

# VAN BUREN CHARTER TOWNSHIP

## VAN BUREN TOWNSHIP 2023 TREE REMOVAL ON BELLEVILLE/TYLER TOWNSHIP OWNED PROPERTY ADDENDUM #1:

The following are the responses to submitted questions to the RFP proposal:

1. I found a fair amount of pre-existing deadfall on the ground in the work zone. Should we include the removal of existing tree debris.

**A: Yes, the scope of work should include the removal of pre-existing tree debris and deadfall on the ground.**

2. The scope of work includes stump grinding. The chips generated from the grinding/ grubbing can remain onsite? I did not see verbiage asking for the removal of the chips.

**A: The wood chips generated from the stump grinding can remain on site.**

3. Is there a standard size related to stump grinding that is exempt from grinding. EX: stumps 6" or greater will be grinded is a reasonable threshold. Asking if we need to grind stumps below 6"?

**A: Yes, stumps 6" and below will be exempt from grinding.**

4. Will there be a prebid meeting?

**A: There is no scheduled pre-bid meeting and we have not marked boundaries. We have included maps in the RFP package. The Township will be asking that at 25' wide buffer of trees be maintained adjacent to Belleville and Tyler Road in the area closest to the corner.**
