## 1. Summary Graphs and Comparisons to Budget and Prior Year

7/31/2023

Comments comparing Actual Results to Budget and Prior Year:

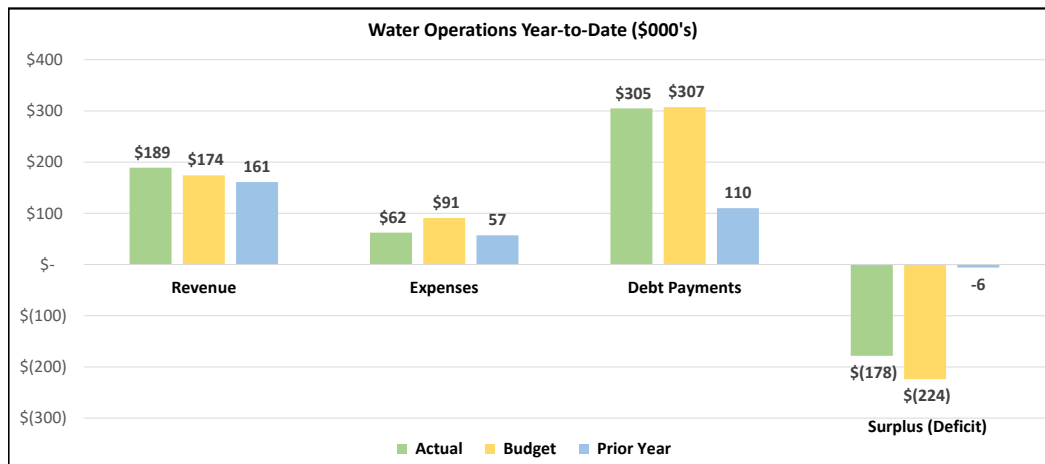

*All comments are "year to date" unless otherwise described.*

Revenue is ahead of budget and prior year due to higher than budgeted sales tax, 5th penny sales tax and interest income earned on our cash investments.

Expenses are running below budget and last year.

Taken together, the better revenue and lower expenses resulted in a \$52,000 positive surplus, compared to negative deficits expected in the budget and at this point in the year last year.

Revenue is ahead of budget and prior year, principally due to higher than expected interest income on our cash investments and larger late fees collected on late-paying/past-due water accounts. However, Water Usage Revenue (based on gallons used) was below budget and down from prior year, likely due to slightly cooler and wetter conditions this summer.

Expenses are running well below budget, but were up modestly from the prior year period.

July 2023 included a new annual loan payment of \$195,000 for the 2019 Project which was completed last summer, thus payments on the loan began this year.

Taken together, all of this resulted in a smaller than budgeted deficit, but the new loan payment this year caused the deficit to be bigger than in the prior year.
