

Dear City of Sturgeon Bay Ad Hoc NERR Advisory Committee Representatives:

I am reaching out to you in support of Sturgeon Bay's efforts to become the site of the Bay of Green Bay National Estuarine Research Reserve (NERR). As the Superintendent of Schools in the Kewaunee School district and a former science teacher, I understand that both building community partnerships and the importance of bringing real life experiences is essential part of growing and improving our communities. This opportunity will encourage and promote problem solving and help nurture life-long learning experiences for both our communities and our students. The opportunity to build these partnerships and to bring real world research to our area would be a valuable addition to all of our communities and enhance the ongoing efforts around clean water. The Door County and Kewaunee County communities are full of examples of community partnerships that strive to make a difference. This opportunity to aid in research, encourage life-long learning and improve the clean water in our world is essential. In Kewaunee and Door County the surrounding water is important for our communities, our economies and our futures. The City of Sturgeon Bay would be a great choice as the site of the Bay of Green Bay NERR.

Please do not hesitate to contact me if you have any questions.

Mr. Scott Fritz - Superintendent  
Kewaunee School District  
915 Third Street  
Kewaunee WI 54216  
920-388-3230 Ext. 502
