AESTHETIC DESIGN AND SITE PLAN REVIEW BOARD
Monday, July 12, 2021

The Aesthetic Design and Site Plan Review Board meeting was called to order at 6:00 p.m. by Chairperson Rick Wiesner in the Council Chambers, City Hall, 421 Michigan Street.

Roll Call: Members Rick Wiesner, Jon Burk, Mark Struck, Dave Augustson, Kelsey Fox and Pam Jorns were present. Excused: Member Cheryl Frank. Also present were City Administrator VanLieshout, Community Development Director Olejniczak, Planner/Zoning Administrator Christopher Sullivan-Robinson and Office Accounting Assistant II Tricia Metzger.

Adoption of Agenda: Moved by Mr. Augustson, seconded by Mr. Burk to adopt the following amended agenda:

1. Roll call.
2. Adoption of agenda.
3. Approval of minutes from June 14, 2021
4. ~~Consideration of: DC Arts Center for Stuart Champeau located at 917 N. 14th Ave.~~
5. Consideration of: Addition to Capital Credit Union located at 1449 Green Bay Rd.
6. Consideration of: Addition to DC Highway Shop located at 1001 S Duluth Ave.
7. Consideration of: Patio and tiki bar for The Lodge at Leathern Smith located at 1640 Memorial Dr.
8. Consideration of: Door County Granary Project for SBHS located at 92 W Maple Street.
9. Adjourn.

All ayes. Carried.

Approval of Minutes from June 14, 2021: Moved by Mr. Burk seconded by Mr. Augustson to approve the minutes from June 14, 2021. All ayes. Carried.

Consideration of: Addition to Capital Credit Union located at 1449 Green Bay Rd. Mr. Sullivan-Robinson explained that Capital Credit Union is requesting approval of a 6 X 11 entryway addition to the front of the building located on Green Bay Rd. The addition will be constructed of glass and metal extending into the existing sidewalk so no parking will be lost. The colors will match the existing structure. The existing façade and signage will not be affected. There are no zoning issues or conflicts with the Aesthetic Design Board criteria.

Mr. Augustson confirmed that the color of the aluminum frame and commercial windows will be silver.

Mr. Wiesner questioned whether this was a heated structure and whether the existing sidewalk would be removed or if they are building on top of the sidewalk. Mr. Sullivan-Robinson confirmed would not be building on top of the sidewalk.

After discussions it was moved by Mr. Struck, seconded by Mr. Burk to grant a certificate of appropriateness as presented. All ayes. Carried.

Consideration of: Addition to DC Highway Shop located at 1001 S Duluth Ave. Mr. Sullivan-Robinson explained this the County of Door is requesting approval for a 400 sq. foot addition to the primary highway shop. The exterior is expected to match the existing structure. The addition will be metal with a 4 ft. knee wall and will include a new overhead door, service door, additional concrete replacement and protective bollards. Staff has no issues with zoning or conflicts with the Aesthetic Design Board criteria.

Wayne Spritka, representative for the County of Door, when questioned by Mr. Augustson confirmed that the lighting on the new addition will be the same down lighting as on the existing building.

After a short discussion it was moved by Mr. Struck, seconded by Ms. Jorns to grant a certificate of appropriateness as presented. All ayes. Carried.

Consideration of: Patio and tiki bar for The Lodge at Leathem Smith located at 1640 Memorial Dr.

Mr. Sullivan -Robinson stated that a patio and tiki bar addition has already been completed at The Lodge at Leathem Smith but is still subject to this Committees review and any guidelines or changes stipulated to the project would have to be met. The application submitted by Paul Meleen provided for an approximate 30x60 pad, 16x16 frame construction building with pavers as the platform.

Mr. Wiesner questioned whether this is a permanent or temporary structure. Mr. Sullivan-Robinson responded its considered temporary because it can be moved.

Mr. Burk questioned the lighting. A representative from The Lodge stated the hours of operation are for 10 am until dusk. The tiki will have hanging lights after dusk.

Mr. Struck continued to question how the building is considered temporary it looks heavy to move. Mr. Olejniczak responded that for zoning purposes the structure is being treated as permanent, it can be moved with equipment but it falls under the guidelines as permanent building. Mr. Meleen took out an electrical permit thinking of the building as moveable and that a zoning permit wasn't required. It was explained to Mr. Meleen that the project does require a building permit in addition to approval from the Aesthetic Design Committee. Mr. Olejniczak stated the tiki bar is already completed therefore it is an after the fact permit; however, it does comply with zoning. Unless the Committee requests additional specifications such as landscaping or lighting it can be approved.

