 828-8238 ext. 145 Fax:..G ..(714) 828-4552 Cell:G G (949) 209-7630

Eval Notes: Received an email from Rey Santos indicating that OCFA Captain Robet Hays visited the facility in order to conduct a facility walk through.
From: Hays, Robert [mailto:RobertHays@ocfa.org] Sent: Monday, October 21, 2019 4:36 PM To: Santos, Rey <ReyS@embee.com> Subject: RE: All Metals Processing Of Orange County, LLC Afternoon Ray, Thank you once again for your time and patience walking and showing us around your facility. As a new captain to this area it was very informative and helpful to see what your process and facility does and how you conduct your daily operations. I will pass on this map and knowledge to my chief and surrounding fire companies who may respond to your business in the event of an emergency. Thank you again and any questions or concerns please fell free to call me. Fire Captain Robert Hays This meets the requirements stated in 2735.5 (d)(3) of Title 19. Violation I705 has been abated.

Comments: EPA's SSI Report was reviewed by Region 4 staff. The site is located
in a commercial/industrial area. Operations per- formed (since 1961)
include metal plating, anodizing, and painting. Annual waste
generated are: 830 gals TCA, 212gals paint, 1256 gals mixed solvent,
200 gals waste oil and 38.83 tons of filter cake. Staff prepared an
HRS package which shows: Sm=8.52 (Sgw=14.69, Ssw=0.16, Sa=1.23)
Sfe=16.04, & Sdc=1.39. Staff recommends referral to the local agency.

CERS ID: 205068
CERS Description: Industrial Facility Storm Water

Violations:

Site ID: 525824
Site Name: All Metals Processing of OC Inc
Violation Date: 07-02-2010
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Late Report
Violation Notes: Failure to submit 2009-2010 Annual Report by July 1, 2010 due date.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 525824
Site Name: All Metals Processing of OC Inc
Violation Date: 07-14-2010
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: Unauthorized Discharge
Violation Notes: Evidence of MEK/paint splashes onto ground and adjacent structures when used solvent is transferred to the outdoor bulk container. Contact states splashes are supposed to be captured with felt paper.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 525824
Site Name: All Metals Processing of OC Inc
Violation Date: 03-21-2001
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: 99-00 AR reports high values of Zn and N. Unauthorized non-storm water discharge observed. Open buckets and drums observed without BMPs. SWPPP not on site.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 525824
Site Name: All Metals Processing of OC Inc
Violation Date: 10-27-2005
Citation: 2014-0057-DWQ - Industrial General Permit

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-21-2001
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: inspection notes too long. see attachment.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-14-2010
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Observed compressor condensate had recently overflowed from a 5-gallon container. Observed used blasting sand stored out in open; supposed to be placed in a bulk hazardous waste tote; not yet transferred. Site is under a separate wastewater discharge permit; treatment works are under a fixed cover and within a diked area. One machine outside of diked area is producing condensate but surrounding area is not well cleaned; water is now muck as the result. Observed bulk hazardous waste container on a containment pallet; pallet contains substantial amount of hazy liquid and surrounding ground and building have been splashed with paint/solvent. Hazardous waste is MEK used as solvent for paint. Contact stated area is usually covered with felt paper to catch splashes. Observed roll-off trash bin w/o cover; contact states bin is tarped when it rains.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Waste Code: D008
Waste Description: LEAD

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RISK AND TECHNOLOGY REVIEW

OSHA ESTABLISHMENT

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Violations:

Site ID: 364657
Site Name: ALL METALS PROCESSING OF ORANGE COU
Violation Date: 03-18-2019
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 05/30/2019. OBSERVATION: The business failed to update business plan within 30 days when there is a 100 percent or more increase in the quantity of a previously disclosed material and any handling of a previously undisclosed hazardous material. CORRECTIVE ACTION: Update Hazardous Materials Inventory to include the following: - All Rinse Tanks for each process line - Calcium Chloride - Chem Film - Chromex 99 - Lacquer - NI Treat 2 - Soap Cleaner - Verify that the quantities for ALL materials are accurate and up to date. Electronically submit the update to this Agency via CERS within 30 days.

