

Ocean Organics™

“I could operate this business from a big city skyscraper. But why would I ever choose that over a wonderful way of life in a small family-friendly town?”

George Seaver
Ocean Organics

Established 1991

About Ocean Organics

We manufacture specialty fertilizers made with seaplants and seaplant extracts under our own name, for our distribution partners and also for private label. Our products minimize the amount of fertilizer needed to grow stronger, healthier plants. Our fertilizers, used on farms, sports turf and golf courses, are made using techniques that are sophisticated, environmentally safe and sustainable.

We love it that on the weekends we can be on our boat, Windchime, and sailing off to Monhegan Island for lunch. My business and my favorite pastime involve the ocean. Without enduring a hectic commute, I can be close to my business, enjoy sailing and participate in plenty of family activities.

A warm welcome awaits you in Waldoboro.