Chris Kellems, 120 Alabama Street expressed her concern over the safety and fire code issues that work being completed prior to obtaining the appropriate permits. Mr. Sullivan-Robinson stated the Fire Chief and Building Inspector are aware of the project and working to resolve the issues.

Moved by Mr. Augustson, seconded by Mr. Burk to grant a certificate of appropriateness for the tiki bar, patio and landscaping as presented and that any lighting would have to be approved by the Chairperson or brought back to the Committee. All ayes. Carried.

Consideration of: Door County Granary Project for SBHS located at 92 W Maple St.

Sturgeon Bay Historical Society Executive Director Beth Renstrom and Architect James Dallman presented plans for the Door County Granary Project. Mr. Dallman stated the project includes moving the building back to its original location on new foundations, adding a modern fire suppression system, windows and doors, new siding, landscaping and public restrooms. The head house will be sided in a translucent polycarbonate. Corrugated steel and charred contemporary siding will be used for the vertical siding. He stated the standard with rehabilitation of structures is to define what is old and new.

Mr. Struck questioned if the bottom floor will go back as original. Mr. Dallman stated it would but noted that the building will be put back slightly higher than the original by approximately 2 ft.

Mr. Struck questioned the intent for the building. Ms. Renstrom stated the plan is a public cultural center offering classes, art exhibits, concerts, educational history of the area, and rental space for public use.

Mr. Wiesner questioned whether the translucent head house is going to be lighted 24/7. Mr. Dallman stated the intention is to be but not brightly lit.

Mr. Augustson wondered whether the current roof will change. Mr. Dallman stated the current roof was a quick fix to keep the water out, the roof will be changed to a standing seam zinc material.

Ms. Fox questioned the exterior lighting with the small spot lights. Mr. Dallman said the lights would just wash the building.

Mr. Sullivan-Robinson commented that the sidewalk along the north side of the building is part of the promenade and has not been installed yet due to waiting for this project to happen this may change. In addition, the proposed signage will need permits and approval from this Committee. He continued, questioning how high the light fixtures were going to be located on the building and whether other options

were considered instead of swivel mount fixtures. Mr. Dallman commented the swivel mounts will hang approximately 15 ft under the awning.

Mr. Wiesner wondered what the timeframe of the project was. Mr. Dallman stated the foundation permits are being submitted in 2-3 weeks and hoping to be under construction by September 2021.

Mr. Augustson questioned whether the parking lot was shared or the granary's. Mr. Sullivan-Robinson stated the parking lot is conceptualized at this time but its shared between the City and 3 others as is the sidewalk. However, this is located below the O.H.W.M so it must remain a public parking lot.

Moved by Mr. Struck, seconded by Mr. Burk to grant a certificate of appropriateness as presented. All ayes. Carried.

Adjourn: Moved by Ms. Fox, seconded by Mr. Burk to adjourn. All ayes. Carried. The meeting adjourned at 7:00 p.m.

Respectfully submitted,

Tricia Metzer
Office Accounting Assistant II

AESTHETIC DESIGN AND SITE PLAN REVIEW BOARD
Monday, July 26, 2021

The Aesthetic Design and Site Plan Review Board meeting was called to order at 6:05 p.m. by Chairperson Rick Wiesner in the Council Chambers, City Hall, 421 Michigan Street.

Roll Call: Members Rick Wiesner, Jon Burk, Dave Augustson, and Jon Burk were present. Cheryl Frank and Kelsey Fox were excused. Pam Jorns was absent. Also present were City Administrator Josh VanLieshout, Community Development Director Marty Olejniczak, Planner/Zoning Administrator Christopher Sullivan-Robinson, and Police Assistant Candy Jeanquart.

Adoption of Agenda: Moved by Mr. Struck, seconded by Mr. Burk to adopt the following agenda:

1. Roll call.
2. Adoption of agenda.
3. Consideration of: Building design and materials for the Sturgeon Bay Plaza project located at 100 E Maple Street; parcel #281-12-10080101A.
4. Adjourn.

All ayes. Carried.

Consideration of: Building design and materials for the Sturgeon Bay Plaza project located at 100 E Maple Street; parcel #281-12-10080101A: Mr. Peter Gentry started by introducing Mr. Doug Pahl, Architect at Aro Eberle Architects. Mr. Pahl stated the industrial design look was created to match up with the surrounding businesses and granary design plans. All three levels are accessible with by elevator with a possible deli on the first floor and housing on the second floor.

