# Flood Assessment Program
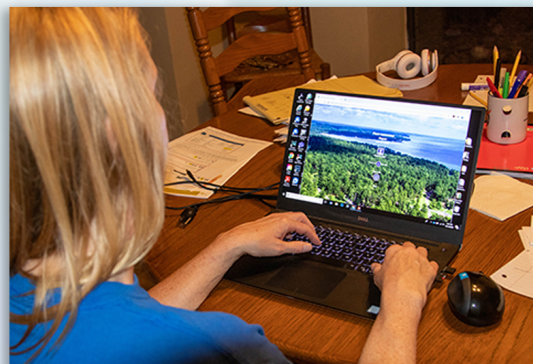

How to report flooding in your area

Simply scan the QR Code (using the carmera on your phone)

Flood Incident Reporting App

or

log on to:
https://tragis.maps.arcgis.com

Information required:

- **Phone #**
- **Name (may use anonymous)**
- **What flooded (road, field, etc.)**
- **Date will auto populate to date of report, change date to date of flooding observed if reporting after the fact**
- **Attach an image (this is crucial to the report)**

Objective:

- **Allow landowners to submit data which in turn will be used to confirm and/or refine flood categories and mitigation strategies.**
- **The information is public, anyone can view or submit a report**
- **Use for flooding that is currently happening or very recently happened (within the season)**
