

Friday, September 6, 2019 – 4:00 pm

Still breezy, but winds are starting to diminish.

Remaining issue we are watching in relation to Dorian is potential tidal flooding issues. High tide on the Pagan River is 5:38pm. South Church in Smithfield is currently closed due to high water at the bridge at Smithfield Station. A number of secondary roadways also have had water on them most of the day - but remain passable, we expect some of these roadways will also become impassable as we near high tide. It's highly likely that Rt17 at the James River Bridge will be impacted tidal flooding this afternoon. Extreme caution should be used when driving on water covered roadways – when in doubt turn around! It only takes 18” of water to make a car float.

Community Electric is currently reporting 13 customers without power. Dominion Energy is also reporting 13 customers without power.

911 call volume has remained at normal levels.