Eval Notes:	Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/17/2020. OBSERVATION: Two 55-gallon drums of waste oil were observed without the required information completed on the hazardous waste labels. All hazardous waste containers must be labeled with the following information: the words "Hazardous Waste", generator information, content composition, accumulation start date, physical state, and hazardous properties. CORRECTIVE ACTION: Hazardous waste labels were provided and completed during the inspection. Violation corrected during the inspection.
Violation Division: Orange County Environmental Health

Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-30-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Ivan Santiago, Owner. Walked throughout the facility and observed hazardous waste storage areas. Containers were closed, but not properly labeled. I provided Ivan with some new labels. Labels were filled out and placed on containers. Manifests were available for review. The facility's EPA ID number is inactive. To reactivate your EPA ID number, please go to the following website, <http://www.dtsc.ca.gov/IDManifest/ReactivateEPAID.cfm>. Download the EPA Form 8700-12 (EPA ID Number Instructions and Form) and follow the instructions. Employees are reported to be trained. Emergency plan is posted in the shop's office. The dumpster was observed and there are no signs of illegal disposal. A copy of this inspection report was emailed to Ivan Santiago at santiagoivan@live.com.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-14-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site for routine inspection. Permission to enter, inspect, and take photographs granted by Ivan Santiago this date. Hazardous Waste receipts from D and R Oil made available and reviewed. HW containers properly labeled this date by the operator The used coolant and used oil drums were closed during the inspection. Emergency numbers posted. Inspected trash/dumpster and it does not appear to contain any hazardous waste. The perimeter of the facility was also inspected; no obvious signs of releases were noted. Discussed requirement for Hazardous Material Business Emergency Plan (HMBEP) to be completed by businesses that have 55 gallons of a liquid, 500 pounds of a solid , or 200 cubic feet of a gas stored at site. See www.esubmit.ocgov.com for information on completing the HMBEP

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 03/30/2017. OBSERVATION: The waste paint has been stored on site >180 days. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA by 11-12-16.

CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-18-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Permission to enter, inspect, and take photographs granted by MrYong Un Park and he provided a tour of the facility. Municipal dumpster area does not appear to contain any hazardous waste. The perimeter of the facility was also inspected; no obvious signs of releases were noted. Emergency Response Informational Sticker was available for review. Hazardous waste containers were inspected. All containers were labeled except the waste paint thinner drum that did not include the beginning date of accumulation that was labeled at my request this date Each container and portable tank holding hazardous was marked with the following information: 1. "HAZARDOUS WASTE" 2. Waste (name) 3. Hazardous property of the waste (e.g. - toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business 6. The Accumulation start date Manifests, bills of lading and [Truncated]
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 03-28-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: This is an in-office inspection report. The owner forwarded a copy of recent waste paint disposal record from 11-16-16 for 55 gallons of waste paint and a disposal record for the removal of a drum of paint filters. Violation I053 and I400 are corrected. Thank you

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-16-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct hazardous materials chemical inventory and business emergency plan inspection this date, consent to enter, inspect and take photographs was given The HMBEP has been submitted through ---- Esubmit Facility needs to make corrections to HMBP and resubmit. The facility has the following hazardous materials that exceed the required disclosure quantities: USed oil Used antifreeze Waste paint Thinner
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 07-26-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: hmbep conditionally accepted This submittal is being conditionally approved in order to facilitate transfer of data to California Electronic Reporting System (CERS) database. The facility will need to make the following revisions in CERS following notification of data transfer: Please review the maximum amount of each chemical that is onsite. Also review the average daily amount and revise it so that it reflects the amount of each chemical that is typically onsite. Reporting thresholds are 500 pounds of solid or 55 gallons of liquid or 200 cubic feet of gas. Our records indicate you may have the following -- 55 gallon drum of paint thinner -- 55 gallon drum of paint thinner waste -- 55 gallon drum of coolant Please provide estimates of the annual waste amounts for each of these, as well as their state waste codes. Emergency Plan: Please elaborate on parts a. G f. and the employee training program. The emergency plan is crucial to emergency first [Truncated]