Mr. Pahl presented examples of the materials for the project. The main material is corrugated metal siding either slate gray or metallic zinc color. The trim will be black with a standing seam metal roof matching the siding. Part of the building will include vertical cedar siding requesting finished in a natural look.

Mr. Struck inquired on the concept of the retaining wall and color. Mr. Pahl explained it will be stacked with a subtle color concrete to match the structure. It was questioned if the owners or the City will be responsible for the landscaping. Landscape maintenance depending on locations will be both parties' responsibilities; however, will be determined by the development agreement between the City and WWP Development LLC. This is based on the proposed outdoor seating area and retaining wall space being on both private and public land.

Mr. Augustson questioned if the vertical cedar siding would continue to the bottom on the east elevation. He also questioned what type of coating would be applied, recommending clear. Mr. Pahl confirmed it is and was thinking a natural finish.

Mr. Burk made a motion to accept as presented. Seconded by Mr. Struck. Mr. Augustson amended the motion to accept as presented with having the vertical cedar siding clear and finished in earth tone color. Seconded by Mr. Wiesner. All in favor. The amendment carried. A vote was taken on the amended motion. All in favor. Carried.

Adjourn: Moved by Mr. Burk, seconded by Mr. Struck to adjourn. All ayes. Carried. The meeting adjourned at 6:35 p.m.

Respectfully submitted,

Candy Jeanquart
Police Assistant

AESTHETIC DESIGN AND SITE PLAN REVIEW BOARD
Monday, August 9, 2021

The Aesthetic Design and Site Plan Review Board meeting was called to order at 6:04 p.m. by Chairperson Rick Wiesner in the Council Chambers, City Hall, 421 Michigan Street.

Roll Call: Members Rick Wiesner, Jon Burk, Dave Augustson, Mark Struck, Cheryl Frank, Kelsey Fox, and Pam Jorns were present. Also present were Community Development Director Marty Olejniczak, Planner/Zoning Administrator Christopher Sullivan-Robinson, Alderperson Helen Bacon, Robert Feller, Andy Dumke (virtual), and Police Assistant Candy Jeanquart.

Adoption of Agenda: Moved by Mr. Augustson, seconded by Mr. Burk to adopt the following agenda with moving approval of minutes from July 26, 2021 to the next meeting.

1. Roll call.
2. Adoption of agenda.
3. ~~Approval of minutes from July 26, 2021~~
4. Consideration of: Final Building and Site Design for Breakwater Apartments located on the North side of the 100 block of E Maple Street.
5. Adjourn.

All ayes. Carried.

Consideration of: Final Building and Site Design for Breakwater Apartments located on the North side of the 100 block of E Maple Street: Mr. Robert Feller, Northpointe Development, started by explaining the complex consists of four stories with fifty-three units and forty-four parking stalls. Fourth floor will have an open deck with a community room. The apartment cost is at market rate housing. Estimating construction to begin late fall with completion in one year, starting to lease Spring of 2023.

In regards to the building, Mr. Feller explained it will have a contemporary maritime look. The base will consist of clay brick masonry and wood grain panels. The siding will be James Hardie lap siding in a lighter blue color, "Light Mist". Each unit will have a balcony hung with metal wrapped tension rod. Mr. Struck questioned how the siding will display in which Mr. Feller explained fourth floor will have shake siding only. At this time, Mr. Feller presented a video of how the complex will look finished.

Mr. Struck asked if the fourth-floor roof is fully enclosed, specifically in the community room area. Mr. Feller explained the area is partially open with a full roof. Mr. Burk questioned if they are working with other developers. Mr. Feller explained they are in communication at least once a month sharing ideas. Mr. Struck asked if/what type of lighting is on each balcony. Mr. Feller explained each unit has individually controlled lighting with timing. Mr. Wiesner asked who is in charge of the snow removal and Mr. Feller stated maintenance. Mr. Wiesner also addressed the water run off from the top of the building. Mr. Olejniczak explained there is a storm sewer which will take care of that.

Mr. Burk made a motion to accept as presented. Seconded by Ms. Jorns. All in favor. Carried.

Adjourn: Moved by Mr. Augustson, seconded by Mr. Burk to adjourn. All ayes. Carried. The meeting adjourned at 6:46 p.m.

Respectfully submitted,

Candy Jeanquart

Hi Rick,

Attached is an image of a 12 x 24 Accessory building to be located at the Annas Healthcare property at S 18th Ave. They received an approval for an accessory building last year (See attachment) for a 24 x 30 structure; however due to costs they have changed the design. Besides the reduced floor area the other revisions includes metal siding and roof, and there are no overhangs. The location and layout of the building will not change.