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-09-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENT: On site for a routine hazardous waste inspection. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled, with the exception of two 55-gallon drums of drained waste oil filters. One 55-gallon drum of waste coolant and two 55-gallon drums of drained waste oil filters have been accumulated on site over the allowed accumulation time of 180 days and 365 days, respectively. Employees are reported to be trained. Manifests were available for review. Facility generates the following waste streams: - Waste Oil - Drained Used Oil Filters - Waste Paint Thinner/Acetone - Waste Paint Filters - Waste Coolant Emergency plan is available on site. No hazardous waste or universal waste observed in the dumpster/enclosure area.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to inspect and take photos at the facility was provided by Tony Park. The facility's EPA ID # is CAL000045117. We discussed the Waste determination process for the waste paint spray booth filters and the new process of draining the drained used oil filters. We also discussed the waste waterborne paint gun cleaner liquids. The waste paint spray booth filters were missing the Hazardous waste labeling information (see violation). The waste paint has been stored on site beyond the allowed time accumulation period of 180 days (see violation). Municipal dumpster area does not contain any hazardous waste. The perimeter of the facility was also inspected; no signs of releases were noted. Emergency Response Information was complete. Hazardous waste containers were covered. Reviewed manifests, bills of lading and consolidated manifests for hazardous waste streams. For further information about [Truncated]

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Violation Date: 10-01-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.

Violation Notes: OBSERVATION: The business failed to establish and electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material. CORRECTIVE ACTION: Establish and electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material within 30 days via the California Environmental Reporting System (CERS) at cers.calepa.ca.gov.

Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-22-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct hazardous materials chemical inventory and business emergency plan inspection this date, consent to enter, inspect and take photographs was given The HMBEP has been submitted through ----Esubmit The facility has the following hazardous materials that are required to be disclosed: -- Acetylene -- Oxygen -- Propane -- Argon/CO2 Outstanding violation remains outstanding. Facility needs to make corrections to your Esubmittal. Note: Please review the maximum amount of each chemical that is onsite. Also review the average daily amount and revise it so that it reflects the amount of each chemical that is typically onsite. Reporting thresholds are 500 pounds of solid or 55 gallons of liquid or 200 cubic feet of gas.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-18-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Ramon Gutierrez & Shozo Hirano. Other inspectors present were Susan Berg & Minh Le. Hazardous Waste and Tiered Permitting inspections also conducted this date. Walked throughout the facility and inspected hazardous materials storage area. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Acetylene - ER-85 Emulsifier - ER-83A Emulsifier - HM-406 - HM-604 - MPF - RC-65 - Waste Oil The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds of 55 gallons for liquids, 500 pounds for solids, & 200 cubic feet for gases. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. Hazardous Materials [Truncated]

ALL METALS PROCESSING OF ORANGE COU (Continued)

S123513258

Eval Date: 10-17-2014
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

S123518259

Violation Description: 6.95, Section(s) 25508(a)(1)
Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. The following hazardous materials must be updated and or added to the inventory: 1. Perchloroethylene: Update maximum daily amount to 55 gallons, update average daily amount to 25 gallons. 2. Acetone: Update maximum daily amount to 55 gallons, update average daily amount to 25 gallons. 3. Add Urethane Polymer Part A & Part B in place of Urethane Epoxy. The maximum daily amount for each material is 250 gallons, the average daily amount is 125 gallons. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information via the California Environmental Reporting System (CERS) at cers.calepa.ca.gov for all reportable hazardous materials on site at or above reportable quantities per note listed above.

Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 416119
Site Name: H & D MOLDING COMPANY INC
Violation Date: 12-12-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: OBSERVATION: The business failed to complete and electronically submit a site map with all required content including: north orientation, loading area, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shut offs, evacuation staging area, hazardous materials/waste storage areas and emergency response equipment. The current site map file upload to the California Environmental Reporting System (CERS) is corrupted. Please upload the file as a PDF file. CORRECTIVE ACTION: Complete and electronically submit a site map with all required content within 30 days.

Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 411884
Site Name: NEWCOMB SPRING OF CALIFORNIA
Violation Date: 01-28-2019
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22,
Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 02/07/2019. OBSERVATION: Manifests were not available for review at the time of inspection. CORRECTIVE ACTION: Provide copies of all hazardous waste manifests from the last 3 years to this Agency within 30 days.

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 02/07/2019. OBSERVATION: A 500 gallon tank of Waste Oil was observed full without an accumulation start date. Mr. Edmondson stated that the tank had been full on site for at least 2-3 years with no recent pick ups. CORRECTIVE ACTION: Properly dispose of the Waste Oil through a registered hauler and provide documentation to this Agency within 30 days. A follow up inspection will be conducted after this time.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 02/07/2019. OBSERVATION: A 500 gallon tank of Waste Oil was observed outside at the back of the facility, near full, and open while not in use. A cap was not available to close the tank while on site. CORRECTIVE ACTION: Obtain a cap for the 500 gallon tank and keep closed while not in use. A follow up inspection will be conducted in 30 days.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-08-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site for a routine inspection. Permission to enter, inspect, and take photographs granted by Gary Edmondson this date. Reviewed the hazardous waste manifests for waste oil and grinding dust at site. OCFA BEP includes information for the emergency coordinator. The waste grinding dust is in a 55 gallon drum hooked up to the bag house and it is properly labeled. The container for the storage of waste oil was not labeled as hazardous waste. A label was provided this date and the container was labeled at my request Inspected trash/dumpster and it does not appear to contain any hazardous waste. The perimeter of the facility was also inspected; no obvious signs of releases were noted.

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: A 55 gallon metal drum of Waste Solder Dross was observed with the lid open and 3/4 full, inside of a trailer near the back of the facility. CORRECTIVE ACTION: The drum was closed during the inspection and no further action is required.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 03/29/2019. OBSERVATION: One 55 gallon drum of Waste Solder Dross was observed 3/4 full inside of a trailer near the back of the facility without a legible accumulation start date. According to the most recent manifest, the last pick up date was 7/18/2015. CORRECTIVE ACTION: Properly dispose of the hazardous waste through a registered hauler and provide documentation to this Agency within 30 days. A follow up inspection will be conducted after this time.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-24-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Mark Sutphin on-site for a routine inspection. Permission to enter, inspect, and take photographs granted by Delbert Haught this date. Hazardous Waste receipts made available and reviewed. Facility generates waste coolant, solder dross, and radiator tank sludge, and small amounts of waste oil. HW containers properly labeled this date by the operator. A label and accumulation start dates added to the used coolant drum by the operator. The facility no longer recycles antifreeze at site and the waste antifreeze is hauled by Toxgard. The facility has two (2) 275-gallon totes for waste antifreeze and these drums were properly labeled as hazardous waste with the beginning date of accumulation. Discussed the de-watering (filter press) process this date. The wash water from the cleaning of the radiators is collected in a vertical cone clarifier. The sludge is hauled as hazardous waste by amberwick. An OCFA Business Emergency Plan that lists information for the [Truncated]

Eval Notes: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: A & S CEMENT CONTRACTOR INC
Violation Date: 02-04-2020
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 02/04/2020. OBSERVATION: Three 55-gallon drums of waste oil were stored on site in the front storage yard were observed without a hazardous waste label. All hazardous waste containers and tanks are required to be labeled with the following information: The words "Hazardous Waste", generator information, accumulation start date, content composition, physical state, and hazardous properties. CORRECTIVE ACTION: Hazardous waste labels were provided during the inspection and were placed on the hazardous waste drums. Violation corrected this date.

Eval Notes:	Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Eval Date: 07-03-2020

Violations Found: No

Eval Type: Other, not routine, done by local agency

Eval Notes: INSPECTOR COMMENT: Uniform hazardous waste manifest for waste oil was received on 3/5/2020 via email. The following violation has been corrected: I479 - All consolidated manifest requirements are met; Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years. HSC 6.5 25160.2 Please retain all hazardous waste manifests for three years and have them available for review during inspections. Facility does not have any other outstanding hazardous waste violation at this time.

Eval Type: Other, not routine, done by local agency

Eval Notes: Called facility to speak with Mike Duffey, listed as the contact on the last inspection report dated 10/16/14. Mike no longer works with the A & S Cement. Spoke with Marina regarding hazardous materials disclosure and employee training outstanding violations. Marina stated she no one was available at the time and that she would forward my message to the manager and owner.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-28-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Marina Rodriguez, Office Manager. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: -Water emulsion curring compound, 55 gallon drum -Rotella HD T1 SAE 30, 55 gallon drum Business emergency plan has not yet been submitted. A violation was issued for the HMBEP. Annual employee safety training records were not available. A violation was issued for the records. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