Chad and I have look over this and don't have any issues with the revisions as it still meets City requirements. There didn't appear to be any conflict with the City Design Guidelines.

Let me know your thoughts.

d-series

Specifications

EPA @ 90°:	1.4 ft ² (0.13 m ²)
Depth:	4.89" (12.4 cm)
Width:	12.90" (32.8 cm)
Height:	13.58" (34.5 cm)
Overall Height:	20.80" (52.8 cm)
Weight:	21 lbs (9.5 kg)

This is the same fixture used on the exterior of buildings 420, 422, and 433

Introduction

The D-Series floodlights feature a site-wide offering to meet specifier's every floodlighting need in application. The D-Series flood offers three sizes delivering 3,000 to 27,000 lumens. Available with seven precision optics, three mountings and three color temperatures, D-Series floodlights offer vast design capabilities while delivering significant energy savings and long life.

The DSXF3 delivers 12,000 to 27,000 lumens, meeting a large breadth of illumination requirements for design and renovation when replacing 400W HID floodlights. All configurations are made in North America allowing for quick delivery.

NOTES

- Performance packages P3 and P4 are not available with HMF, MFL, MSP, NSP.
- MVOLT driver operates on any line voltage from 120-277V.
- Requires MVOLT or 347V.
- Requires 120V, 208V, 240V, 277V or 347V.
- For units with a photocontrol receptacle, the mounting must be restricted to $\pm 45^\circ$ from horizontal aim per ANSI C136.10-2010.
- Compatible with standard twist-lock photocells for dusk to dawn operation or advanced control nodes that provide 0-10V dimming signals. Wire 4/Wire 5 wired to dimming leads on driver. Wire 6/Wire 7 capped inside luminaire. (PER and PER5 are also available.)
- Also available as separate accessories; see Accessories information at left.
- Requires luminaire to be specified with PER option.

RSX1 LED Area Luminaire

Catalog Number	RSX1 LED P3 40K R3 MVOLT SPA
Notes	+ 25' SSS POLE / FLUSH BASE
Type	R3

Hit the tab key or mouse over the page to see all interactive elements.

Specifications

EPA (ft ² @0°):	0.57 ft ² (0.05 m ²)
Length:	21.8" (55.4 cm) (SPA mount)
Width:	13.3" (33.8 cm)
Height:	3.0" (7.6 cm) Main Body 7.2" (18.4 cm) Arm
Weight: (SPA mount):	22.0 lbs (10.0 kg)

Introduction

The new RSX LED Area family delivers maximum value by providing significant energy savings, long life and outstanding photometric performance at an affordable price. The RSX1 delivers 7,000 to 17,000 lumens allowing it to replace 70W to 400W HID luminaires.

The RSX features an integral universal mounting mechanism that allows the luminaire to be mounted on most existing drill hole patterns. This "no-drill" solution provides significant labor savings. An easy-access door on the bottom of mounting arm allows for wiring without opening the electrical compartment. A mast arm adaptor, adjustable integral slipfitter and other mounting configurations are available.

NOTES

- Any Type 5 distribution, is not available with WBA.
- MVOLT driver operates on any line voltage from 120-277V (50/60 Hz).
- HVOLT driver operates on any line voltage from 347-480V (50/60 Hz).
- XVOLT driver not available with P1 or P2. XVOLT driver operates on any line voltage from 277V-480V (50/60 Hz). XVOLT not available with fusing (SF or DF) and not available with PE or PEX.
- Single fuse (SF) requires 120V, 277V or 347V. Double fuse (DF) requires 208V, 240V or 480V.
- Maximum tilt is 90° above horizontal.
- It may be ordered as an accessory.
- Requires MVOLT or 347V.
- Not available in combination with other light sensing control options (following options cannot be combined: PE, PEX, PER7, FAO, DMG, PIRHN).
- Requires 120V, 208V, 240V or 277V.
- Twistlock photocell ordered and shipped as a separate line item from Acuity Brands Controls. See accessories. Shorting Cap included. Dimming leads capped for future use.
- For units with option PER7, the mounting must be restricted to +/- 45° from horizontal aim per ANSI C136.10-2010.
- Two or more of the following options cannot be combined including DMG, PER7, FAO and PIRHN.
- Must be ordered with PIRHN.
- Requires MVOLT or HVOLT.
- Must be ordered with NLTAR2. For additional information on PIRHN visit [here](#).
- Must be ordered with fixture for factory pre-drilling.
- Requires luminaire to be specified with PER7 option. Ordered and shipped as a separate line item from Acuity Brands Controls.