violations I208 and I239 were cited for continuance of not submitting the HMBP and not having employee training records available for review. As of this date there is no HMBEP submitted to CERS, all violations remain outstanding. Go to <https://cersbusiness2.calepa.ca.gov/Account/SignIn?ReturnUrl=%2f> and create an account. Once you are able to access your account after verifying by email, click "add new facility", enter your facility details, and once done click "start" to being working on your HMBEP. The HMBEP is composed of three different sections: 1) Facility Information, 2) Hazardous Materials Inventory, 3) Emergency Response and Training Plans. Complete each section and submit within 30 days. Here is some additional information to help. For Section 1)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site Name: BD LOOPS INC
Violation Date: 12-26-2018
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Failure to meet NEC criteria
Violation Notes: Regional Board staff conducted a No Exposure Certification (NEC) inspection of the above facility on December 26, 2018. Multiple pallets containing various metal and wood items were noted on the east side of the facility. A corroding metal rack was also observed in the southeast corner leaning against the neighboring property wall. This facility is currently in violation of the NEC requirements as set forth in the Industrial General Permit. The Legally Responsible Person will be notified of the violations. The facility will be given until Monday, January 7, 2019 to come into compliance. If evidence is not provided by said deadline, the Regional Board will deny NEC coverage and issue a Notice of Non-Compliance.

Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-26-2018
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a No Exposure Certification (NEC) inspection of the above facility on December 26, 2018. Multiple pallets containing various metal and wood items were noted on the east side of the facility. A corroding metal rack was also observed in the southeast corner leaning against the neighboring property wall.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002708464

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Date: 08-15-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Received email from Long Ngo, President, regarding IN1146691. Long stated he is in the process of moving his business out of the facility and has reduced the amount of hazardous materials maintained on site. On site to verify this information, met with Christian Ramirez, Painter. The facility, 10680 Fern Ave, Stanton is now occupied by two businesses. Couch & Philippi is operating a paint booth in one of several rear buildings with two hazardous materials over disclosure thresholds; propane and powder coat. An RUR will be submitted to reverse IN1446691, change PE to 5801 and rebill.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a Hazardous Waste Inspection. Met with Long Ngo who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: waste oil/coolant, used spray booth filters and paint thinner waste. Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words G HAZARDOUS WasteG 2. Waste (name) 3. Hazardous property of the waste (e.g. G toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. Hazardous Waste Emergency [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-16-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On site to verify change of ownership and conduct inspection. Consent to inspect and take any necessary photos was given by Frank Chimenti, Owner. Walked throughout the facility and observed hazardous waste storage areas. Containers were closed and properly labeled. Manifests were not available for review as ownership changed after the most recent hazardous waste pickup and the current hazardous waste has not reached its accumulation time limit. Discussed hazardous waste accumulation time requirements with Mr. Chimenti. No violation will be issued. Please be advised that as a small quantity generator, from the accumulation start date, you have 180 days to have the waste hauled off site by a registered transporter for proper disposal. Employees are reported to be trained. Emergency plan is posted in the main office. No hazardous waste was observed in the dumpster. No hazardous waste violations were observed this date. and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violations:

Site ID: 363575
Site Name: A-1 ACCURATE AUTOMOTIVE
Violation Date: 10-15-2014
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 05/15/2017.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 363575
Site Name: A-1 ACCURATE AUTOMOTIVE
Violation Date: 02-01-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 02/01/2019. OBSERVATION: One 55 gallon drum of Used Oil Filters was observed full without an accumulation start date on the labeling. CORRECTIVE ACTION: Mr. Riesing determined and filled out the accumulation start date during the inspection. No further action required.

Eval Type: Other, not routine, done by local agency
Eval Notes: Reviewed facility's CERS HMBP submission. All submittal elements accepted. Suggestions were made for the hazardous material inventory and site map. Submission accepted however please note for the following: Hazardous Materials Inventory - The maximum daily amount should reflect the maximum amount of that material that you may have on site at any one time. The average daily amount should reflect the amount of that material that may be present at any one time. For example, a 55 gallon drum of motor oil has a maximum daily amount of 55 gallons, but may have an average daily amount of 30 or 40 gallons. Site map - Please add the following information: storm drains and sewers, emergency response equipment (fire extinguishers, fire hydrants, absorbent materials), evacuation staging area.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Violation Notes: disposing of, transporting or offering for transportation any hazardous waste.
Returned to compliance on 10/30/2018. The facility must apply for an EPA ID number before having Hazardous Waste (Used Oil) hauled off site. Apply for your EPA ID Number and notify this Agency immediately once you receive your number. Comply by 9/2/2017.

Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 425073
Site Name: K&G Ready Mix, Inc.
Violation Date: 10-30-2018
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)

Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: Returned to compliance on 12/20/2018. OBSERVATION: The business plan has not been updated and submitted to this department within 30 days of a 100 percent or more increase in the quantity of a previously disclosed material. In CERS, the Accelerating Admixture (Plastocrete) is reported with a quantity of 500 gallons but there was a total of 1,600 gallons observed on site behind the office area. CORRECTIVE ACTION: Update the chemical inventory in the California Environmental Report System (CERS) within 30 days.

K&G Ready Mix, Inc. 8237 Monroe Ave Stanton, 90680 INSPECTOR COMMENTS: On site for a routine Hazardous Waste inspection. Consent to inspect and take any necessary photos was given by Bobby McDonald, Plant Manager. Confirmed the facility has 10 employees, and ownership is under K&G Ready Mix, Inc. Walked throughout the facility and observed facility's processes. The facility is a concrete mixing plant, and does auto repair on vehicles under circumstances where the vehicles cannot be driven to a mechanic. The facility does not have an EPA ID Number. Please apply for a new EPA Identification number for this location within 5 business days. The number is obtained by submitting DTSC form 1358 to the Department of Toxics Control. The form can be located at http://www.dtsc.ca.gov/HazardousWaste/upload/GISS_FORM_1358.pdf. Notify this Agency within 5 business days of the new number being

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-11-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Scott Jensen, Facility Supervisor. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - 1,000 gallon tank of Diesel - 4,000 gallon tank of Gasoline - One 55 gallon metal drum of Waste Oil - One 55 gallon plastic drum of Waste Oil The following documentation submitted to CERS on 12/11/2018 has been reviewed and ACCEPTED: - Business Activities - Business Owner/Operator Identification - Hazardous Materials Inventory - Site Map - Emergency Contingency Plan/Training Records The following outstanding violation originally cited on 7/5/2018, has been corrected: - I292: Adequate completion and electronic submission of a business plan. REMINDER: Please re-submit your 2020 HMBEP between January 1st G March 1st of 2020 [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-11-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Consent to enter and inspect given by Scott Jensen, Facility Supervisor. Walked throughout the facility. Observed hazardous waste storage areas. Mr. Jensen stated that the facility picks up abandoned waste throughout the city of Stanton and stores it on site to be hauled off as a Lab Pack or Universal Waste. He also stated that the waste stream and amount hauled varies depending on the waste that is found throughout the city. Discussed Universal Waste and Hazardous Waste accumulation times with Mr. Jensen. Manifests were available and reviewed. No hazardous waste or universal waste observed in the dumpster/enclosure area.

Eval Notes:	Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: This is a follow up inspection report to the off site inspection conducted on 7/5/2018 by inspector Justin Bechara. Violation I292 was cited and remains outstanding due to failure to complete and electronically submit a business plan when handling hazardous materials at or above the reportable threshold quantities. Electronic submission of the annual Hazardous Materials Disclosure & Business Emergency Plan (HMBEP) to CERS is a legal requirement and has not yet been submitted for this facility for 2018. Please submit the following three required sections of the HMBEP for this facility IMMEDIATELY: 1) Facility Information, 2) Hazardous Materials Inventory, 3) Emergency Response and Training Plans. Hazardous Materials documents can be submitted via the California Environmental Reporting System (CERS) located at <http://cers.calepa.ca.gov/>.

Eval Notes: On site to conduct a Hazardous Waste Inspection. Met with Scott Jensen who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: Hazardous waste storage area where the cities abandon waste and universal waste is picked up and stored. (LAB PACK) Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words G HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. G toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, [Truncated])

Eval Notes: On site to conduct hazardous materials chemical inventory and business emergency plan inspection this date, consent to enter, inspect and take photographs was given by Scott Jensen. The HMBEP has been submitted through Esubmit. The facility has the following hazardous materials that exceed the required disclosure quantities: Diesel and Unleaded gasoline Note: Please review the maximum amount of each chemical that is onsite. Also review the average daily amount and revise it so that it reflects the amount of each chemical that is typically onsite. Reporting thresholds are 500 pounds of solid or 55 gallons of liquid or 200 cubic feet of gas.