 Rev. 05/04/21
 Page 1 of 9

FEATURES & SPECIFICATIONS

INTENDED USE — These specifications are for USA standards only. Square Straight Steel is a general purpose light pole for up to 39-foot mounting heights. This pole provides a robust yet cost effective option for mounting area lights and floodlights.

CONSTRUCTION — Pole Shaft: The pole shaft is of uniform dimension and wall thickness and is made of a weldable-grade, hot-rolled, commercial-quality steel tubing with a minimum yield of 55 KSI (11-gauge, .1196"), or 50 KSI (7-gauge, .1793"). Shaft is one-piece with a full-length longitudinal high-frequency electric resistance weld. Uniformly square in cross-section with flat sides, small corner radii and excellent torsional qualities. Available shaft widths are 4", 5" and 6".

Pole Top: A flush non-metallic black top cap is provided for all poles that will receive drilling patterns for side-mount luminaire arm assemblies or when ordered with PT option.

Handhole: A reinforced handhole with grounding provision is provided at 18" from the base on side A. Positioning the handhole lower may not be possible and requires engineering review; consult Tech Support-Outdoor for further information. Every handhole includes a cover and cover attachment hardware. The handhole has a nominal dimension of 2.5" x 5".

Base Cover: A durable ABS plastic two-piece full base cover, finished to match the pole, is provided with each pole assembly. Additional base cover options are available upon request.

Anchor Base/ Bolts: Anchor base is fabricated from steel that meets ASTM A36 standards and can be altered to match existing foundations; consult factory for modifications. Anchor bolts are manufactured to ASTM F1554 Standards grade 55, (55 KSI minimum yield strength and tensile strength of 75-95 KSI). Top threaded portion (nominal 12") is hot-dipped galvanized per ASTM A-153.

HARDWARE — All structural fasteners are high-strength galvanized carbon steel. All non-structural fasteners are galvanized or zinc-plated carbon steel or stainless steel.

FINISH — Extra durable standard powder-coat finishes include Dark Bronze, White, Black, Medium Bronze and Natural Aluminum colors. Classic finishes include Sandstone, Charcoal Gray, Tennis Green, Bright Red and Steel Blue colors. Architectural Colors and Special Finishes are available by quote and include, but are not limited to Hot-dipped Galvanized, Paint over Hot-dipped Galvanized, RAL Colors, Custom Colors and Extended Warranty Finishes. Factory-applied primer paint finish is available for customer field-paint applications.

BUY AMERICAN — Product with the BAA option is assembled in the USA and meets the Buy America(n) government procurement requirements under FAR, DFARS and DOT. Please refer to www.acuitybrands.com/buy-american for additional information.

WARRANTY — 1-year limited warranty. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions

NOTE: Actual performance may differ as a result of end-user environment and application. Specifications subject to change without notice.

NOTES:

- Wall thickness will be signified with a "C" (11 Gauge) or a "G" (7-Gauge) in nomenclature. "C" - 0.1196" | "G" - 0.1793".
- PT open top poles include top cap. When ordering tenon mounting and drill mounting for the same pole, follow this example: DM28/T20.
The combination includes a required extra handhole.
- Refer to the fixture spec sheet for the correct drilling template pattern and orientation compatibility.
- Insert "1" or "2" to designate fixture size; e.g. DM19AST2.
- Specify location and orientation when ordering option.
For "x": Specify the height above the base of pole in feet or feet and inches; separate feet and inches with a "-".
Example: 5ft = 5 and 20ft 3in = 20-3
For "y": Specify orientation from handhole (A,B,C,D)
Refer to the Handhole Orientation diagram below.
Example: 1/2" coupling at 5'8", orientation C = CPL12/5-8C
- Horizontal arm is 18" x 2-3/8" O.D. tenon standard, with radius curve providing 12" rise and 2-3/8" O.D. If ordering two horizontal arm at the same height, specify with HAXxy. Example: HA20BD.
- Combination of tenon-top and drill mount includes extra handhole.
- Must add original order number of existing pole(s).
- Use when mill certifications are required.
- Provides enhanced corrosion resistance.
- Additional colors available; see www.lithonia.com/archcolors or Architectural Colors brochure (Form No. 794.3). Available by formal quote only, consult factory for details.
